Ex-SNCC Chief To Head Project

2/8/70 Richmond Times-Dispatch

ATLANTA, (AP) — John Lewis, former chairman of the Student Nonviolent Coordinating Committee , has been named director of the Voter Education Project for the Southern Regional Council, it was announced yesterday.

Also announced was the appointment of Emory F. Via as director of SRC's new Center for Resources Development.

Lewis, 30, replaces Vernon E. Jordan, who resigned to become executive director of the United Negro College Fund, effective March 1.

He is a native of Troy, Ala., and a graduate of the i- can Baptist Theological Seminary and Fisk University.

PRESS RELEASE

FOR RELEASE TO AM'S
SUNDAY, February 8, 1970

Southern Regional Council, Inc.
5 Forsyth Street, N. W.
Atlanta, Georgia 30303
522-8764

ATLANTA -- The Southern Regional Council today announced the appointment of directors for its voter education program and a new center dealing primarily with economic and human resources development.

John Lewis, 30, widely known in the civil rights field since his work with the Student Nonviolent Coordinating Committee in its early days, was named director of the council's Voter Education Project.

Emory F. Via, 45, who has been in charge of the council's work in labor education and with problems of discrimination in employment, was named director of the new Center for Resources Development.

The appointments were announced by Paul Anthony, executive director of the council.

Mr. Lewis will succeed Vernon E. Jordan, director of the Voter Education Project for the past four years. Mr. Jordan will move to New York to become executive director of the United Negro College Fund on March 1. The Voter Education Project has administered grants to local voter registration programs throughout the South. It engages in citizenship education

programs and provides research and educational services to elected officials in the region.

A native of Troy, Ala., Mr. Lewis is a graduate of the American Baptist Theological Seminary and of Fisk University. He was a participant in numerous early events of the civil rights movement, including the Nashville sit-ins and the first "freedom rides" of 1961, and he was a leader in the 1963 March on Washington and the 1965 march from Selma to Montgomery. He was national chairman of the Student Nonviolent Coordinating Committee from 1963 until 1966. Subsequently he was associate director of the Field Foundation. Since 1967 he has been director of the Southern Regional Council's Community Organization Project.

Mr. Lewis is married to the former Lillian Miles, who is curator of the Negro Collection of the Atlanta University Library.

Mr. Via, a native of Lynchburg, Va., is a graduate of Emory University and holds a doctor of philosophy degree in political science from the University of Chicago. He has been on the staff of labor education programs in Philadelphia, Chicago and Atlanta. He was director of Southern Regional Council's Labor Project in 1966-1967 when on leave from the University of Wisconsin. He resigned as a professor of Labor

Education from the University's School for Workers to return to head the council's Labor Project in 1968.

He and his wife, the former Margaret Johnson, have a son, David.

The new Center for Resources Development will encompass existing Southern Regional Council programs related to housing and planning, manpower and labor education, community organization, and leadership. The center supports research and information projects in regional economic and social affairs.

The Southern Regional Council, a research and information agency founded in 1944, has a staff of 38 and is governed by a council of 100 Southerners. It deals primarily with problems of race and poverty. Its funds are derived principally from foundations.

REGISTRATION

LABOR RELATIONS IN PUBLIC EMPLOYMENT

April 3-4, 1970

Name _____

Street Address _____

City _____ State _____ Zip Code _____

Affiliation _____

If you want room reservations at the Memorial Union Building, please complete the following form.

Type of Room	1 person	2 persons
Single	____$ 9.00	xx
Double (1 bed)	____$ 9.00	____$12.00
Twin (2 beds)	____$10.50	____$14.00
Twin (2 beds)	____$11.50	____$16.00

COST AND REGISTRATION

The registration fee is $35.00 per person, which covers the cost of two lunches, dinner and all coffee breaks, but does not include lodging. The fee should be sent with your registration. Room charges should not be paid in advance. Registration fee checks should be made payable to Indiana University, and mailed to the Labor Education and Research Center, 201 Owen Hall, Indiana University, Bloomington, Indiana 47401.

LODGING

We will be happy to make room reservations for you at the Indiana Memorial Union Building, or you may wish to arrange yourself for lodging at a local hotel or motel. All regular sessions of the conference will be held in the Memorial Union Building.

Labor Prog - Publicity

Conference Information

This is the first conference sponsored by the Labor Education and Research Center on the increasingly important subject of public employee bargaining. The Center has been fortunate in recruiting speakers and panelists who are nationally recognized experts in public employee relations. Their extensive experience and research should contribute substantially to a better understanding of the problems and issues in this area.

Except for the luncheon and dinner speeches, the sessions will be organized around a panel discussion of the points raised by the principal speaker. All sessions will be structured to allow questions from the conferees. Space limitations prevent listing panel members on this announcement. In each case, however, employee and employer representatives have been asked to participate.

The topics listed below are not the speakers' chosen titles, but simply an indication of the subject to be discussed.

PROGRAM

Friday, April 3, 1970.

9:30 - 11:30 a.m., Registration.
11:30 - 12:00 noon, Welcome and Orientation.
12:00 - 2:00 p.m., Opening luncheon. "A Management View of Labor-Management Relations in the Public Sector," Kenneth O. Warner, Executive Director, Public Personnel Association.
2:00 - 3:30 p.m., "Current Issues at the Federal Level," Robert Repas, Professor, School of Labor and Industrial Relations, Michigan State University.
3:30 - 4:00 p.m., Coffee Break.
4:00 - 5:30 p.m., "Current Issues at the Local Level," Morris Slavney, Chairman, Wisconsin Employment Relations Board.
6:00 - 7:00 p.m., Social Hour.
7:00 - 9:00 p.m., Dinner Session. "Poverty and Public Employment," Emery Via, Director, Southern Regional Council, Atlanta, Georgia.

Resources Development Center

Saturday, April 4, 1970.

8:30 - 10:00 a.m., "Current Issues in Public School Teacher Bargaining," Robert E. Doherty, Professor, New York State School of Industrial and Labor Relations, Cornell University.
10:00 - 10:30 a.m., Coffee Break.
10:30 - 12:00 noon, "Impasse Resolving Systems," Robert Howlett, Chairman, Michigan Employment Relations Commission.
12:00 - 2:00 p.m., Luncheon Session. "A Union View of Labor-Management Relations in the Public Sector," Jerry Wurf, President, American Federation of State, County and Municipal Employees.
2:00 - 3:30 p.m., "Current Issues at the State Level," Ronald Donovan, Professor, New York State School of Industrial and Labor Relations, Cornell University.
3:30 - 4:00 p.m., Coffee Break.
4:00 - 5:30 p.m., "The Legal Status of Public Employee Bargaining," Julius Getman, Professor, School of Law, Indiana University.

Speaker Here Says

'Surely We Have Sense To Build A Society To Reduce Complaints'

By JOHN FANCHER
H-T Civic Affairs Editor

"We ought to have sense enough to construct a society that reduces complaints. The society deserves what it gets in unrest," declared Dr. Emery F. Via Friday night at Holiday Inn where he addressed an Indiana University conference on Labor Relations in Public Employment.

Dr. Via is director of the Labor Program for the Southern Regional Council, Inc., with headquarters in Atlanta, Ga. He formerly was professor of labor education at the School for Workers, University of Wisconsin.

He asked the conferees last night:

"Who needs job security the most?"

"The man at the low end of the scale who's wiped out first in an economic recession," Dr. Via answered.

'Why should we be concerned about the poor?" he asked, citing some general reasons:

1. If you see a basic human need, that is enough to say 'let's do something about it."

2. How are things handled in the society?

3. The better off all our people are the more stable our economy will be.

4. By taking care of a segment of population considered poor, we stand a better chance of reducing social unrest.

"As a practical people we ought to think about what it will cost us not to be concerned about the poor. We haven't calculated the welfare costs, the losses in taxes, the crime costs," he said.

Dr. Via pointed out that in Atlanta "the sanitation workers are about to go into the 20th day of a strike. These are public employes who are poor."

He compared today's situation of the poor with the 1930's when many people at different levels of society were struggling financially.

"The depression was a serious challenge to ideas of economic security. We used to have a great myth that anybody who wanted to make it could. But, in 1929 we found many well-heeled people having the same problems as others.

"The banks went broke and they (the once well-heeled) couldn't find jobs either.

"People were marching in the streets and being obnoxious. This was like a revolution. Reforms were shaken out of our system. They didn't come graciously," said Dr. Via.

"As good as these reforms were, we still have much need to help the poor in society. We have good reason to change the system."

Dr. Via pointed out that for the poor, who cannot afford to put money in the bank, savings insured by the federal government mean little. Yet, this was one of the reforms growing out of the depression when many people lost life savings in bank failures.

The poor has difficulties in many ways.

Inadequate diet may produce low energy in which case the poor may appear to mope on their jobs, said Dr. Via.

With regard to mobility and seeking work where the jobs are, Via cited:

"You nver pay a poor man to go and talk about a job.

"But I don't move if I can't bargain on pay for me to move. Yet we've built that in to the system."

It's common for those in the professions to have moving expenses paid for them by their new employer.

Transportation systems in many major cities favor those who need it the least and use it the least, but they pay the brunt of the cost, Via said.

Turning to the employment situation, Via said:

"Just because a man wants to work doesn't mean there will be a job for him or a job for which he is qualified.

"If this is beyond the individual's control, then does his become a public matter?"

Joint Council No. 5, of which Local No. 218 is a part, was hosted by the Local Union at its recent meeting in Regency House on April 8, 1972.

The Council developed plans for a long range development program starting with a workshop on organization methods and procedures to be held July 8, 1972 in St. Louis, Mo.

Emory Via, noted educator and teacher will set up and conduct the workshop for the Joint Council.

The Council also voiced its full support and assistance to Local No. 56 of Gary, Indiana, in its strike against employers in that city. Every assistance will be rendered Local No. 56 by both the individual member Locals and the Joint Council in this important fight.

On this page are a series of photographs which depict some of personalities and activities of the Joint Council delegates while they were in Atlanta.

Local 218 Members get Moneys Worth, And Know It!

The members of Local No. 218 overwhelmingly voted their support of the policies and activities of its officers and staff by voting by a margin of 5 to 1 to increase Local Union dues $1.50 on April 1, 1972 and another $1.50 on January 1, 1973!

Officers of the Union had pointed out the hazards facing Local 218 members in 1973 and 1974 in protecting gains won in the 1971-72 contract, and furthering those gains in future contracts, due to a substantial loss of income by the union, resulting from economic and technological changes within the industry and a resultant loss of membership.

The dues increase will enable the union to meet the increased cost of operation for organizing and service and also establish a permanent defense fund to bolster its bargaining position in future negotiations.

Commenting upon the overwhelming vote for the dues increase, Secretary-Treasurer E. L. Abercrombie said, "We were happily surprised at the tremendous vote for the increase. We had all felt our membership would give us the means of meeting the challenges facing the union, but the size of the vote was most gratifying to all of us, as it reflected the confidence our members have in their officers and staff."

The financial officer of the union stated that the increased income to the union treasury would be used wisely and only for projects which would strengthen the union numerically and contractually.

FITZSIMMONS WINS COVETED AWARD

Jones Attends A. Phillips Randolph Institute Meeting in Houston, Texas

President Carl Jones represented Local No. 218 at the April 9, 1972 meeting of the A. Phillip Randolph Institute in Houston. President Jones conveyed the support of Local No. 218, its officers and membership to Bayard Rustin, Executive Director of the Institute and pledged continued cooperation of the Local with the Institute efforts and goals.

In a stirring address Bayard called the ballot and the Union Card the key weapons in the black's struggle in America.

Lane Kirkland of the AFL-CIO, further ennunciated the theme of economics and politics in his address to the conference. The following summary of the conference and its highlights will advise members of Local No. 218 of the importance of this vital work.

A ballot and a union card are the most effective weapon available for blacks to gain economic democracy, a dean of the civil rights movement said in Houston Saturday.

Bayard Rustin, executive director of the A. Phillip Randolph Institute, addressing the institute's national conference at the Sheraton-Lincoln Hotel said blacks' political punch should be aimed at defeating President Nixon in the November election.

"He deserves a good swift kick out of the White House" based on the President's economic program "where the rich get richer and the poor get poorer," Rustin told about 1,000 delegates.

The Randolph Institute, created in 1964, conducts voter registration and get-out-the-vote campaigns in cooperation with the NAACP and the AFL-CIO Committee on Political Education (COPE). The voter drives generally are conducted by black trade unionists.

Rustin, a close associate of the late Martin Luther King, said Nixon's policies "have to destroy us because his economics are based on scarcity and as long as there is scarcity, people will fight each other for jobs, housing and medical care.

"There is no chance of blacks and whites getting along in this country until there is economic abundance," he said.

Rustin and Republicans as well as Alabama Gov. George Wallace are creating a false issue - busing - in the presidential campaign.

"The white community in the Florida primary was mighty confused to react to busing (nothing more than a form of transportation)," he said. "The focus should have been on the soaring price of food."

Lane Kirkland, No. 2 man in the AFL-CIO, continued the attack on Nixon and Wallace at a banquet Saturday night and added Treasury Secretary John Connally to the list.

"Economics is what politics is all about," said Kirkland, arguing that the Republicans have consistently supported big business at the expense of the working man.

Citing a long list of unemployment figures that have risen during the Nixon administration, Kirkland compared the plight of the working man today to that of the poor in Robin Hood's England. "The poor have been fleeced to feed the rich," and that's the stage we're at today, he said.

At the same time, the 100 largest corporations are heading toward the highest profits in history, he said.

He called Connally a new "sheriff of Nottingham," the "enforcer of King Richard's court" in economic matters.

Kirkland scoffed at Connally's jaw-boning to lower food prices.

"Never before in history have so few Philistines been felled by the jaw bone of an ass," he said.

He also added Wallace to his list of politicans who have added to the economic plight of workers and the poor.

"The George Wallaces of this country were the real authors" of all the economic problems of

Teamster President Honored at New York Dinner

The annual Franklin D. Roosevelt Four Freedoms award for 1972 has been given by Frank E. Fitzsimmons, President of the International Brotherhood of Teamsters, with which the Laundry, Dry Cleaners & Dye House Workers International Union and Local No. 218 are affiliated.

Representing Local No. 218 at the award dinner was E. L. Abercrombie, Secretary-Treasurer of Local No. 218 and Vice President of the International Union.

The dinner was held April 12th, 1972 in the Grand Ball Room of the New York Hilton Hotel, New York City.

Principal speakers at the affair were Franklin D. Roosevelt, Jr., son of the late President, Vernon E. Jordan, Executive Director of the National Urban League; Hon. James Hodgson, Secretary of Labor; Joseph Trerotola, Labor Chairman. Presentation of the award was made by Theodore W. Kheel to President Fitzsimmons.

THE FOUR FREEDOMS

The Four Freedoms were enunciated for the first time by the late President Franklin D. Roosevelt in an address to Congress, January 6, 1941 when he stated:

> "In the future days, which we seek to make secure, we look forward to a world founded by four essential human freedoms."
>
> "The first is freedom of speech and expression — everywhere in the world."
>
> "The second freedom of every person to worship God in his own way — everywhere in the world."
>
> "The third is freedom from want — which, translated into world terms, means economic understanding which will secure to every nation a healthy peaceful life for its inhabitants — everywhere in the world."
>
> "The fourth is freedom from fear — which, translated into world terms, means a world-wide reduction of armaments to such a point and in such a thorough fashion that no nation will be in a position to commit an act of aggression against any neighbor — everywhere in the world."

The Four Freedoms Foundation, Inc., a non-political, tax-exempt membership corporation, was organized in 1951 under the laws of the State of New York to implement the principles of the Four Freedoms throughout the world. The activities of the Foundation include advancing its principles and ideals, distribution of literature through the schools, essay contests, public relations in a campaign to disseminate the principles of the Four Freedoms, and other similar projects.

An award is given annually by the Foundation in recognition of distinguished service in the cause of Freedom.

Previous recipients of the Award are: Hon. Alben W. Barkley, Mrs. Eleanor Roosevelt, Dr. Ralph Bunche, Gen. George C. Marshall, Hon. Harry S. Truman, Hon. Herbert H. Lehman, Hon. W. Averell Harriman, Hon. Carlos P. Romulo, Hon. Henry Cabot Lodge, George W. Meany, Hon. Hubert H. Humphrey, Hon. John F. Kennedy, Hon. Adlai E. Stevenson, Hon. Arthur J. Goldberg, Theodore W. Kheel, Whitney M. Young, and Hon. Edmund S. Muskie.

Rowan Speaks the Conscience of the Nation

By
W. T. Archer, Jr.
Director of Organization

Noted black columnist Carl Rowan, who notably speaks the conscience of the nation, has directed another of his gleaming bits of reporting in exposing the "get rich" schemes of those who profit at the expense of the poor. In a column titled, "Poor Are Valuable" Rowan points out how the medical profession has profited by exploitation of the poor, and how other exploiters use Government aid to the poor to fatten their pocketbooks.

Below we reprint the content of this timely and important article.

The sweetest get-rich-quick schemes in the country these days seem to lie in "services" to the poor and the sick.

We hear a lot about money paid to chislers on welfare, but this is a pittance compared with the billions being gobbled up by affluent Americans who prey upon programs designed to provide housing, medical care and other services to the needy.

Doctors, hospitals and drug stores have found a gold mine in Medicaid, the joint Federal-city program to provide medical services for welfare recipients and the poor.

Residents of this city were amazed to learn recently that one physician received $120,060 in Medicaid payments last year while also collecting $108,000 from Blue Cross-Blue Shield for other patients.

A psychiatrist collected $106,835 from Medicaid, an amount justifiable only if he worked 13 hours a day, 365 days a year serving the poor. This was a physical impossibility since the doctor had another 20-hour a week job.

The D. C. Medical Society is investigating such payments.

Hospitals here got $13,671,170 from Medicaid during the last eight months. The head of the Medicaid program says they would have received $2 million from the same services in 1969, adding that "the hospitals love Medicaid."

The drug stores must, too, since one chain here filled $1,122,102 worth of prescriptions for poor people in 1971, making a tidy profit of about $435,000 off Medicaid.

The picture is similar all over the country. A grand jury report in New York City said "almost a billion dollars was wasted" in Medicaid there.

Nursing and "personal care" homes for elderly welfare patients also reap a sweet bonanza. This city alone made $300,000 in illegal overpayments to such homes last year for services the patients never got.

Exploitation of the poor to grab millions of federal dollars is also widespread in the housing field.

After hearing testimony for 11 months, a New York grand jury recently indicted Dun & Bradstreet, nine other corporations, and 40 individuals in an alleged multi-million-dollar housing fraud scheme. Loss to the government in this scandal has been estimated at $200 million, with millions more lost by bilked poor people.

Similar alleged frauds and schemes have been charged in

(Continued on Page 7)

Buchwald Prays And Says it All

Some things are worth repeating, and a thing worth repeating to our membership is a recent humorous prayer, written by nationally famous humourist Art Buchwald in a Washington release. With apologies to Mr. Buchwald for use of his material we repeat this prayer for our members:

...Have Mercy on Us

OUR HEAVENLY FATHER,

We beseech You in our hour of need to look down kindly on Your humble taxpaying servants to have given all we possess to the almighty Internal Revenue Service. Grant us that we have completed our Form 1040 correctly so no power will find fault with it.

We pray to God that we have added lines 12, 13C, 14 and 15 accurately, and that we have subtracted line 17 from line 16 so our adjusted gross income is computed to their divine satisfaction.

We ask you, O Lord, to protect our exemptions and bless our deductions as outlined in schedule A (Form 1040) (see Chapter 10 and 11).

Have mercy on those of us who failed to wisely estimate our payments during the year, and must now borrow from Peter to pay Paul. Blessed are those who spend more than they earned and contributed so much to the economy.

GIVE US the strength, Lord, to find losses to wipe out our net gains (see Form 4797) so that we may dwell in a lower tax bracket forever and ever (as outlined in Publication 17, the refised 1972 edition).

Pray help us find loopholes and tax shelters so we are not deemed sinners, but are looked upon as honorable businessmen who are just taking full advantage of the law.

We ask You, Almighty, to protect us from auditing by government servants who don't know the difference between a business lunch and a family picnic. Give them the wisdom to realize that none of our entertainment was for pleasure, but only to entice our acquaintances to buy our exalted products.

And if You can see Your way to doing it, provide us with legitimate reasons for taking our wives when we go on trips to Florida and California. What good is it for a man to own the world and then discover his wife is not tax deductible?

Those of Your humble servants on straight salary beg thee to withhold more than we owe, so at the end of the fiscal year we will be granted a much deserved refund. And, Dear God, make sure that which is

CENTRAL UNIFORM - FANNIE CHINN - 252-54-6372

Getting One's Moneys Worth

by E. L Abercrombie

In the last edition of the Southern Laundry Worker I wrote about the protection and gains made by our membership through the past years. I called attention to the crisis that lay ahead and the endangerment of all that we had accomplished if we became complacent and self satisfied.

Happily, as I had believed, our membership rose to the threat of these new challenges to our future security and well being by providing the capital for a new offensive against management, and a defense fund as a bulwark to protect that which we have already won.

Armed as we will be in the next few years, it is unlikely that any employer or group of employers will be able to take us on or tear us down. With the means our membership has provided the officers of the union, we should be able to launch new organizing drives, thereby bringing into the union members to replace those lost through economic and technological cutbacks in the industry.

DEFENSE, OUR GREATEST NEED

Our membership has already learned what influence a powerful defense fund can have upon management. Had we not been armed with the temporary strike fund given us last year, we would not have been capable of winning the outstanding contracts we now enjoy.

Many employers breathed a sigh of relief when the union returned the strike fund dollars to the membership. They thought the union would take it for granted such a fund was never again going to be necessary, and would go to the bargaining table in 1973, unprepared and considerably weakened.

It must have been a stunning shock and a rude awakening for those same employers to learn the membership of Local No. 218, by a margin of five to one, voted to give it's officers, not only the money to establish a strong permanent defense fund, but also the funds to get out in the field and organize the industry.

The membership of this union has always risen to any challenge. That is why we are strong, why we are respected and why we are accepted by all segments of society as a force for good in our communities.

IMPLEMENTING MEMBER ACTION

Now, we, as officers of your union, having been given the tools to do the job, must get our program on the drawing board, and carefully use the means you have provided us to do a good and effective job.

The planning is already getting under way, as every department of the union is submitting its suggestions and ideas to the Executive Board, and as these ideas and programs are evaluated, those which are worthy will rapidly be put into effect.

New targets of organization are being studied. As these also are evaluated, we shall center our activity upon those where the most effective job can be done with the minimal outlay of union money.

We must exercise every caution to see that these funds which you have provided are spent where each dollar will give our membership its greatest return. Therefore, we will scrutinize every proposed project carefully to see that our membership gets its moneys worth.

MEMBER ACTION SUSTAINS FAITH

The vote of our membership on the dues proposition, once again sustained the abiding faith we at headquarters and in the field, had in our membership. You have never let us down on any project. nor in any emergency. For this we are eternally grateful. For it is this confidence which you show in us as elected leaders which make it possible for us to give you a full measure of your moneys worth in adequate and effective representation.

As your elected officers and employees, we are ever mindful of our responsibility to you, the members of our union. You may be assured in the years ahead we shall be just as concerned and careful in fulfilling that obligation as we have in the past.

I want to personally thank each and every member of the union for the spirit of confidence and militancy demonstrated in the dues project, and to applaud your judgement and foresight in reaching your individual decision.

For we are one, your officers and you, in this right to protect that which we have already won, and to moving forward toward new goals and accomplishment in the years ahead.

Carolina Uniform Rental

Funeral services were held Sunday, February 20, 1972 at 1:00 for Mr. William Henry Dunn of 129 North Sycamore Street, Charlotte, N.C. He was a loyal and faithful member of Gethsmore Baptist Church, Member of the Deacon Board for over thirty years, Sunday School teacher, Scout Master, Chorister of the Senior Choir since 1936, Post Commander of Charlotte Camp No. 1 American Woodsmen, and was also a member of Silver Mount Masonic Lodge No. 261 Lancaster County, S.C. He is the father of Mrs. Mae Frances Pickett of Carolina Uniform Rental.

Miss Barbara Ann Leak, daughter of Mr. James Thomas Leak and the Mrs. Willie Mae Leak, was born in Charlotte, North Carolina on October 30, 1948. She departed this life on Friday, February 4, 1972.

She was a devoted daughter and sister, and was loved by all her friends.

She is survived by her father, Mr. James Thomas Leak, two children, Jeffrey and Latonya Leak, three sisters, Mrs. Sarah Ford, Miss Vivian Leak, and Miss Shirley Leak, all of Charlotte, three brothers, Mr. Willie Leak, Mr. Jerry Leak, and Mr. Karl Leak, all of Charlotte. One brother-in-law, Mr. Clyde Ford, grandparents, Mr. and Mrs. Willie Boyd, other relatives and a host of friends.

Dallas Uniform Rental

Our prayers go out to Johnnie Lacy who has been in the hospital, and has undergone surgery. We hope she will be up very soon and back to work, we all miss her.

Mrs. Dorothy Crockett's husband has been ill for some time. We do hope he will be up soon. We are all praying for him to have a safe recovery real soon.

Montgomery Linen Service

NEWAY UNIFORM - G. M. CABRERA - 266-19-6961

We are very happy to welcome Miss Mildred Richardson back to work after being off due to illness. We are also pleased with the return of Mrs. Mary Porterfield who took time off for the birth of little Audrey Felix born Jan. 24, 1972. Mrs. Porterfield also celebrated her birthday on January 28th of this year. Others receiving belated birthday greetings are: Mrs. Mary Alice Stephens (Jan. 10th) Mrs. Ellene Nix (Jan. 17th) Mrs. Alice L. Sankey (Jan. 24th) and last but not least little Patrick Lynn, son of Mrs. Ruth Graves who was 3 years old on Feb. 14th, Happy birthday to all of you, and to those who did not give me their birthdays.

Our prayers and deepest sympathy goes out to Mrs. Pauline Gray and Family in the loss of her grandmother on March 1, 1972.

Macon Linen Service

Congratulations to two of our members who are the proud parents of a little girl born January 31, 1972. They are Mr. & Mrs. George Waters!!!

Pictured is Miss Evelyn Gresson, one of our soil Linen girls, and also Miss Gresson is the secretary of Local 218 at Macon Linen Service.

Here is Mrs. Mildred T. Simmons who works as a shaker and feeder, one of our good workers we're proud of.

This is Mrs. Ida Mae Parker, one of our good table girls who also operates the hot hopper and the tying machine on the table.

Gulf Uniform Rental

Miss Carolyn Ann Wesley, daughter of Mrs. Rose Wesley, an employee of Gulf Uniform Rental of Atlanta, Georgia, was married to Mr. David Walker February 6, 1972 at Salem Baptist Church at 2283 Baker Road, N.W. The reception was held at Paschals Motor Hotel's Matador Room. Miss Wesley is a 1971 graduate of Price High School, and is now attending Atlanta Area Tech. Mr. Walker is a 1971 graduate of Carver High School, and is employed at Atlanta Aviation Department. Good luck to the bride and groom!!!!

Indiana Linen Service

FLORIDA LINEN - CARIDAD RUZ - 265-21-7570

Here is a bit of news from the union members at Indiana Linen: Vacations were in order for December and January, they were as follows: Lula Moore, Richard Elliott, Bobbie Noe, Juanita Burton.

Donald Spurgeon, son of Dorothy Spurgeon exchanged wedding vows with Karen Sue White on Saturday, January 29, 1972, at 7:00 P..M. at the United Methodist Church. Donald was a graduate of Columbus High School in 1967 and also graduated from the Indiana State Police at Indiana University in 1969. He is assigned to the Indiana State Police Post in Indianapolis. The bride was a graduate of the Columbus High School in 1969. The couple are on honeymoon in Florida.

Here is a little item I found in a paper recently. I thought it would be nice to print in the Union paper.

WHY FIGHT UNIONS?

To the Editor:

I keep reading in the paper of incidents occuring concerning the unions trying to get into factories and-or business places. I am just interested in how far a company will go to keep a good union out. If my husband, a factory worker, wasn't in the union he wouldn't be able to make a decent wage. It looks to me like that in this day and age the people would see this for themselves.

I myself, have worked several places and there was no union, and believe me, the hours were long, they hired and fired without good reasons, the pay was low, the raises were very slow in coming, the only way you could advance in better pay was to know the boss or be a "rat" on everyone.

If there had been a union in these companies, these incidents would not have been allowed.

Texas Overall Rental

Pictured are employees of Texas Overall, reading left to right: Lona Scott, 24 years of service, Adline Dorsey, 13 years, Irene Carter, Idella Alton (Shop Steward) Back Row: left to right: Veanna Wilson, 22 yrs., Naomi McDonald, Minnie Moore, Lavada Ross, 15 yrs., Leona Henry, Birdie M. Johnson, Lillian Collins and Ella Burley 19 years or service. Congratulations!

I would also like to say we at Texas Overall were glad, and yet regreted that Sister Lizzie Morris retired on the First of January, 1972. We will miss her but wish her happiness and good health.

Local No. 218 News Briefs

The next meeting of the Local No. 218 Health and Welfare Fund trustees will explore the possibility of establishing mobile health units to travel among our member plants and furnish free physicals to the members of the Local Union. After a complete feasibility study a recommendation will be made to the trustees as to the advisability of such a service.

The Local Union Executive Board has voted to Postpone the '72 annual conference meeting in Atlanta, because it is an election year and the conservation of funds will help bear the cost of the election as well as provide more needed services to the membership.

Tellers and nominating committee members will be named shortly by President Jones and the membership will be informed of such appointments.

James O. (Jim) Moore, President of the Georgia AFL-CIO, passed on Sunday, April 16th at the Atlanta Baptist Memorial Hospital. Mr. Moore was a long time acquaintance and coworker in the Labor movement with Brothers E. L. Abercrombie and W. T. Archer, Jr.

Condolences and expressions of sympathy were sent by the Local to the family of Brother Moore and the prayers of our members are asked for the rest of his soul.

Action shots of Carl Avery Jones "Mr. Smooth" in action !! Carl is No. 24

Son of local 218's President: Carl A. Jones Jr.

Dear Carl:
CONGRATULATIONS!

Our Tournament Selection Committee has chosen you as a participant in our first annual "One on One" double eliminatpon tournament.

Drawings for the pairings have been made and acopy is enclosed for your information. The tournamenh will be held on Wednesday and Thursday nights, March 15th and 16th. The starting time will be 7:00 P..M. each evening. Please be at the Lakewood High School gym promptly at 6:00 P.M. on Wednesday prepared to play ball. We will at that time go over all rules and answer all questions. Locker facilities will be provided. Please make your own arrangements in regard to your valuables.

In accordance with FHSAA reguljtions, no entry may wear any uniform to identify him as representing his school. It should be fully understood that you are participating in this tourney representing yourself, not your school, and no reference whatever will be made in our tournament as to what school you attend.

Forty-eight College and Jr. College coaches throughout Florida have been invited to this tournament, so come prepared to play your best. This may be your opportunity to pick up your college basketball scholarship.

Sincerely,
John M. Hedrick

JACKSONVILLE LINEN - NADINE SMITH - 252-42-1443

Carl Avery Jones Athlete of Month

Carl Jones is as graceful as a gazelle and as smooth as the gym floor. Jones is called "Mr.. Smooth" because of his grace in playing basketball. Carl makes everything look easy. When he glides up for one of his jumps, you can hear the nets singing even before he soots. Jones, recognized for his unusual jumping ability, plays most of the game about the rim. Carl, a forward, can turn a game around with his hot shooting. When asked what he likes the most, Carl jokingly replies, "Girls, food and money". Bing and Jones make 1972-73 Basketball at Lakewood look like a state championship.

Vikes Nudge Lakewood

Northeast's Vikings, the best of the rest (after Clearwater, Gibbs and St. Petersburg) of the Pinellas County Conference, held on to defeat Lakewood 68-67 Tuesday night in the Spartans' gym.

Craig Pippin led the Vikings (9-5 in the PCC and 12-7 overall) with 17 points and hit a three-point play midway through thz fourth quarter that put Northeast ahead 54-51, a lead it never lost. Andre Samuels, Dave Duquette and Keith Smith all had 13 for the Vikes. Lakewood (6-8 and 8-9) was led by Iarl Jones with 20.

Charlotte Woman, 22 Is Murdered In Home

Police Searching For Man

By JIM MITCHELL
Observer Staff Writer

A 22-year-old Charlotte woman was in her kitchen washing some clothes when she was fatally shot at 9:45 Friday night.

She is Barbara Ann Leak of 2604 Dundeen St.

No one was arrested by late Friday night, but police were searching for a man described as a close friend of the woman's

Officers said she was shot three times, including one shot in the left side near the heart. A weapon was not recovered, but officers said they thought it was a small pistol.

Two persons were in the front room of the apartment when the murder occurred, the police said.

Miss Leak was a member of Carolina Uniform Rental and Local 218 Laundry Workers Union since August, 1968.

PRIZE MONEY

Somewhere on these next seven pages of this issue of the Laundry Worker are the names, shops and social security numbers of twelve of the members of Local No. 218.

The names are hidden in the news colums, but are clearly legible if you want to find them. If your plant name, your own name and your social security number match up, notify headquarters at once and you will receive $5.00. Look closely at every issue and join the winners!

refunded by the federal government is not taken away from us by the state, and that which is refunded by the state is not taken away from us by the county, and that which is refunded to us by the county is ntt taken away by the town. Even taxpayers have to eat.

IF YOU HAVE heard us so far, O Father, you are probably wondering why we don't address our prayers to Washington instead of heaven. We have, God knows we have - but there is no one there to answer them.

Yea, though we walk through the valley of the shadow of bankruptcy (see Tax Rate Schedule X, Y, Z, or if applicable Schedule D or Schedule Gor maximum tax from Form 4726) there is no one to comfort us.

Congress have mercy on us. Treasury have mercy on us, Pentagon have mercy on us, HEW have mercy on us, HUD have mercy on us, Wilbur Mills have mercy on us.

And finally, if as you have proclaimed, the meek shall inherit the earth, all we humbly ask is that the IRS consider it a capital gain instead of ordinary income.

Amen.

HAPPY DAY LAUNDRY & CLEANERS

This is Little John Edward Potter, son of Janet Potter and John Kennedy. Born July 11, 1971. At birth his weight was 3 lbs. 1 oz. Now he is 8 months old and weights 19 lbs. 5 ozs. He is the grandson of Sister Doris Potter.

Retired after 23 years of service is Sister Alice Alexander. We wish her the best of luck.

Our deepest sympathy to Sister Elizabeth Brown with the loss of her uncle, Mr. George Perry of Nashville, Tennessee.

Also to Brother William Jones, who lost his sister Mrs. Emma Davis of St. Louis, Mo.

Sister Nannie L.. Gilbert, a member of Tabernacle Church and Choir No. 2, held their annual Installation Services March 19, 1972 at 3:30 P.M. Everyone had a wonderful time.

I am Janet Potter, a June 72 graduate of Pearl High School, Daughter of Doris Potter. Upon graduating, I plan to attend college and major in Speech Therapy.

This is Marilyn Woodruff, daughter of Mrs. Doris D. Woodruff. She is also a 72 graduate of Pearl High. After graduation, she plans to go to a business school and become an IBM Key Puncher. Miss Woodruff is the niece of Doris Potter.

Rowan Speaks

(Continued from Page 2)

Philadelphia, Chicago, Boston, St. Louis, Miami and other cities.

Here is how a typical operation is alleged to work.

A black or Puerto Rican family moves into what has been an all-white neighborhood. Blockbusters get busy frightening other white families, causing them to sell their houses at low prices and flee.

The speculator then takes the $6,000 house and sells it to a black or Puerto Rican family at an inflated price of $20,000. He takes $700 or so from the purchaser and arranges a mortgage guaranteed by the Federal Housing Administration for the balance.

This huge mortgage is secured by providing phony information about the credit and income of the purchaser. In the New York case the grand jury accused FHA employees of being bribed into going along with the fraud.

The purchaser soon finds that the mortgage payments are far more than he can meet. The mortgage is foreclosed, he he loses his down payment and FHA becomes responsible for the huge mortgage balance.

The same speculator, or a colleague, may then buy the house again at a low price, find another black or Puerto Rican victim, and pull off his phony deal again.

In a short time the houses are in disrepair, even abandoned, and the neighborhood an eyesore. A program designed to improve the lives of poor people and minority groups has been turned into a creator of anger, despair, bitter resentment at the whole "Establishment."

The terrible truth is that the medical and housing cases cited above don't begin to tell the whole story of how programs to lift the poor are turned into bonanzas for slick operators.

Health and Welfare Fund Sells Garage

Local No. 218 Health and Welfare Fund trustees okayed the sale of the Union owned parking garage in Atlanta to Cousns Properties affiliates for a sum of one million, one hundred thousand dollars.

The garage was purchased by the fund several years ago from the Rich's Employees Pension fund for $625,000, and has been operated under lease during the tenure of its possession by the Local 281 Fund.

Sale of the property at a substantial profit will bolster the Union Health and Welfare Fund and help to provide additional services to the members in future years.

The sale of the property will not be finalized until February 1973, however a substantial earnest payment has been made to the Fund to guarantee the sale.

A constant deterioration of property values in the area of the garage made it a greater rish investment than the Fund trustees felt was feasible to the organization.

Staff and Board Met in March

The Executive Board and Staff of Local No. 218 both had meetings in Atlanta on March 13, 14, 15, 17 and 18th. These meetings were to implement the work of the last conference, to prepare goals for the union advancement during the next year and to evaluate the resources and energies of the Union, to see that these were being best employed in behalf of the membership.

Long range planning by both bodies will be incorporated into future news in the Southern Laundry Worker, in order to keep the membership fully informed.

Shakeup Urged For Phase 2

The Joint Economic Committee of Congress, in its annual report on the economy out Thursday, called for sweeping changes in President Nixon's economic controls.

It advocated that controls be lifted from as much of the economy as possible so that the government can concentrate its efforts on those unions and corporations which have so much power they can control wages and prices regardless of marketplace pressures.

The committee's 12 Democrats, in the majority report, said the President's Phase 2 controls were "so late in being adopted, so complicated in their design, so weak in their administration and so modest and vague in their goals that we are compelled to be severely critical and to recommend an immediate sweeping revision."

It added that "given the very long time during which this administration has been purporting to 'fight' inflation, first by creating unemployment and finally in recent months by imposing controls, given the high costs we are paying, the amount of progress which has been achieved is pitiful."

The committee's eight Republicans, however, praised Nixon in their minority report. They said his policies have won substantial success "in setting the stage for healthy growth with price stability."

Throughout the 139-page report, the Democrats and Republicans agreed on only three paragraphs - calling for a quick start on negotiations for international monetary reform and opposing a quota on imports approach as a solution to the nation's trade deficit.

In a related development, the Price Commission Wednesday said it would suspend any price increase it had granted to firms who have made profits beyond its guidelines.

Commission Chairman C. Jackson Grayson said a sampling of quarterly reports indicated a number of firms may have violated the panel's profit ceiling rules.

MEMBERS - This decal may be obtained free for your automobile by contacting Atlanta office.

Phase 2 Probe Is Threatened

Rep. Wright Patman, D-Tex., has told President Nixon to shake up the wage-price stabilization program, or it will be investigated by the House Banking Committee.

Patman, chairman of the committee, wrote Nixon that it is receiving many complaints reflecting "a widespread belief that the program is being administered unfairly and that in several important respects the law has been completely ignored by those designated to carry out the responsibilities of the act . . . I am inclined to agree with this conclusion."

Turning to specifics, Patman wrote:

-Price regulations are so complex that "consumers cannot know what their rights are . . . it is impossible for (them) to police illegal price increases."

-Rents have been raised as much as 9 percent. "The tenants are very perplexed . . . because the landlords cite as justification . . . Phase 2 guidelines. As one member of Congress told me, "This is preposterous.' I agree."

-By providing that the working poor should be exempt from the ban on pay raises, Congress intended to set the line at family incomes of $6,900. The Cost of Living Council has set a standard of $1.90 an hour, or less than $4,000 a year. "This is far from what Congress had in mind."

-Congress contemplated that, if interest rates were not to be controlled, there should be a formal and documented finding that controls were not needed. The Cost of Living Council finding that no controls were needed "blatantly ignored" the requirements.

-The stabilization law called for public hearings by the control agencies, but only two have been held.

Patman declined an invitation to testify at a Price Commission hearing March 28, saying his appearance would be inappropriate in view of his letter to Nixon.

"Unless there is prompt assurance of action to conform stabilization policies to the intent of the law," he wrote, "this committee will not hesitate to convene hearings to see that act is used in accordance with the intent of Congress."

In a statement, he added:

"It is obvious that the stabilization effort is not working as Congress intended...

"Only the President can bring order out of the conflicting and inneffective regulations...

"Instead of strong enforcement . . . the stabilization authorities seem to be resorting to Madison Avenue techniques."

Pioneer Black Atlanta Leader, 86, Dies in Sacramento, California

Jesse O. Thomas, one of the founders of the Atlanta Urban League in 1920 and a moving force in the creation of the Atlanta School of Social Work, has died in Sacramento, California at the age of 86.

"Mr. Thomas was, without question, one of Atlanta's great leaders, and can be credited as much as any man in this century for advancing the cause of racial justice and equality in this community," said Lyndon A. Wade, Atlanta Urban League executive director.

Mr. Thomas also played a leading role in the establishment of the Atlanta University School of Social Work, according to Dean Genevieve Hill. "His charge to a social workers conference in New Orleans in 1919 helped spark the nucleus group which went on to becoming the first training program for black social workers in the U. S., " Dean Hill said.

As the first field director for the Atlanta Urban League he served until 1940 when he became the national field representative for the National Urban League. In 1941 he left the Atlanta Urban League to become Senior Promotion Specialist with the U. S. Treasury Department.

In 1947 he was appointed public relations consultant for the American Red Cross. In 1952 he was chosen by Mike deSalle for a position with the Office of Price Stabilization in Washington, D. C.

Mr. Thomas was noted for his commitment toward creating trade and vocational schools for blacks in Georgia, claiming in 1961 to the State Board of Education that vocational schools for blacks were "separate but not equal."

In December 1954 he was awarded a Christian Service citation from the Adelphi Club of Shaw Temple, AME Zion Church. The citation recognized his assistance in a fund raising drive for the Big Bethel AME Church, as well as for raising the salaries of workers at the Travelers Aid Society at the Terminal Station. He founded the '27 Club," which served as a forum for concerns and issues in the black community.

Mr. Thomas graduated from Tuskegee Institute and served as a field secretary for the school in 1911. He received a Doctor of Laws degree at Morris Brown College in Atlanta.

In 1917 he was appointed as a Supervisor of Negro Economics for the State of New York and shortly after became an Examiner in Charge for the U. S. Employment Service, Department of Labor.

Mr. Thomases' funeral was on Wednesday, Feb. 23 in Sacramento.

Mitchell New Legal Counsel

Robert L. Mitchell, prominent Atlanta attorney has been retained by Local No. 218 as its General Legal Counsel. Announcement of Mitchell's appointment was made by E. L. Abercrombie, Secretary-Treasurer of the Local Union after consultation relative to retaining his services were concluded between officers of the Union and Mr. Mitchell.

Mr. Mitchell has a wide experience in Labor law, having served as legal counsel for the past twenty years for such unions as the International Printing Pressmen, Chemical Workers International Union, International Association of Machinist and Teamsters Union.

Jones Attends

(Continued from Page 1)

poor blacks in northern ghettos, he said. He said Southerners like Wallace had shipped their responsibilities to the north by failing to meet their obligations to southern blacks.

Kirkland is secretary-treasurer of the AFL-CIO and is widely regarded as the man who will one day replace George Meany as president of that organization.

The three-day conference was called to discuss techniques and strategy on how to increase the impact of the black vote, primarily in national elections.

Rustin said blacks vote in smaller percentages than whites - a pattern black leaders should strive to change.

The institute is not endorsing a particular candidate for president but will unite behind any Democratic nominee except Wallace, he said.

HISTADRUT

Founded in Haifa in 1920 with a membership of 4,433, Histadrut today has more than a million members. They range from laborers to university professors, from steelworkers to nurses, from bakers to lawyers, from truckdrivers to airplane pilots.

They include not only Jews, but Druzes and Arabs as well. Some 50,000 Arabs now belong to Histadrut, including 5,000 living in East Jerusalem, recently incorporated into the State of Israel.

In 1970, Histadrut celebrated its Golden Jubilee. Throughout these years, it has carried on extensive medical, social welfare, cultural and educational programs. It has played a leading role in social pioneering activities which have changed a wilderness and desert into a productive society. Histadrut's goal is a model society based on the highest concepts of social justice and democracy.

OUR GUEST OF HONOR

Wilbur Hobby is one of the most effective and articulate labor representatives of our time. He is indefatiguable in his work, ignoring the days of the week and the hours of the day. He is of the people and for the people, speaking their language and attracting them to a cause which has brought them identity and dignity. During his first term as President of the North Carolina State AFL-CIO he was instrumental in doubling the membership of that statewide labor organization. In paying tribute to him, we honor a man who by his steadfast devotion to the cause of the common man best exemplifies the highest ideals of the American labor movement.

WILBUR HOBBY

With complete dedication and acknowledged distinction, Wilbur Hobby has been a member of the labor movement for 25 years. He joined the Tobacco Workers International Labor Union Local #183, in 1946 and is still a member of that organization. He served on the negotiating and grievance committee and was recording secretary of that local. He was President of the Durham Central Labor Union and Editor of the Durham Labor Journal. He was then appointed Southern Political Director of the Textile Workers of America and a year later became Area Director of the Committee on Political Education (AFL-CIO) covering five southern states.

Wilbur Hobby was elected President of the North Carolina State AFL-CIO in 1969 and two years later was re-elected to that high office.

He attended Duke University majoring in Political Science and Labor Economics and is a graduate of the United States Armed Forces Institute. He served in the United States Navy in World War II and Korea.

His extensive interests in public and civic affairs are clearly attested by the many organizations in whose programs he has participated. These include: March of Dimes; Heart Fund; Good Will Industries; Employ the Physical Handicapped; Durham Cancer Society; United Fund; YMCA; Governor's Committee on Comprehensive Health Care; the American Red Cross;the Manpower Development & Training Act Council; the North Carolina Consumer Council; the North Carolina Council on Economic Education and the North Carolina Council for Social Legislation.

This testimonial to Wilbur Hobby is in deserved recognition of his many years of service to the cause of the American labor movement and other humanitarian causes and of his deep sympathy with the pioneers and builders of the democratic State of Israel.

The proceeds of the dinner will go toward the establishment of the Wilbur Hobby Perpetual Histadrut Scholarship Fund. It will enable children of underprivileged families in Israel to attend High School or vocational school. Scholarships are awarded on the basis of need,

Christian, Moslem, and Jewish youngsters alike will share in the scholarships.

Labor - Publicity

Labor Ed. In the United States

Rogin + Rachlin

As this summary shows, the NLRB has been urging greater education in labor relations law, and has been making its staff available as a resource for this purpose. However, it has not developed its own program for such education, as has the Mediation and Conciliation Service.

Civil Rights Organizations

We have already noted that the labor education programs of both the unions and the universities are paying increasing attention to the problems of minorities in the United States. This is illustrated by the special programs on minority problems and by the inclusion of civil rights issues in the more traditional labor education.

In this section we are interested in education directed toward unionists that is conducted by organizations whose primary concern is civil rights. 23/ Two kinds of education are conducted by such groups. Some is for all union activists, to acquaint them with civil rights problems. Some is for minority group union members, to help them function more effectively in their unions and in their communities. Attention will be given first to education for all unionists, and then to the special programs for minorities.

Southern Regional Council

The Southern Regional Council is a long-established research, education, and action organization focusing attention on the problems of the south. For many years the Council's staff has been a resource for union education in the area, teaching courses or delivering lectures at schools and conferences run by national unions and state central bodies. During the period of our survey the Council expanded its work with unions by employing a labor education specialist who was on leave from the University of Wisconsin School for Workers and who had previous experience in labor education in the south.

The Labor Program, which is now concluded, increased the Southern Regional Council's involvement in existing union education, promoted some activity that would otherwise not have been conducted, drew trade unionists into broader Council conferences, developed some special materials for workers, and distributed Council literature to unionists. The general purpose of the Labor Program was to develop among unionists an understanding of the changing south, including race relations and civil rights. Sometimes this was done in direct discussion of these issues; sometimes as an appropriate part of other subjects.

The Labor Program participated in 19 educational activities involving about 1,000 unionists. Eight of these programs were sponsored by national unions, including one week-long school. Seven were programs with state central bodies (two one-week schools, four conferences, and one program at a state convention). One was the four-week southern staff school sponsored by the National Institute of Labor Education and the AFL-CIO Department of Education. The other three were more general Council conferences in which unionists participated along with others.

Among the special materials developed were some concerning the federal wage and hour law because coverage was expanded and the minimum raised during the period of the project. The more general materials dealt with minority problems, the southern economy, legal rights, and voting.

Other Programs

Three other civil rights organizations do some education work with unionists. For many years the 10-person field staff of the Jewish Labor Committee has worked with AFL-CIO state and local central bodies on civil rights issues. These activities usually include annual conferences on minority problems, sponsored by the central body with much of the staff work performed by the Jewish Labor Committee representative. Civil rights issues are also discussed at a national conference of the Jewish Labor Committee that is attended by a large number of trade unionists.

Some unionists have participated in regional conferences held by the National Association for the Advancement of Colored People. These conferences have the dual purpose of informing unionists about minority employment problems and acquainting NAACP members with union practices and structure.

The conferences run by the U.S. Equal Employment Opportunity Commission were described earlier in this chapter in the section on U.S. government agencies.

Education for Minority Unionists

Labor education primarily for unionists from minority groups is a more recent development and is quite limited. Only one organization, the Urban League, has defined this as a focus for one of its programs. The League's Labor Education and Advancement Program (LEAP) has as one of its objectives the training of non-white trade unionists in organizational skills and knowledge necessary for leadership. The major thrust of the project, however, is to open job opportunities for non-whites, so there have been only a few courses with the union objective.

One of the courses, in Philadelphia, was directed almost entirely to training minority unionists for more effective union activity. This course, sponsored by the Philadelphia Urban League and conducted by the Philadelphia school district's labor education program, drew students from a number of unions.

Other LEAP courses have been given in St. Louis and Milwaukee, but they have differed from the Philadelphia course by focusing partially on general problems of minorities and drawing some white unionists as students. The St. Louis courses were run in cooperation with individual unions, ACWA, IUE, and AFSCME. One of the three courses in Milwaukee was sponsored by the Steelworkers; in the second, the Steelworkers joined a directly affiliated AFL-CIO local; while the third was run for the Milwaukee County AFL-CIO Council. The University of Wisconsin School for Workers cooperated in two of these courses.

There is one other example of special classes to prepare minority unionists for leadership. The Trade Union Leadership Council in Detroit,

UNION ADMINISTRATION

A Local Union Education Committee

I. What Kind of Education? Both union education and education about the world in which we live. Both learning to understand the contract and the civil rights struggle. Both steward training and becoming a better informed voter.

II. Official Status for Education Committee. This Committee should be officially set up by the Union, having the approval of the membership and a close tie with the Executive Board, with the Chairman of the Education Committee either a member or a non-voting member of the Union's Executive Board.

III. Define the Job of the Education Committee. If the Executive Board has not done so, the Education Committee should thoroughly discuss, then draft such a definition of its scope, taking it to the Executive Board, then to the membership meeting for approval.

IV. Where should the Education Committee Start? Where the members' interests and needs are. Find this out by interviewing them, by a questionnaire, by informal discussions. Might ask each one what they consider the three most important is ues today are, or on hat aspects of the Union's operation they would like more information.

V. Program Planning.

1. Start Small. Only try to do one thing at first, and be sure the Committee succeeds in doing that well. Then tackle another.

2. Set Up Goals for One Year. Establish priorities, starting with the ones you are ready to do first and which are most urgent.

VI. Getting More Participation.

1. Divide up the jobs among all Education Committee members. Someone may want to specialize in one field, study and know more about workmen's compensation, for example, than others.

2. Involve new people, both new members and formerly inactive members, if possible, in different committee projects. Union members who are not yet ready to serve on a committee may be interested in helping on one project.

VII. Union Building Activities.

1. Planning for better membership meetings.

2. Working with new members.

3. Taking the union to the members -- home visiting.

4. Building local union committees.

5. Union Community Services Committee (especially union counselling).

6. Classes in parliamentary procedure, speaking at meetings, union counselling, steward training, union administration, labor history, collective bargaining.

7. One-day institute on crucial union problems.

8. Send delegates to summer institutes, week end conferences.

9. Special labor film show.

10. Put out a shop paper or frequent handbills on Union subjects.

11. Keep a membership card file showing union activities, interests, hobbies.

VIII. Fun and Recreation Ideas.

1. Special film showings -- sports, recreation, travel, conservation.

2. Picnics, outings, ball games and parties for members and their families.

3. Dances and rallies. Education Committee might have a table or display even at a party or picnic.

4. Dance classes for members, hobby shows, white elephant sales.

IX. Other Education Activities.

1. Speakers or meetings on such topics as U. S. foreign policy, the war in Viet Nam, civil rights, the state legislature, how a bill becomes a law -- in our state, or in Congress.

2. Special classes or week end institutes on human relations as applied to union work, how to lead discussions, automation, politics and the Union, the changing South, community relations.

3. Promote reading on issues in cooperation with the City Library.

WORKING WITH NEW MEMBERS

Today's new member is the future active member, steward, or local officer -- or just a card carrier, critic, and problem. Even in the all-union shop, there is a problem: workers must join the union but this fact does not guarantee understanding and participation. Sometimes special problems, such as a feeling of resentment, come from the fact that the worker must join the union.

New members must be made to feel that joining the union is important to them and to the union, that the union is interested in their welfare and that their welfare depends on their own activity in the union. Officers and older members must make it evident that they welcome the new members into the organization.

I. One Approach.

1. A welcoming letter sent to the worker's home -- such a letter could include a welcome, the fact that the union is responsible for the wages and conditions now in the shop, the information that the worker should bring his problems to the union, the name of the worker's steward, and the signature of the local president.

2. Have the steward take an interest in the new member -- introduce him to workers, find his interests, explain the grievance procedure, invite him to meetings and perhaps arrange to take him to one or two meetings. If there is no formal initiation ceremony, the steward can present the new member with his union card and a copy of the by-laws and contract with an explanation of what they are. This type of program could be spread over a period of time and it could be developed as standard procedure in the case of each new member.

II. A More Ambitious Program.

1. Follow the above suggestions with regard to the welcoming letter and supervision by the steward.

2. Give the new member a feeling of importance -- and of the importance of the fact of joining -- by a full-fledged initiation ceremony:

   -- have the steward or an older member pick up and deliver the new member to the meeting

   -- make sure the new member is made welcone, and not lost in the back row

   -- conduct a simple but meaningful swearing-in ceremony, with perhaps the presentation of the union card, contract, and by-laws

   -- perhaps have a short welcoming speech by a union officer or representative

   -- serve refreshments (this might bring out some older members too)

   -- such ceremonies could be held on a regular schedule, or as often as necessary, to avoid excessive conflict with the regular business of the local

3. Send union literature to the new member's home:

   -- leaflets and pamphlets discussing the work of the union and the labor movement (DUES and PROGRESS leaflets)

   -- include a covering letter with one or two pieces at a time, but several mailings at intervals are better than a lot of materials sent at one time

   -- this can be developed as a standard procedure with some effort to follow up to give the new member the impression that he is expected to read the material

4. Send individual invitations to meetings to the new members for the first three or four meetings.

5. Establish some form of "buddy system" according to which each new member is assigned to an older member who is responsible for his education in union affairs and in getting him to meetings.

6. Show union films at meetings where new members are initiated.

7. Run classes for new members at regular intervals or when there are enough new members to make a class worthwhile.

III. New Member Classes -- suggested outline for two-session class:

1st session: Introduction (welcome by local president, explanation of the sessions, stress value of questions and discussion, have each member introduce self);

The Union We Belong To: (the local -- who belongs, when and why organized, how it works, dues and how spent; the national union -- why have one, size, number of locals, how it works, history and accomplishments, main job ahead; how related to parent federation).

2nd session: How the Union Protects You In the Shop (steward system, grievance procedure);

Your Rights Under the Contract (wages, hours, transfers, senority, vacations, holidays, insurance, etc.);

The Union Outside the Shop (meetings, recreation and education program, political action, community service);

There's A Place For You (how the new member can fit into' the union program);

Conclusion (democratic nature of the union, need for participation).

Printed and mimeographed leaflets and summaries can be distributed as they fit in during both sessions. (DUES, PROGRESS, By-Laws, Contract, diagram of grievance procedure, etc.)

A union film could be shown and discussed at each session.

SUGGESTIONS FOR BECOMING A GOOD LEADER

1. Be well informed about your work.

2. Accept criticism cheerfully.

3. Encourage those working under or with you to give suggestions; accept as many of these suggestions as possible.

4. Delegate responsibility widely and wisely. When you give someone a job to do, take time to make very clear what the job it and why it is important to the union.

5. Practice evaluating people.

6. Be tolerant and unprejudiced.

7. Give praise generously where it is deserved for effort and/or accomplishment; avoid flattery.

8. Assume responsibility for your own mistakes; avoid alibis and excuses. Be willing to learn from your mistakes.

9. Give to the other person the intelligent, undivided attention which you want to receive from him. Become a good listener.

10. Make people feel at ease when you are talking with them.

Atlanta, Georgia 30303

TIPS ON DISCUSSION LEADING

I. Types of Discussion Groups.

This is a simple breakdown of discussion groups based on the role of the leader. There are a lot of other ways discussion groups could be classified. And the three main classifications below might well overlap each other -- indeed, it would be easy for a group to go through phases of all three in one discussion.

A. Leader Oriented -- The discussion leader provides information, directs questions, gives the appearance of being "in charge," may well be in front of the group. The leader combines the role of expert and being the mechanic that keeps the discussion going. Many teaching situations are of this sort.

B. Resource Oriented -- The discussion is built around the information, experience, or even opinion of an expert resource person. The resource person may help conduct the discussion, or the mechanics of the discussion may be left to a chairman or leader. Panel discussions are of this type. In steward training you might wish to use this form when discussing rate grievances or legal problems.

C. Group Oriented -- Naturally, in each of these types of groups we are concerned about the whole group. But in this form of discussion the leader attempts to take as little active part as possible. He doesn't pose as an expert. He attempts to get information and help in running the discussion from the group participants. The leader becomes a kind of human relations mechanic. This can be a useful device in many groups. Sometimes, the nature of the group and the problem is such that this is the best method. It is recommended that you try this approach occasionally for some of the following reasons: (1) to see how it works; (2) to break the routine; (3) to get greater participation from the group; and (4) to improve your observation of what is happening in the group -- understanding both the group and individuals.

II. Some Points Regarding Leaders.

A. The leader is very important -- even when keeping his own expertness (and authority) in check in order to get participation, thought, and the exchange of experiences; his role is the key to successful discussion.

B. Attitude of Discussion Leader

1. Towards People -- friendly, feel that they are important and so their ideas and experiences are important. Similarly, the members of your group are important enough that you want to help them through their problems and over the hurdles of mis-information.

2. Towards Learning -- really appreciate what new knowledge can mean in helping the individual grow; in building a better organization; and in solving problems. Perhaps we should underscore the importance of thinking as a part of learning. The leader should be interested in encouraging thought.

3. Towards Himself -- to understand that you don't lose by getting others to learn, that you may have to back down on being "the authority" in order to get thoughtful participation. You may have to shift from being the specialist and authority to being an educator while leading a discussion. Just remember that both roles are extremely useful.

C. How ~~Does the Leader Handle Himself~~ -- the simple rules of friendliness, courtesy and attentiveness all apply. Few things are more helpful than really learning how to listen so you truly grasp what the other person is saying, or where members of the group are actually disagreeing.

D. Some Things for the Discussion Leader to Do:

1. Prepare the place where you are meeting; make sure that you have the lighting and venilation you need and enough comfortable seats. Arrange the group informally, but so that everyone gets a chance to take part and hear and see what's going on.

2. Prepare the group for the discussion method itself; for your own changed role to discussion leader; for the topic of that session or for a whole series of sessions.

3. Prepare any resource people you use -- Tell them what kind of people are in your group, what they should talk about, that you will have discussion, to limit speech-making to about twenty minutes, what role you will play.

III. Techniques Which Help the Discussion Method Work.

A. Clearly state the problem or topic for discussion.

B. Provide some information or orientation to the problem:

1. From the leader
2. From a resource.
3. From the group
4. From materials given to the group.

C. Make use of questions -- keep in mind that you are more interested in learning and thinking than getting "pat" answers.

1. A question can be asked of the whole group -- make it clear that you want an answer.

2. You can rephrase a question and ask it again if at first you get no response.

3. Suggest a specific application of the question (or point). For example: "Would it work ..."

4. Use a directed question:

a. To a person with special experience or knowledge.
b. To someone who looks as if he is "ready" to answer.
c. And with a great deal of care, to someone who has not been taking part -- perhaps very off-hand: "What do you think of it?"

5. Use written prepared questions -- have some questions to distribute to the group -- let them read, think about it, then discuss.

D. When a question is asked you.

1. Re-direct the question to either the whole group, the person who asked it, or some other person.

2. Or sometimes, of course, answer the question.

E. Sometimes favorable comment, on someone's participation or the whole group, is helpful.

F. From time to time summarize what has been said, agreed to, areas of disagreement.

G. State the still unanswered problems -- you might ask: "Have we discussed ..."

H. Keep the discussion on the topic -- but be free enough to move to a related topic if this is the best way to make use of the group's interest.

I. Introduce new information -- or ask for it.

J. Be aware of when to move to the next point.

K. Make sure that the leader is prepared.

L. Don't let one person monopolize -- apply the "rules of the game"; be tactful, but firm.

M. Remember you can frequently take time to wait for an answer -- not all pauses are awkward. Sometimes it means a group is thinking or trying to get a problem in focus.

N. Make all "speeches" short -- perhaps limit to 10 minutes.

O. Summarize each session.

P. Prepare the group for the next discussion.

U.S. DEPARTMENT OF LABOR RECOMMENDED STANDARDS FOR A GOOD WORKMEN'S COMPENSATION LAW

Comparison with Recommended Standards 1/

MINIMUM STANDARDS

1. Compulsory Coverage
2. No Numerical Exemptions
3. Coverage of Agricultural Workers
4. Full Coverage of Occupational Disease
5. A Rehabilitation Division Within the Workmen's Compensation Agency
6. Maintenance Benefits During Rehabilitation
7. Full Medical Benefits for Accidents
8. Full Medical Benefits for Occupational Diseases
9. Supervision of Medical Care by State Agency
10. Free Selection of Qualified Physician
11. Coverage under a Broad Second or Subsequent Injury Fund
12. Flexible Period for Filing Claim
13. Waiting Period of Not More than 3 Days with Retroactive Benefits After Two Weeks or Less
14. Benefits to Widow during Widowhood
15. Benefits for Permanent Total Disability for Life or Period of Disability
16. Double Benefits to Illegally Employed Minors
17. Maximum Weekly Benefits Should Be Equal to at Least 66 2/3% of the State's Average Weekly Wage
18. Administration of the Workmen's Compensation Law by a State Agency
19. Judicial Review Limited to Questions of Law

1/ A checkmark indicates the state workmen's compensation law contains such a provision.

[1967?]

STATEMENT OF PRINCIPLES, GOALS, AND COMMITMENTS
EMERGENCY CONVOCATION: THE URBAN COALITION

We are experiencing our third summer of widespread civil disorder. In 1965, it was Harlem, and the disaster of Watts. In 1966, it was the Hough area of Cleveland, Omaha, Atlanta, Dayton, San Francisco and 24 other cities. This summer, Newark and Detroit were only the most tragic of 80 explosions of violence in the streets.

Confronted by these catastrophic events, we, as representatives of business, labor, religion, civil rights, and local government, have joined in this Convocation to create a sense of national urgency on the need for positive action for all the people of our cities.

We are united in the following convictions:

We believe the tangible effects of the urban riots in terms of death, injury, and property damage, horrifying though they are, are less to be feared than the intangible damage to men's minds.

We believe it is the government's duty to maintain law and order.

We believe that our thoughts and actions should be directed to the deep-rooted and historic problems of the cities.

We believe that we, as a nation, must clearly and positively demonstrate our belief that justice, social progress, and equality of opportunity are rights of every citizen.

We believe the American people and the Congress must reorder national priorities, with a commitment of resources equal to the magnitude of the problems we face. The crisis requires a new dimension of effort in both the public and private sectors, working together to provide jobs, housing,

education , and the other needs of our cities.

We believe the Congress must move without delay on urban programs. The country can wait no longer for measures that have too long been denied the people of the cities and the nation as a whole--additional civil rights legislation, adequately funded model cities, anti-poverty, housing, education, and job-training programs, and a host of others.

We believe the private sector of America must directly and vigorously involve itself in the crisis of the cities by a commitment to investment, job-training, and hiring, and all that is necessary to the full enjoyment of the free enterprise system--and also to its survival.

We believe the sickness of the cities, including civic disorder within them, is the responsibility of the whole of America. Therefore, it is the responsibility of every American to join in the creation of a new political, social, economic, and moral climate that will make possible the breaking of the vicious cycle of the ghetto. Efforts must be made to insure the broadest possible opportunity for all citizens and groups, including those in the ghetto, to participate fully in shaping and directing the society of which they are a part.

This Convocation calls upon the nation to end once and for all the shame of poverty amid general affluence. Government and business must accept responsibility to provide all Americans with opportunity to earn an adequate income. Private industry must greatly accelerate its efforts to

recruit, train, and hire the hard-core unemployed. When the private sector is unable to provide employment to those who are both able and willing to work, then in a free society the government must of necessity assume the responsibility and act as the employer of last resort or must assure adequate income levels for those who are unable to work.

Emergency Work Program

This Convocation calls upon the Federal Government to develop an emergency work program to provide jobs and new training opportunities for the unemployed and underemployed consistent with the following principles:

--The Federal Government must enlist the cooperation of government at all levels and of private industry to assure that meaningful, productive work is available to everyone willing and able to work.

--To create socially useful jobs, the emergency work program should concentrate on the huge backlog of employment needs in parks, streets, slums, countryside, schools, colleges, libraries, and hospitals. To this end an emergency work program should be initiated and should have as its first goal putting at least one million of the presently unemployed into productive work at the earliest possible moment.

--The program must provide meaningful jobs--not dead-end, make work projects--so that the employment experience gained adds to the capabilities and broadens the opportunities of the employees to become productive members of the permanent work force of our nation.

--Basic education, training, and counseling must be an integral part of the program to assure extended opportunities for upward job mobility and to improve employee productivity. Funds for training, education, and counseling should be made available to private industry as well as to public and private nonprofit agencies.

--Funds for employment should be made available to local and state governments, nonprofit institutions, and Federal agencies able to demonstrate their ability to use labor productively without reducing existing levels of employment or undercutting existing labor standards or wages which prevail for comparable work or services in the area but are not less than the Federal minimum wage.

--Such a program should seek to qualify new employees to become part of the regular work force and that normal performance standards are met.

--The operation of the program should be keyed to specific, localized unemployment problems and focused initially on those areas where the need is most apparent.

Private Employment Assistance and Investment

All representatives of the private sector in this Urban Coalition decisively commit themselves to assist the deprived among us to achieve full participation in the economy as self-supporting citizens. We pledge full-scale private endeavor through creative job-training and employment,

managerial assistance, and basic investment in all phases of urban development.

The alternatives to a massive and concerted drive by the private sector are clear. They include the burden of wasted human and physical potential, the deterioration of the healthy environment basic to the successful operation of any business, and the dangers of permanent alienation from our society of millions of citizens.

We propose to initiate an all-out attack on the unemployment problem through the following steps:

--In cooperation with government, to move systematically and directly into the ghettos and barrios to seek out the unemployed and underemployed and enlist them in basic and positive private training and employment programs. We will re-evaluate our current testing procedures and employment standards so as to modify or eliminate those practices and requirements that unnecessarily bar many persons from gainful employment by business or access to union membership.

--To create a closer relationship between private employers and public training and emergency employment programs to widen career opportunities for our disadvantaged citizens. To this end, we will proceed immediately to promote "Earn and Learn Centers" in depressed urban areas that might well be the joint venture of business, labor and local government.

--To develop new training and related programs to facilitate the early entry of under-qualified persons into industrial and commercial employment.

--To develop large-scale programs to motivate the young to continue their education. Working closely with educators, we will redouble our efforts to provide part-time employment, training, and other incentives for young men and women. We also pledge our active support to making quality education readily accessible to deprived as well as advantaged young people.

--To expand on-the-job training programs to enhance the career advancement prospects of all employees, with particular emphasis on those who now must work at the lowest level of job classifications because of educational and skill deficiencies.

We pledge to mobilize the managerial resources and experience of the private sector in every way possible. We will expand part-time and full-time assistance to small business development. We will strive to help residents of these areas both to raise their level of managerial know-how and to obtain private and public investment funds for development. We will work more closely with public agencies to assist in the management of public projects. We will encourage more leaders in the private sector to get directly and personally involved in urban problems so that they may gain a deeper understanding of these problems and be of greater assistance.

We pledge our best efforts to develop means by which major private investment may be attracted to the renovation of deteriorating neighborhoods in our cities. We will explore and encourage governmental incentives to expedite private investment. We will develop new methods of combining

investment and managerial assistance so that the residents may achieve a leadership position in the development of their areas.

Housing, Reconstruction, and Education

This Convocation calls upon the nation to take bold and immediate action to fulfill the national need to provide "a decent home and a suitable living environment for every American family" with guarantees of equal access to all housing, new and existing. The Urban Coalition shall, as its next order of business, address itself to the development of a broad program of urban reconstruction and advocacy of appropriate public and private action to move toward these objectives, including the goal of rehabilitation and construction of at least a million housing units for lower-income families annually.

This Convocation calls upon the nation to create educational programs that will equip all young Americans for full and productive participation in our society to the full potential of their abilities. This will require concentrated compensatory programs to equalize opportunities for achievement. Early childhood education must be made universal. Work and study programs must be greatly expanded to enlist those young people who now drop out of school. Financial barriers that now deny to youngsters from low-income families the opportunity for higher education must be eliminated. Current programs must be increased sufficiently to wipe out adult illiteracy within five years.

This Convocation calls upon local government, business, labor, religions, and civil rights groups to create counterpart local coalitions where they do not exist to support and supplement this declaration of principles.

This Convocation calls upon all Americans to apply the same determination to these programs that they have to past emergencies. We are confident that, given this commitment, our society has the ingenuity to allocate its resources and devise the techniques necessary to rebuild cities and still meet our other national obligations without impairing our financial integrity. Out of past emergencies, we have drawn strength and progress. Out of the present urban crisis we can build cities that are places, not of disorder and despair, but of hope and opportunity. The task we set for outselves will not be easy, but the needs are massive and urgent, and the hour is late. We pledge ourselves to this goal for as long as it takes to accomplish it. We ask the help of the Congress and the Nation.

###

This statement was unanimously adopted by members of the Steering Committee and their representatives at a meeting Wednesday, August 23, 1967. Mr. Roy Ash and Mr. Theodore Schlesinger were unable to attend or to be represented.

Urban coalition

the renewal of organizations

Organizations often run down. But their decay isn't inevitable—if they follow nine rules governing the life cycle

By Dr. John W. Gardner

Some years ago I became interested in the question of why organizations lose their vitality. Why do they run down? Can anything be done about it?

I discovered that if you start with a curiosity about the rise and fall of organizations, you soon develop a curiosity about the rise and fall of societies. Why do societies decay? Why do civilizations fall?

At the same time, I found my curiosity turning to the processes of growth and decay as they occur in individuals. Why do some people go to seed? Why do some men grow old before their time? All of us know men who are old at the age of 30—a friend of mine calls them young fogies. And all of us know men who remain "young in spirit" to the end of their days. How can we account for such differences?

I became so interested in these questions that I wrote a book to try to answer them, a book entitled *Self-Renewal.* I'm going to limit myself to only one of the topics covered in the book—"The Renewal of Organizations."

Organizations Possess Life Cycle

Like people and plants, organizations have a life cycle. They have a green and supple youth, a time of flourishing strength and a gnarled old age. I could show you business firms or government agencies or university departments that are at each stage of that cycle. Or you could show me. These are things everyone has observed.

Organizations differ from people and plants in that their cycle isn't even approximately predictable. An organization may go from youth to old age in two or three decades or it may last for centuries. More important, an organization may go through a period of stagnation and then revive and go into a wholly new cycle. In short, for organizations, decline is not inevitable. It is common, to be sure, but that is because the art of organizational renewal is not yet widely understood. Organizations need not stagnate. They need not go to seed. They can renew themselves continuously. That fact has, I believe, the most profound and far-reaching implications for our future.

As all of you will readily understand, this is not unrelated to the problem of creativity—a problem that is certain to engage the curiosity of every research man sooner or later. I am convinced that the conditions favoring creativity are the same as the conditions that favor organizational renewal. And this is relevant because most creative research today takes place in an organizational setting. If the organization is rigid or decaying, the research may suffer.

Spirit of Creativity Necessary

Most corporate presidents today understand that they must sponsor creative research on the technology underlying their products or services. But not many of them understand that the spirit of creativity and innovation so necessary in the research program is just as necessary in the rest of the organization. Thus you observe a corporate president buying himself a brilliant research team and installing it in the midst of an organization that has never practiced the arts of renewal. Then he wonders why the research unit fails to get cooperation from the rest of the organization, and ultimately fails to prosper.

As I discuss organizational renewal, it will be natural for you to think chiefly of the organizations of which you are a part. But you will understand me better if you also keep in mind other kinds of organizations you have had the opportunity to observe—industrial companies, government agencies, military services, universities, research laboratories, and so on. I have had an unusual opportunity to observe the processes of growth and decay in all of those settings, and I can assure you

---

Dr. Gardner, former Secretary of the Department of Health, Education, and Welfare, is now the chairman of the Urban Coalition. This article is a reprint of his address delivered at MRI's 1965 Annual Meeting when he received the Board of Trustee's Citation for distinguished public leadership.

that the principles governing organizational renewal are basically the same in all of them.

Let's proceed by listing some rules for organizational renewal.

Rules for Organizational Renewal

The first rule is that the organization must have a hard-hitting program for the recruitment and development of talent. People are the ultimate source of renewal. The shortage of able, highly trained, highly motivated men will be a permanent feature of our kind of society; and every organization that wants its share of the short supply is going to have to get out and fight for it. It must have the kind of recruitment policy that will bring in a steady flow of able and highly motivated individuals. And it cannot afford to let those men go to seed, or get sidetracked or boxed in. In other words, there must be positive, constructive programs of career development.

The second rule for the organization capable of continuous renewal is that it must be a hospitable environment for the individual. Organizations that have killed the spark of individuality in their members will have greatly diminished their capacity for change. Individuals who have been made to feel like cogs in the machine will behave like cogs in the machine. They will not produce ideas for change. On the contrary, they will resist such ideas when produced by others.

Danger of Self-Deception

The third rule is that the organization must have built-in provisions for self-criticism. It must have an atmosphere in which uncomfortable questions can be asked. I would lay it down as a fundamental rule of human organization that the individuals who hold the reins of power in any enterprise cannot trust themselves to be adequately self-critical. Speaking as one who holds the reins of power in a couple of enterprises, I'm sure that that is true of me, though I usually get a couple of hundred miles away from home before I say it. For those in power the danger of self-deception is very great; the danger of failing to see the problems or refusing to see them is ever-present. The most enlightened top executives are well aware of this. But I don't need to tell those of you who are below the loftiest level of management that even with enlightened executives a certain amount of prudence is useful. The Turks have a proverb that says, "The man who tells the truth should have one foot in the stirrup." It depends on the individual executive, of course. Some welcome criticism, others don't. As Louis Armstrong once said: "There are some people

Like people and plants, organizations have a life cycle. More important, an organization may go through a period of stagnation and then revive and go into a wholly new cycle. They can renew themselves continually.

that if they don't know, you can't tell them."

The fourth requirement for the organization that seeks continuous renewal is fluidity of internal structure. Obviously, no complex modern organization can exist without the structural arrangements of divisions, branches, departments and so forth, and I'm not one of those people who imagine that the modern world can get away from specialization. In this connection I always recall a Marx Brothers movie in which Groucho played a shyster lawyer. When a client commented on the dozens of flies buzzing around his broken-down office, Groucho said, "We have a working agreement with them. They don't practice law and we don't climb the walls."

Specialization and division of labor are at the heart of modern organization. But we all know that jurisdictional lines tend to get set in concrete. Pretty soon no solution to a problem is seriously considered if there is any danger that it will threaten those sacred jurisdictional lines. But those lines aren't sacred. They were established in some past time to achieve certain objectives. Perhaps the objectives are still valid, perhaps not. Most organizations have a structure that was designed to solve problems that no longer exist.

The fifth rule is that the organization must have an adequate system of internal communication. If I may make a rather reckless generalization, I'd say that renewal is a little like creativity in this respect —that it depends on the existence of a large number of diverse elements in a situation that permits an infinite variety of combinations and recombinations. The enormous potentialities of the human brain are in part explainable in terms of such possibilities for combination and recombination. Obviously such recombination is facilitated by easy communication, impeded by poor communication.

Prisoners of Procedures

The sixth rule is that the organization must have some means of combatting the process by which men become prisoners of their procedures. The rule book grows fatter as the ideas grow fewer. Thus almost every well-established organization is a coral reef of rules and procedures that were laid down to achieve some long-forgotten objective.

The extent to which an organization may actually frustrate the attainment of objectives is suggested by an experience a friend of mine had in Germany in the last days of World War II. He was in Aachen, which had only recently been occupied by the American forces, when he received a message instructing him to proceed to London immediately. He went directly to Army headquarters, and showed the message to a sergeant in the adjutant's office.

The sergeant said that the only plane for London within the next few days was leaving from the nearest airfield in 30 minutes. He added that the airfield was 25 minutes away.

It was discouraging news. My friend knew that he could not proceed to London without written orders, and that was a process which took from an hour to a couple of days in a well-established and smoothly-functioning headquarters. The present headquarters had been opened the day before, and was in a totally unorganized state.

My friend explained his dilemma to the sergeant and handed over his papers. The sergeant scratched his head and left the room. Four minutes later he returned and said, "Here are your orders, sir."

My friend said he had never been in such an efficient headquarters. The sergeant looked at him with a twinkle in his eye and said, "Sir, it's just lucky for you we weren't organized!"

Combatting Vested Interests

The seventh rule is that the organization capable of continuous renewal will have found some means of combatting the vested interests that grow up in every human institution. We commonly associate the term vested interests with people of wealth and power, but you and I know that in an organization vested interests occur at every level. The lowest employees have their vested interests, every foreman has his, and every department head has his. Every change threatens someone's privileges, someone's authority, someone's status. What wise managers try to do, of course, is to sell the idea that in the long run everyone's overriding vested interest is in the continuing vitality of the organization itself. If that fails, everyone loses. But it's a tough message to get across.

The eighth rule is that the organization capable of continuous renewal is interested in what it is going to become and not what it has been. It is interested in the evolving future and not in the glorious past. The need to look to the future is the reason that so many corporations today have

research and development programs. But you and I know that an organization cannot guarantee its future by ritualistic spending on research. The organization must understand the uses of research and development, and its R and D program must be be an outgrowth of a philosphy of innovation that guides the company in everything it does. The research program, which is a way of looking forward, cannot thrive if the rest of the organization has a habit of looking backward.

The ninth rule is an obvious one, but a very difficult one. An organization runs on motivation, on conviction, on morale. Men have to believe that it really makes a difference whether they do well or badly. They have to care. They have to believe that there is a chance of accomplishing something. They have to believe that their efforts as individuals will mean something for the whole organization, and will be recognized by the whole organization.

Change is always risky, usually uncomfortable, often painful. It isn't accomplished by apathetic men and women. It requires high motivation to break through the rigidities of the aging organization.

So much for the rules. Since the publication of my book on *Self-Renewal*, I have had occasion to test these rules on many organizations. And that experience has impressed me more than ever with one aspect of the problem of renewal that I would now like to describe to you.

Warning Signals are Plentiful

I have collected a great many examples of organizations that have experienced serious crises as a result of their failure to renew themselves. In the great majority of these cases, certainly nine out of ten, the trouble was not difficult to diagnose and there was ample warning of the coming catastrophe, sometimes years in advance. I know of one research organization in which the problems that led to trouble were diagnosed with great clarity by an outside consultant two years before the crisis came. In another case, involving an industrial company, a published article outlined every essential difficulty that later led to disaster.

But if warning signals are plentiful, why doesn't the ailing organization take heed? The answer is obvious: Most ailing organizations have developed a functional blindness to their own defects. They are not suffering because they can't solve their problems but because they won't see their problems. They can look straight at their faults and rationalize them as virtues or necessities.

Their blindness is traceable to any or all of three conditions: (1) Most people in the organization share the same comfortable assumptions, the same habitual ways of appraising reality, the same rationalizations and self-deceptions; (2) most people in the organization have a vested interest in keeping things the way they are; (3) criticism is discouraged (so that the few who are not blind are unwilling to speak out).

When I am discussing these matters with the head of an organization, a corporation president, let us say, or the head of a research laboratory, he is likely to say, sooner or later, "How do I know that I am not one of the blind ones? What do I do to find out? And if I am what do I do about it?" There are several ways to proceed.

One way is to bring in an outside consultant who is not subject to the conditions that create functional blindness inside the organization.

A somewhat more difficult way is to bring new blood into at least a few of the key positions in the organization. If the top level of the organization is salted with vigorous individuals who are not familiar with all the established ways of doing and thinking, they can be a source of fresh insights for the whole organization.

Speaking Out

A more direct approach, but one that is surrounded by subtle difficulties, is for the organization to encourage its internal critics. Every organization, no matter how far deteriorated, has a few stubbornly honest individuals who are not blinded by their own self-interest and have never quite accepted the rationalizations and self-deceptions shared by others in the organization. If they are encouraged to speak up they probably will.

Still another means of getting fresh insights is rotation of personnel between parts of the organization. Not only is the individual broadened by the experience, but he brings a fresh point of view to his new post. I think it is pretty well recognized that even in an organization as sophisticated and open-minded as a research team, men are likely to get so used to one another after a year or so of working together that the stimulus of intellectual conflict drops considerably. A fresh combination of individuals enlivens the atmosphere.

In the last analysis, however, everything depends on the sensitivity of the top executive to the problem of renewal. If he is conscious of the problem

(continued on page 17)

the renewal of organizations

(continued from page 7)

and understands it, the battle is already half won.

So much for the specifics of organizational renewal. Before I close I want to say just a word or two about the larger implications of these matters.

A New Kind of World

We are moving into a new kind of world. There are lots of people today who don't like what they can see of that world. They hate science and technology and bigness and organization. Without quite realizing it, they long for the world of the nineteenth century. There's an old saying that it isn't safe to be nostalgic about something until you're absolutely sure there's no chance of its coming back. In that case it's perfectly safe to be nostalgic about the world we left behind us. It's gone forever. We have no choice but to try to make the world of the future into the kind of world we want, the kind of world we think is worth living in. Our capacity to do that, our capacity to shape our future, depends on a considerable degree on our national capacity for self-renewal. And in the matter of renewal we face a great opportunity and a great danger.

First, consider the opportunity. Americans have always been exceptionally gifted at organizational innovation and invention. In fact, some observers have said that this is the true American inventiveness. I believe, thanks to that inventiveness, we now stand on the threshold of new solutions to some of the problems that have destroyed the vitality of human institutions since the beginning of time. We have already made progress in discovering how we may keep our institutions vital and creative, and we could make much more.

Decline Not Inevitable

Weighed against that is the danger created by our unprecedented affluence. I said once that our problem as a nation was how to stay awake on a full stomach. It will be incredibly easy for us to develop the somnolence and complacency that have traditionally accompanied an easy life. I doubt that there is a man who hasn't on some occasion wondered whether the American nation is losing its grip on the future. I do not intend to explore that subject with you, but I can assure you of one thing. If we go into a decline, it will not be inevitable. It will be an avoidable failure of the mind and heart and spirit of the American people.

What we do with our affluence will determine our chances for survival. Tommy Henrich once said, "Catching a fly ball is a pleasure, but knowing what to do with it after you catch it is a business." We had better know what to do with our affluence now that we have it.

And the chief thing we should turn our minds to, in my opinion, is the continuous renewal of our society. We have a better chance than any people in the history of the world to build a society that won't run down, a society that will not lose its vitality and dynamism, a society that continuously renews itself economically, politically, morally and in every other dimension. I propose that we get on with the job. ▪

Wall St. Journal Dec. 10, 1969

Urban Coalition Head Raps Nixon Leadership On Social Action Front

Gardner, Former HEW Chief, Appeals for Sense of Urgency, More Effort From President

By a WALL STREET JOURNAL *Staff Reporter*

WASHINGTON — John W. Gardner, chairman of the Urban Coalition Action Council, assailed President Nixon's leadership for the first time.

"He must do more to set a tone of urgency to which we can all respond," Mr. Gardner said in a speech to the National Press Club, "and more to exemplify in his own actions a determination to solve our pressing problems."

It was the first direct attack on the President's leadership by Mr. Gardner, a Republican who served as Secretary of Health, Education and Welfare during the Johnson Administration and has continued as a leading liberal spokesman in his current nongovernment post. Heretofore, Mr. Gardner the chairman of both the Urban Coalition and the Urban Coalition Action Council, in calling for national action, has refrained from singling out Mr. Nixon. But in his press club speech Mr. Gardner declared:

"The President must say more explicitly, and with greater urgency, what he conceives to be an appropriate strategy for dealing with the dilemmas of the cities, with equality of opportunity, with the environment and with other problems that are wracking the nation.

"Not only must we propose social programs adequate to our need, but when the legislation goes to Congress he must fight as hard for it as he fought for the ABM and Judge Haynsworth."

The Urban Coalition is a private, nonprofit corporation comprising leaders from Government, business, religious and labor groups. Formed in the wake of the 1967 urban riots, the coalition seeks better jobs, educational opportunities, housing, health and other services for residents of the inner cities. The action council is its legislative lobbying arm.

Mr. Gardner also called on Congress to end its "lethargy" by passing needed legislation and enacting "genuinely meaningful Congressional reform." Declaring that "few institutions in our national life are as gravely in need of renewal as is the Congress," he proposed that the House and Senate take steps "to abolish the seniority system and to curb the abuse of power by entrenched committee chairmen."

Mr. Gardner also proposed that other institutions—including industry, labor unions, the professions, Government agencies and private nonprofit organizations—undertake a "jolting reappraisal and overhaul" as part of an effort to "alter both our mood and our state of inactivity."

Specifically, he suggested:

—That industry "make an unqualified commitment to equality of opportunity for minority groups," "commit itself to end pollution," and take constructive measures to "meet the rising tide of consumerism."

—That labor unions "eliminate restrictive membership practices that deny the opportunity to work or to advance beyond menial work."

—That the health professions act to redesign the system of health services, which he termed "outworn, expensive and outrageously inefficient," and that educators seek ways to change "a system that isn't working."

—That Government agencies and private nonprofit organizations subject themselves to a "no-holds-barred reappraisal of what they are doing" and "honestly appraise the extent to which (each) has built an empire rather than service the public."

National Urban Coalition
Report

March 1970

The Urban Coalition and Urban America Merge

The early March merger of the Urban Coalition and Urban America Inc. into the National Urban Coalition "gives us one body better able to define and clarify the highest priority problems of urban areas," said John W. Gardner, chairman of the combined organization. "It will help us in our effort to make the nation aware of those problems and to initiate significant action on them," he added.

Urban America Inc. was formed in January, 1965, as a continuation of the American Planning and Civic Association, and in December of that year merged with the Action Council for Better Cities. Its major programs have been in the areas of information gathering and dissemination, technical assistance in housing, and urban design and planning. Last year it adopted an organizationwide focus on the subject of urban growth policy.

Urban America was one of the groups which stimulated formation of the Urban Coalition, along with the U.S. Conference of Mayors, National League of Cities, and Potomac Institute. Organized in the summer of 1967, while smoke still hung over the streets of Detroit and Newark, the Coalition represented a coming together of national leaders in business, labor, religion, local government, and civil rights both to ask and to offer a greater commitment to improving the conditions of urban life which had bred civil disorder.

The Coalition at first focused its attention on immediate remedies to these conditions (in such areas as employment, housing, and health.) More recently it has broadened its concern to encompass changes in the national attitudes, priorities, and institutions; the systems of urban government and development, by which these conditions are created and perpetuated.

The merger represents a continuation of this broadening process, Gardner said. It means that the Coalition will be more involved in problems of urban development and environment—*in addition to* its root concern with problems of urban life, not *instead of* this concern, he emphasized.

In particular, he said that the National Urban Coalition would continue Urban America's major program in the field of urban growth policy.

The need for such a policy has risen rapidly on the national consciousness, Gardner said. It has become increasingly clear that America must take a positive hand in shaping its future.

William D. Eberle, former chairman of Urban America, is one of the four co-chairmen of the combined organization. He and Whitney M. Young Jr., executive director of the National Urban League, join Andrew Heiskell, chairman of Time Inc., and A. Philip Randolph, who have been co-chairmen of the Urban Coalition. Heiskell has been chairman of the board of Urban America and Young is on the board. These four men also serve on the executive committee, which determines policy for the new organization.

Peter Libassi, executive vice president of the Urban Coalition, retains the same title under the new formation. He is responsible to Gardner for the direction and supervision of the merged staffs of the two organizations.

City magazine, the bi-monthly review of Urban America, will continue publication in expanded form under the direction of its present

Coalition Brokering

A grant of approximately $250,000 has been made to the Urban Coalition in South Bend, Indiana, by the Department of Health, Education and Welfare. The grant was made possible through the brokering efforts of the National Coalition. Similar efforts are underway to benefit other local organizations.

The grant is for the development of a complex program under the area's Youth Coalition, an organization supported by the South Bend Coalition. The purpose of the program is to provide young people with access to all the key institutions in the community—in education, drug abuse, community action, model neighborhoods, recreation, city government, the family and children's center, and the police department. Representatives responsive to youth will be stationed with each of these institutions to serve as liaisons with young people.

The program is an effort to broaden the role of youth in the growth of the community. It will enable the area's youth to advocate more effectively the participation of young people in the planning and implementation of socio-economic programs within the system.

The Youth Coalition is composed of representatives of 60 youth groups from the St. Joseph County area. Part of the grant funds will go to a center for the coalition's paid staff and professional and technical assistants. The Youth Coalition and the community agencies will be responsible for hiring all liaison personnel to work with the community. Each agency will share the salary of the liaison with the Youth Coalition.

One of the purposes of the program is to identify, assess, and alter those features of community institutions which impede favorable youth development.

The National Coalition's role in the project has been that of a broker. Staff contacts with HEW, identification of funds not yet committed, and constant contact with key individuals responsible for making the grants have made the grant to the South Bend Coalition possible. The Coalition is working with HEW officials to obtain similar grants for local programs in New Orleans and Portland.

From the Locals

■ The **Westchester County** Coalition issued the first of nine reports in areas of major coalition concern. The reports, which are being prepared by 30 businessmen and women on loan from major Westchester County corporations, form the basis upon which the coalition will set its priorities for future action. The first report, on solid waste disposal, recommended county-wide approaches to the problem, recycling, and the creation of a county Environmental Conservation Department and a citizens' Environmental Management Council.

■ The **Miami** Coalition, with the Chamber of Commerce, organized a task force of 11 organizations to study the housing crisis in the Miami area. Their recommendations urge a firm county-wide commitment to meet local housing needs by building 10,000 units of public housing in Dade County in the next two years. Land banking, state and county government commitments, zoning reevaluations, and federal fund commitments were also part of the task force's recommendations. The study was presented to the Metro Miami Commission for action.

■ A proposed new police complaint procedure was recommended by the **Wilmington** Coalition's Police-Community Relations Task Force. The task force found that under the present system, complaint procedures lacked credibility among the area's residents.

The new procedure would bring complaints not to the city government but to the state's Human Relations Commission. The recommendation calls for a close relationship between the Human Relations Commission and the city's Commissioner of Public Safety.

■ A neighborhood improvement program to combat blockbusting and white migration to the suburbs is being organized by the **Pontiac** Coalition. The four-part program begins with the goal of setting up as many block clubs as possible which will be used as the organizational focal point. The next step of the program, "Light the Night" campaign, will be initiated. All members of the block will be asked to turn on their porch lights from dusk to dawn to discourage crime. A third component is unarmed civilian patrols with two-way radios to alert police to any problems in the neighborhood.

The most significant element of the plan will be to prevent real estate solicitation through the block club solidarity. Thus, blockbusting by unscrupulous real estate agents can be eliminated.

Ximenes Named Vice President

Vincente T. Ximenes, a Commissioner of the Equal Employment Opportunity Commission, has been named Vice President for Field Operations by Chairman Sol M. Linowitz and President Jack H. Vaughn. Ximenes, a Commissioner with the EEOC since 1967, served as Chairman of the President's Cabinet Committee on Mexican-American Affairs from 1967 to 1969. From 1966 to 1967, he served as Deputy Director of U.S. AID in Panama.

Ximenes began his career as a teacher in his native Texas and went on to become an economics instructor. He is the author of a number of economics research publications.

Ximenes will join the Coalition on July 6.

Welfare Laws

The National Urban Coalition has advised the Attorneys General of the 50 states of the inherent unconstitutionality of new state laws which impose a one-year residency requirement for welfare recipients.

In response to a June 7 decision by the Supreme Court reaffirming any citizen's right to travel, President Jack Vaughn, in a letter to each Attorney General, noted the inevitability of suits should states continue to pass such legislation. Several states have passed laws to ease the increasing burden of welfare payments by imposing residency requirements. Vaughn urged the Attorneys General to rule any attempts at such legislation null and of no effect.

Said Vaughn in a statement announcing the action, "The new legislation reflects a greater concern with states' pocketbooks than with individual rights."

Land-use Session

The fourth in a series of strategy sessions on exclusionary land use was held on June 24 at the Coalition. The meeting brought together 40 public and private professionals concerned with the problem.

The all-day conference centered on a discussion of President Nixon's June 11 statement on equal housing opportunity and HUD's implementation of it.

Following a critical analysis of the implications of the President's statement, the group discussed the U.S. Civil Rights Commission's June 14-17 hearings on the question of urban growth. Herbert M. Franklin, executive associate of the Coalition's Urban Growth Division, testified at the Commission hearings. Franklin made clear the Coalition's position on exclusionary land use:

"Once the false dichotomy between economic and racial discrimination is accepted, the door is open to 'sophisticated' efforts to exclude because of race. . . There is always a racial effect, even though it may be difficult at times to prove a racial motivation."

Affiliate Programs

■ The **Nonprofit Housing Center** has been asked by the Bureau of Indian Affairs and HUD to examine housing programs which can and have been implemented by local tribal housing authorities. The study will be used to provide information to local tribal housing authorities for the development of effective housing programs for Indian reservations.

■ The **Minority Contractors Assistance Program,** a Coalition affiliate, received a $600,000 grant from the Opportunity Funding Corporation in mid-June. The grant is earmarked to assist minority contractors in obtaining bid, payment, and performance bonds through letters of credit and through long-term loan guarantees.

HMDP Ends First Year

A total of $1,314,759 has been allocated to various organizations during the first year of the Coalition's Health Manpower Development Program (HMDP). The funds have been allocated to health manpower development consortiums through four universities, community health fellowships, paraprofessional programs, and college and high school programs.

A key element of the HMDP plan is specific recruitment activities for community health centers. Three newsletters have been produced to publicize the recruitment efforts. To date, 142 individuals have been recruited: 57 physicians, 11 nurses, 27 hospital administrators, and 47 allied health and other professionals. These individuals will be placed in OEO community health centers where they are most needed.

Speaking Out

The City Club Forum of Cleveland heard an address by Coalition President Jack H. Vaughn on June 18.

Vaughn devoted his talk to the question of options for a city today—and to the coalition concept:

"You hear the phrase, 'an uneasy coalition,' and there could not really be any other kind. The job of coalition is to keep trying to bring people together, people who often have great difficulty in recognizing their common concerns. It begins with the idea that people and their immediate interests may be different but that their long-term interests are very similar. It means more than just getting people to sit across a table and nod at each other—that is not coalition—but to agree to work with each other come hell or high water. In short, it means some gut commitment and a dedication beyond the signing of a deductible contribution.

"Nobody says the job of coalition is easy. In fact it gets tougher day by day. And nobody claims that coalition is going to solve all our society's ills. It won't. But somebody has to start someplace."

VOLUME 1, No. 2

FALL ISSUE/1971

TRAINING CONFERENCE ATTENDED BY OVER 135

More than 165 LEAP staffers and guests convened in Detroit for the Third Annual Apprenticeship and Journeyman Training Conference, July 21-24.

Labor Undersecretary, Michael Moskow, the opening speaker, reviewed internal problems within the construction industry which directly affect the success of present and future outreach programs. Among the problems and issues he cited are:

- unemployment in the construction industry has reached a national level of 10%.
- spiraling wage demands by the crafts might price the trades out of the market.
- the productivity rate has risen an average of only 3% per year for the past eight years, much lower than comparable dollar industries.
- Federal construction should span regular and off-season.
- the Federal government should provide incentives to encourage more off-season construction in the private sector.
- greater linkages should be established between the schools and industry.

Harold Sims, Acting Executive Director, National Urban League, led the line of dignitaries who addressed participants. Other participants included: Adolph Holmes, Director Department of Program Operations, National Urban League, Archie Moore, Office of National Projects; Tom Hall, Bureau of Apprenticeship and Training; Bob McGlotten, Human Resources Development Institute, AFL-CIO; Bill Oliver, Anti-Discrimination Department, UAW, AFL-CIO; Attorney William Gould, visiting professor, Harvard University School of Law; John Wilkes, Director, Office of Federal Contract Compliance, U.S. Department of Labor; Ray Brown, Mideastern Regional Director, Alexander J. Allen, Eastern Regional Director, National Urban League.

Staff and guests participated in five rotating workshops on Contract Per-

LEWIS J. CARTER, Field Representative of the Southern Region, was a discussion leader for the workshop on "Contract Performance" at the Third Annual Apprenticeship and Journeyman Training Conference in Detroit.

F. RAY MARSHALL KEYNOTES LABOR SYMPOSIUM

The Labor Affairs Program held its Annual Labor Symposium at the National Urban League Conference with Paul B. Jennings, International President IUE and chairman of the Trade Union Advisory Committee of the National Urban League, presiding. This year's theme, "The Recession and the Black Worker", was keynoted by F. Ray Marshall, Director, Human Resources Development Institute, University of Texas.

Interesting points brought out in Marshall's address and subsequent addresses by reacting panelists stimulated a high level of interest that prompted a deviation from the planned format which originally called for dividing guests into workshop groups. Instead, following reacting panelists, a question and answer forum was substituted.

Marshall stated that the problems of urban and rural blacks are substantially different.

"More attention must be focused upon rural blacks particularly since they lack national representation," he said

Contrary to public opinion, he later added, greater economic strides are made by blacks when there exists a tight labor market.

Other facts cited by Marshall are:

- in urban areas, female heads of households are increasing; the reverse is true in non-metropolitan areas;
- the relative wage gap between black and white workers is closing; the actual dollar gap is growing;
- one-fourth of all urban blacks lie below the poverty line ($3,500). Of these, more than one-third are among the working poor.

LaMond Godwin, Senior Research Associate for New York's Metropolitan Applied Research Center (MARC), responding from the community's perspective, stated that the local minority community is being flagrantly short-changed because the agency that was specifically created (Equal Employment Opportunity Commission) to protect and oversee its immediate interests has limited funds. EEOC is short-staffed and its powers are too limited to be effective.

The showdown at Hilton Head

The state seeks more industry, while land developers want co-op farms and fisheries

Small farmers in South Carolina are pawns in a fight between industrial developers and spa owners who want to retain the pastoral look by expanding farming and fishing.

Weather-bleached shacks built on stilts to protect them from marshland tides line the two-lane road that runs through Beaufort County, S. C., from Charleston to Savannah, Ga. The rusting shells of abandoned cars and other flotsam of poverty litter the land between them. Beaufort has a population of 49,729, and neighboring Jasper, 11,900. More than half are blacks, and an estimated 70% are unemployed.

For more than a year, they have been caught in the middle of a battle over what sort of work they will do. The chief antagonists are South Carolina's Development Board and resort owners on Hilton Head Island, a plush spa lying just off the mainland. The development board wants to bring heavy industry into the area to create new jobs. The resort owners want to keep industry out and create new jobs in farming and fishing. At one point, the state seemed to have won.

In 1969, in a move that would have brought in about 650 jobs, South Carolina offered tax breaks and other inducements to the German BASF Corp., if it would build a $200-million petrochemical plant at Port Victoria, 8 mi. from Hilton Head. Then, with Interior Dept. help, the resort owners and shrimp fishermen who work the rich coastal waters blocked the project on the ground that pollution from the plant might well destroy existing industries and jobs. Now, resort owners Orion and Fred Hack are pushing a job plan of their own—the establishment of farming and fishing cooperatives that those now jobless would run for a share of the profits.

Land-use plan. The cooperative idea is the result of a comprehensive land-use study for Beaufort and Jasper prepared for the Hacks by the architectural firm of Skidmore, Owings & Merrill at a cost of $30,000 to $40,000. The 178-page report concludes that the proposed cooperatives could produce enough to provide the people working on them with a living wage. Orion Hack says that the state should set up the cooperatives by renting, at "a very reasonable fee," parts of tracts that are now owned by "several large landowners for hunting preserves."

The Hacks themselves own 11,000 acres on Hilton Head and say they would be willing to lease some of it. "Every day I see stuff coming in here that could have been grown here," says Orion Hack. "We should be exporting, not importing." He adds that a current harvest of 300 lb. to 400 lb. from existing fishing cooperatives could be boosted four-fold with state assistance. Of funds that South Carolina had planned to spend on enticements to BASF, Hack asks: "Why not redirect the money? Why not put these funds into cooperatives?"

The SOM report also recommends that the state strive harder to exploit the area's tourist and recreation potential. It urges the resort owners themselves to make every effort to hire residents of Beaufort and Jasper.

Cheap labor. An SOM recommendation that especially irks South Carolina officials is that industry should avoid the Hilton Head area and locate instead in Savannah, in the neighboring state of Georgia, which has been competing with South Carolina to attract industry. Asserts SOM's John Galston, who worked on the study, "The state is pushing cheap labor [to get industry], and, in reality, it is not cheap. Industry must train them, and then unions come in." Development Board Director J. Bonner Manly flings the charge back at the resort owners by accusing them, in proposing farming and fishing, of trying to maintain a cheap labor supply themselves.

"When I look at the hungry parents and the starving kids, I just don't believe they want to wait for the cooperatives," says Manly. "From a cold dollars-and-cents standpoint, these aren't the types of jobs that pay well. What we need are manufacturing jobs that pay $4 to $5 per hour." The outspoken industry hunter claims that BASF was frightened off with "distortions, untruths, and scare tactics," and adds: "I am trying to find one that will be even bigger than BASF. We are now talking to several prospects."

BASF's decision not to settle at Port Victoria left South Carolina the unwilling owner of a 1,500-acre site, which Manly vows will neither go to waste nor be tilled by farmers. Although Manly has not named the prospects he is talking with, he says that the board plans to dredge a channel to make Port Victoria a deep-water harbor. Orion Hack counters that this could wipe out the shrimp and oyster fishing for miles. "Manly is continuing to be horrible," complains Hack, adding that he hopes to establish better relations with other state officials.

Bleaker days. But the dispute continues to boil even though the area's economy faces the possibility of further deterioration. Nearly half of Beaufort's residents work at federal military installations, many at the Marine boot camp at Parris Island. The military payroll is on the downswing, and the SOM report predicts that 5,600 people will lose jobs by 1980. However, Manly who seems to have completely dismissed the cooperative idea, snaps: "You're not going to solve any poverty problems with more maids, waiters, bartenders, and groundskeepers. Seventy-five cents an hour plus tips isn't what I would call a living wage." ■

BASF Report

Marshall Frady

THE VIEW FROM HILTON HEAD

It is one of the few untainted estuarine landscapes left along the Southeastern coast . . . but for how long?

In the South, the land of Canaan consists of a horizon of smokestacks. Industrialization—the devout acquisition of factories—has been a kind of second religion there: the secular fundamentalism. Faulkner's Flem Snopes was more than a literary invention: he was a historical, cultural species in the South, and his heirs are those eager, sharp-eyed, checker-coated, rawly barbered, ruthlessly enthusiastic young men in the Jaycee chapters of all dowdy little Southern towns, with faint sniffs of wilt along their quiet main streets, which pursue with a poignant indefatigability their own factory as a sort of golden fleece, a Holy Grail, a deus-ex-machina deliverance from impending exhaustion and extinction. In this desperation, they seem willing to suffer the loss of any elegancy. When a paper mill was constructed in a little Alabama town some twenty miles from Montgomery, it tinged even the Capitol's corridors, on especially muggy mornings, with a vague reek: Wallace, who was then Governor, would note on such mornings, "Yeah, that's the smell of prosperity. She does smell sweet, don't it?" What has happened is that the Snopesian mind in the South, in the course of its sedulous exertion to transmogrify itself from an earth culture into an urban civilization, has evolved into a hard bright glinting neo-Babbittry. Several years ago, a newspaper in Georgia's old river city of Augusta glumly pointed out that, while a new state anthem just offered by Johnny Mercer "abounds with the sights and sounds of baying hound dogs, cawing crows, watermelons lying ripe in the field, and summer lightning in the sky . . . some of us might have hoped for a song more suitable to the new Georgia than to what to most of us is the old. But it's doubtful that even the great Johnny Mercer could create memorable lyrics about the booming of industry and the soaring of sales, and such. . . ."

Probably no other Southern state has been quite so evangelistic about industrialization as South Carolina. One reason may be that it has been a state which was more or less a company town anyway, presided over by an informal consortium of business interests, predominantly textile, with the fierce orderly privacy of a mill village—all civic irregularities and crises briskly attended to in a

GEORGE GARDNER

Marshall Frady

THE VIEW FROM HILTON HEAD

tidy circumspect corporate manner, as matters of personnel relations. Probably as a result, South Carolina has long persevered as one of the most conscientiously innocuous states in the Union: without the dark glamour of Mississippi or even the hot hasty dingy meanness of Alabama, throughout most of the classic Southern decade of the Negro Awakening she seemed merely to lack the vitality for any serious viciousness. It was as if her defense were a colossal dullness. With occasional visitations by Billy Graham and fracases over Blue Laws, the central obsession has been, in the words of one Columbia legislator, "our program of industrial solicitation. We've brought in a half-billion in new industry each year since about 1959, and we now have a five-hundred-seven-million annual budget. But we haven't reached the point where we can relax this effort. Nosiree."

The conventional celebration, then, was orchestrated—the Governor, the local legislative delegation, assorted chambers of commerce, newspapers like the *Columbia State*—when a German chemical empire, Badische Anilin- & Soda-Fabrik, announced it was establishing a formidable outpost along the South Carolina coastline: a $200-million facility for the production of dyes and plastics which would be the third bulkiest industrial presence in the state. The site was a sprawl of 1,800 acres along Victoria Bluff in Beaufort County—property consisting then of little more than a few scattered thin dirt roads passing like tunnels through the grave muffled grieving of moss, ending at the wide expanse of the Colleton River into which, BASF projected, 2.5 million gallons of treated waste would be discharged daily, emptying finally into Port Royal Sound. Eventually, it was also mentioned, a railroad spur would be laid to the site, docks constructed, and, with federal designation of the area as a free-trade zone and grant of an oil-import quota, a channel dredged for 200-foot-long tankers bringing in 40,000 barrels of naphtha a day.

There were instant assurances that the complex would comply with the state's pollution regulations—which, along with its corporate tax expectations, happen to be among the most indulgent in the nation, devised as they were in the Fifties when the lust for industry was in a high heat. These assurances were particularly facilitated by the industrious attentiveness of the *Columbia State*, including one assiduously solicitous marathon interview with the company's American overseer, Dr. Hans Lautenschlager. (Q: "As of this moment BASF has complied or has signified intention to comply with every requirement that South Carolina has yet presented officially to you?" A: "That is right, yes.") Actually, the headlong enthusiasm seemed to startle somewhat even BASF's officials. "We had a reporter from the *State* simply walk into our office in New York and tell us, 'Now, show me how you aren't going to pollute,' " reported one BASF executive cheerfully. "It's very unusual to have that sort of attitude in a newsman, you know." But there were, from the first, certain uneasy murmurs in the county, principally from former industrialists who had retired there from the North. "I've lived in Chicago, Cleveland, Detroit," remarked one. "I know the price of industrialization. The threat of pollution is so much easier to prove *after* the fact than before it."

The South Carolina coastline around Port Royal Sound is an uncertain and capricious play between land and water, still arrested at that moment in the history of the earth when the sea was just beginning, reluctantly and tentatively, indecisively, to relinquish the land, a slight release and hesitation and change of mind still enacted every day. Grassy marshes yawn off level and limitless, past solitary marooned islands of palm and pine, into cold red sunsets—one of those plots on the planet where man is still incidental to nature, instead of nature being incidental to man, which seems to work some subtle mystic dislocation in the species. Specifically, its tidal creeks—a myriad and ceaseless discreet ebbing, with the occasional tiny idle flapping of a seabird across bright open roofless glittering spaces—is one of the few untainted estuarine landscapes left along the Southeastern coast. But it's not so much nature as man's commerce which abhors a vacuum: Dr. Lautenschlager, a badger-like and altogether genial man with bristling close-clipped hair and horn-rim glasses, agreeably explains, "We always felt that the U. S. as compared to Germany was somewhat underdeveloped—excuse me that expression—in the use of plastics. Because you wouldn't believe it, but from, I would say, Philadelphia to Miami, there is nothing. Really—no plastics plant."

The fact is, Beaufort County is underdeveloped not only in plastics, but in most other respects, including economically and politically. (A local legend has it that the squire of a remote plantation in the county, a man not accustomed to company, who is prone to blast his telephone periodically with his shotgun, once invited a neighbor, in a moment of restlessness, to engage in a duel—"You can take the ground if you want, and I'll take the air"—and presently appeared over his neighbor's house in a plane, making several passes and bombing roof, trees, steps with flour sacks while his neighbor furiously slammed away at him from the front yard with a rifle.) Altogether, the county is probably one of the most abject and squalid crannies of the country, with perhaps up to 40 per cent of the 20,000 Negroes there—about half the total county population—illiterate. Some 900 families are eligible for food stamps, and the ministry of Dr. Donald Gatch, who came to be regarded as an unmentionable indecency by the county's white gentility, had a great deal in common with Schweitzer's ministry in Gabon. Not long ago, South Carolina's Senator Fritz Hollings—a tall, glossy, tanned, silvered figure who speaks with the steamy organ-tone rhetoric of the primeval summertime palm-fan South but is eccentrically given to certain liberal impulses—took a stroll about the county, peering in the doors of Negro shacks, and came away eloquently aghast.

Some 6,000 jobs of the 11,000 in the county—about half of this total employing Negroes—are involved with fishing and tourism, enterprises largely focusing on one of the county's offshore islands, Hilton Head. The recent resort developments there are, indeed, sanctuaries for retired executives and industrialists who have fled lands they have laid waste behind them in the North, along with retired military officers, admirals with flushed tomato-faces and frosty moustaches, gathering in madras jackets at dusk at the club bars. Autumn is a lyrical weather of winy dawns and musing warm days and chill sundowns, fine for bicycle riding. At Sea Pines Plantation, on the furthermost tip of the island, Rolls-Royces and Mercedes-Benzes twinkle leisurely along the quiet private roads through groves of high pines and gum and palms and live oaks with moss like downstreaming smoke in which the long late-afternoon sun lingers like a soft amber dream—beyond, there are glimpses of fairways, as sleek as the flank of a fawn, in which golfers occasionally appear, distant, miniature, trivial, and soundless, walking and stooping and then moving on, figures materializing briefly in time out of nothing and then, after a moment, gone again, idly and tracelessly vanished back into nothing.

On the whole, confesses a local political manager, "We are almost like India or China down here. We got the very, very rich, and then we got the very, very poor, but there's hardly anything in between there. Close to 40 per cent of our people make less than $2,500 per year per household." The county is in the Congressional district of House Armed Forces chairman L. Mendel Rivers, whose two simple solicitudes for the thirty years he has been in Washington—the military and the folks back home—have had a way of enhancing each other over the decades, and one official with the Beaufort County Development Commission wistfully allows, "About 75 per cent of our gross wages come from federally oriented sources—namely, the bases Mendel's put down here. So every time there's a war, business picks up real good. After World War II, everything fell off until the Korean war, when there was an upswing again. Same thing now with Vietnam. I hate to say it, but war—people gettin' killed—means prosperity around here, it's as simple as that. So who can fuss?"

The first giddiness after BASF announced its intentions was that the plant would pass a magic wand over the economy of the area, but more sober souls recognized that most of the sparkle would fall on the fortunes of real-estate brokers, insurance agents, town merchants, without really sifting on down appreciably into the lower zones of destitution in the county. In one official state study some years before citing the kinds of high-intensity employment industries needed in coastal counties like Beaufort, sophisticated chemical operations like BASF's were not even listed. Before long, it was more or less tacitly acknowledged all around that BASF would only be the inception, the genesis of a vaster industrial complex in the area. But to the north of Beaufort County is North Charleston, and closer to the south is Savannah, both of them with doomsday manufacturing wastelands of smudged bleary skies, slag heaps, rank winds, and vile waters. With these unnerving specters on both sides, Dr. Lautenschlager has been a bit delicate about projecting visions of Beaufort County as an industrial complex, but he recently admitted privately, "Of course, we will expect that new industries will come in, mostly in the polymers field. Plastics lend themselves to the creation of other plants, and we will encourage these along, set up an entrepreneurial young fellow and train the people for him, perhaps even finance him to a degree. We also hope to attract down here some of the bigger plastics users."

One young local politician frankly declares, "This is gonna be a disaster area if we don't turn it around. What BASF will mean ultimately is that we won't be a sleepy village any longer, with a lot of open spaces and untromped-on places. This just has to be. Change is inevitable, you know."

Perhaps, but for the matter of only months, that would have been the case.

"The county is probably one of the most abject and squalid crannies of the country."

Years ago, on a warm summer night musky with magnolia blossoms in a small Georgia city, three young boys slipped out of their respective bedroom windows and, working in a peculiar wordless savage ecstasy, systematically wrecked the ground piping in a lot that had just been razed for the first filling station to intrude into their leafy

DIANE ARBUS

Marshall Frady

THE VIEW FROM HILTON HEAD

and innocent neighborhood. Some weeks later, they would be drinking Nehi oranges and passing around the air hose for their bike tires at the same station after it was finished, only half-remembering that furtive night of abrupt furious trivial unavailing sabotage, repudiation. But it has been more than a spasm of simple vandalism. There persist, whatever one's age, those small dull interior concussions of despair, exasperation, at abruptly discovering jaunty new jiffy curb markets or jumbo variety stores, glad and glittering with pennants, apparently clapped together in an eye-blink out of glass and chrome and plastic and asphalt along a roadside where the last time there had only been an empty cleanness of earth and sky. But such occasions—noticing trees and grass peeled from hillsides for freeway ramps, a dragonfly-wing iridescence from industrial excretion over rivers with Indian names, oddly drab unbright shadowless mornings with a fainting ghost of the sun—had been, in the past, totally private moments of discontent, like the brief prick of a rock in the shoe. At the most, there were sporadic flares of civic querulousness at zoning hearings.

But suddenly, it seems, all those random moments of dim elusive private discomfort have gathered into a massive popular outrage, their electricities have swiftly accumulated into a general voltage, an Issue. It has not quite found its tongue, its definition yet: the matter is still approximated as one of environment, ecology, pollution. But it is conceivable a new popular sensibility is emerging—an extraordinary moment. A new conscience and consciousness threaten to accost an old profound ethic, the dogmas and perspectives and rationales of an abruptly suspect mythology are now harried by perverse heresies from unexpected quarters: in the bright jubilant rampant advance of prosperity and convenience—ground clearings, ribbon cuttings, plant dedications, drive-in openings—a certain barbarism is now being sensed. A new and elemental Crime is being perceived.

Mailer proposed long ago that the prophetic disease of the age is cancer: that the cancer principle characterizes the times: robust, ravenous, unabating growth for growth's sake, a mortal process disguised as vitality and energy, health—Shakespeare's tragic trick: "Fair is foul, and foul is fair." At a meeting recently of the Beaufort County Retirees' Association, one man finally arose and began in a voice like the slow crackling of paper, his fingertips faintly fluttering on the back of his chair, "Well, I'm from up North—places where they brought in a lot of industry. I've been hearing all my life, since I was a young man, I guess—you get industry in here, get industry in here, and life's gonna be smoother. Everything's gonna improve, life's gonna be brighter. Well, I've never seen it yet. All my life, I waited for it to happen, but I never saw it. Things didn't get smoother, they just changed. Oh, there was a lot more money, but it seemed things just got messier at the same time. So I got tired of waiting, and I moved down here. Now they're saying bring this big industry in here too, everything's gonna be brighter—what I want to know is, when's it supposed to happen?"

What has now appeared on Hilton Head is the kind of spontaneous conglomerate popular resistance, the makeshift hasty collaboration of disparate interests that is one curiosity of the ecological passion. Not long ago, the man appointed to be manager of the plant, Dr. Herbert Ende, concluded a conference with a young attorney involved in the resistance by cautioning him, "Now, I don't want to ever see this in print—but we are a two-billion-dollar organization. We can flush all of you down the drain. We can wipe you out." But Ende still finds improbably ranged against him, pressing an offensive of lawsuits and petitions and demonstrations, an eclectic assortment of housewives, professional men, retirees of both opulent and modest circumstances, black fishermen, tense lank-haired rumpled young circuit-riders from the Audubon Society and Friends of the Earth, and certain local nabobs, including Charles Fraser, the brisk cherubic young developer of Sea Pines, and Fred Hack, an older and somewhat more weathered squire who owns much of the island, and who, with his Port Royal Plantation, has been gamely and doggedly battling to keep pace with Fraser.

A gangling, somewhat gawky figure with stray tufts of graying hair like an osprey's feathers, Hack has remained fairly plain and homespun in manner and conversation (he is given to that immemorial feint, disavowal of his slow sly kind, "I'm just an ole country boy") since he arrived as the island's first developer, coming over on a barge with his family twenty years ago to set up a timber operation. "I finally got a bridge built," he drones, "and then Charlie Fraser came over it." He still has a certain feudal sense of proprietorship about the island and its affairs. When one Negro storekeeper erected a sign along the main road which Hack regarded as a bit large and conspicuous, Hack simply approached him one afternoon and gently inquired, "Abe, how much is that sign gonna cost me? . . ." The construction of a motel recently along the beach seemed to be threatening a forked palm toward which Hack had taken a fancy, so he had the tree dug up, transported out to his Port Royal Inn, and replanted there with an elaborate arrangement of wires and ropes, but chatting at the Inn with someone recently, he suddenly paused and then murmured, "Look at my tree. I think it's dyin'." He still lives in the antique house in the interior of the island where he originally settled with his family, a white wooden edifice with mammoth fireplaces and long polished halls and a huge iron cooking-range in the kitchen. In his generous living room one evening recently, he dismounted from a ladder where he had been hanging new curtains (he had forgotten to open the vents in the fireplace several nights before after starting a booming fire for a party) and sat to talk with a pair of visitors regarding the advent of BASF six miles up from his island, gulping occasionally from a kitchen

glass filled with Sprite and vodka. "That plant's not comin' in," he peacefully allowed, with an almost childlike simplicity in his voice. "Nothin' like this can happen to *me*—I just know that. I survived diphtheria when I was five years old, so I can sho survive this thing."

One gentle evening recently, a large number of islanders gathered at Fraser's Hilton Head Inn from their supper tables, a freshly showered and tanned assembly in citrus-colored liquid golfing sweaters and blazers and canvas shoes, sitting in metal folding chairs in a chamber of powder blue walls with potted plants where they were to be addressed by a young Audubon Society activist named Joe Browder ("He's their number-one scrapper," a local gentryman advertised happily) and a state legislator from Columbia named Alex Sanders. An ample cheerful bearish thirty-one-year-old attorney with somewhat shaggy hair and a relish for the droll aspects of life, Sanders is a probably premature occurrence in South Carolina of the phenomenon of the New Politics, and has come to be regarded a bit askance, as a faintly dangerous aberration, by most of his colleagues in the House: he introduced a resolution (and passed it) which provided that at no time would the total membership of all legislative committees studying agriculture in the state exceed the number of farmers in the state—offering this after briefly contemplating another measure which would have stipulated that at no time would the membership of any state subversives-control board exceed the total number of subversives, including Communists, in the state. One bone-cold night last February in Columbia, at a parlor gathering of state political brokers swishing tumblers of bourbon before a quietly rustling fireplace, Sanders was dismissed as "too inclined to take on these—uh—*quixotic* kind of causes, and just a little too *amused* by the serious business of politics." In the context of the evening, it was an endearing dismissal. He is, actually, a refreshing mutation in the state's politics. Sitting in the audience at Hilton Head Inn before he spoke, he muttered, after a glance around, "Lot of pretty people here tonight, ain't there?" A moment later, behind the lectern, he announced, "I wish I could tell you I have come to save you from this noxious threat to your well-bein' and peace of mind. But the candor of the hour requires me to tell you I am not concerned with you assembled here tonight—" A rather delicate hush settled over the floor. "—I have looked beyond your beautiful homes and unpolluted golf courses. It's possible to replace those—but it's not possible to replace this beautiful Port Royal Sound and the fragile life-balance of these estuaries." At this, there was a relaxing release of luxurious approving applause. "The reason I bring you this message," Sanders continued, "is not to insult you. It's just that this issue won't be decided on preserving these homes and golf courses, but on a larger national scale . . . and in the course of this fight, you are likely to come into contact with those beyond your normal personal relationships."

And they did, right after Sanders. Browder—a slight modest figure with a somewhat finch-like face and fine-spun sandy hair, wearing horn-rim glasses and a pinstriped ginger-colored suit with scuffed suede boots—had just landed on the island vibrant from a rally in Miami addressed by Abbie Hoffman, and he informed the gathering, "I heard some industrial-type people talking on the plane coming up here who said they hoped the response to this BASF thing wasn't one of bailing out Hilton Head Island. I really get the feeling there isn't anyone in Washington terribly interested in bailing out the people here." He talked to them in a casual free-form easy monologue that was the style of SNCC organizers during the old days in Alabama and Mississippi, his manner wry and half-abashed and anti-rhetorical, bemused, his voice small and almost toneless. Whimsical frequencies were in the air at this occasion: Browder imparted to his audience the emotionally mixed piece of news that, when the construction of an airport in the Everglades was frustrated in Florida, "the fellow who had been the baron of the state, the czar of the state until a few years ago, was told to go to hell. . . ."

Indeed, a number of those directing the front against BASF are not accustomed to having been particularly on the sunny side of any recent national issue, and they seem not quite able to trust the fact that, at least in terms of the national press and the liberal community—the conventional conscience of the country—they are uncannily on the side of righteousness for a change, and so they are proceeding with a certain awkwardness, a high

"What has now appeared on Hilton Head is . . . a makeshift hasty collaboration of disparate interests."

GEORGE GARDNER

Marshall Frady

THE VIEW FROM HILTON HEAD

nervousness, with somewhat the same instinctive furtiveness and conspiratorial mentality of their long wilderness guerrilla warfare against the general massive marches of history since, for some of them, Roosevelt. The head of one citizens' association, a pastured industrialist, warned his colleagues about a visiting newsman from a national magazine, "We haven't checked that fella out yet," and when a young painter on the island began trying to assemble demonstrations at the plant site, it was suggested by a few residents that such a dramatic extravagance might be "undignified." Other parties have been engaged in some of the more Byzantine of the old procedures—private and elemental persuasions in certain strategic places—and one young conservation activist, who cultivates hopes of the BASF fight evolving eventually into participatory-democracy politics in the county, emerged from one session with this faction and hissed, "I feel like I ought to take a bath." But the resistance promised to survive such uneasy associations. Demonstrations were continuing through March at the plant site and the BASF suite of offices on the island—motley ecumenical processions of Junior League matrons and black fishermen, long-maned college students and retired colonels in long-billed mesh fishing caps and khaki trousers. While a recent march was breaking up, one young mother with a sign was asked if she had ever done anything like this before, and she chirped, "Why, Lord, *no*!"

Actually, the black fishermen, who after five years of struggle have finally begun operating successfully as a cooperative, are caught in special complications. As Tom Barnwell, one of the co-op officials, explains it, "How the hell am I gonna be able to get out there picketing against BASF without also picketing against the welfare system and the political system and all the other pollution like that in this county?" Whatever, they regard themselves as menaced by the plant more critically and immediately than is anyone else. "More meetin's I 'tended, listenin' to those plant people talk," remarks the co-op's president, David Jones, a looming mild soft-spoken man, "the less comfortable I felt. He kept tellin' us we didn't have nuthin' to worry about, but that was just a man talkin'—you know what I mean? A man can say anything. Anyway, even if we get BASF to fight pollution, we got to go through this same mess with every one of these other plants when they come in?" The co-op finally sued for a moratorium on the plant's construction until extensive laboratory tests could confirm it posed no danger, but BASF—whiffing intimations of disaster should it be temporarily stalled—has been particularly implacable and brittle on this point. "A moratorium is completely out of the question," maintains Lautenschlager. "If we postpone our plant, the whole thing loses momentum—see?" Commenting on this matter another time, he snapped, "We reject it. And everybody else rejects it. . . . The Governor has said it is un-American and unjustified, and there is no legal possibility for it as far as I know. I say it is unnecessary and unjustified."

The fact is, the confrontation at Hilton Head—and, for that matter, the whole national confrontation over ecology—is still taking shape in a kind of uncertain moral twilight. John Gadsen is a young black who directs Penn Center out from Beaufort, which functions in part as a job-placement agency for the black community, and as he coldly eyes the issue, "BASF isn't going to mean that much to my people around here. I know that. There'll be a little bit for a little while, and then even less after that. They aren't really going to do much more than just touch the problem. It's the industry they'll bring in after them, which will transform the whole economy of this area. That's the choice we've got to make—are we going to industrialize, or do we stay this quiet little peaceful area. It can't be both ways, I'm not fooled by that either. These waters are going to be polluted, no doubt about that—rivers here around Beaufort are *already* off-limits just with the regular sewage from the people living here, and it doesn't take that much pollution to place oyster beds off-limits. Of course, they're saying now, if BASF doesn't come in, they'll open up other jobs without pollution. Well, one of our girls we sent out the other day on a waitress job was offered twenty-two cents an hour plus tips—if that's the kind of thing they're talking about, forget it. No, when it comes to a choice between the people I know who have to make it here on food stamps, who're still living like they've been living for the past hundred years, or whether we're gonna keep all these pure waterways and beautiful marshes and wildlife, all this wonderful scenery—I got to go with the people. If I got to put the oyster beds up against people—the oyster beds have got to go."

That is a rather cheerless set of alternatives—the kind of desperate and understandably impatient vision which, it has been suggested, could end in the subtle treachery of merely exchanging a rural ghetto for an urban one which, to the degree such things can be measured, is probably more desolate. As a number of those who mistrust the ecological issue point out, what's happening to trees a hundred miles away does not have a great deal of relevancy for people pent in a ghetto who've never been in a forest. But it is more than a matter of aesthetics. What is being recognized is that simple emptiness—an adjacency of open and trackless spaces—is actually a human value, and the absence of that visits a vague abasement, brutalization on the human spirit. Whatever, developers on Hilton Head—however belated and accidentally induced their interest (actually, Sea Pines has in the past ventured some educational projects in the island's interior)—have begun plotting programs committed to more black enterprises like the co-op. As Gadsen concedes, "I do sympathize with the co-op, that problem. They labored through the most unbelievable difficulties over there to get that thing started. You can't know how important it is now to them—just those some one hundred jobs mean more to the black people of this county than any thousands of jobs with the tourist industry as waitresses or bellmen or ground-keepers."

A few black leaders on the island regard the advent of the plant with a special foreboding. With South Carolina a society whose politics have always been precipitously susceptible to the influence of the business estate, the enormous presence of a firm like BASF has sobering implications. Barnwell, who is executive secretary of the co-op, says flatly, with an angry crackle in his eyes, "We've just begun to work up a little bit in the politics of this county and this state, but this deal—the power you talkin' about here—will put us right back into slavery."

All the clamor has caused considerable dismay among the county's Establishment; as one of its spokesmen philosophizes, "We just want all this damn fuss to die down. We'd be all right, if it weren't for all this damn fuss. It's just damn stubbornness, that's what it is." The executive director of the county development commission, Eddie Boyer, a man of slightly dusty and crumpled appearance with an expression of drowsy amiability, laments, "Old ladies come into my office cryin', I tell you—chins quiverin'—and commence to tell me, 'Eddie Boyer, I'm gonna take up a collection in this town and erect a statue to you as the man who ruined Beaufort County.' I been here for thirty years, and have tried my best never to make an enemy, to get along with everybody—wasn't any home in this county I didn't feel I couldn't go into and be welcome. But now, people don't like me. I been in the hospital three times over this thing."

In the face of this unaccountable popular ambush, all the conventional rationales, the conventional exuberances are being lustily and diligently invoked. "Land has got to be used for the greatest good of the people," insists one Beaufort business promoter. "Over there on Hilton Head, these naturalists and so on, they worried about roostin' places for their birds. Well, hell, we can't leave this country to wilderness just because of their birds." The director of the local Office of Economic Opportunity, a white fortyish chipper erstwhile Baptist preacher with a sun-kissed face tanned like a dye tint and a small cherry bulb of a nose, attired in a snappy black-and-white-check sport coat, drove a recent visitor along on a road on the outskirts of Beaufort with hamburger drive-ins and trailer parks and billboards and power lines under tatterings of moss: "Wadn't anything out here before, and now we got a nice new li'l shoppin' center along here, it's grown up real nice out here. I don't understand all this hollerin' about BASF. Why, I've seen estimates it'll mean probably one thousand more automobiles in the county alone. . . . I've said from my pulpit a million times, Beaufort is the virgin territory between Miami and New York." One Beaufort booster burbles, "They talk about alterin' the *look* of the place, the environment. If you want to know the truth, lot of plant grounds you see now are actually prettier than country-club grounds."

The notion is being offered, as one local business figure put it, "If man is smart enough to mess it up, he's smart enough to clean it up." This particular perspective is heard most often when the melancholy case of the Tenneco plant is mentioned—a similar facility established some years ago along a tidal creek on nearby Dafuskie Island with the most hearty and ruddy and unequivocal assurances that there would be no contamination. Not quite two years later, a landowner with property along the creek noted that the marsh grass was withering away, and when he called in two scientists to investigate, it was discovered that vast concentrations of acid had been flushed into the waters there, corroding oyster shells and exterminating all mussels in the stream. The state, after a time, finally dealt some minimal wrist-rapping to Tenneco, which then went about tidying up its operation.

Somehow, the breezy assurances that are being produced to answer the alarm tend to be not enormously reassuring. "Tenneco?" asserts the OEO director. "They say that area over there at Tenneco is ruined? That ain't ruined—there's green grass growin' up to twenty-five yards of where they say the ruin is." One state legislator from the county, who has been maintaining that industrialization will not violate the nature of area ("You can swim in water that you can't farm oysters from, you know"), was asked if there were any other spot in the county that occurred to him where such a novel cohabitation had been managed—if such a compatability, in fact, would not be a first for the world. After a pause, he allowed, "Yes, I suppose so. No, I don't guess it's ever been brought off before. But —well, that's the challenge of this whole thing, see?" BASF officials have cited their scrupulous compliance with the anti-pollution standards in New Jersey, which has not spectacularly comforted the refugees from New Jersey in the area, nor others who have simply made the drive from the Newark airport into New York, one of the most obscene landscapes on the face of the earth. (At the same time, BASF has declared natural de-industrialized zones will be left along both the riverfront of its property and the road front; but when a local political apologist promised a civic meeting recently, "I'm sure that what goes on two or three miles back there from the highway will be virtually unknown and unobservable," it only deepened the frowns, momentarily narrowed the squints of those in the audience.)

At a recent hearing before a legislative committee in Columbia, local proponents of the plant—with the awkwardness of old mentalities still stoutly impervious to deep shifts in the popular mood—unwittingly added extra savor to all the misgivings. The president of the county's chamber of commerce, a lank and weathered man who stood rigidly straight with his hands shoved deep in his pockets, clipped, "We're missin' the whole picture—other companies, other industries will be involved in this. You fiddlin' with an opportunity that may be gone forevermore. . . . As far as this pollution is concerned, I don't think it's a problem—" At this, there was a tide of laughter from the galleries which spilled even over the floor. Undaunted, with only a short dangling uncertain hesitation, he went on, "We've gotten assurances from the Governor on

"All the clamor has caused considerable dismay among the county's establishment."

Marshall Frady

THE VIEW FROM HILTON HEAD

down there won't be any pollution—" Again, the chamber was splashed with laughter, and the fellow plunged on back to his seat, followed presently by a somewhat more dapper, nattily groomed, resolutely casual and grinning chap who introduced himself as the next mayor of Beaufort and, "in an attempt to calm the waters a little bit," proceeded to smilingly dismiss the issue of pollution as a matter of any real grimness: "Why, some of the best bass fishin' you'll find down there is right at the mouth of the Savannah River, which is the most polluted river in the state. . . ."

For that matter, virtually the whole political structure of South Carolina—from the impending mayor of Beaufort all the way up to the Governor, Robert McNair, a much beleaguered man these days on several fronts—is committed to the plant and the immutable doctrine of "industrial solicitation." Senator Hollings, one figure of some heft who might have been expected to intervene at least on behalf of a construction moratorium, is not only cramped by the posture of his party's hierarchy, but somewhat more seriously compromised by the fact that "industrial solicitation" was never a more feverish obsession than during his own term as Governor. At an informal convocation of assorted political technicians in Columbia recently, he advanced the rather improbable speculation that all the dismay over BASF, the signatures of protest from all over the state, even the national notice the incident was attracting, had all been engineered by Charles Fraser.

At a meeting not long ago of retirees in the Beaufort area, held in a country club with mint-green cement-block walls, one young local legislator rummaged forth all the customary enthusiasms while, here and there, elderly ladies savagely scribbled questions on the back of paper place mats with ball-point pens, couples glanced at each other and shook their heads—they had already begun to take him on with impatient incredulous snortings and brief high hums. "The concern over pollution now," he forged on, "it's certainly the sensible thing, and certainly now the *popular* thing, and the thing that's in the headlines. . . . But we have laws to protect us on this, and have had them on the books since the nineteen-fifties." When he was finished, a tall bony crew-cut man lunged to his feet and fairly blared, "Yes, and just a few years ago we had the same assurances on the Tenneco dye plant. They said they absolutely would *not* pollute the area. It was crammed down our throats, and they built their multi-million-dollar dye plant. So what happened? What I want to know is, why is BASF being brought in here the same way?" The young legislator wanly proposed, "Well, you can't say absolutely-positively nothing's gonna happen. I mean, you can't get out here and drive to Columbia and say absolutely-positively nothing's gonna happen. . . ."

While BASF, with all the fanfare, has actually attained, even before the plant has been physically assembled, a state of high righteousness probably unprecedented in anti-pollution projections, Dr. Lautenschlager himself has acknowledged, "We can't guarantee against accidental spillage from our plant. We can't guarantee against accidental spillage from tankers, because we are not in control of them." That is the anxiety of a number of thoughtful people in Beaufort County and over the state, including Representative Sanders—whether an accident can actually be afforded. Speaking not long ago to a House committee after introducing a bill calling for a moratorium on the plant's construction, Sanders intoned, "Gentlemen, there are four estuaries in South Carolina—bodies of water uniquely constituted on this planet, with a sensitive balance of life there crucial in the biological chain of existence. Two of those estuaries have already been destroyed now by pollution. Port Royal Sound is one of the two left. No one knows without the facts at hand what the results of the location of that plant will be—but those who would ignore history are condemned to repeat it. It is a matter of historical fact that when the process of industrialization . . . devolves itself upon the underdeveloped people of this earth, those people lacking the sophistication of urban societies can be depended on to become so enamored of the shiny machines and the gold and silver it promises as to ignore sophisticated concepts of an undisturbed ecology. The Southern European peasant with a newly acquired automobile will stand in the street and fondle his machine while goats defecate in his house. And make no mistake about it, as compared to the highly industrialized society of Western Germany—the fatherland of BASF—the coast of South Carolina with its poverty and great expanse of virgin land is viewed by many as nothing more than another emerging nation whose people are for exploitation and—more important—for sale. But gentlemen, you and I know South Carolina is different. We are not Southern Europe—" (Despite that, the word was spread by the plant's advocates back in Beaufort that Sanders had testified their county was populated by peasants who stroked their cars while livestock leisurely puddled their front parlors.) "—we have steadfastly demonstrated that our birthright is not for sale for a mess of pottage. . . ."

The fact is, with all the unanticipated high attentiveness to the affair, some members of Beaufort County's local legislative delegation have found themselves caught in certain rather specific positions of intimacy with the plant—quiet arrangements which, in the past, have been more or less a matter of course in the discreet customary incest between the state's political and business interests, and which in almost any less feudal context would be politically mortal. A member of the state House, W. Brantley Harvey Jr., a lean spare pale young attorney with a taut jaw and cottony ashen hair, with a quality of sober earnestness about him, has, it turns out, been acting as counsel for BASF, clearing the way legally for its arrival in his district, which will amount to something like $25,000 for the first year of his service. "I expect to represent them in those matters in the future," he admits, "and

charge them the usual rate." (He also has as clients the South Carolina Gas and Electric Company and Tenneco Chemicals Inc.)

Another member of the House, Representative Wilton Graves, a reedy man with thinning hair who often holes up in his motel on Hilton Head, twice renewed an option he enjoyed on one third of the property adjacent to the plant site, and then, after BASF made its decision to locate there, exercised the option. Actually, the pattern of symbiotic understandings already struck on the island approaches the arabesque—a new resort development. Palmetto Dunes, a project largely cultivated by the island's Jaycee chapter, and another of Harvey's clients, has been quietly but studiously congenial to the plant's progress: Graves' son, it happens, is president of the Jaycees there. Actually, after the co-op filed its suit to enjoin BASF from proceeding with construction, Graves had the lurching artlessness to announce he would introduce a resolution in Columbia to enforce a moratorium against the fishermen, forbidding them from working closer than a mile from shore. Co-op members, he explained were "lost in a legal fog—if there is to be a moratorium enforced against BASF under any circumstances, then I will insist that the same moratorium be enforced concurrently on all shellfish grounds, rivers, and sounds, and to crab pots and trawling for crab or shrimp." It was a move which seemed to embarrass about everybody except Graves.

Not long after BASF declared it would locate in Beaufort County, there was a deer hunt on the property site, the party including Dr. Ende, who would be the plant's manager, and the district's state Senator, James M. Waddell, whose occupation in addition to legislation is selling insurance. Before they set out one frosty morning, Waddell, already a bit flushed and effusive despite the fresh hour, turned to Ende, draped his arms around his neck, and boomed, "Herbie, I love yuh! I just love yuh!"

As for the Germans themselves, they seem, more than anything else, profoundly befuddled by the popular combustion of opposition. They had proceeded in all innocence on the natural assumption that the old mystique still prevailed, the old combinations were still viable; all the proprieties and mechanics had been attended to. "I was led to believe everyone had accepted the idea," said Dr. Lautenschlager recently. "It is always good to be welcomed all over, but I don't understand this. It is completely under control. I mean, everyone we talked to seemed to accept the idea." According to one of the firm's public-relations figures, a hulking robust blond apple-cheeked Berliner named Dietrich Rogala, it is all simply a question of "Facts! If everybody would just keep to the facts, there would be no trouble. Facts. But all this emotion—My God! What can you do!"

They have installed themselves in a corner suite of offices in a newly erected one-story building near the island's main shopping area; a recent visitor there found Dietrich, his colleague—an older, darker and somewhat quieter man in a gray tweed suit named Fred Jacobson—and their secretary, the three of them rather awesomely alone in large rooms scantily furnished with only a few desks and chairs, the expansive walls around them blank and still smelling wetly of plaster: looking a trifle alien and stranded and possibly surrounded, they maintained a certain hectic doughtiness. "Why is all this trouble, hunh?" demanded Dietrich pleasantly. "Do you think maybe it is we are foreigners? A little bit of that, hunh?" (Actually, BASF is one of the remnants of I. G. Farben, which was dismantled by the Allies after World War II, but officials now hastily point out, "Every one of those businesses that came from Farben is now larger than Farben was—every one of them.") Dietrich rumbled, while Jacobson smiled thinly and politely from behind a desk. "In Germany, we welcome foreign investment with open arms. So why should there be all this here? We maybe finally take this up between Bonn and Washington, hunh? The American companies there, the bases—they will have to go back home. Hunh?" It was as if a Teutonic bunker psychology were already beginning to set in. "We *will* build our plant," Dietrich boomed. "It doesn't matter."

Later that afternoon, they drove out with the visitor to the plant site, confessing, "Maybe you could show us where it is. We haven't seen it ourselves, actually." (Earlier, when Dietrich had driven over to the island from Beaufort, he had been stopped for speeding by a highway patrolman, and as he reported with considerable gusto and relish afterward, "I showed him my license—what is this, *Berlin, Germany?* With—what? Badi—Badische—what? I told him, perhaps you can work for BASF, hunh? I left him very friendly, but I was something quite new for him, I am sure.") As the car pulled off the highway down a dirt aisle beneath languid spectral taperings of moss, Dietrich breathed, "Fantastic! Unbelievable! Jacobson, I believe I like our property we have bought." When the car reached a cable strung across the road, Dietrich heaved out and began struggling to wrench up a post to which it was fastened, and Jacobson, watching him, still with his quiet flat little smile on his face, mused, "He is from Berlin. He is very enthusiastic, no?" The road ended at the far shimmering sprawl of the Colleton River, at a bluff of dead gaunt trees from which there drooped rags of moss, under a cold sky uneasy with the low steady vast flight of sunless clouds, a solitary hawk hanging in taut weightless suspension overhead. After standing at the edge of the bluff in the sharp wind for a few minutes, during which the apple-stain in his cheeks paled away, Dietrich—shuddering, his hands deep in his pockets—abruptly blurted, "Well, gentlemen, it all looks wonderful. Excuse me. I believe I will go back to the car now—" and strode off. Returning to the highway, Jacobson slewed the car with small deft turns of the wheel through low bogs in the road left by a recent rain, and Dietrich lunged forward from the back seat to announce, "Jacobson, the way you are handling that wheel—I think you must have driven a tank, no?" Jacobson, with only a barely perceptible tension in his jaw, replied quietly, "No. Oh, no. I merely did a lot of walking," and Dietrich

"What is being recognized is that simple emptiness is actually a human value."

Marshall Frady

THE VIEW FROM HILTON HEAD

chortled. "Ah, I think maybe you drove a tank, too." Jacobson finally murmured, "Well, I did ride one once," and Dietrich boomed, "Yes, they called those Panzers, did they not? Panzers, yes?" Jacobson, his head only slightly thrown back, his mouth open, uttered a light soft laugh, more like coughing, and kept his eyes on the road. His knuckles merely whitened briefly on the rim of the wheel.

The truth is, as his company now undertakes to steer its plant through the unexpected bogs of recent and still brooding rains ahead of them, knuckles are whitening on wheels all the way up to New York, their American headquarters. They have decided to jump up initial construction, and by March there could already be heard a distant clank and whining of bulldozers deep in the pines of their property. And in a recent state promotional supplement in newspapers over the country, there was a full-page announcement by BASF that:

> *...BASF Corporation is coming to Beaufort County, South Carolina...*
>
> *We...look forward to South Carolina becoming the major plastics center of the Southeast. We look forward to increased job opportunities for everyone. We anticipate success in showing the world, with the help of our neighbors, that man and nature can live in productive harmony....*
>
> *We salute the Palmetto State for its past 300 years, and eagerly look forward to the next 300.*

But the crisis in Beaufort County has encountered what is a central complication in the issue over the nation: unlike the Negro Awakening in the South, or even Vietnam, which was personalized by Johnson and Rusk, the issue of pollution seems to lack a dramatic and palpable demonology, the element of recognizable personal villainy. The effects, the mutilations and outrages are plain enough, but trying to confront those responsible for it, answerable for it—corporations, county zoning boards, bureaucracies, with all their glib pieties and postures of agreement—is somewhat like trying to engage a vaguely malign fog. They lack the simple passionate palpability of a Bull Connor or George Wallace or Lyndon Johnson. The question is whether the issue—in its theatrical dynamics, which are essential to any popular issue in this time—can survive this diffusion of responsibility, of the identity of the guilty. If so, then it may also mean, by extension, a general perception eventually past *all* glib pieties, all nimble dissembling, all medicine-man rhetoric—that syntactic game which is the refuge of an entire galaxy of interests in our society, including not only officialdom and corporate apologists and the Pentagon but Madison Avenue, those there who recommend titanic excitements over such cretinous trivia as toothpaste ("Daddy! The dentist said I had no cavities!"), underarm sprays, laundry soaps, soda-pops ("You've got a lot to live! And this one's got a lot to give!")—all those who can only survive in a nihilistic void between word and reality. The danger is that they would draw us all into that void. By fanciful extension, perhaps the pollution, the devastation of the language is secretly and ultimately involved. A wry incidental service it would be if the passion over ecology—in which honesty is elementally concerned—began to fuse again language and meaning.

Of course, it would be a tragic diversion if ecology deflected the national will and attention from its racial desperation—and, increasingly, there are those who dread that it is such a distraction, that at the least it will result in a kind of cross-eyed national view of needs ahead, each issue muddling the other. But, as has been hinted at Hilton Head, in the effort against pollution parties are getting together who have never been elbow to elbow before: a peculiar, erratic, and still faltering communion is gathering between equally assertive interests that have seemed up to now implacably alienated from each other—a conglomerate and still clumsy constituency of radical activists and Establishment princes, students, and the aged, all of whom now will at least have a new understanding of each other's impulses, despairs, visions, languages, since they have, on the issue of ecology, worked with them on common terms, in a common urgency. (One Hilton Head resort dweller in his middle years phoned Browder and ventured, "Uh—listen, are there any more outside agitators down there that you suppose you could bring up here to help us with this thing?") On the whole, the issue is likely to have a modestly radicalizing effect. As a California state Senator pointed out sometime ago, "You can't have people getting concerned about Lake Erie without them starting to ask pretty soon who killed it. How the hell did it happen? Who let them do it, and why?" Indeed, implicit in the issue are certain final questions about our entire system, our habits of managing ourselves, and certain implicit prospects of an unprecedented regulation of matters impinging importantly on the public condition: there is the possibility that the conduct of large business, even if left in private hands, will thoroughly, even in its most trivial transactions, and particularly in its intercourse with all echelons of government, have to be under public scrutiny. Also in this experience we are encountering a number of ghosts from our origins—in particular, we are likely to sense the portions of glandular greed and rapacity that were actually at play in the romance of the frontier, the pioneer, the expansion into the West, and this in turn could introduce a new realism and maturity into Americans' still essentially adolescent understanding of themselves and their past.

Whatever, it would not be the least of this issue's gifts if, in the possibly brief Noah's Ark union of all the disparate elements in our nation who wish to survive this peril, certain illusions and suspicions and assumptions about each other will have been modified, if not vanished. And, supposing that Americans on the whole are still incorrigibly people of good will, in that familiarity and fellowship could lie the inception of the new community of vision and compassion that is necessary for the true civilizing of this land. □

I. INTRODUCTION

When short, stocky Cesar Chavez rose during a labor meeting in the Mexican-American community center in Delano, California, to shout "Huelga!" he had no idea what would come of those first, seemingly puny efforts to organize the town's grape pickers. In September of 1965, Chavez's goal loomed large and difficult to reach but it was one which was limited only to Delano. In the three and a half years since the strike began in Delano, it has spread from the narrow confines of one small town into a nearly world-wide movement. And, since the early days of the strike, one fact has been made clear: for the first time, efforts to organize a union for farm laborers have been successful; therefore if the grape pickers are able to realize their objective, the doors to organizing farm labor all over the United States are swung wide open. The import of this is also clear, since farm labor is the last great bloc of American working people which has not been unionized.

PLACE ! OUTSIDE QUOTE

This paper will trace the history of the grape pickers' strike from its inception: how and why it began, and how it has progressed. The subject will be presented in three parts. First, the causes of the movement and its first six months of operation; second, what has happened since the first breakthrough in the strike in the spring of 1966; and third, what it portends for the future. Although

much space is given to describing the movement itself, particular emphasis is placed on its implications. We must know why the movement has been successful and why it may attain complete success, in order to understand its meaning. The Huelga (Spanish for "strike") is not an isolated event in time; it is the first link in a great chain.

It must be noted here that published material on the subject is quite inadequate in light of its magnitude. No major news magazine has had a running account of the movement. Articles published in periodicals have been scattered and unconnected, usually related only to isolated events in the strike. It would seem that the public press, for the most part, either does not realize, or has ignored, the importance of the movement. Two books have been written on the subject; but for the sake of time, the one reportedly presenting the most objective account was chosen. Other sources of information had to be foregone due to the limits of time. Among these are various newspapers published by the Delano grape pickers themselves, by other labor unions, and by smaller organizations sympathetic to labor.

Taking into consideration first the lack of thorough information, and second the limitation of time, this paper will seek to present a condensed, overall view of the movement rather than a highly detailed account.

II. THE MOVEMENT BEGINS

The Grapes of Wrath

Agriculture is California's largest industry, and grape growing is no small part of the state's total crop income. The state's grape industry gleans some $175 million per year,[1] producing 95 per cent of all table grapes grown in the United States[2] and a large amount of the country's wine grapes.

PLACE FOOTNOTE NO. AT END OF SENT. ONLY ONE WOULD SUFFICE HERE.

California's agriculture provides the most number of jobs in the state as well. Average employment on the state's farms in 1965 was 305,110; of these, 91,000 were farm owners and their families; 92,000 were hired annual workers; and 119,000 were hired seasonal workers. This compares to the national farm employment average in 1965 of 3,780,000.[3]

These healthy statistics, however, cloud the facts of wretched working conditions to which many thousands of the state's farm laborers are subjected. While agriculture is its biggest industry, California, like many other farm states, is one that "pays its workers about

PLACE PERIOD AT END.

one-sixth the yearly income of other industrial workers, that recognizes no minimum wage, that offers no holidays, vacation, sick leave, unemployment insurance or pension plan; that grants no overtime, that regularly violates the child labor laws, and that denies the right to bargain collectively." [4]

California farm workers, in a state whose median income is $6,726 per year, have a median family income of $2,000 per year, and like many poor families, often have eight or ten children. [5]

These facts apply as well to grape pickers, who do not have even a pleasant job for compensation. The fields are always hot and steamy, and workers must crouch in a wearying and straining position for hours on end to pick the grapes.

"The workers hunch under the vines like ducks. There is no air, making the intense heat all but unbearable. Gnats and bugs swarm out from under the leaves." [6]

DO NOT USE QUOTES WHEN YOU INDENT & SINGLE SP.

In addition to these conditions, the workers are seldom provided with field sanitation facilities, although state law requires that they be. Workers must often bring their own water with them, as none is provided in the field; and in some cases where water is provided, growers have

5 "Grape Pickers' Strike: War in California," Andrew Kopkind, New Republic, Jan. 29, 1966, p. 12-15.

6 John Gregory Dunne, Delano, Farrar, Straus & Giroux, New York, 1967, p. 16.

been known to charge the pickers 25 cents for a cup.[7] Poor enforcement of the state's field labor protection has resulted in much of the bitterness of the Delano grape strike.

"California has good laws covering working conditions in the fields, such as sanitation, but these have been poorly enforced. It is felt that the only way to stop the conditions is to have a union."[8]

NO QUOTES

Attempts to organize unions among California's farm laborers were not new. During the 1930's, when unions were being organized all over the country in most non-farm industries, there were sporadic and violent attempts to organize segments of California's—and other states'—farm laborers. But these attempts never achieved any success, their failure usually being attributed to resistance against their reputedly communist leadership.[9]

Aside from actual attempts to form unions, the state's farm laborers have often tried to better their conditions and get higher wages through non-union-sponsored strikes.

"Over the years, California's migrant and semiresident peasantry has waged stormy strikes against the cotton, lettuce and citrus growers, winning some wage increases, but never really reforming their dreary working conditions or gaining acceptance of a labor union. Organized only for the purpose of striking, the workers lacked the

9 Delano, op. cit. P. ?

SHOW PAGE NO.

resources for a long walkout. The huelga was different." [10]

It was different in part because it was backed by the AFL-CIO, albeit loosely.

In Delano, in 1962, a group of Filipino grape pickers (the farm workers of California, even when on the same farm, are segregated by race and nationality; the growers explain that this is because they eat different things [11]) organized the National Farm Workers Association, [12] which was to be the beginning of a long-range attempt to organize farm labor everywhere. The NFWA was backed by the AFL-CIO, but the larger union virtually ignored the farm workers, ostensibly waiting to see what they could do. [13]

But why should a full-fledged union organizing attempt begin on the grape farms? Dunne cited reasons for this.

> "...table grapes presented a greater opportunity for union organizers than any other seasonal crops. Unlike lettuce or asparagus, grapes require attention for some ten months a year...As a result, the labor force is relatively stable. There are few migrants, except during the harvest, and since the residents can put in nearly a full year's work, their income levels are accordingly higher. As the richest of the poor, they are less apathetic than migrants whose overriding considerations are the next job, the next meal, and hence more susceptible to an organizing effort." [14]

[10] Newsweek, op. cit.

[12] Business Week, op. cit.

[13] Delano, op. cit.

[14] Ibid, p. 14.

The Filipinos of the NFWA had tried since 1962 to effect reforms in their working conditions on the farms of Delano. They had petitioned and tried to talk sensibly with the growers. But since the growers refused the group's right to bargain, the NFWA had met with no success. Finally, in September, 1965, the NFWA decided to show its power by calling a strike.

Meanwhile, Cesar Chavez had succeeded in organizing the Mexican-American grape pickers of Delano. It had long been Chavez's dream to have a union for the pickers, but he had begun by organizing the community for betterment projects, including citizenship classes, voter registration, a credit union, and cooking, sewing and hygiene classes for women. Chavez envisioned a labor union some day, and knew that it would have to come via strike methods, but he felt it was several years away, possibly in 1968.[15]

When the NFWA decided to call the strike, its members felt they needed more support. The leaders approached Chavez and asked if the Mexican-Americans would join the strike. Chavez was reluctant. He felt that his group was not ready to go into union organizing or striking. But he agreed to ask the members. Although he explained that he didn't believe they were ready, the members voted unanimously to join the Filipinos, and were so enthusiastic that Chavez

15 Ibid.

for a moment lost his fears. He stood up, threw out his arms, and shouted "Huelga!" That night, there was a joyous celebration in the Mexican-American community center. The worrying could wait for tomorrow.

Huelga: Trampling Out the Vintage

The next day, the Filipinos and Mexican-Americans did not show up for work, and picket lines were thrown up at the gates to the farms of Delano and along the roads where pickers were expected to be at work. Meanwhile, leaders of the two groups tried to meet with the growers, but they were rebuffed. Growers simply refused to talk with the leaders, and as the days wore on, the growers even refused to admit that there was a strike in progress. They had a simple way of handling the problem.

Very early in the strike, the strikers ran against one of their biggest barriers, the bracero law. This law allowed farmers to import foreign laborers, usually Mexicans, for as long as they were needed. The law had lapsed in late 1964, and the NFWA strikers felt that they had good chances for an early success in the strike since the growers could not bring in foreign labor. But they did not count on the U.S. government's sympathetic ear toward the large farm lobby

of California, and to the power of California's growers. Ten months after the much-hated bracero law had been allowed to lapse, Labor Secretary Willard Wirtz, despite the strike, ordered a temporary lifting of the injunction against importing foreign labor for the grape growers of California. Some 20,000 Mexicans were promptly brought in to replace the strikers.[16]

The NFWA was furious, but virtually helpless. The coming of the Mexicans, however, had the effect of bringing almost all of the Filipino and Mexican-American grape pickers who had been skeptical of NFWA into its fold.

With so many people striking, Chavez, who was by this time the prime leader of NFWA, was desperate to find means to see that everyone was fed. He set up communal dining halls where donated food was served, and a store to hand out donated clothing and other goods. The strikers were enthusiastic enough, but some were underfed, and Chavez's attempts to get real support from the AFL-CIO and other organizations were frustrating. Equally frustrating were attempts to talk with the growers, who were still refusing to recognize the NFWA or to admit that a strike was under way.

Nor was the strike well received among the non-grower citizens of Delano. Chavez at first got much of his food and

16. New Republic, op. cit.

other goods from churches and their governing bodies. But the growers pressured the churches into cutting much of this aid off, and many churches complied with the growers' requests for fear of losing the large contributions the wealthiest planters regularly provided.[17]

Strikers were harassed by growers and their employees along the roads that bordered the fields. Growers even sprayed the picketers with insecticides, fertilizers, or rode up and down the roads on tractors to stir up choking dust clouds. Growers tried to keep secret from the strikers where picking would be done each day, and strikers would spend whole mornings driving around the farms of Delano looking for fields that were being worked. Growers also adopted the habit of moving pickers to the center of the fields when picketers arrived so the strikebreakers could not hear the NFWA workers.

One grower was able to obtain an injunction prohibiting the strikers from shouting at the Mexican pickers, but the NFWA appealed, and a higher court struck down the injunction.[18]

Delano had not at first totally rejected the NFWA's demands. When the group was merely trying to bargain for

17 Delano, op. cit.

18 Ibid.

higher wages and enforcement of the laws, most townspeople were sympathetic. The complaints of low pay and poor or non-existent sanitation facilities were "grievances that some quarters in Delano were willing to consider legitimate—until Chavez also demanded that the growers recognize the NFWA as bargaining agent for all the field workers in the area." [19]

Cries of "communism" began to be heard from the residents, but the NFWA was at least successful in convincing the people of the town quite early that the union was not communist-led or inspired.

> "Unlike earlier attempts to arouse California farm laborers, this one has succeeded in avoiding accusation of communist infiltration." [20]

But if the NFWA was spared that accusation, it was spared little else. Besides the harassment of picketers, growers and other unsympathetic townspeople did everything in their power to prevent any outside help to the strikers, while continuing to maintain publicly that there was no strike. Catholic clergymen who came to Delano to help the predominantly Catholic strikers were in many cases reprimanded by their superiors, who had been threatened with loss of the growers' contributions.

19 Ibid, pp. 22-23

20 Business Week, op. cit.

One of the priests, Victor Salandini, a local resident who tried to help the strikers, was sharply reprimanded by his bishop. Others were told to cease trying to help the NFWA or risk being sent to unpleasant posts. A writer in a large-circulation Catholic magazine cited this oppression of clergymen who wanted to help the strikers as one reason the NFWA was forced to turn to outsiders, and were in turn accused of bringing in "outside agitators."

> "When moderate critics such as Salandini...are effectively silenced and prevented from playing the role of local opposition, it appears specious at best when the growers cry 'outside agitation.' When, as happened in the Imperial Valley in 1961, hundreds of growers and their allies were deputized and roamed the area with shotguns across their arms, it should not be surprising that the local people asked support from outside." [21]

It did not seem that the pickers were asking so much, the growers and townspeople claimed. What aroused their ire was the idea that the growers, along with granting higher wages to the pickers, should also recognize a union. Besides enforcement of the state's field labor laws, the pickers were at first asking a rather small pay raise which would grant them a minimum of $1.40 per hour plus 25 cents per basket. The pre-strike rate was $1.10 per hour plus 10 cents per basket. [22]

21 "The Church and Delano," Jerome Wolf, Commonweal, April 29, 1966, p. 168-169.

22 New Republic, op. cit.

Why should the growers so stubbornly fight organization of their pickers? Although labor has historically had difficulty organizing unions, James P. Degnan feels there is more to it than that.

> "The most vehement opposition to unions comes from the richest and biggest growers...Many of the smaller growers are actually in favor of the union; and a few have quietly helped Chavez and the NFWA." [23]

Degnan presents an interesting reason why the biggest growers should fight the hardest against the NFWA, and it is not the reason that they would have to pay out more wage money. Quoting Dr. Paul Taylor, emeritus professor of economics at the University of California, Degnan explains that the largest growers have a monopoly on the land, and they fear that organized unions with lobbies in Congress might bring about Congressional investigations of the land monopolies in California. [24]

This is not a publicly-stated argument, naturally. What the growers say publicly about their reasons for not recognizing the union include the same groundless arguments used by factory owners in the 1930's.

> "The growers argue that unionizing workers is senseless in the face of increasing mechanization on the farms and, in fact, unions will only encourage automation. Cesar Chavez... recalls that the same arguments were used in the 30's by automobile companies to discourage Walter Reuther's efforts to organize the auto workers." [25]

23 Nation, op. cit.

24 Ibid.

25 "Squeezing California's Grape Growers," Joseph F. Gagen, Commonweal, June 14, 1968, p. 374.

Outside help at first, aside from the clergy, came mostly from civil rights workers, including members of the Student Nonviolent Coordinating Committee, and from Berkely radicals.

> "With its ethnic-minority flavor, grass-roots origins and seemingly clear-cut moral stance, the strike quickly captured the fancy of middle-aged, middle-class liberals in California and young activists of the New Left; it also won the support of church and labor groups." [26]

Hence the accusations of "outside agitation." But Chavez, finally recognizing that outside help was not enough so far, and that government help as well as national attention was needed, decided on a dramatic move pattered after the 1964 Selma march. Strikers would march to the capitol at Sacramento, arrive on Easter Sunday, 1966, and hopefully would have the governor and other top state officials to speak along with labor union and church leaders.

Also, shortly before he hit on the idea of the Sacramento march, Chavez had decided that some of the growers must be boycotted. Strikers were sent to large cities around the country to get support for a boycott of Schenley's liquor to begin with, the company farm at Delano being one of the largest. The Schenley boycott was the initiation of boycott tactics which continue to the present in the grape strike.

Several hundred strikers set out for Sacramento three weeks before Easter Sunday, accompanied by the press and filmed by network television cameras. Along the way, they picked up

26 Newsweek, op. cit.

sympathizers and more press. The march was joyous and had a distinctly religious flavor, again similar to the Selma march.

Three days before the marchers reached Sacramento, Schenley's capitulated. The arrival in the capital was ecstatic, although Gov. Edmund G. (Pat) Brown had refused to come, stating he had a prior commitment to spend the holidays with his family at Frank Sinatra's house.

The march was hailed as a definite success and huge moral victory. The nation had viewed the strikers at the capitol rally on television and had read of the march in newspapers and magazines. And the march gained for the NFWA more members; the post-march membership rose to 3,000 families.[27]

And Walter Reuther, who had been at Sacramento for the arrival of the marchers, followed the strikers back to Delano to promise $5,000 in United Auto Workers union funds per month for the NFWA.[28]

The first successes had come. The NFWA now felt it could go on, that the goals were in sight, not just the immediate gains of higher wages and better working conditions, but full realization of Chavez's dream.

"Chavez's idea is not primarily to win small benefits or even long contracts. He is out to develop a community of

27 "March of Migrants," Life, April 29, 1966, p. 93-94

28 "Labor Comes To Life In the Grape Fields," New Republic, April 23, 1966, p. 6-7.

farm workers, and his methods are more like a civil rights worker's in Mississippi or a ghetto organizer's in Chicago than a union leader's." [29]

[29] Kopkind, New Republic, op. cit.

III. THE MOUSE THAT ROARED

"Viva Huelga! Viva Cesar Chavez!"

Cesar Chavez is a man of the people he serves. Along with other "Okies," his family came to California in the dry and hungry 1930's, following the rumors of work. During the depression, when there was no work, Chavez and his brother fished and gathered wild greens, or looked for tinfoil to sell to get shoes and sweatshirts. When there was work, it often cost the family more money for transportation to the job than they earned in one day.

Chavez doesn't remember how many schools he attended, but he got about as far as the eighth grade. He desired more education, but was forced to work instead of going to school, so that the family could eat. He satisfied himself with reading as much as possible and learning what was going on around him.

When in his early twenties, Chavez was hired by a community organization agency to organize Mexican-American groups in areas of California for welfare rights, voting registration, adult education, and community betterment. He spent some ten years with this group, learning how to organize communities. It was in these years, seeing the poor conditions under which most farm laborers lived and worked, that he developed his dream. He quit his job with the agency to go home to Delano to organize his people.

Neither was Chavez a stranger to ethnic prejudice in California as one of the barriers to bringing Mexican-Americans into the mainstream of American life. As a sailor during World War II, he was once arrested while home on leave in Delano for sitting in the "white only" section of a movie theater.[30]

A mild-mannered and soft-spoken man, he is nevertheless persuasive and his influence is extensive. He has become a symbol, a near object of worship to his followers, while at the same time trying to fend off any personal praise or attention. A strict believer in nonviolence, he has used his strong influence to keep the strike as nonviolent as possible. When violence has broken out, he has been quick to act to try to stop it. Once after a particularly fierce attempt to carry the strike to the Coachella Valley, where violence erupted on both sides, Chavez went on a 30-day fast to remind his followers of his nonviolent feelings.

Although at present he is somewhat in check, since the more experienced organizers of the AFL-CIO have taken the grape strike in hand, he still remains as the symbolic leader of the movement, and is usually given most of the credit for its limited success. His duties now are mostly of speechmaking and negotiating, but he is still greeted with those enthusiastic shouts of "Viva Cesar Chavez! Viva Huelga!" wherever he goes.

30 Nation, op. cit.

"Don't Buy Grapes!" (I)

The boycott of Schenley's that had begun before the march to Sacramento had been a tremendous victory for the NFWA. The strikers saw it as the first breakthrough in a long chain of grower capitulations that would have to take place. They felt strengthened and powerful.

The surrender of Schenley's, which owned 12,400 acres in Delano, was also looked upon by outsiders as an important victory for the NFWA and as a highly significant event, even "a historical landmark in the struggle of migrant workers and settled field laborers." [31]

The tactics of the Schenley boycott were practice ground for the methods which would be used throughout the rest of the strike.

> "...pickets were thrown around supermarkets which carried Schenley products; two million pledge-and-protest cards were distributed around the country; sixteen NFWA workers were dispatched, with $75 each, to the 16 largest U.S. cities to set up boycott offices. Outside sympathizers set up 117 committees to spread the boycott word." [32]

After the boycott began, Schenley's stock slipped eight points on the New York Stock Exchange, and the company gave in mostly because of the bad publicity it had received. [33]

31 Editorial, Christian Century, April 27, 1966, p. 515

32 "Labor Comes To Life In the Grape Fields," New Republic, op. cit.

33 Ibid.

Schenley's Delano farm agreed to recognize the pickers' right to bargain collectively for a contract.[34] With this success firmly behind it, the NFWA then began a boycott of the products of another company which had a large farm in Delano, the DiGiorgio Corporation.[35] A national boycott of DiGiorgio's S & W Foods and TreeSweet fruit juices was initiated, and Christian Brothers Farms in Delano promptly recognized the NFWA for fear of being next.[36]

With this, staid Business Week announced that "California's $3.5 billion agricultural industry watched with stunned apprehension" the union's successes.[37]

Success also brought more support from the AFL-CIO. In August of 1966 the NFWA went out of business, merged with the AFL-CIO's Agricultural Workers Organizing Committee, and formed the United Farm Workers Organizing Committee—UFWOC.[38]

From the spring of 1966 until the spring of 1968, the union went on to make gains of contracts with the smaller growers, but most of the biggest ones continued to hold out.

The UFWOC and its supporters began to lobby to have farm labor included in the 1935 National Labor Relations Act

34 Ibid.

35 Ibid.

36 Ibid.

37 Business Week, op. cit.

38 New Republic, Letter to Editor from William L. Kircher, Director of Organization, AFL-CIO, Jan. 6, 1968, p. 46-47

which stipulates that "most industrial employers must bargain collectively with their workers if a majority of the workers prove they want to bargain, and then must sign a contract with the workers' union. But farm employers have managed, thanks in part to a powerful lobby, to remain exempt from the law since it was enacted in 1935." [39]

A "Benchmark Exemption"

If farm workers had been included in the NLR Act in 1935, the grape strike would never have had to happen. Nor would the United States have so many poverty-stricken farm laborers. Without the right to organize, they cannot even receive decent wages; planters can get away with paying farm workers the lowest amount possible. Congress could help by requiring that farm labor be paid the national minimum wage, but again the powerful farm lobby has prevented this legislation every time it has been introduced.

But why is it that so large a bloc of the American working class was excluded from such an important bill, the 1935 NLR Act?

"The ostensible reason was that farm workers are not engaged in interstate commerce, but the actual power of farm state solons stymied any real discussion of the farm problem. Ever since, the farm lobby has used this benchmark

39 "La Huelga Becomes La Causa," Dick Meister, New York Times Magazine, Nov. 17, 1968, p. 52-109

exemption to frustrate any minimum-wage or collective bargaining legislation designed to benefit farm workers." [40]

Can a lobby be so powerful? The answer seems to be that it can, with the aid of Congressmen from farming states, whose campaigns are often well supported by wealthy planters. In addition, there has been no farm workers' lobby in opposition or no unit of Congressmen to speak for farm workers until the past few years. UFWOC now has a lobby, but it is not yet powerful enough to overcome the farm owners' lobby. Dunne is not the only observer of the strike who blames the farm lobby for keeping farm laborers out of the NLR Act.

"It is probably true that the powerful farm lobby has prevented farm labor from being included in the National Labor Relations Act. It was included in the original bill but for reasons which have never been made clear, it was later taken out, possibly with the intention that it would be replaced. It never has been." [41]

Apparently through some cloakroom maneuvering, farm labor was cheated out of the rights of other workers 34 years ago, and now must struggle for those rights as if no one had ever thought to include farm workers in the NLR Act.

"It may be, as Chavez himself has recently said, that what is most needed now is federal legislation to extend collective bargaining rights to farm workers, a protection given to non-agricultural workers under the National Labor Relations Act of 1935. As matters currently stand, an incipient farm union has to struggle with an employer not

[40] Delano, op. cit., p. 100-101

[41] Dr. Smith interview

only for improved working conditions but for that right of recognition which unions in most industries can assume." [42]

In addition, UFWOC is forced to lobby for the final death of the periodically resurrected bracero law. With growers in California able to bring in Mexicans to work the crops, and with UFWOC members unable to induce many of the Mexicans not to work, the fact of the strikers not working has had little effect on the growers. It was mentioned earlier that growers were able to convince the government to temporarily lift the ban on bringing in foreign labor.

"Agriculture is the only industry which has demanded that the government supply it with a captive foreign-labor force when American citizens have refused to accept the appalling wages and conditions that industrial farming offered them." [43]

Partly due to exclusion from the NLR Act, partly to the bracero law, and partly to violence in the Coachalla Valley strike attempt, the UFWOC's tactics went into transition.

"Don't Buy Grapes!" (II)

By March of 1968, UFWOC had forced nine of the largest of Delano's growers to give in, including DiGiorgio Corporation, and had obtained some important wage raises.

[42] "Grapes of Wrath," Martin Duberman, New Republic, Dec. 2, 1967, p. 23-26

[43] Nation, op. cit.

"The movement...has been unexpectedly successful in its attack on the grapes-of-wrath misery to which pickers, mostly migrant workers, have been subjected for generations. Thus far, nine growers--most notably Schenley Industries, the Gallo Winery, Christian Brothers and the DiGiorgio Corp.--have signed contracts with the NFWA (UFWOC), elevating a laborer's average pay from $1.10 an hour to a minimum of $1.75. Other benefits such as medical care have also been won, along with more habitable work camps for the men and women who once lived in tar-paper shacks, battered buses, overaged trucks, in haystacks or under bridges." [44]

The contracts stipulating a minimum of $1.75 an hour were higher than what UFWOC had asked in the beginning, and with such successes behind it, the union decided in June of 1968 to spread its wings. [45]

Organizers would go to the Coachella Valley, the southern part of California's farming valleys, where the picking season began. The season went up the valleys every year to the Delano area, and UFWOC planned to follow the season.

But unexpectedly, violence broke out on both sides. Beatings, shootings, bomb throwings and fire settings against the camps of both growers and strikers occurred almost uncontrollably. Abruptly, Chavez called a halt to the Coachella Valley organizing and went on his famed 30-day fast to reinforce his belief in nonviolence. But the abortive attempt taught UFWOC two very important things:

44 "Cesar's War," Time, March 22, 1968, p. 23.

45 "Seething Vineyards," Newsweek, July 8, 1968, p. 62.

"The Coachella Valley experience has proved once again that California's table-grape growers will never accept an organized work force so long as the green-card (bracero) system provides a ready supply of cheap, docile labor to take the place of domestic workers who prefer to work as members of Chavez's UFWOC. This explains the vital necessity of UFWOC's two-pronged drive: to put pressure on Federal authorities to do something about the system that permits green-carders to be used as strike-breakers, and to convince the American public to back the nationwide boycott of table grapes until the battle for justice is won." [46]

"...when violence broke out, it (the Coachella Valley attempt) was curtailed. This also put an end to strike activities for that season. When the next season began, the whole activities were directed toward the national boycott. There is now no actual strike in the form of a work stoppage." [47]

The decision to change tactics from work stoppage to national boycott was mostly Chavez's. With his nonviolent attitudes, he had despaired of reaching UFWOC's goal peacefully, or of arousing the conscience of the nation and of Congress by ordinary strike methods. UFWOC members are now working, mostly on the farms which have granted contracts. The union's leadership is running the boycott.

"The activity is totally directed toward the boycott now. You can't have a strike when they keep bringing in scab labor." [48]

[46] "More Grapes of Wrath," Victor Salandini, America, Aug. 17, 1968, p. 104-105

[47] Dr. Smith interview

[48] Mrs. Lou Becker, chairman, Atlanta grape boycott organizing committee, in interview Feb. 18, 1969

Today Delano, Tomorrow the World

With renewal of nationwide boycott efforts, UFWOC set out to boycott only the grapes of the growers who had not yet agreed to bargain with the union. The largest of these, indeed the largest grape grower in California, was Giumarra Corporation.

When UFWOC had finally been successful in convincing the government that braceros should not be brought into California because a strike was on, the temporary reinstatement of the law was lifted. But Giumarra, apparently through some handy political maneuvering, somehow finagled to get a court order in June of 1968 that "temporarily prohibited U.S. authorities from enforcing the law against the importation of Mexican laborers...into fields where a labor dispute is in progress." [48]

With this, indignation of outsiders mounted. California's hitherto reluctant Catholic hierarchy finally jumped into the fray in June and issued a resolution urging inclusion of farm workers in the NLR Act. [49]

Just when the boycott of Giumarra's grapes began to be successful, however, even though the company was using braceros to get its work done, Giumarra arranged with other growers to

[48] "Seething Vineyards," Newsweek, op. cit.

[49] "California Bishops and the NLRA," America, June 15, 1968, p. 764

use their labels on its grapes. In the face of this blatant deception, Chavez was forced to order the boycott of all California table grapes.[50]

But why involve all grape growers?

> "...In one way, the growers brought it on themselves, by allowing Giumarra to use their labels on some of the containers the corporation shipped to market, in an attempt to hide them from strikers. But they would have been involved anyway; the union was faced with nearly insurmountable problems in trying to single out one grower among many who shipped grapes to the same stores. 'It was the only way we could do it—take on the whole industry,' says Chavez. 'The grape itself had to become a label.'"[51]

And become a label it did.

In June, UFWOC was contending against 23 other grape growers besides Giumarra.[52] The union began to take its case not just to the country, but to the world.

> "Overseas, the boycott is now becoming quite successful. The London and Stockholm dockworkers are refusing to handle ships that are carrying California grapes. Transport workers in most European countries have voted to blockade grapes. On February 11, (1969) the International Transport Workers Association issued a request to all affiliate organizations to begin boycott and blockade actions wherever possible. This has already begun. Two major steamship lines have refused to carry California grapes. The thing spreads more every day."[53]

By late June, table grapes had "almost disappeared" from the New York market, through which 20 per cent of the grapes had moved, and also from Boston.[54] The growers then began a

50 "Seething Vineyards," Newsweek, op. cit.

51 New York Times Magazine, op. cit.

52 "Squeezing California's Grape Growers," Commonweal, op. cit.

53 Mrs. Becker interview

concerted effort to ship grapes into areas where they had seldom before been shipped in such quantities, particularly Southern cities such as Atlanta, Nashville, and Miami, which received an estimated three times as many grapes as they had before.[55]

In Atlanta, after a beginning which seemed nearly hopeless, boycott organizers were able to convince grocery store unions and Teamsters union members who delivered to grocery stores to put pressure on store managers not to sell grapes. The organizers felt it was better to convince the stores not to sell the grapes than to try to convince the public not to buy them. Pressure from unions connected with grocery stores was effective.

> "The five major grocery chains in Atlanta, which represent 80 to 85 per cent of the grocery market in the area, have stopped putting grapes on the shelves. Nashville is the only other Southern city where the boycott has been effective, except for some success in Miami. It has not yet spread to the rest of the South, but efforts will begin in the spring to do this. The success in New York is slipping, but boycott efforts will be renewed there in the spring, too. And all of Michigan is now grapeless due to the efforts of a senator."[56]

Mrs. Becker added the information that one of the five chains with regional offices in Atlanta has agreed to sell no grapes in any of its stores in Georgia.[57]

55 Dr. Smith interview

56 Ibid.

57 Mrs. Becker interview

Yes, But Will It Work?

The boycott of summer 1968 is considered a great success, possibly costing the growers $2 to $2.5 million.[58] It was termed "possibly the most extensive boycott in American history."[59]

The pay of the grape pickers is "up considerably" to a base of $2.55 per hour at present, with bonuses often making the total $3 per hour. Workers' contracts also provide "some of the first" employer-paid holidays, vacations, pensions and health-care services in the history of farm labor, and among other things, require growers to provide nonprofit housing, field toilets, drinking water, and tools.[60]

UFWOC, however, realizes there is still much work to be done.

> "However unprecedented, the concrete gains of the farm workers have been relatively slight: eleven contracts or union-recognition agreements from the 100 or so growers involved, covering only a few thousands of California's 300,000 farm workers; and, because of strike pressures, an increase of about 25 cents an hour in the base pay of most vineyard workers."[61]

The activities of UFWOC are expensive, and must be supported by the AFL-CIO and whatever outside help Chavez can get for his workers who are not working in the fields. The union needs $50,000 per month to house and feed the strikers. In March of 1968, the AFL-CIO was providing $10,000

58 New York Times Magazine, op. cit.

59 Ibid

60 Ibid

61 Ibid

per month and the United Auto Workers $7,500 per month.[62] Total AFL-CIO support to UFWOC had reached $2 million by January of 1968.[63]

The main holdout is Giumarra, but "if he goes, so will they all go."[64] Mrs. Becker stated the same opinion.[65]

UFWOO is conducting the boycott as if it were a foregone conclusion that it will be a total success ending in the capitulation of Giumarra and the rest of the growers, or that first it might result in the inclusion of farm workers in the NLR Act. This success, however, is not certain.

> "It is unknown whether this will be successful. They (the growers) can store grapes up to six months, and they now have a lot in storage. We do not know whether this is due to the boycott or simply a large crop. But we are working from the tenet that it will be successful. If it is not...well, I don't know what tactic would follow."[66]

It could be that growers will flood the market with grapes now in storage, or could hold as many grapes as possible in hopes that UFWOC will collapse or give up the boycott before the grapes are spoiled. Mrs. Becker, however, is confident that the growers will give in.

> "I think it is very possible that the boycott will be a success. It is to the growers' own best interests that the pickers be organized. They will save more money by allowing them to organize. When it hits them hard enough in the pocket, they'll give in."[67]

62 "Cesar's War," Time, op. cit.

63 Kircher letter to Editor, New Republic, op. cit.

64 Dr. Smith interview

65 Mrs. Becker interview

66 Dr. Smith interview

67 Mrs. Becker interview

The strikers, too, seem confident. They believe they have "enough momentum now to win the growers' acceptance." [68]

The renewed boycott drive is already under way. It began with an attempt to persuade union workers of other countries to blockade and boycott California grapes. Organizers in the South hope to spread the boycott over the entire region this year, and a planning meeting is scheduled here in Atlanta Feb. 28-March 2 for that purpose. [69]

With the boycott, UFWOC has shown itself to be something different, a new kind of union, and has demonstrated that this new kind of union can be effective for its members.

> "It is far from the individualistic idea the unions had half a century ago. The end of the process was simply to give workers a leg up to the middle class, and be done with them. The new way is quite different—to give workers a decent income and all the while build a society in which they can participate in the decisions which will affect their lives. As it is now, they must leave those decisions to the growers." [70]

[68] "Labor Comes To Life In the Grape Fields," New Republic, op. cit.

[69] Mrs. Becker interview

[70] "Grape Pickers' Strike: War In California," Kopkind, New Republic, op. cit.

IV. "IT IS NOT THE BEGINNING OF THE END; IT IS NOT EVEN THE END OF THE BEGINNING." [71]

The Springboard

The successes of UFWOC have given rise to hopes in the AFL-CIO, among other farm laborers, and among sympathizers to labor, that perhaps at long last farm labor can be unionized everywhere in the United States.

Before UFWOC, there had been little hope that this would occur in the foreseeable future. But UFWOC has pointed the way, has showed that it can be done and how it can be done; and has raised such a clamor that farm labor can no longer be ignored.

According to Chavez's dream, when the goal of the grape pickers is realized, his workers will spread out to farms everywhere to organize unions for the workers. [72] This will still be necessary even should Congress at last place farm labor under the provisions of the NLR Act, for the mere right to bargain collectively does not insure that unions will be automatically formed. Most of the South's cotton mills, for instance, have never been unionized although the millworkers have had the right to bargain collectively since 1935.

Most observers agree that on the grape strike hinge the

[71] Cesar Chavez, as quoted in Delano, op. cit.

[72] Dr. Smith interview

the possibilities of organizing all farm labor in the country, however long it might take.

> "What heppens in the grape arbors of California will have a delayed but inevitable effect on workers in the cotton fields of Texas, the beet farms of Colorado, the fruit groves of Michigan and Wisconsin." [73]

> "The attempts to organize farm workers from New Jersey to California, almost all of them dropouts from the Great Society, currently hinge on the outcome of the grape strike—the first real chance of a breakthrough that many disillusioned workers believe the growers will not allow to happen." [74]

Mrs. Becker concurred strongly with this theory, but added that the important thing is to get farm workers included in the NLR Act. She stated that supposing the grape strike is successful and peach pickers then wanted to organize, "we'd probably end up with a peach boycott" unless the pickers first had the right to collective bargaining. [75]

The grape pickers, said one writer, have laid a solid foundation for farm unionization and "they are not about to quit." [76]

And since the voices of those who would unionize farm labor are no longer going unheard, the possibility that farm labor everywhere might be unionized reaches into many aspects of American life.

73 Christian Century, op. cit.

74 "The Grape Strike," Commonweal, Jan. 28, 1966, p. 491

75 Mrs. Becker interview

76 New York Times Magazine, op. cit.

"The grape pickers' strike can have political as well as economic and social ramifications. What began no bigger than a grape picker's hand begins to take on the dimensions of a sociological and political cloud." [77]

Some Hopes and Some Fears: Conclusion

While Giumarra and the other holdout grape growers have steadfastly claimed that they will lose profits if their workers are unionized, that they are so squeezed now they cannot possibly spend any more money, that unionization would be the end of the growers, and that anyway the workers don't need a union because the growers pay them well enough, UFWOC's membership has grown to 17,000. Since the bracero law lapsed in December, 1964, California's agricultural income has increased from $3.7 billion to $4.08 billion, and the per farm net income has increased 14 per cent over the 1960-1964 average. [78]

In addition to what national attention the strike had already received, it became a campaign issue in 1968, and was taken up most enthusiastically by the late Robert Kennedy and by Eugene McCarthy. After the nomination, Hubert Humphrey and Edmund Muskie also voiced support for UFWOC and farm labor unions in general.

"This is a crucial development, for political action is essential to Chavez's strikers. Like the industrial workers of the nineteen-thirties, they need the protection of the National Labor Relations Act to allow them to win what they

[77] Christian Century, op. cit.

[78] Delano, op. cit., p. 170

are struggling for on the picket line by simply casting a ballot in a union election or signing a union authorization card, and they need a law to protect them from 'green card' strikebreakers."[79]

But how likely is it that such laws will be passed? A bill introduced in Congress last year that would have given farm workers the protection of the NLR Act was not even voted out of committee. Senators Ted Kennedy and Fred Harris are strongly in favor of the bill, but it is unknown what their—or any other Congressman's—plans might be to reintroduce the bill this year. The strikers hope this year's even more extended boycott will convince Congress that the farm laborers have support and the weight of public opinion behind them, and will induce the lawmakers to act accordingly.[80]

The AFL-CIO has been lobbying for the NLR Act legislation "very actively and aggressively." Union president George Meany has appeared before Congressional subcommittees and high administration officials "as many or more times in the last year on this matter than on any other single item of legislation except Social Security."[81]

Despite its efforts, however, the union has not been able to get a promise of action or even an attempt at action. It would seem that the AFL-CIO needs the backing of the public to get results from Congress. Whether this support will come depends, as noted, on the success of the boycott. As recently as December, 1967, however, one writer held out little hope for

79 New York Times Magazine, op. cit.
80 Dr. Smith interview
81 Kircher letter to Editor, New Republic, op. cit.

this.

> "...the most direct tactic for achieving the unionization of farm laborers may be to pressure Congress into amending the National Labor Relations Act so that agricultural workers will be included under its collective bargaining guarantees. Such a campaign is unlikely to develop. There is too much distrust on the Left of federal programs and bureaucracies, too little interest on the part of organized labor, too negative a mood in Congress." [82]

Nor does the change of administration bring hope to the union. Chavez is reported to have resigned himself to at least another four years of inaction by Congress and of having to depend on the union's efforts alone—that is, success of the boycott, which still does not offer much hope to other farm laborers. Chavez claims that President Richard Nixon will neither initiate nor encourage legislation to stop the bracero system once and for all, or to include farm workers in the NLR Act. Nixon outraged the strikers and their supporters by "gleefully" popping grapes into his mouth during a campaign political rally in California. [83] Thus the reason for the protest signs greeting Nixon throughout the rest of the campaign with "Nixon eats grapes."

The future, then, is at the same time hopeful and bleak. Hopeful, because for the first time some farm labor has been unionized somewhere, a thing once deemed impossible; bleak because of the strength of the growers, the power of the farm lobby in Congress, and the difficulty of arousing the American public to support the cause.

82 "Grapes of Wrath," New Republic, op. cit.

83 New York Times Magazine, op. cit.

The grape strike is a drop in the bucket, a mere snowflake in a vast furnace, a small match flaring in a bottomless well of darkness; but it is there, nevertheless. It is too late for it to be stopped completely. The bucket will fill drop by drop, the snowflakes will gradually cover and cool the furnace, and somewhere a light will gleam at the bottom of the well. The ball is in motion, it gathers momentum, and it is toppling the biggest obstacles placed in its path.

> "Some day the strike at Delano will end. What a pity—and what an insult to human dignity—that it ever had to be called." [84]

UNCLE SAM GLADLY refunds taxes paid in error, he says, but holds his own in court.

Few taxpayers have doubted the IRS's zeal in nipping off every tax dollar due the Government. But are the taxmen as diligent in discovering overpayments and sending the money back? Yes, indeed, assures Commissioner Thrower. In fiscal 1969, he says, the IRS returned $140.2 million that had been paid in error by two million taxpayers. That's up a whopping 49% from the $94.3 million sent 1.5 million taxpayers in fiscal 1967.

Other figures show that the Government has a pretty good record in winning tax money it considers due. According to recent Congressional testimony, the Tax Division of the Justice Department wins three out of four cases it takes to court. In the Supreme Court, the Government batted .700 in tax cases in fiscal 1968.

* * *

TAXES IN THE SOUTH weigh heavily on the poor, the Southern Regional Council says.

"Southern states (1) have lower incomes, and (2) out of lower incomes, take a higher share in regressive taxes than the average state," concludes the Atlanta-based council, best known for its voter registration and civil rights work. In every Southern state except Texas and Virginia, the sales tax bite exceeds the national average of $32.08 per $1,000 of personal income. In Mississippi, the figure is $57.72, and the levy raises 78% of state tax receipts. (Sales taxes are usually termed regressive because the poor spend a larger part of their income on items taxed.)

The council finds the income tax "of major importance" only in Virginia and North Carolina. Southern states rely less on income taxes and levy them at less progressive rates, it says. Lacking other sources, many Southern localities are forced to depend heavily on user charges and fees.

The "outmoded tax structures" leave many Southern states unable to deal with "a host of unmet public needs," the council declares.

* * *

EXPENSE ACCOUNTS have a higher ceiling now. An employe who gets a fixed per diem for travel, entertainment or gift expenses isn't required to account in detail for the outlays unless the per diem exceeds the higher of $25 or

discovery. Their nets quickly became fouled with oil and tar—thick sticky globs up to three inches in diameter. Day after day along a 630-mile stretch they cleaned the nets with solvent only to see them gum up again a few hours later. Finally they abandoned the project in disgust because they were picking up three times as much oil as seaweed.

It wasn't an isolated incident. "Just in the past few years we're finding we can't sail anywhere in the Atlantic—even a thousand miles from land—without finding oil," says Howard Sanders, senior scientist at the Woods Hole Oceanographic Institution, which operates the Chain.

Threat to Marine Life

As the vessel's unhappy voyage suggests, world-wide oil pollution—even diluted by the ocean's vastness—is nearing crisis proportions. Beach-goers in such widely scattered spots as the New Jersey shore, Bermuda, the Riviera and the Red Sea complain of gooey black lumps of jellied oil that frequently wash up on shore. Floating oil spills—almost always of unknown origin—each year kill many thousands of seabirds in North Atlantic and Mediterranean waters, according to surveys by conservationists. Indeed, scientists believe the growing quantity of oil dumped into the sea is threatening marine life of all sorts—and perhaps man as well. The oil industry itself is exhibiting mounting concern.

Where's all the oil coming from?

Ships that routinely discharge oil wastes at sea are the biggest offenders, pollution control experts agree. Tankers, for example, wash out their cargo tanks with salt water after each load. Not infrequently, the washings—along with a heavy residue of oil—are dumped into the ocean. Moreover, passenger liners and freighters often fill their empty fuel tanks with water for ballasting purposes. This highly contaminated mixture is always pumped overboard before the ships enter port to refuel. And vessels of all types normally discharge oily bilge sludges over the side.

Other major sources of unwanted oil include spills from manufacturing plants, refineries and oil terminals. In Boston Harbor alone, a spill of several tons of oil can be expected every three weeks, according to officials of the Massachusetts Division of Natural Resources. Seepage from offshore drilling rigs and spills from wrecks of oil barges and tankers also add to pollution levels.

A Day-to-Day Problem

In recent years, a few widely publicized disasters—like the grounding of the supertanker [illegible] off Britain and the blowout of a

5 Forsyth Street, N. W.
Atlanta, Georgia 30303

Dear Emory:

As one of the leaders who made such a tremendous contribution to our OEO Labor Training Conference at the Flagship Hotel in Galveston, Texas, you will be pleased about what one of the trainees told his fellow delegates.

Rising to his feet in Friday's general assembly, he faltered, saying in effect: "I may be out of order, but last night I got to thinking what this conference has done for me. Here we are together, Negroes, whites, Mexican-Americans. We have lived together for a week, worked together, eaten together, and had a good time together. Men and women from different unions, different kinds of communities and different states. What we have proved is that we have become a united force, and if we can weld this force together when we get back home, God Almighty, what we can do for the poor!"

To me, this speech demonstrated that you along with the other distinguished leaders, had really communicated and that together we had achieved the purposes of the eight day seminar. You have helped us off to a running start and I am extremely grateful for the valuable part you played in making this program the success it was.

Cordially yours,

Jim

Dr. Emory F. Via, Director
Labor Program
Southern Regional Council
5 Forsyth Street
North West Atlanta, Georgia 30303

Dear Emory:

Enclosed I am sending some material on our labor training program and on the Flagship Hotel where the meeting will be held from January 4th through the 11th.

Earl Williams and I are delighted, of course, that you will be able to free your calendar to help us during this important residential training period.

As we discussed it by telephone, we want you to speak on Wednesday evening on The Victims of Welfare in the eight state region. In your address, we hope you will give particular attention to the welfare trap which Silberman, in his book, Crisis in Black and White, called welfare colonialism. The way in which you approached this for the Southern Labor School seems to be quite appropriate for our trainees.

In addition to this, you know that your major role will be as a discussion leader for the group from Mississippi. There will be ten people here and they, hopefully, will cover the various central bodies over the state. I gave you a list of these, as you recall, by telephone; and, as soon as we get more specific date I will send this to you also.

For your contribution, the University will be able to pay you a modest honorarium of $400.00 for the eight days plus your travel and a per diem of $16.00. Earl and I both are apologetic for such a small amount, but in view of the budget cuts which were made by the OEO, this is all which we can pay at this time.

I personally am looking forward to renewing our acquaintanceship after all of these long years in between and getting to know more about you and your family.

With best wishes!

Very truly yours,

James R. Noland
Project Coordinator

Mr. Emory F. Via, Director
Labor Program
Southern Regional Council
5 Forsyth Street, N.W.
Atlanta, Georgia 30303

Dear Emory:

I hope that you have had a very merry Christmas and that the New Year will bring you prosperity and good health.

Every day brings us closer to our OEO Labor Training Seminar to begin in Galveston on the 4th of January. We are certainly keyed up and looking forward to the significant role which you will play as a discussion leader and as a speaker.

In addition to what we have discussed in the past, we have one additional assignment for which we need your leadership. On Friday afternoon, we will be talking with the trainees about what to do when they get back home. Beginning at 3:35, we have built in a two hour panel and discussion period, focusing on the five following areas:

1. How to help the poor locate and use community resources;
2. The role and function of an OEO Committee and Central Body;
3. How to work in CAP as a volunteer committeeman or board member;
4. Educational programs in the local union;
5. Specific projects for local unions.

Emory, we would like to have you take the fifth subject, "Specific Projects For Local Unions." Please plan to take about eight to ten minutes to elaborate on your subject and then allow three or four minutes for group clarification and response. After the entire panel has completed its presentation, there will be another opportunity for further questions addressed to the total group.

After you arrive in Galveston, it may be that it would be helpful for the panel members to get together one evening to do some advanced planning. Other members of the panel will be Jim Nelson, Bob Winn, Bill Kemsley, and George Guernsey.

Should you have any questions, please call me, reverse at 748-6600, Extension 1137. In the meantime, we will be looking forward to seeing you at our ten o'clock staff meeting on Saturday, January 4, if not before.

Very truly yours,

Jim

Saturday Review 9/20/69

Southern Labor School

The Politics of Resegregation

by GARY ORFIELD

A year ago it seemed that this September would bring the decisive victory against school segregation in the South. Southern school administrators, facing a firm deadline set by the Johnson administration in October 1967, resigned themselves to the inevitable, and prepared belatedly to accept the law of the land. The growing willingness of Southern educators to abide by the Civil Rights Act of 1964 was an immensely hopeful sign. Now, however, political decisions made by the Nixon administration have jeopardized that hope and the educational future of the Southern black population.

When, on July 3, the administration announced the revision of the guidelines governing school desegregation, it was clearly a victory for South Carolina's Senator Strom Thurmond and his segregationist allies. And when last month the Legal Defense and Education Fund of the National Association for the Advancement of Colored People broke publicly with federal civil rights officials over a delay in Mississippi desegregation, it was the result of months of drift toward the Southern point of view by the administration.

The school desegregation guidelines are the regulations designed by the Department of Health, Education and Welfare (HEW) to implement the most important provision of the 1964 Civil Rights Act. The act required federal agencies to end all financial aid to local school districts that refused to end discrimination, and the guidelines spelled out just what the South had to do to retain needed federal aid. The guidelines, denounced as excessively timid by most civil rights leaders, asked significant annual progress in each school district toward the creation of a unified, nonracial school system. Two years ago, the Johnson administration set this fall as the deadline for completing the task, except in a few districts which could demonstrate special problems.

GARY ORFIELD is assistant professor of politics and public affairs at Princeton University, and is the author of *The Reconstruction of Southern Education*. This summer he toured Southern state capitals, talking with state school administrators about the effects of the Nixon administration's civil rights policies.

During the Presidential campaign last year, most Northerners ignored the political arguments about the school guidelines and took little note of the attacks on them coming from both George Wallace and Richard Nixon. Since his election, however, Nixon has come under heavy pressure from Southern politicians who were responsible for swinging five Southern states into the Republican camp. As the September deadline approached, Southern political pressure on President Nixon became intense and generated a bitter internal debate in his administration. Finally, HEW Secretary Robert H. Finch, who had urged strict enforcement, was overruled and the September deadline was scrapped. Most enforcement powers were taken from HEW, and primary reliance was once again placed on the federal courts of the South, the very institutions that had failed so seriously between 1954 and the enactment of the Civil Rights Act.

Although the new school guidelines were intended to demonstrate the administration's appreciation for the electoral votes of five Southern states, there was little jubilation among Dixie school officials. Southern educators, who thought they were finally finished with the desegregation battle, realized that the President had once again politicized the issue. It was painfully obvious to them—veterans of fifteen years of slow, tedious, and expensive court skirmishes—that moderate school officials would be right back in the midst of explosive racial politics. Once again the work of improving education in the region's lagging public schools would have to be postponed.

"Political decisions of the Nixon administration have jeopardized the educational future of the Southern black population."

The new policies fail to recognize that there are only two ways to quiet white segregationist uproar in the heart of the Deep South; either the federal government can permit restoration of the old and unconstitutional system of separate schools, or it can demand creation of unified school systems in all districts. Virtually all the political trouble comes in communities suspended in uncertainty and fear somewhere between these alternatives. Once desegregation is accomplished, the unified school system generally becomes part of a new status quo. In four of the five Southern states Nixon carried last fall, the process is near completion and the school issue has lost most of its political force.

Most school officials saw the administration's decision to permit further desegregation delays not so much as a concession to the "South" or even the "Deep South," but to the principal followers of Thurmond and Wallace, the recalcitrant segregationists of a few hundred black belt school districts. Almost 4,000 of the 4,476 formerly segregated school districts of the Southern and border states were already committed to meeting HEW deadlines for eliminating separate schools. Interviews with leading educators in Strom Thurmond's South Carolina and Lester Maddox's Georgia in the days immediately before and after the announcement of the new guidelines demonstrate that even Deep South schoolmen were ready to desegregate. When the Nixon administration attacked existing desegregation standards as "unrealistic" and "arbitrary," it was undermining the efforts of some of the Deep South's leading educators, men who had belatedly put their prestige behind the desegregation effort.

In political terms, the new guidelines have their most immediate im-

PAGINATION INCORRECT

South Carolina's Strom Thurmond (left) and President Nixon—"If the President really wishes to make the Deep South Republican, he can do it by restoring school segregation, but the cost will be abandoning Southern blacks, sacrificing the best leadership in southern education, and devastating the powerful moderate wing of his own party, South and North."

pact on the remaining holdout counties in the Southern black belt. These terribly poor counties, stretching along an arc from southside Virginia to the Mississippi Delta, are steeped in the old plantation traditions and dominated by staunchly segregationist political machines. These are counties with heavy black populations and local political climates so rigid that racial change is impossible without federal force. These communities will not be satisfied with the kind of delays and fudged-over compromises the administration appears to be offering. Unless the President intends to allow changes that would completely undermine desegregation across the South, says one prominent Georgia educator, the GOP cannot outbid Wallace in the black belt. If the President and his advisers really wish to make the Deep South Republican, they can surely do it by restoring school segregation, but the cost will be abandoning Southern blacks, sacrificing much of the best leadership in Southern education, and devastating the powerful moderate wing of their own party, both South and North.

If the new policies merely mean delay, they will only postpone the bitterness from this September to the months before next fall's Congressional elections or perhaps even until the next Presidential campaign. Delay will taunt local segregationists and maximize moderate and black alienation.

While the political value of compromise is obscure, the damage to education is clear. "Some fine men are having their careers and their health ruined by this indecision," Reg Murphy of the Atlanta *Constitution* wrote of the administration's vacillation. "If they are left without laws to rely on and Presidential guidance to quote, they are helpless to combat the forces of anger and hate in their towns."

The kind of local pressure that frightened state school officials even before the federal slowdown was painfully evident in South Carolina's capital of Columbia a year ago. After several hundred angry white parents took over a school board session, the city school system withdrew its desegregation plan, which would have required some white children to walk a few blocks more to formerly Negro schools. Strom Thurmond attacked HEW on the Senate floor and reportedly discussed the city's problem with Nixon at the GOP National Convention. Before withdrawing its plan, the school board was assured by leading state politicians that Columbia could defy HEW without risking loss of federal funds. The case has been stalled for months before HEW's Reviewing Authority, which was recently expanded from three to five members with a position going to a Columbia GOP politician. Now, in the words of school board member Heyward McDonald, there is a "general feeling of uncertainty as to what the law requires right now and what it will require six months from now." Columbia is still receiving federal funds, and school officials all over the state are watching to see if the city can get away with it.

Local superintendents will bear the brunt of rekindled pressures. "Some very good superintendents," says South Carolina State Superintendent Cyril Busbee, "can find themselves in a very awkward position." More than fifty Georgia superintendents have left their jobs in the last year, largely because of the desegregation issue. Now the federal policy reversal "has placed those systems that have done something in a very embarrassing position," says Jack Acree, executive secretary of the Georgia School Boards Association. In both states, local superintendents have called state school authorities seeking ways to renege on their HEW desegregation plans and thus salvage their political positions. Just before school opened, nine Georgia school districts that had pledged earlier to desegregate this fall refused to meet their commitments.

Nixon's guidelines surprised and threatened many school boards that had gone ahead with the desegregation process, trusting in repeated administration assurances that no change

would be made. South Carolina illustrates both the general movement of opinion in the Deep South and the damaging consequences of politically motivated enforcement. Dozens of South Carolina school boards agreed to desegregation plans last year. Goaded by the realization that the state's development was being held back by poorly trained manpower, state educators have been seeking and obtaining increased state and federal funds to upgrade the traditionally substandard public schools. This progress made local leaders more willing to solve the race question as a necessary preliminary to economic development.

The state school superintendent decided to offer help to local superintendents in what he saw as an inevitable transition to desegregated schools. During the summer of 1968, the elected state superintendent, Cyril Busbee, a salty and candid man somewhat reminiscent of Harry Truman, told a conference of local superintendents that desegregation was their "immediate problem." "The recent Supreme Court decision," he told them, "has said that the dual system will be eliminated." He promised state assistance. Expecting sharp criticism, he was surprised to be thanked by a number of local school officials. These men, who finally faced up to the race issue, are both the state's principal hope for better schools and the victims of the new policies.

Until the issue was plunged into politics, Joe Durham, Busbee's desegregation aide, noted great progress: "Attitudes are changing much more rapidly than we had anticipated three years ago or even two years ago." His observations were echoed by Professor H. L. Winecoff, director of the University of South Carolina's School Desegregation Consulting Center. The general feeling, Winecoff said, was "Let's do it, painful as it is." People were gradually realizing that their fears about integration were unreal. School superintendents who expected resignations from a fourth of their teachers found that they actually lost only 2 to 3 per cent. "What really amazes me," Professor Winecoff said, "is the progress that has been made and what can be made if moderate pressure is maintained." Before Nixon reopened the political floodgates, Lamar Clements, HEW's South Carolina civil rights coordinator, saw the state finishing the desegregation process in a couple of years.

State Superintendent Busbee is no crusader for integration, but he was convinced that the guidelines were the law of the land. In spite of his skepticism about the possibility of integration in systems with overwhelmingly black enrollments, he saw no legal alternative to compliance. Busbee kept in his desk a letter from HEW citing court decisions and quoting President Nixon in defense of the same guidelines the President subsequently junked. To his mind, Busbee says, the Supreme Court's sweeping call for unified school systems in the 1968 *Green* decision is "about as unequivocal as anything I've ever seen." On the basis of court decisions and repeated assurances from HEW, Busbee and many leading local school officials had moved toward compliance with the law. Desegregation doubled in South Carolina last year, and HEW had negotiated about thirty-five plans for ending separate school systems by 1970.

The tardy policy announcement on July 3, coming in the midst of preparations for the next school year, produced rank confusion for school administrators. Local constraints on school officials were multiplied after prominent Southern newspapers proclaimed SCHOOL DEADLINES SCRAPPED and NIXON KEEPS HIS WORD. Experience of previous summers suggests that commotion will build to a showdown in September on what the new guidelines really mean. Very soon the administration will have to make some fundamental decisions about the future of the South. Administration leaders have assured Southern officials that "extensions would be available," according to James Batten of Knight Newspapers. "A hell of a lot of districts," one federal official told him, "will get extensions beyond 1969-70." If he is right, the entire structure of desegregation across the South will come under attack. At worst, the new guidelines may be, in the words of Georgia's Julian Bond, "the old compromise after Reconstruction all over again."

At best, a heavy price will be paid by school leadership and the HEW enforcement program. Nixon's commissioner of education, James E. Allen, Jr., commented on the danger in Atlanta just days before the new guidelines were issued. A change, he said, would be "educationally unsound" and "harmful to the South."

In South Carolina, politics has pervaded the school controversy since last fall, because the state Republican organization hopes to use the school issue to take control of the state. In an interview in Columbia the day before the new guidelines appeared, Jimmie Howle, the party's research and information director, told of the pressure on the party from all over the state to fulfill the promises to weaken civil rights enforcement made in the Presidential campaign. Since January, he said, the state organization had repeatedly obtained concessions for school districts from HEW, but couldn't claim public credit because "all the damn liberals say Strom Thurmond is President of the United States." One school district, he claims, received a year's extension "inside of ten minutes" after the party's executive director called Washington. "They've got a pipeline to Washington," one frustrated official in HEW's Atlanta regional office sadly said. "Why should they call here?" There have been repeated political appeals for special treatment of individual districts, and at least one district was allowed to by-pass the

(*Continued on page* 77)

White students in Reserve, Louisiana, protesting school desegregation this fall—"Nixon's guidelines surprised and threatened many Southern school boards that had gone ahead with the desegregation process."

Resegregation

Continued from page 60

Atlanta office completely. Local authorities flew to Washington with Thurmond, met with the head of the Office for Civil Rights, and gave him two hours to accept or reject their plan. The plan, which some officials thought inadequate and none had the chance to study carefully, was accepted. Other districts broke off negotiations in Atlanta.

Federal blessing for South Carolina segregation could rescue a state Republican party that was very badly defeated in last fall's legislative elections. "If the guidelines are relaxed," Howle said, "the Republican party owns South Carolina." It could mean that "we're going to wind up with a white party and a black party in this state." Howle was unconcerned about what might happen to the GOP outside South Carolina if the administration began to act as if Strom Thurmond really were President.

Confusion, fed by Thurmond statements and stories in the state's largest newspaper, *Columbia State*, had brought the desegregation program to a standstill months before the July 3 statement. Four districts had withdrawn their plans and a number of others had been permitted to modify theirs. The night before the new guidelines were issued, HEW officials, still struggling to restore the credibility of their program, met with one of the school boards that had withdrawn its earlier plan. They were greeted with copies of the *Columbia State* forecasting the federal reversal. "We found out," said one HEW official, "that if there were going to be no changes, that particular school district would comply." After the new guidelines came out, the *State*'s Washington correspondent informed his readers that the statement had been "shrewdly drawn" to confuse administration critics, but really meant that everything possible would be done to allow further delays.

The political backdowns in South Carolina and the probability that the new rules will bring similar developments in other states has thoroughly demoralized many HEW staff members. Enforcement officials who were receiving plans a year ago from counties that they never expected to desegregate voluntarily, now wonder if they can hold the line on commitments that seemed solid weeks ago. Everything depends on Washington's response to the parade of school officials demanding delays.

The administration's handling of a recent South Carolina case is instruc-

tive. When a federal court asked HEW to prepare plans for twenty-one South Carolina districts, HEW technicians drew up proposals calling for elimination of separate schools this fall. At the last minute, however, politics prevailed and the 1969 deadlines were scribbled out and replaced by penciled "1970s" on the documents presented to the court. NAACP Legal Defense Fund attorneys found other flaws built into the HEW plans. Some plans lacked effective protection of the jobs of black teachers and administrators. The plans often said that local authorities "should" rather than "will" meet explicit requirements. The plans lacked effective reporting systems to permit the judge and the litigants to evaluate local implementation.

In Clarendon County (one of the districts involved in the original 1954 Supreme Court decision) and in a number of other areas, HEW's normal requirement for substantial progress this fall was abandoned. In Sumpter, HEW proposed to leave more than 80 per cent of the black students and all but a handful of teachers in segregated schools this school year. Black students would be transferred only where there were unused spaces in white schools. This was the administration's interpretation of the Supreme Court's directive for the speediest possible elimination of separate schools.

Decisions handed down in the South Carolina cases by four federal district judges have proved even weaker than HEW's severely compromised plans. Three of the judges have left open the possibility that delay will be permitted even beyond the 1970-71 school year. Litigation is no more immune to politics than the HEW guidelines were.

Under the new guidelines, however, the major burden of enforcement shifts from the HEW fund-withholding process to Justice Department litigation. Attorney General John N. Mitchell claims that returning the issue to the courts, where it was mired between 1954 and the 1964 Civil Rights Act, will speed progress. But Mitchell, who has consistently pressed for weakening the guidelines, must approve the filing of suits. Suits can only be filed where local black parents brave community pressure to file a complaint. If the Justice Department decides to recommend weak desegregation plans, the probability is high that many Southern federal judges will happily acquiesce. Justice has the power to decide whether or not bad decisions by segregationist federal district judges will be appealed to higher courts. Then, too, the Nixon administration's consultations with Deep South Republicans in filling federal court vacancies will profoundly affect the quality of civil rights enforcement in the future.

Announcement of the new guidelines undermined HEW's attempt to write tougher desegregation plans for thirty-seven Louisiana districts. Under a federal court order, HEW experts drew up strong plans with 1969 deadlines, only to have the federal district judge, Ben C. Dawkins, Jr., throw them out as incompatible with the new guidelines. The judge expressed his gratitude to President Nixon for the change and then ordered HEW to prepare plans allowing more time. HEW initially refused, but after harassment by Judge Dawkins, the department gave in on the advice of a Justice Department attorney. The judge indicated that he intended to allow as much as two more years of delay. Facing lower court intransigency and lacking the support of the national administration, the Fifth Circuit Court of Appeals has given up on the effort to enforce a 1969 deadline.

The uninspiring administration performance in the South Carolina and Louisiana cases suggests some of the dangers inherent in the state-wide lawsuit Justice filed August 1 against the Georgia State Board of Education. Announced as a dramatic indication of the administration's continuing commitment to desegregation, the suit, which seeks a court order forcing Georgia to develop a state-wide desegregation plan, actually promises delay, compromise, and serious weakening of the Georgia enforcement effort. Many local officials in Georgia knew that desegregation is generally slower in court-order districts and had asked the State Department of Education and the Georgia School Boards Association how they could get under a court order like neighboring Alabama's. They knew that in Alabama, the only state now under a state-wide order, all school systems continue to receive federal subsidies even though desegregation is at one-third the level of the rest of the South.

Justice may not even win a state-wide order in Georgia. Georgia's school system is not so unambiguously centralized as Alabama's. State Superintendent Jack Nix argues that the state board of education has no constitutional authority over desegregation, and Georgia officials promise a fight all the way to the Supreme Court.

A lawsuit would be unnecessary, Superintendent Nix said, if the federal government would just make its requirements clear and thus end the "untenable position" local officials are put in by Washington's "inconsistency and confusion." "I for one," he told reporters, "would like the federal government to make up its mind as to what it's going to do, and how, and get on with it so the administrators can get on with the job of education."

Even if Justice wins in Georgia, it will be faced with the task of monitoring implementation in 194 school districts and bringing further legal actions should localities violate their plans. Justice's Civil Rights Division has neither the manpower nor the administrative expertise to cope effectively with this task, and the Attorney General has recently testified that he is prepared to accept Congressional cutbacks on administration requests for new personnel.

The immediate impact of the suit is great confusion and a virtual destruction of HEW leverage over local school districts. The thirty-six districts that had funds terminated know that they will be automatically restored as soon as a court order is issued. Georgia's 121 districts still negotiating with HEW now have no real incentive to deal seriously, since it is highly unlikely that more funds will be cut off while litigation is pending.

Across the South, school officials are tired of the protracted desegregation struggle and want it ended. Georgia's Deputy State Superintendent Allen Smith says that years of needed leadership have already been lost in most school districts. "The longer the uncertainty is prolonged," he says, "the longer the adverse impact on education will continue."

Some Southern observers believe that the administration's decision to support tacitly a House appropriations amendment nullifying what remains of the HEW guidelines is a sign that a decision has been made to turn back the clock. President Nixon's recent Supreme Court choice, Clement Haynsworth, Jr., a South Carolina conservative who fought against some of the most important principles of school desegregation law, offers further encouragement to Southern resistance.

The impression of federal backdown was heightened by the administration's decision to postpone desegregation in Mississippi. On August 11, HEW had submitted desegregation plans calling for abolition of separate school systems in thirty-three Mississippi districts. Days before the plans were scheduled to take effect, HEW Secretary Finch took the unprecedented step of writing to the federal court to request a delay. Although HEW's education experts had drafted the plans, Finch now claims that they would

"produce chaos, confusion, and a catastrophic educational setback." The reversal, underlined by Vice President Agnew's remarks that the Civil Rights Act requirements should be suspended in school districts damaged by Hurricane Camille, was a clear change of signals from the top levels of the administration.

Federal retreat brought a historic break between the Justice Department and the civil rights movement. The NAACP Legal Defense Fund claimed that Justice had abandoned its legal responsibility to defend the constitutional rights of black children and asked the Mississippi federal court to change Justice's legal status from that of a defender of the children concerned to that of an ally of the segregationist local school boards. Within the Justice Department, many of the attorneys in the Civil Rights Division, angry and disillusioned, joined in drafting a protest against the administration's turn backward.

In a way, the lawyers of the Legal Defense Fund and the Civil Rights Division represent the best hope for peaceful racial change. These attorneys have had enough confidence in the American system to invest years in the process of gradually building up and enforcing a body of desegregation law. They, and the black leaders in communities across the South who believed in them and worked with them year after year, now feel that they are being cynically abandoned by national leadership.

Beneath a cloud of rhetoric and behind a procession of confusing actions, the Nixon administration has chosen to slow and perhaps to reverse the desegregation process. Deprived of governmental support, the courts have begun to retrench their efforts. In attempting to reward the South, Nixon has undermined the best Southern leadership, both political and educational. Just when many schoolmen were belatedly accepting the objectives of a tested compliance program, that program has been emasculated.

The future promises only years of difficult and often futile litigation, laced with political skirmishes. The new atmosphere in Washington will encourage a multitude of evasive tactics at the local level. Without national pressure, a good many Deep South communities will search for ways to create segregated programs within nominally desegregated schools. The economic and social future of the South will surely be impaired. So too, perhaps, will be the political future of an administration that seems determined to betray the law-abiding school officials and the black and white children of the South.

Text of High Court Order

NYT 10-30-69

WASHINGTON, Oct. 29—Following is the text of the Supreme Court order today on desegregation in Mississippi schools:

632—Beatrice Alexander et al., petrs., v. Holmes County Board of Education et al., on writ of certiorari to the United States Court of Appeals for the Fifth Circuit, per curiam. These cases come to the court on a petition for certiorari to the Court of Appeals for the Fifth Circuit. The petition was granted on Oct. 9, 1969, and the case set down for early argument.

The question presented is one of paramount importance, involving as it does the denial of fundamental rights to many thousands of schoolchildren who are presently attending Mississippi schools under segregated conditions contrary to the applicable decisions of this Court.

Against this background, the Court of Appeals should have denied all motions for additional time because continued operation of segregated schools under a standard of allowing "all deliberate speed" for desegregation is no longer constitutionally permissible. Under explicit holdings of this Court, the obligation of every school district is to terminate dual school systems at once and to operate now and hereafter only unitary schools. Griffin v. School Board, 377 U.S. 218, 234 (1964); Green v. County School Board of New Kent County, 391 U.S. 430, 438-439, 442 (1968).

Court Order Vacated

Accordingly it is hereby ajudged, ordered and decreed:

1. The Court of Appeals' order of Aug. 28, 1969, is vacated, and the cases are remanded to that court to issue its decree and order, effective immediately, declaring that each of the school districts here involved may no longer operate a dual school system based on race or color, and directing that they begin immediately to operate as unitary school systems within which no person is to be effectively excluded from any school because of race or color.

2. The Court of Appeals may in its discretion direct the schools here involved to accept all or any part of the Aug. 11, 1969, recommendation of the Department of Health, Education and Welfare, with any modifications which that court deems proper insofar as those recommendations insure a totally unitary school system for all eligible pupils without regard to race or color.

The Court of Appeals may make its determination and enter its order without further arguments or submissions.

May Hear Objections

3. While each of these school systems is being operated as a unitary system under the order of the Court of Appeals, the District Court may hear and consider objections thereto or proposed amendments thereof, provided, however, that the Court of Appeals' order shall be compiled with in all respects while the District Court considers such objections or amendments, if any are made.

No amendment shall become effective before being passed upon by the Court of Appeals.

4. The Court of Appeals shall retain jurisdiction to insure prompt and faithful compliance with its order, and may modify or amend the same as may be deemed necessary or desirable for the operation of a unitary school system.

5. The order of the Court of Appeals dated Aug. 28, 1969, having been vacated and the case remanded for proceedings in conformity with this order, the judgment shall issue forthwith and the Court of Appeals is requested to give priority to the execution of this judgment as far as possible and necessary.

10/30/69

'Terminate Dual . . . Systems at Once'

Wash. Post

Following is the text of the Supreme Court decision ordering immediate desegregation of all Mississippi public schools:

These cases come to the Court on a petition for certiorari to the Court of Appeals for the Fifth Circuit. The petition was granted on October 9, 1969, and the case set down for early argument. The question presented is one of paramount importance, involving as it does the denial of fundamental rights to many thousands of school children, who are presently attending Mississippi schools under segregated conditions contrary to the applicable decisions of this Court. Against this background the Court of Appeals should have denied all motions for additional time because continued operation of segregated schools under a standard of allowing "all deliberate speed" for desegregation is no longer constitutionally permissible. Under explicit holdings of this Court the obligation of every school district is to terminate dual school systems at once and to operate now and hereafter only unitary schools. *Griffin v. School Board*, 377 U. S. 218, 234 (1964); *Green v. County School Board of New Kent County*, 391 U. S. 430, 438—439, 442 (1968). Accordingly,

It is hereby adjudged, ordered, and decreed:

1. The Court of Appeals' order of August 28, 1969, is vacated, and the cases are remanded to that court to issue its decree and order, effective immediately, declaring that each of the school districts here involved may no longer operate a dual school system based on race or color, and directing that they begin immediately to operate as unitary school systems within which no person is to be effectively excluded because of race or color.

2. The Court of Appeals may in its discretion direct the schools here involved to accept all or any part of the August 11, 1969, recommendations of the Department of Health, Education, and Welfare, with any modifications which that court deems proper insofar as those recommendations insure a totally unitary school system for all eligible pupils without regard to race or color.

The Court of Appeals may make its determination and enter its order without further arguments or submissions.

3. While each of these school systems is being operated as a unitary system under the order of the Court of Appeals, the District Court may hear and consider objections thereto or proposed amendments thereof, provided, however, that the Court of Appeals' order shall be complied with in all respects while the District Court considers such objections or amendments, if any are made. No amendment shall become effective before being passed upon by the Court of Appeals.

4. The Court of Appeals shall retain jurisdiction to insure prompt and faithful compliance with its order, and may modify or amend the same as may be deemed necessary or desirable for the operation of a unitary school system.

5. The order of the Court of Appeals dated August 28, 1969, having been vacated and the case remanded for proceedings in confirmity with this order, the judgment shall issue forthwith and the Court of Appeals is requested to give priority to the execution of this judgment as far as possible and necessary.

No Integration Appeal Delays

Jacksonville JOURNAL, Nov. 19, 1969. p. 6

HOUSTON (AP) — The chief judge of the 5th Circuit Court of Appeals says parties in intergration cases ruled on by his court must comply immediately with the ruling.

"There will be no stays for appeals," said Judge John R. Brown of Houston. "Everyone had better be ready to comply with them immediately."

Brown commented just before the appeals court —sitting "en banc" — took under advisement yesterday 15 appeals challenging desegregation methods in six Southern states.

The 14-member panel heard nearly 14 hours of testimony during a two-day session. The court's ruling is expected to come from its New Orleans headquarters but there was no indication when it would come.

"En banc" means the full court.

Judge James P. Coleman, one of the panel members, said desegregation orders by federal courts "are going to destroy a lot of schools."

"There are going to be a lot of schools totally destroyed because we order on paper what can't be accomplished in real life," Coleman, a former Mississippi governor, said.

"There will be places where there won't be any public schools worth talking about."

However, Coleman said the recent Supreme Court decision makes clear that further integration must be accomplished.

Coleman commented after John F. Ward, a Baton Rouge, La., attorney representing two Louisiana school districts which have achieved only 3.7 per cent integration said many whites are leaving the public schools.

"I'm afraid you are going to see the growth of the biggest private school system in a long time," Ward said.

Once during the session Judge Griffin B. Bell of Atlanta told a school board attorney to stop complaining about the integration plans from the Department of Health, Education and Welfare.

"Everybody wants to use HEW as a scapegoat," Bell said. "If you don't like their plan, come up with one of your own."

D. P. Hulbert, an attorney from Perry, Ga., said a HEW plan for integrating schools there was unworkable. He added he was not picking on HEW.

"If picking on HEW hurt them, they would have died a long time ago," said Judge Walter P. Gewin of Tuscaloosa, Ala., another member of the federal panel.

During closing arguments Judge Brown asked David Norman, a Justice Department civil rights attorney: "How do we get out of the school business?"

Norman said he could not give the court a set of guidelines.

"It's interesting you can't give us any standards for a unitary system," Judge Brown said. "All you can say is what isn't a unitary system."

Norman C. Amaker, an attorney for the Legal Defense Fund of the National Association for the Advancement of Colored People, told the panel he believes the recent Supreme Court ruling means schools must use whatever desegregation plans they have.

"The court rejected the notion that you had to wait until you had a perfect plan," Amaker said. He said the plans can be modified later.

School districts in Louisiana, Alabama, Georgia, Mississippi, Florida and Texas were in the appeals.

Southern Regional Council, Inc.
5 Forsyth Street, N. W.
Atlanta, Georgia 30303
404/522-8764

FOR RELEASE:

SUNDAY,
NOVEMBER 9, 1969

The Southern Regional Council has concluded its Annual Meeting in Atlanta with a resolution reaffirming "its belief that the South and the nation must work out the future as one people in an integrated society free from discrimination."

The resolution noted a trend in the national government in which "politics as usual" has weakened a developing commitment to a more democratic society in the South.

"The current direction of the administration in this respect," the Council declared, "is clear from its actions. Already momentum is being lost, and within the region, we see a resurgence of the kind of crude resistance that characterized the years immediately following the 1954 school desegregation decision."

"The main goal of our democracy," the resolution observed, "is and must be the full participation of all citizens." "The fundamental question," the resolution continued, is whether America "shall reform our society and our institutions, or destroy them."

The resolution asked that the nation take a more sophisticated view of "demands for black self-determination," not rejecting such demands "out of hand," but, rather, that "people of goodwill make immediate good faith efforts to change conditions which cause lack of faith in the concept of inte-

gration."

The resolution strongly condemned recent action of the Senate Finance Committee recommending that no tax exempt foundation funds be expended to support voter registration efforts. "Any thoughtful appraisal of voter registration must conclude that these efforts are aimed at reforming the system. The resistance to such efforts inevitably have the effect of encouraging the most cynical and the most destructive among us."

"We call on all our nation's leadership, including our region's, to perceive how central this issue is to the larger question of bringing about intelligent reform which will make our democracy work."

de seg regat ing people's minds

Desegregation conducted in any fashion ends with white children thrown together with various children from other backgrounds: poor white, Mexican American, Negro. The valid educational and psychological rationale for this action stems from the observation that children learn much from each other as well as from the teacher. This experience enriches the children's lives and is critical to their later living and sharing together in the American tradition.

Unfortunately, the mere proximity of individuals under one roof does not guarantee that they will communicate. There are many who would agree that moving children together with its concomitant problems is superior to keeping them in separate schools; still it must be admitted that without some established plan for communication between those involved in the integrative processes, problems arise which confuse and sometimes seem to negate the value of desegregation.

The act of desegregation may allow for the following perplexing situations:

(1) It removes minority children from their immediate psychologically supporting peer groups and exposes them to often frightened and hostile majority group children who have no desire to be near them.

(2) It removes minority group children from environments where those individuals (teachers, principals, custodians, nurses) working with them had either willingly or passively accepted the task of educating them. They may be placed

in schools where the staff has no intentions of working with them and may actually dislike them. At best, you have workers who do not know these minority group children and haven't the vaguest idea of how to start the communication process with them.

(3) It forces the minority group child into an unfamiliar value system for which he may be inadequately prepared and which may depress his self-concept as a person and as a learner.

(4) It forces the minority group member into a value system for which his physical characteristics and cultural background could never be source of self-fulfillment. For example, how can a little black girl of six years ever learn to love her color and hair if she is surrounded by books, children, and adults (the system) which values only white skin and straight or wavy hair.

(5) Programs for cultural enrichment, as advocated by many who believe in separatism as a means of strengthening the self-concept and survival potential of their groups, become difficult to implement.

These points of possible conflict represent the array of problems which should be considered prior to, during, and after the desegregation process occurs. It is the purpose of this paper to discuss one approach being used in several schools throughout the country to try to overcome, in a significant way, the majority of those problems.

When a civil rights protagonist like Martin Luther King or a noted Mexican American educator like Julian Samora ended their talks with the statement that the problem of the minority is really the problem of the majority, they were referring to the breakdown in communication between individuals at all levels of personal contact. Adults seem to have trouble understanding teenagers, and teenagers adults. Whites have trouble understanding blacks, and blacks whites. Husbands seem to have trouble understanding wives, and wives husbands (look at the divorce rates). The communication breakdown appears associated with our lack of ability to look at another person's eyes, face, and total self and understand what he is thinking or feeling.

For example, it would seem that if an Anglo (white) teacher could look at a six-year-old, poor Mexican American from the barrio, who speaks English poorly, and really understand his feelings and thoughts, she would not possibly continue utilizing educational techniques which thousands of teachers use daily in the classrooms. How can she, for example, teach in a school for five years without learning Spanish or making an effort to make some breakthrough in communication. A teacher of 20 years in a 20 percent Mexican American district took pride in the fact she had never learned to speak Spanish because in this way she forced the children she "taught" to speak English or fail. Any person taking a crash course in learning a foreign language by speaking only that language over a prolonged period of time knows of the psychologically disorienting effects that can occur even with a supposedly emotionally mature adult. If that teacher could have taken the time and had a practiced ability to understand children's feelings, she would have seen what her educationally and psychologically unsound techniques for teaching English were doing to the sense of self-worth of these children.

PAGINATION INCORRECT

The frightening effects of this type of miscommunication can only be understood when one considers that the teacher probably likes the children and really sees herself as doing the correct thing. It would appear that when miscommunication because of language exists in the classroom, the burden for non-verbal efforts in communication falls on the children. Teachers are too busy giving pre-determined information and have no time for (or are incapable of) looking at these children and seeing their confused and trapped souls wanting expression, but not being allowed it because no one understands *their* means of communication: a beautiful mixture of Spanish and English, "Spanglish," where the child speaks of his home gestalt in Spanish, and of the larger world, of which the school is the most significant representative, in English.

This refusal by the educational system to recognize the unique linguistic and cultural background of the Mexican American is best evidenced by the unwillingness of local schools to use local funds to deal with these problems. For example, a local district will use some local funds to help children with special educational needs associated with articulation problems due to stuttering, cleft palates, etc., as these are considered a legitimate educational endeavor. Therapists will be hired, and facilities provided, etc., in a school district where only two percent of the children may have such a need; but, in the same school where 15 percent of the student body have legitimate linguistic needs associated with their Mexican American backgrounds, not one cent of local money will be spent on the *legitimate* educational needs of these children.

What then is the problem? Is it that hate motivates school board members and educators in an attempt to destroy the self-respect of Mexican American children? The answer to this question is, in the main, no.

Educators and community people alike have not tried to understand the feelings and thoughts of the children they are intrusted to serve. If educators and citizens would have practiced what they preached and truly listened to the feelings of the children, the present psychologically devastating educational approaches would have long ago been radically altered to fit the children.

The key task, then, that confronts us in the process of desegregation is the thorough preparation of all individuals involved in the art of communication. We have not traditionally developed systems for encouraging communication, nor prepared ourselves as educators to transmit communication skills to the children. Without some systematic and serious effort at bettering both children and school personnel at this process, we will continue to perpetuate the conditions which led to the problems in the first place. The only difference now is that in a desegregated school situation, the children, despite the lack of guidance and the haphazard efforts, might learn ways of dealing with each other at a younger and, hopefully, more flexible age than is presently occurring in communities like Watts, Chicago, and East Los Angeles.

What then can we do? The Human Development Training Institute (HDTI) in San Diego, California, represents one very specific effort to deal with the problem of communication. The intent of the HDTI was to enhance communication and humanistic understanding between all individuals. The intent is to deal with the human dilemma of trying to understand what other people are thinking or feeling while, at the same time, communicating our own thoughts and feelings to them. We all have this need, but it appears that the minority groups' problems represent the largest single symptom of what happens when communication breaks down.

Although the HDTI recognizes the fundamental need to help all people to better communicate with each other, its central theme is improving the communication process between educator and child, and between child and child. It does this by providing both a day-to-day curricular approach toward helping teachers to teach children to better communicate, and by providing a 24–60 hour teacher training institute to help teachers, themselves, be more open and receptive to their own feelings and thoughts, and to the feelings and thoughts of children. Although the teacher training institute can be altered to the specific needs of each district, they consist of the following set of experiences:

(1) Teachers are exposed on a small group basis to a series of experiences aimed at helping them become aware of their feelings, thoughts, and behavior. This is accomplished in relationship to some

specific minority group by providing highly qualified group facilitators who are, themselves, members of that minority group. (2) Along with the experiences, the teacher is given knowledge of what she is experiencing and of the skills it takes to help others develop an awareness of their feelings. This is accomplished through feedback sessions after the communication experiences in the small groups, and through a minimum of well-planned lectures.

(3) Finally, demonstrations by the instructors with representative children from the participant schools are held, both to model techniques and help teachers appreciate the legitimacy of such communicative experiences with children.

This triad of experiences (group experiences for teachers and children, plus the lectures) are repeated in two areas other than "awareness." The other areas are "social interaction" (my ability to know and understand how I affect other people and how they affect me) and "mastery" (becoming aware of my feelings of adequacy or inadequacy, self-concept, and developing a feeling of "I canness" about my ability to learn).

Similar but slightly longer institutes are held with counseling, supervision, and administrative personnel to provide support and follow-through to the teachers as they struggle to implement this approach with children. After the educators are put through experiences relevant to the minority group members in their schools in the areas of awareness, mastery, and social-interaction, they are given materials they can use in their classrooms to encourage similar types of day-to-day communication experiences with their children. The series of experiences constitute what is described as the Human Development Program (HDP). Developed along the three main themes of awareness, social-interaction, and mastery, the HDP presents a sequential, cumulative set of experiences on a daily basis, designed to promote personal effectiveness and communication skills in children.

For a third of the year the teacher spends 20 minutes each day (or every other day) with one half of her class, helping children develop an articulate awareness of their positive and negative feelings, thoughts, and behavior. The effect this has on children from divergent cultural groups is that they learn to develop an increasing awareness of their similarities, as well as their differences. In addition to this, they discover that all have feelings, no matter what color they are. They are systematically exposed to their own feelings, thoughts, and behavior, and to those of their peers. They learn early, and continue to practice looking beyond color.

For another third of the year, the teacher, in the same manner as in "awareness," spends time helping the child practice the art of understanding how he affects others and how they, in turn, affect him. It is here that the child begins to develop an increased responsibility for his acts and their effect on others. This type of activity is designed to get black and white, brown and black, or whatever the combination may be, to practice the elusive, yet critical art of understanding.

Finally, interrelated as all three areas are, the children spend one third of the year developing a feeling of "I canness" in relationship to their school work, "mastery." Experiences are provided where the teacher and group help each other to understand the relevance of learning specific skills so as to increase motivation and develop a positive self-concept in children.

The HDP, then, comprises a specific approach aimed at the task of increasing communication between educators and educators, teachers and children, and children and children.

PUBLIC EDUCATION AND COMMUNITY ORGANIZATION

By HAYES MIZELL

Mr. Mizell, on a year's leave of absence from his post as director of the South Carolina Community Relations Program of the American Friends Service Committee, is a Fellow at the Institute of Southern History of Johns Hopkins University in Baltimore.

The South is at the beginning of a period during which we can either so structure our social, public and political institutions that they will be unique in quality and humanity in this nation, or we can plunge headlong into the same abyss of chaos and conflict which has so swiftly engulfed the technological greatness of the North. The next two generations of southerners must decide whether they will draw upon the positive aspects of our region's distinctive quality and character to shape a more humane future. Failing this, it is not improbable that in fifty years Charlotte will become the South's Cleveland, Richmond our Rochester, and Dallas our Detroit.

Hopefully there is still time. We must try to determine what distinctions remain between the North and the South today and see if there is still an opportunity for us to avoid some of the conflict which is now broadening the girth of anger and despair in the northern black community, feeding off the injustice and corruption of the past. We can still make a case for the unique situation of the South, I believe, simply because most of our region is still composed of small towns and rural areas. It is, in other words, more manageable than is the North. With the exception of the metropolitan areas of the South—Atlanta, New Orleans, Memphis, Nashville—there are still hundreds of small towns which can deal rationally and intelligently with the problems of desegregation while there is yet time. Even in some of the medium-sized cities of the South—Montgomery, Columbia, Greensboro, Baton Rouge—there is still an opportunity to make decisions concerning the public schools which reflect the hopes for the future rather than the ideals of the past. Perhaps such places will miss that opportunity, as others have, but it is a luxury which is no longer available to much of the North.

Unlike the North there is still not a great cynicism in the South regarding the public educational system. The system's failure tends to be blamed on the expense and inefficiency of segregation, on the poor economy, and on the lack of public awareness of the necessity for a good educational system for all people. But the school system is not regarded as corrupt, inept, or downright evil as it is in much of the North. In spite of all of their suffering and mis-education at the hands of the public educational system in the South, black people still seem to believe that they will be able to compete and succeed within that system once they gain access to all of its opportunities. For them the ills of the school system are merely extensions of state sanctioned and enforced racial discrimination. Once that is removed they seem to believe that a good education will naturally follow. This traditional view is obviously superficial and overlooks some of the more serious failures of the educational system itself, for black and white alike. But this hope, almost a faith, of so many black people provides the South with an opportunity to remedy the myriad of educational faults which lie beneath

the surface of our educational system within an atmosphere of trust and understanding among black people. If the education system is not reformed, then as desegregation proceeds, more and more black people will come to learn, as some already have, that the education system of the South is subject to the same ills as is that of the North. When that happens southern educators can expect the same hostility and impatience that is now so prevalent in the black community of the North; then there will be no time for conciliation and reform.

There is also in the South a sense of creation and movement which is distinct from the northern sense of stagnation and decay. Whatever is left of the civil rights movement in the South is geared toward moving forward with the destiny of the region, seeking to initiate reforms and to be in on the ground floor of new institutions and programs. The new interest in cooperatives and politics (the loyalist Democrat movements in Mississippi, Alabama, and Georgia) indicates a faith in the future of the South and in the potential quality and humanity of its institutions.

The public school systems of the South are among those institutions that are having to adapt to survive, and merely by the nature of their relatively primitive state of development they offer a better opportunity for those who wish to determine their structure and role in the future. While pressures for change may exist to some extent in the North, they are usually much more self-serving and potentially chaotic, or they are pressures which have existed for so long that the school system has learned how to manipulate them. Only recently have pressures for progressive change been intensified and escalated so that they can no longer be ignored. For the North the heritage of victory and technological achievement has brought the public school system to such a state of complacency and conceit that the black community now regards the system as unworkable and unbearable. In the South, on the other hand, our system is more clever but less sophisticated and this is to the advantage of those who want to shape its future.

I realize that many people would argue with the aforementioned reasons for maintaining our involvement in the movement for school desegregation and quality education in the South. But in the end one's position on this whole matter is largely dependent upon the individual's vision of his society and upon his dreams for the future. What are the alternatives to our involvement? Do we disband the public school system? Do blacks, Birchers, integrationists, etc., each establish their own schools, where they can do "their own thing?" Do we return to the womb of southern history where provincialism, racism, and fear infected the fetus of our nation's dreams and produced the frail child of democracy so crippled and unable to cope with the recurring ills of infancy? Do we, in fact, admit that we cannot alter "the system" but that it can alter us—the ultimate victory of cynicism and intolerance over faith and understanding? No, the South knows better than any other region the consequence and pain of division and withdrawal. Now we must know that the question is not whether it is strategically and logistically possible to abolish our dual school system, but rather if such integration can be achieved concurrently with the rehabilitation of the people involved so that they begin to relate to one another from a nonracist orientation. Can we create an inclusive school system where stimulation of individuality and creativity takes precedence over the commitment to regimentation and conformity? Though I can find the same reasons as others to be as pessimistic about such possibilities, it doesn't seem to me that the alternatives are either pleasant or productive for race relations and public education in the South, nor are they consistent with the dreams of this nation.

Any hope of working productively in the area of desegregation and public

education in the South must take into account the growing trend toward localism in this country. It appears that the nation has grown tired of the federal initiatives which began during the era of the New Deal and which have consistently been extended through the programs of the Fair Deal, the New Frontier, and the Great Society. There was no better evidence of this than in last year's presidential campaign during which all three candidates carefully made it clear that they hoped that local initiatives would solve local problems. All of the candidates sensed the anger in the country directed at any federal program requiring that local communities follow guidelines and regulations sent down from Washington in order to receive federal funds. There was also objection to provisions in these programs which called for some Washington bureaucrat to exercise discretionary judgment to determine whether the communities were meeting such regulations. George Wallace talked about what he would do to those "briefcase tot'in bureaucrats." Richard Nixon said he wanted "power to flow from Washington back to the states." Even Hubert Humphrey proposed a federal tax sharing plan which would return portions of federal income taxes to the states for their unrestricted use. Associations of school administrators, teachers, and superintendents have advocated that federal aid to education no longer be administered from Washington but rather that the federal government give funds directly to the various state departments of education for their use as they see fit, unencumbered by U.S. Office of Education guidelines and requirements.

All of these are indications that the trend of strong federal involvement in programs intended for use at the local level will temporarily subside for at least the next four years. The election of Mr. Nixon will undoubtedly hasten the demise of this trend, and if the Eisenhower era is any indication of what we might expect from Mr. Nixon there will be few new federal programs under his administration which will give greater power to the bureaucracy in Washington. Further evidence of such a trend can be seen not only by Mr. Nixon's victory but by recognizing that Mr. Humphrey was defeated, in part, because he had been an architect of federal legislation which tended to increase the power of the central government through its administration of federal welfare, education, and civil rights programs.

Because of this trend toward localism and because the experience of the past several years has demonstrated that half-hearted federal initiatives can only be of limited value, it is time for those working for school desegregation and quality education to re-evaluate their own strategies. While such people have learned that the bureaucracy is vastly limited in its ability to force the solution of local social and educational problems, at the same time they have developed a certain dependency not only on the federal government but on civil rights groups and foundations in the North to assist them in working to promote change in local communities of the South. In fact, with the exception of a few determined and forceful individuals in each black community across the South who have worked on a broad range of issues, there are almost no persons who are attempting forcefully and systematically to engage the local power structure to produce fundamental change at the local level. One can even argue that the black community has been so oversold on the potency of federal power and federal programs that it looks to Washington for assistance in solving community problems of nearly every variety. For those without power and leverage this is a natural reaction, but it nevertheless creates a psychological dependency which in the long run tends to further undermine what little is left of the individual's faith in his own potential power and creative ability to effectuate change in his community.

"The action," for better or worse (and

given the repressive strength of southern resistance I think it has been for the better), has been at the federal level for the past five years and all of us have exploited that action in our own ways to achieve those civil rights objectives which have concerned us most. Who has not felt that if the federal government would only do more in education, housing, welfare, jobs, and economic security our task would be essentially complete except for mopping up resistance at the local level? But in exploiting the alleged power and resources of the federal government we have seen that there are certain aspects of these problems which cannot be solved in Washington and to these we have given little attention because to solve them at the community level requires intensive education, motivation, assistance and allocation of resources over a long period of time—community organization.

To understand how we can take advantage of the trend toward localism and why community organization around education issues is necessary if we are to achieve fundamental change within our public educational system, we must first understand how that system operates in most school districts of the South and we must learn its idiosyncrasies which are within the pale of local reform. The dangers of generalization certainly apply to any attempt to characterize the typical southern school district because the institution, like the South itself, is filled with mavericks who turn up in the most unexpected places. Nevertheless such characterization can be made as long as we do not attempt to define the typical district in too narrow terms.

The typical district is small, probably rural in geography and/or in behavior, and it operates a dual school system though it now proclaims that "any child can attend the school of his choice." The superintendent of the district, unless it is large or metropolitan, probably is from the South with the chances being good that he is from the state where the district is located. It would not be unusual for him to be a native of that district. The superintendent might have a doctorate in education obtained during the summers by attending the school of education of the state university. It is rare to find a superintendent who graduated from college, then went right on to get his masters, then went right on to get his doctorate. You find, instead, that superintendent's degrees are received five to fifteen years apart—testimony to financial hard times, the uncertainty of the career potentials of the education profession, or to the lethargy of the superintendent. The superintendent has a certain status in the community, depending again on its size, and depending on the wealth of the district his office may be shabby and small or modest and adequate, but hardly ever is it plush.

The superintendent feels that he is "professional" and that he is a dedicated and underpaid public servant who takes a lot of abuse from his constituents though he works diligently to see that "all children receive a good education." He attends a great many local, state, and national education association meetings, but he really has very little stomach for those innovations in education which might cause him greater administrative headaches. But faced with all of the new federal education programs and visitors from the state department of education trying to prod him into using the federal money, the superintendent has started some new programs in the past several years. Most important is the fact that the superintendent feels threatened. He must satisfy the extremes of his school board, his teachers, the parents and the community, and the federal government. They all have interests, it seems to him, which cannot be reconciled.

The superintendent "works closely" with his board of education. The method for selecting the board is directly proportional to the democratic commitment of those persons originally charged with de-

termining how the board should be constituted. Thus, in some districts the board members are elected by the voters; in others the board might be appointed by the legislature, by the governor or perhaps even by the superintendent himself if he is elected by the voters instead of hired by the board. The board is composed of prudent men who are prominent in the community and who may be doctors, lawyers, bankers, successful merchants or farmers. Hardly ever does one find a black or poor board member and even to find a woman member is infrequent. The members of the board perhaps serve without pay and feel that they are performing a public service by accepting this time-consuming but thankless job which few other people would want.

The members of the board of education have no background in education; they do not take time to learn much about education, and consequently they know almost nothing about what is happening in education today. Except in unusual cases, the board is legally charged with formulating educational policy for the school district; in fact, however, it spends most of its time discussing the budget of the district, making decisions relating to personnel matters, wrestling with desegregation problems, and deciding if a new school should be built, where it should be built, and what kind of floor the new gymnasium should have. In most instances the superintendent presents plans for changing the curriculum or the education program to the board for its approval. Seldom does the board reject such plans because, after all, it assumes that the school staff is competent and knows what it is doing; but because the board knows nothing about education it is really in no position to question intelligently the potential ramifications of the administrators' plans. It is also rare that the community or the teachers become involved in the formulation of plans by the school system staff or that the board consults them when making education policy.

In many districts the school board convenes in private and neither the meeting nor its proceedings are mentioned in the local newspaper. In those places where the sessions are public the board really prefers that no one come to the meetings and quickly goes into executive session to avoid the scrutiny of the press and public. Matters relating to school desegregation are almost always held in executive sessions. The board does not like conflict. Because it feels that it is performing a public service, it does not like to be held accountable for its decisions by the public. Indeed, it feels that the public has abrogated its right to hold the school board accountable because, after all, the public isn't really interested in the school system and it doesn't care about the problems of the school district. The board feels, probably correctly, the public has an uninformed, overemotional, and unsympathetic attitude toward the difficulties of the board of education. Because of this and because they care little for fortifying the democratic framework of the school system, the superintendent and the board regard the schools as "theirs."

What remains of the school system is even more difficult to characterize. The teachers are probably discontent because they are underpaid, patronized by the community, and can't get the superintendent or their principal to listen to their ideas for revising the curriculum or initiating new methods of teaching. Many of the teachers are women who supplement the income of their husbands—tending to be either the most militant in demanding better salaries and teaching conditions or the least likely to complain, depending on how necessary their salaries are to the family. There are never enough male teachers in the system, particularly in the elementary grades. While there are some young teachers in the district who still remember what education is supposed to be all about, they

also are rapidly learning the lessons of frustration and survival within the school system. The teachers spend considerable time in faculty meetings which are little more than empty exercises designed to convince them that they are becoming more "professional." The white teachers in the system are frightened of integration. No assurance has come from their superiors—the board and the superintendent—that the school system is at all prepared to deal with it openly and honestly. Instead there is a lot of rhetoric about "treating all students alike," and the recently integrated teachers' association is figuring out how to isolate the new black members from its loftiest, though essentially meaningless, positions.

The schools' principals are former football coaches and gym instructors who would feel more at home employed in the state correctional institution than in the public schools, because they are concerned first with discipline and order; education is secondary. Here too, however, there are a few souls of merit who spend more time trying to improve the quality of education the kids receive and less time being concerned with class schedules, authoritarian rule, and the orgy on the senior trip to Washington. The principal is also kept busy manipulating the local Parent-Teachers Association and insuring that it doesn't become too curious about the operation of the public school system. The PTA usually excels in its assigned role of having bake sales, discussing how to stop smoking in the rest rooms, and sponsoring the seventh grade fashion show to raise money to buy books for the school library. They never ask why *they* must raise the money.

It is, all in all, quite a depressing picture. Perhaps there are school districts which are vastly better than the model I have described, but the problems of such a district are characteristic of many districts in the South and these are our primary concern. To all of these, add the other problems—racism, the exclusion of black and low-income parents from participation in the formulation and evaluation of federally-financed education programs from which they are supposed to benefit, the utilization by most school districts of curricula which have been demonstrated to be educationally debilitating—and it is easy enough for us to see the task which lies ahead for those involved in working for quality education and school desegregation in the South.

□ □ □

We can no longer assume that school desegregation in the South is still the goal of the entire black community; perhaps such an assumption should never have been made in the light of the many levels of opinion and self-interest within the black community. A generation of school children has passed through the public education system of the South since *Brown v. Topeka Board of Education* and there has been widespread disillusionment at the failures of the federal courts to effect significant school desegregation. That disillusionment has been augmented during the past four years by the general inability of HEW to move quickly and decisively to abolish the dual school system in the South. It is not surprising, therefore, that more and more black people are having second thoughts about the feasibility of school desegregation. As they see it, the minimal desegregation which has already been achieved has brought them nothing but more despair and sacrifice. They have learned that access to a desegregated school system does not necessarily mean that low-income and black people will have access to an integrated education which relates to them out of respect and consideration for their identity, heritage, and culture. They have seen that a desegregated education does not mean that the traditional policies, methods, and practices of an educational system fostered and nurtured by racism will be aban-

doned or even altered to meet the new complexion of the classroom. They have found that it is possible, even likely, that for them a desegregated education means ostracism, academic uncertainty, and the loss of what little control they once exercised over their own schools and educational program. What they learned is that desegregation is not the sole answer to the deep educational problems of the public school system, and even if it were, the future of black children cannot wait until integrated schools become a reality in the South.

No group is more sensitive to the failures and limitations of desegregation than are those black people who live in the school districts of the South where their race constitutes a majority of the population. Until recently it was the official policy of HEW that these school districts were exempt from compliance action, probably because HEW itself did not know how or if these districts could desegregate their schools. There are more than 250 of these districts in the seventeen southern and border states with the vast majority of them in the Deep South, some with a black student enrollment as high as 80 or 90 per cent. It is in such districts, in the black belts of Alabama and Mississippi as well as in the low country of South Carolina, that there is the greatest resistance to desegregation, the most significant erosion of the local economy and human resources caused by migration to the North, and the poorest history of race relations. Because of such conditions these school districts have the least adequate educational facilities, generally attract the least able teachers, and by and large cling to a curriculum which is outmoded and unable to respond to the academic needs of students. It is also in these areas that the private school movement has experienced its greatest growth with the advent of desegregation meaning the virtual destruction of the public school system in some districts as the white students and "white" financial support have fled to the private schools.

majority Black Districts

In these "majority Negro" districts the black people know that for them the abolition of the dual school system will have little meaning. No matter how the school system is structured their numbers will still remain in the majority. Thus, they realize that if the quality of education for their children is to improve there must be something beyond desegregation, radically altering the traditional operation of the local school system and the nature of the education program itself. (The Southern Regional Council publication of several years ago, "Beyond Desegregation," and the National Education Association's report on the schools of Wilcox County, Alabama, describe in some detail the complex educational problems of such districts and suggest the extensive changes necessary to provide quality education.) It is difficult to imagine such alterations being initiated by the whites who now exercise a totalitarian control over the school system in these districts. Considering such an atmosphere of resistance and deprivation it would appear that it is only a matter of time before there is open confrontation between the controlling white minority and the victimized black majority over who will control the school system. One would hope that the whites trapped in such situations would learn to change and to yield but there is nothing in their past performance which would justify this kind of optimism.

The disillusionment with desegregation has been reinforced by the national black power movement emphasis on the quality of education received in the black school, the relation of the curriculum to the needs of the black community, and the values transmitted to the black student. Realistically appraising the degree of white resistance to meaningful school integration many black people have concluded that desegregation has been a white man's trick all along and that their best interests now lie in commitment to

the creation of a black school system responsive to their control and to their children's need for quality education. It is the position of these people that they will perhaps accept desegregation when the white man straightens himself out and cleanses himself of the racism which has thwarted desegregation and consistently stifled the aspirations of black people. Much of New York's decentralization program is designed to respond to such concerns of the black community, though the troubled events of the Ocean Hill-Brownsville struggle indicate that not only will the whites not give up their power without a fight but that perhaps local control is not insulated from the same kind of insecurity and false pride which has characterized the actions of the teachers' union and the central school authority.

These disturbing, though understandable, reactions against desegregation are causing many activists engaged in working for school desegregation in the South to reconsider their goals and their strategies. It is easy for them to admit that the whole venture has been largely a failure, but it is terribly difficult for them to find reason to go on and, if they judge it desirable to continue to work for the goal of the abolition of the dual school system in the South, to determine just what alternatives are open to them that have not been already explored and found wanting. In frustration, some longtime civil rights activists and sympathizers have succumbed to the temptation to disregard school desegregation as a viable issue worthy of their labor. Though much of their new interest in other areas is merely predicated on certain strategic placements of their own time and resources, they must recognize that efforts to promote citizen participation in working for desegregation and quality education in the South require their support now more than ever before.

It is vital that all of those people who are beginning to falter realize that not only is school desegregation still an urgent matter that deserves their attention, but that additional manpower is now needed simply because the school desegregation movement has underscored those serious fractures and flaws in the public education system of the South which have so long placed our region at the very bottom of progress in this nation. They should also be aware that school desegregation is an issue which has aroused the interest of a significant number of persons in these more intensive problems of public education in the South. Contrary to limiting efforts in school desegregation and public education, the human relations and civil rights agencies of the South must begin to recognize the necessity for their involvement in exploiting new opportunities and servicing awakened interests in these areas.

There is no better argument for such involvement than for us to look at the present state of the system of public education in the South. At present the forces of conservatism and reaction are in control. Moreover, such forces are virtually unchallenged in the various communities of the South and the progressive elements of change in southern society have hardly had any impact on the public school system. If we choose to avoid the issues of desegregation and public education in the South because they are too difficult or frustrating, we can be assured that those now controlling public education will welcome our departure. They are secure in the knowledge that the education bureaucracy is a tenacious and everlasting institution, one which flourishes on public neglect and ignorance. The present state of the system of public education in the South is due largely to the fact that our citizenry has been content to let the system educate us as it saw fit, seldom holding it accountable for the quality of education for which it was responsible or for the mis-educated people it produced. The issue of school desegregation

has now presented us with the opportunity to *begin* to develop an informed and aggressive group of southerners who will initiate fundamental educational change in their communities. If those with the resources to be of assistance to them fail, it will mean only further decay and disillusionment.

There are also some elementary and pragmatic reasons which will cause desegregation itself to remain alive as a vital issue in the South and which may well attract the crucial focus of our attention in the future. First, there is Title VI of the 1964 Civil Rights Act which was passed primarily for the purpose of eliminating *de jure* racial segregation in our public schools. Regardless of how we view that law, its weaknesses and the fragility of its implementation, there is every indication that it will continue to be used as a lever to require more southern school systems to eliminate race as a criteria for the assignment of pupils to public schools. This is not to say that we can be assured that HEW will continue to insist that such school districts also eliminate their dual school systems—a requirement which is more fundamental to our concerns than is the mere prohibition of assignment of pupils by race.

Barring some action by Congress which would totally deprive HEW of its enforcement power—and I do not exclude that possibility—we are at least assured of creeping desegregation in the future years through the use of freedom-of-choice plans. Both Mr. Nixon and HEW policy are extremely unpredictable and it is not impossible that the Second Reconstruction will go the way of its nineteenth century predecessor. But for now there does seem to be a national commitment enforced by both law and policy, no matter how timid or tentative, which will produce greater school desegregation in the South in the immediate future. Unless that commitment is completely abandoned, the school officials of the South will continue to feel the real and psychological pressure generated by the weary employees of HEW. Black schools may remain but desegregation will continue with deliberate speed.

Second, we must recognize that to buttress what may well be only a minimal enforcement of the federal law there are the federal courts. These institutions are themselves quite imperfect and painfully cautious in administering justice, but here too there seems to be a clear trend toward requiring school districts to get on with the job of desegregating their schools. A major problem, however, is that neither the Supreme Court nor the appellate or district courts have really decided to what extent they should become involved in spelling out the precise constitutional responsibilities of a school district in eliminating the *de jure* system of racially segregated schools.

Nevertheless, it appears that the courts are becoming an increasingly important force in nudging the pace of school desegregation ahead, though there is good reason to wonder if the courts are capable of making sound judgments on the more knotty problems of equality of educational opportunity and even the drawing of attendance zones, especially when they tend to hold the "professional" opinion of the local school officials in such high regard. It appears that more and more school districts will come under court orders, with the usual result having been that districts can achieve minimal progress while continuing to receive federal funds. But so long as the courts continue to interpret the 14th Amendment in the light of the 1954 *Brown* decision and the 1968 *Green v. School Board of New Kent County, Virginia* decision, there is promise that their orders will continue to produce more desegregation.

Third, we must be concerned with school desegregation and its pace because there is considerable evidence that a quality education is largely dependent upon abolishing racially segregated schools. While the black people in the urban ghettos of the North and West—

as well as in some urban and rural ghettos of the South—have lately been forced by the circumstances of their *de facto* segregated condition to abandon this view, it is valid for most of the South.

The findings of the massive study of the U.S. Office of Education, *Equality of Educational Opportunity,* and the report of the U.S. Commission on Civil Rights, *Racial Isolation in the Public Schools,* are sufficient evidence to press forward with the task of school desegregation in the South. If the conclusions of these studies are valid—that children in school tend to learn more from each other than they do from teachers, from the use of school facilities, or from the use of educational materials, and that compensatory education is no substitute for integrated education in producing academic achievement—then there is good reason for using desegregation as a device productive of a greater mix of students of all racial and economic backgrounds. If our paramount concern is with the quality of our children's education, the abolition of the dual school system in the South continues to be essential to the achievement of that goal.

The Poor People's Campaign expressed much of the concern felt by black people and poor people about education. In response, the U.S. Office of Education established a special Office of Programs for the Disadvantaged. While this office has no real power, it is designed to provide poor people with information about federally-funded education programs and to receive complaints from poor people regarding their exclusion from them.

Also resulting from these grievances submitted to HEW by the Poor People's Campaign were new regulations requiring the involvement of the poor in programs of the Elementary and Secondary Education Act serving their children. One of these regulations requires local school districts to establish advisory committees to assist in the "planning, operation, and appraisal of a comprehensive compensatory education program" with at least half of the members of the committee composed of "parents of disadvantaged children" attending schools receiving programs funded by Title I, ESEA. The regulations also require that the Title I program include appropriate activities or services in which parents will be involved. In spite of these and other new requirements—potentially powerful levers for involving poor and black people in the affairs of the education system—it is doubtful that many school districts in the South have followed these requirements or that low-income people know they exist. When such advisory committees are formed, how can we be sure that their members will be sufficiently informed and aggressive so that they will differ from the rubber stamps sitting on the community action boards which are part of local Office of Economic Opportunity programs?

When I ran for the school board in a local district in South Carolina in 1968 I found that there were concerned white parents, clearly middle-class and moderate, who were concerned that the school system was not taking realistic and progressive steps to deal with the human relations and academic problems created by desegregation. These parents had no idea how to begin to change the school system or how to prod the administration into coping with its own problems. Similarly, one finds that even the most conscientious monitor of public institutions in southern communities, the League of Women Voters, frequently compiles excellent data on the operation of the school system but then finds it difficult to translate this information into effective pressure which will initiate reform in the school system.

Nothing has been more frustrating for me than to go into a community where there are no public meetings of the school board and to have to tell people that they have a right to demand such meetings. When such issues are raised

some people are surprised to learn that this is their *right,* while others recognize the injustice of the conditions but are so demoralized that they doubt their ability to change the traditional operation of the school system. Over and over again one finds that those people who really are concerned about quality education and desegregation and who want to do something to change the school system feel ill-equipped to confront the system and to make demands of it.

These concerned citizens are quick to admit that they know nothing of education programs. They have probably not given serious thought to the kind of education system they want. They just know that *something* is wrong. These people don't know anything about the techniques for dealing with the problems of children who are below their grade level. They have been convinced that compensatory education programs can "uplift" the child of the low-income family, that such children are being significantly helped by Headstart, and that these "disadvantaged" children fail because of their home environment or their own lack of "intelligence," but never because the school has failed them. Many of these well-educated and middle-class people are themselves overcautious about moves to achieve meaningful desegregation because they fear the impact of black children on the "quality" of the present educational system. Because these average citizens have left the job of education to the "professionals," they have blindly fallen victim to old myths and have taken the word of school officials about what is best for their children and the children of people different from themselves. Like the members of the school board, they are unfamiliar with options their school system could exercise in favor of better education, desegregation, or both.

It is clear then that efforts must be made to establish at least a cadre of persons in southern communities whose first concern is with quality education. Perhaps this is the logical role of the PTA, but by and large the PTA has been both impotent and irrelevant to the fundamental issues of education discussed here. Some communities have established groups such as the Beaufort County Education Committee composed of parents and interested citizens to monitor the actions of the local school system. But a much more intensive effort is required. Until a group of citizens in each community begins to grapple with the problems of education and to educate themselves about the range and quality of options available to the local school district, there will be little change. At least some persons in the community must be able to understand what school principals and superintendents are talking about when they use such terms as "homogeneous grouping," and these persons must become acquainted with the potential of such methods as team teaching, a nongraded system, academic games, teaching English as a second language, and other innovations of demonstrated effectiveness in improving academic achievement. They must, in other words, come to have some notion of what constitutes a good educational system and how its operation is different from an inferior system. They must begin to consult with teachers, not on a group-to-group level alone, but on an intensive one-to-one basis, rising above the usual superficial contact made when Johnny brings home a bad report card. They must begin to understand the concerns and the limitations of the teacher and to discover how teachers perceive the local education system and their role in it. They must also take the "radical" step of consulting with groups of high school students to discover their perception of the system and what they see as its failures.

There are other necessary steps. A new militancy is required in response to localism. Local citizens must begin to demonstrate to the school system that

education policy can no longer be formulated, programmed, and evaluated without community participation. They must begin to work with teachers in their demands for more involvement in the development of the education program. Citizens' groups must continuously and consistently engage the central office staff of the school district and the state department of education, making the bureaucracy conscious of the legitimate and responsible grievances of citizens, aware of the needs of the community and mindful that it must adequately respond to such needs. Efforts must be made to seek out the competent and creative educators in the system—to listen to them and learn how the community can facilitate change in the school system. Such groups must also begin to hold extensive discussions with the boards of education regarding the nature of their role and responsibilities in representing the body politic. But a first step is for citizens to ask themselves what kind of educational system they want, what that system as it functions in the local community is, and what that system is doing.

"Quality education" itself is a term glibly used by local educators and political leaders alike. There is never, it seems, any definition of this term though such a definition is central to an understanding of the goals of any movement for progressive change within the educational system. For the purpose of this discussion of what we should be doing to achieve this elusive goal, I offer my own belief of what a quality education does:

A quality education gives the student the basic skills which he needs for the great range of opportunities before him when he completes his education. A quality education equips him with the tools (reading, writing, reasoning, etc.) so that *he* — not his teacher, not his parents, not our society—but *he*—can determine what he wants to do with his life and will be well prepared to take the next step toward that goal.

A quality education challenges his assumptions about life and about people, and it introduces him to new experiences which expand his understanding and appreciation of the world and people in it.

A quality education gives the student the opportunity for self-exploration so that he can develop his own ideas, so that he can think critically and independently, and so that he can begin to know himself.

A quality education helps the student develop a sense of values, including an appreciation for the worth and humanity of his fellow men and an understanding of the necessity for his involvement in the social and political structure of his society.

Quality Ed — Defined

SPECIAL REPORT

SOUTHERN REGIONAL COUNCIL
5 Forsyth Street, N.W., Atlanta 3, Georgia

LAWLESSNESS AND DISORDER

Fourteen Years of Failure in Southern School Desegregation

Thou hypocrite, first cast out the beam out of thine own eye; and then shalt thou see clearly to cast out the mote out of thy brother's eye.
--Matthew, 7:5.

Introduction

This report is the third in a period of four years in which the Southern Regional Council has attempted to tell the nation of the deplorable degree of failure in the South to comply with the law of the land against racial discrimination in education, and to suggest the terrible implications of this failure.

In the previous two reports, in 1965 and 1966, there were empirical and psychological reasons for including some guardedly optimistic, some hopeful words, saying that surely the situation would be corrected. This would come, it could be felt, once the nation realized the extent of failure, of resistance by men of public trust in the South, of ineptitude and unrealism on the part of those charged with enforcement, of savage damage done to children of both races by this enduring record of flaunting the law.

This time there seems almost no hope, virtually no reason to find optimistic words, to say things may improve. The mistakes of the past are repeated. The nation has not seemed aware even of the failure, let alone resolute enough to end it.

Such a dismal report comes at a time when many Americans --young people and Negroes especially--are disaffected, disillusioned, disgusted with the government, the basic institutions, the socially expressed values of their country.

Riots, repressions of civil liberties, distrust to the degree of hatred of police by many citizens, acrimony so bitter in the exchange of ideas that debate degenerates into cat-calls, the murder of leaders--these are the marks of the disintegration to which American public life has come. A tendency to anarchy, a willingness to destroy the good along with the bad of such a basic institution as higher education, is evident on the one hand. A tendency to right-wing totalitarianism is evident on the other.

And the public expresses its perception of all of this with a cry for law and order. Politicians use the term as a shibboleth.

There have been lawlessness and disorder rampant across the South since 1954 regarding the just requirement that racial discrimination in education be ended. This has been the signal failure in a whole incredible series of failures in the rights of Negroes, in society's obligations to the poor. Children are starving among us, and the official reaction is most often to deny the existence of that starvation, rather than to respond to it, alleviate it.

The real story told in this report is that of where the real breakdown in law and order, all along, has been. It is a terrifying story of the object lesson in dishonesty and hypocrisy our government and our society have provided for a whole generation of young Americans.

The only real hope that we can put into a report like this is the fervent one that the American people will come

to see what true law and order means, and act at last to achieve it, with justice for all.

Pat Watters

PART I

FULL CIRCLE OF FAILURE

by Glenda Bartley
Director of Research
Southern Regional Council, Inc.

In the long decade between the Supreme Court's first decision in Brown v. Topeka Board of Education and passage of the Civil Rights Act of 1964, faith in the ability of federal courts to affect substantial integration in the public schools of the South had sharply diminished. At the time Congress gave legislative sanction to the nation's fundamental law, there were only 34,105 (1.17 per cent of Negro enrollment) Negro children attending school with whites in the eleven southern states. Hope now hinged on Title VI of the act, which contained the ingredients for a small revolution. Then, for three, bitter, frustrating, defeated years, attention was focused on the enforcement agency for Title VI--the Department of Health, Education and Welfare. It seemed that HEW's Office of Education with its power to cut off federal funds now had the weapon to wring compliance from the previously unbudgeable South, that school desegregation would cease to be a phenomenon of urban tokenism.

Essentially, the shift away from the courts to the executive branch made school desegregation wholly an administrative matter.

The Administrative Era

In the first year of this administrative era (1965), the Office of Education issued guidelines for compliance with the act. The freedom-of-choice clause (theoretically

allowing parents to send their children to any school in a given system) in these guidelines, and in those issued subsequently, still placed the burden of desegregation on Negro school children and their parents, but the weight of resistance was shifted from southern legislatures to individual school administrators. Neither the novices at HEW nor experienced observers outside the South calculated the nature and ability of their new adversaries. School administrators in a region yet uncommitted to education are a lonely and beleaguered lot. (Support for education as a regional panacea is more dogma than dollars.) Early outraged protest over federal intervention and federal control soon settled into the sure manipulation by one parallel bureaucracy of the other.

It was also during the brief period before schools opened under the first guidelines that the real violence set in. The previous ten years had been relatively free of it in the matter of school desegregation. There was Mansfield, and Clinton, and Little Rock, and New Orleans, where screaming mother-mobs appeared on television as the first wave of mass media theater of the absurd. But the violence was done mostly to psyches of the few Negro children. During the first judicial era (1954-64), the mode of southern private resistance was as often economic as physical terrorism. And the targets of the bombs, beatings, burnings, bullets, firings, credit cut-offs, and foreclosures were most often not parents who tried to send their children to "white" schools, but people who tried to gain access to

public accommodations, register to vote, and the like. This was largely because there were virtually no Negro parents making the attempt in the rural areas and small towns where the varieties of terrorism have been most virulent. In the cities, where most of the (token) school desegregation occurred during the first judicial era, the terrorism was mainly within the schools, a low-grade, day-by-day torture of the Negro children by their schoolmates, teachers, and administrators.

Out in the rural areas of the South, where law enforcement was repressive before it became fashionable to be so, the advent of the guidelines, the threat that black children might actually go to school with white children, brought a wave of terror unmatched since post-Reconstruction whites rode around in bedsheets. And economic retaliation against the few Negroes who chose the "white" school did not abate.

In September, 1965, 184,308 (6.1 per cent) Negro children enrolled in "white" schools.

In spite of the increased violence and the pitifully small number of Negroes in desegregated situations, there was a national misunderstanding of what was happening in the South. There were several reasons for this. The administrative experiment was taking place in rural areas of the South--crossroads towns and hamlets as ill-geared for news coverage as Ulverstone, Tasmania. And, since there had been virtually no desegregation at all before, any small gain was often hailed as a triumph. Another reason for the national misunderstanding was perhaps caused by national

news media's probably unconscious wish to have done with the violence attendant on any significant social change in the South. This passion for tranquility, for order, has led many a responsible reporter, magazine, newspaper, and television network to announce the advent of another school year as an occasion of "increased desegregation," or even "massive desegregation...without violence." (An example of such was the story which ran under a headline proclaiming that school desegregation swept peacefully across Dixie: the story itself recounted instances of desegregators' homes fired into--as many as 32 times--in three towns in one state alone.)

March, 1966, brought new guidelines aimed at plugging some of the loopholes that observers felt accounted for the debacle during the first year of the administrative era. Freedom-of-choice, the most commonly used southern compliance method, remained. The choice forms were mailed that spring; federal negotiations with individual districts continued; a few school systems, notably in Alabama and Mississippi (with their unpopular national image), had their funds terminated; private agencies, already cognizant they were doing the federal government's job, sent field workers to persuade Negro parents to choose the "white" school.

In 1966 there were 2,598,842 (or 88 per cent of the Negro enrollment) in all-Negro schools, more, due to population increases and the small amount of desegregation, than had attended segregated schools in the year of the first Brown decision.

New guidelines were issued in December, 1966, but it was about over--the administrative era. Negro parents, target of every trick known to a national minority accustomed to working its will on the nation in matters of race, were getting tired. Negro children, in all too many instances in desegregated schools abused, excluded from activities, were disillusioned. Private agencies' field workers, who had often been Negroes' only assurance that all of white America was not hostile, that they and their children were not totally alone, were reluctantly pulling out.

When school opened in September, 1967, 86 per cent of southern Negro students remained in segregated schools. Figures for the Deep South were more depressing: Alabama, 94.6; Mississippi, 96.1; South Carolina, 93.6; Georgia, 90.1; and Louisiana, 93.3.

Defeat for the administrative experiment in education in the only large nation without a national school system came for a number of reasons. Freedom-of-choice was a fatal blunder. It allowed the violence to work its will, permitted white terrorists a victory denied their "respectable" counterparts of the 1950's. Negro parents, who had from the first simply been interested in getting their children the best education available, failed to see the educational value of losing a job, being shot at, in order that the children might attend a school only a little less bad than the "Negro" one. Even without white resistance, the free choice concept in its pure form is an administrative impossibility. Realizing this early on,

authors of guidelines and court orders as well were forced to attach exemption clauses (read as loopholes by southern schoolmen) taking into account such physical realities as "proximity," "overcrowding" and the like.

The confounding of Title VI was perhaps present all along within the same act. Title IV, little noticed in 1964, has haunted all the efforts launched under Title VI. There are many districts in the South which are like Washington, D. C., where the school population is mostly Negro and defies conventional zoning or other plans to make it desegregated. Such districts in the South are still overwhelmingly rural, but Atlanta, Memphis, Richmond, and other cities are already, or soon will be, in this category. Title IV prohibits "bussing" to achieve racial balance. How then desegregate majority-Negro districts, or large school systems in which de facto housing segregation perpetuates school segregation? Pairing (making one elementary school serve grades 1-2, another grades 3-4, etc., drawing children from wider geographic areas in the process), said some experts. Combination pairing-zoning, said others. And still others suggested educational parks, federally financed in fringe areas to accommodate suburban whites and ghetto blacks. This would be achieved with urging from (the same) Title IV's technical assistance teams and pressure of fund termination from Title VI (carrot and stick, repeated ad nauseum--the carrot magically to overcome heretofore sacrosanct district boundaries, to say nothing of county lines and jurisdictions hallowed in

the South, but the other part of the formula, the basic question, ignored--WHAT STICK?). The restriction on bussing eliminated the possibility of drawing up zone plans which would ultimately destroy the dual school structure--erase the designations "Negro" and "white."

It is therefore useless (and even cruel) to criticize too strongly the failure of the Office of Education to map a strategy other than freedom-of-choice.

The weapon--termination of federal funds--did not prove effective. Most often the sufferers were the pitiful black schools. Many southern superintendents seem to hold to the philosophy that "Negro" and "federal" are synonymous terms. These schoolmen use federal school funds, like those allotted under Title I of the Elementary and Secondary Education Act for upgrading education in "deprived" areas, to bring Negro schools' per pupil expenditures up to the level afforded "white" schools by local finances.

Perhaps the best summary of the failure of the administrative experiment is contained in an example of massive school desegregation as it swept non-violently across Unadilla, Georgia.

Roy Hunter was beaten by schoolmates more than once at Unadilla High School and received threats on his life up until the moment of his singular dark presence in the graduation exercises from that seat of learning. Three years before, in 1965, his mother, fired from her job, had found a dead bear on her front porch--local whites' reminder that her eight children had chosen the wrong school. Finally, in 1968, Unadilla lost its federal

money--200,000 badly needed dollars. All but $25,000 of that money had gone to the Negro school--much of it spent for lunches (upgrading education in the South is all too often a matter of feeding children who get little food at home). The community raised tax millage to replace the $25,000, and the superintendent announced that since the system no longer received federal funds, the "white" school would no longer accept black children. The Hunter children had been the only desegregators all along. Displaying the kind of courage that seems required of those who still believe in this country's fundamental law, they again attended the "white" school in the fall of 1968.

The Second Judicial Era

March 29, 1967, marked the advent of the second judicial era in school desegregation. The Fifth Circuit Court of Appeals, sitting en banc (full court), directed each state within the circuit to take all necessary affirmative action to bring about a "unitary school system in which there are no Negro schools and no white schools--just schools."

In October, 1967, the Supreme Court refused to review the order, and the National Association for the Advancement of Colored People declared the Fifth Circuit ruling to be "the most influential school desegregation opinion" since Brown versus Topeka.

Indeed it was. In effect it gave legal sanction to the guidelines, while insisting that freedom-of-choice plans would be thoroughly examined by the courts to deter-

mine whether the method was working.

On May 27, 1968, the Supreme Court issued a similar ruling, stating that,

> In desegregating a dual system of public education, a plan utilizing student 'freedom-of-choice' is not an end in itself but is only a means to the constitutionally required end, the abolition of the system of segregation and its effects, and, if it proves effective, it is acceptable, but, if it fails to undo segregation, other means must be used to achieve that end.*

Clearly freedom-of-choice had failed in almost every instance to abolish "the system of segregation and its effects."

The decisions renewed hope, all but bludgeoned to death by more than a decade of too many Unadillas, an Ezekiel's Wheel kind of hope that freedom-of-choice itself would be abolished. At the same time civil rights and legal agencies were renewing their efforts to desegregate southern schools, Education Commissioner Harold Howe, II, was expressing federal relief at the re-entrance of the courts in a manner which should have been ominous to those who were anticipating a new concerted effort by executive and judicial branches. Howe said: "Our policies are clearly supported by the courts.....It's not as necessary now as it formerly was for those of us in Education to have a role in civil rights compliance."

---

*Green v. County School Board of New Kent County, 88 S.Ct. 1689 (1968).

A federal district court in Alabama had issued an order (also in March, 1967) which would, in fact, result in a collision of the two branches of the federal government in the matter of school desegregation. Lee v. Macon County placed 99 of Alabama's 118 school districts under court order. These were districts that had formerly been operating under HEW guidelines. During the summer of 1967, HEW declared that the Lanett, Alabama, school system was not in compliance with the guidelines and was therefore ineligible for federal aid; Lanett school officials protested that they were now under a court-approved plan, and in July the court held that it was the court's responsibility to determine whether school systems were in compliance with its order. Urging HEW to continue investigations and to report any failures to comply, the court warned, however, that HEW could only take action with its specific approval.

But meanwhile, all across the South during 1967 and the spring and summer of 1968 old school cases were reopened and new ones filed. Results were familiar to those old enough to remember Brown I and Brown II. District courts in numerous cases overthrew freedom-of-choice plans and ordered school boards to submit geographic zoning plans drawn so as to afford substantial desegregation.

In many respects the new judicial era was exactly like the old. It introduced an entirely new concept in equal education to southern whites. No less revolutionary than the Supreme Court's announcing in 1954 that separate

educational facilities were inherently unequal was the idea that desegregation meant white children attending formerly "Negro" schools. Freedom-of-choice had been the interim separate but equal, not a transitional concept, but educational dogma. HEW's acceptance of gradualism was not nearly so damning as its acceptance of the southern solution. Freedom-of-choice meant Negroes, as many as could stand it, in white schools. New, court ordered, the zone concept literally meant mixing the schools. Administrators (the South, they said, the people, simply weren't ready for it, no sir) reluctantly drew up the new plans.* Through the late spring and early summer resistance grew. Just as in the first judicial era, it was mainly the cities of the South that were affected. And the resistance had a citified, sophisticated new look, not seen since the administrative experiment moved the issue to the rural South. Committees, organizations (Stand Together and Never Divide, etc.) of white parents formed (reformed, in many instances--a new generation of resisters) to fight for freedom-of-choice. Almost without exception they were victorious.

The new judicial era fell victim to many of the traps that had plagued the old one. Federal judges, admittedly

---

*The Supreme Court stated in Brown II (1955): "It should go without saying that the vitality of these constitutional principles cannot be allowed to yield simply because of disagreement with them." Brown v. Board of Education of Topeka, 1955, 349 U.S. 294, 75 S.Ct. 753, 99 L.Ed. 1083.

not educators, were often forced to believe elaborate arguments by schoolmen that what the courts requested was simply not (immediately) possible. Redraw all school boundaries...75,000 children involved...teachers already assigned...overcrowding...undercrowding...BUSSING...You see, your honor, we would very much like to comply with the court order, and we will...but not now. (A federal district judge in Mississippi recently ruled that, since whites would pull out of a zone-desegregated school system, freedom-of-choice was consititutional. This bit of tortured judicial reasoning was engendered by a poll, conducted by whites, of whites in the district. The poll revealed that white parents would refuse to send their children to public schools; therefore, no desegregation would exist. So, freedom-of-choice would, at least in theory, allow more desegregation.)

Also, pressure by white parents in many locales had almost the same effect as threats by southern legislatures a decade before. These parents, through their organizations, said they would, and in some instances did, close the schools down rather than desegregate them. (In Chesterfield County, South Carolina, schools were closed for a week due to protests by white parents. They were reopened September 15, 1968, after the board reinstituted the freedom-of-choice plan.)

Mobile, Alabama, seemed to sum up the first year of the new judicial era: The Mobile case had been in court for many years. The system was operating under freedom-of-choice. In 1967 two per cent of Negro school children attended "white"

schools. The Fifth Circuit Court of Appeals in March, 1968, instructed the school board to adopt a rigid (no provisions for transfers within the system to avoid attending a desegregated school) zone plan, which would have placed about 1,400 white children in formerly all-Negro schools. White parents organized (Stand Together, etc., and Whites Organized for Rights Keeping); the area's state senator filed a motion in federal court seeking to overturn the new ruling on grounds it would be unsafe for white children to attend all-Negro schools. After a summer of legal battling the federal district judge who had issued the initial order came up with a plan allowing senior high schools to operate under freedom-of-choice, requiring specified attendance zones for elementary and junior high schools, and permitting more liberal transfers within the attendance zones. When school opened in September, an estimated 3,500 Negroes were in formerly all-white schools; but very few whites were in formerly all-Negro ones.

Mississippi, as usual, was the epitome of frustration, confusion, and a certain hope. School cases in 50 of Mississippi's 148 districts are to be reopened in the fall. A spokesman for the NAACP Legal Defense and Educational Fund, Inc., the most active agency in the legal battle for school desegregation, was confident that in most of those districts freedom-of-choice would be discarded and zone or pairing plans required. The spokesman also stated that such action would result in whites pulling out of the public schools in several districts. "It depends on the

district," he said. "Where whites are proud of the schools, where the schools are good, whites will stay. In the Delta, where schools are bad, whites will probably pull out." He cited Corinth, a relatively prosperous community in northern Mississippi, as an example of a good school system's holding whites in spite of a comprehensive zone plan that would result in substantial desegregation. Though Mississippi still has a tuition grant statute, which theoretically could support private schools, there is little chance of its indefinite survival. The Legal Defense Fund spokesman, wise in the ways of Mississippi, and still hopeful, said, "Whites will probably go through the full cycle of resistance and come back to reconciliation again--just as they did before." He felt that the South might yet solve the problem of desegregation before the North began, really, to grapple with it.

The Pattern of Failure

There was the chance, a slim one, that the courts might succeed, might assure justice at last to school children in the South. But all the foregoing history indicates failure, and the results of the first year of the second judicial era bear out this gloomy prophesy. Though no official figures were available in late September, 1968, the old pattern seemed to hold. A few more Negroes in school with whites in the cities; in some instances rural "Negro" schools closed and the entire student body absorbed by the "white" ones; a minuscule number of whites in formerly all-Negro schools. The second judicial era would, it seemed,

encounter the same dilemma that doomed the first one: Governor Lurleen Wallace, paraphrasing another Southerner who flouted the law when it suited him to do so, said of the Fifth Circuit ruling, "They have made their decision, now let them enforce it."

Why those who had lived through the first era, had watched the few children life-scarred for the privilege of entering a building, fanned the old hope again is probably irrelevant. But the results of fourteen long years of methodizing, legalizing, computerizing, analyzing, and finally, mortifying what is, after all, the basic right of every American child--the right to a good education, the right to enter any building to get that education--will long be felt in this nation.

We teach children, all children, that the United States of America is dedicated to law and order. We lie. We have shown a generation of American children, in the public institution closest to their lives, the schools, that this nation's fundamental law need not be obeyed; we have clearly demonstrated to them that what we expect is their conformity to lipservice to the shibboleth. What will be the awful effects of this lie upon children, black and white alike? What depths of disillusionment when they hear us say "law" and observe only "order?"

After a generation has beheld successful evasion, rationalized vaccillation, outright flaunting of the law, only a country absolutely wedded to the totalitarian concept of order without law could turn on the victims of lawlessness and accuse them of destroying the fabric of society.

PART II

THE CONGRESS, THE COURTS, AND THE NATIONAL WILL

by Robert E. Anderson, Jr.
Editor of Southern Regional
Council's Publications

The story of how desegregation still hovers at a low level of tokenism involves not only official defiance of the federal government and intimidation of Negro parents and students but, of late, extremely effective persuasion by southern congressmen.

In 1966, a southern assault on the HEW guidelines was directed primarily at desegregation percentage requirements which HEW said were used only to measure a school system's rate of progress from one year to the other. Southerners said the percentages were promulgated to bring about racial balance in the schools in violation of the 1964 Civil Rights Act. The southern strategy, appealing to northern fears that HEW's next move would be to attack de facto segregation and the sanctity of the neighborhood school, was partially successful in emasculating the guidelines. The House voted to require the U. S. Office of Education to hold a full hearing before withholding funds from a school district considered to be in violation of the guidelines. A House-Senate conference changed the provision to allow for fund "deferrals," provided a hearing be held within 60 days. In addition, the Southerners succeeded in slashing HEW's budget request for funds to increase its compliance staff.

In 1967, House Southerners largely remained in the background as a northern liberal -- Rep. Edith Green (D.-Ore.) -- fought their segregation battles for them. In amendments

to the Elementary and Secondary Education Act of 1967, Rep. Green succeeded in requiring HEW to apply its school desegregation guidelines uniformly to all 50 states, and to cite statutory authority under which it withheld federal funds from noncomplying districts. Southerners supported both measures, charging that in the past, HEW acted discriminatorily in applying the guidelines only to the South and illegally in denying funds without authority of the Civil Rights Act. Southern civil rights forces were disappointed at the adoption of the amendments which they saw as no more than spiteful diversionary tactics designed to fragment HEW's compliance efforts in the South.

Southern officialdom gained another victory in 1967 when a Senate attack led by Georgia Senator Richard Russell resulted in a policy statement from the Secretary of Health, Education, and Welfare, pledging that the agency would give school systems notice of any possible fund termination six months prior to the start of the school year. Earlier Russell had introduced an amendment to the Secondary and Elementary Education Act, which would have flatly prohibited HEW from cutting off funds at any time during the school year. Senator Wayne Morse, floor manager for the bill, said he could not accept the Russell amendment. Southerners, no friends of federal aid to education anyway, threatened to filibuster the whole bill to death if he did not. But the policy pledge by Secretary Gardner placated Southerners.

They abandoned their efforts to enact the Russell amendment. Interestingly, however, Russell, on the floor of the Senate, later admitted that he had "no assurance whatsoever" that his measure could have passed. He conceded the Secretary's policy statement was probably for his forces better than passage of his own amendment because it might have been killed in a Senate-House conference. In a letter to his Senate colleagues, Russell said the compromise represented a larger concession than he had thought possible.

In June of 1968, a coalition of Southerners and northern moderates united in the House to bring about what Georgia Congressman John Flynt described as "congressional sanction to 'freedom-of-choice.'" On a crucial 139-109 tally, the House voted to retain the so-called "Whitten Amendment" to the HEW Appropriations Act. That amendment (named after its sponsor, Rep. Jamie Whitten, D.-Miss.) stated:

> 409. No part of the funds contained in this Act may be used to force busing of students, abolishment of any school, or to force any student attending any secondary school to attend a particular school against the choice of his or her parents or parent.
>
> 410. No part of the funds contained in this Act shall be used to force busing of students, the abolishment of any school or the attendance of students of a particular school as a condition precedent to obtaining federal funds otherwise available to any state, school district, or school.

Proponents of the amendment were frank in seeking to link their cause with that of northern advocates of the neighborhood school. Rep. Whitten warned his colleagues that "what has been visited upon certain areas of the country is about to spread throughout the nation." Rep. Robert L. F. Sikes (D.-Fla.) after describing what he termed "harassment" of school officials in Florida concluded:

> This is what is happening to schools throughout the land. Probably it has happened to your schools. If not, it will.

Rep. Charles E. Goodell (R.-N. Y.), speaking against the amendment, stated the issue clearly: "The two amendments . . . specifically provide that no federal money can be used to assist school districts in their plans, or to press school districts in their plans to meet the Supreme Court decision."

Rep. Emmanuel Cellar (D.-N. Y.) was even more blunt. "What is sought here is to overturn the Supreme Court decision [regarding freedom-of-choice]."

Rep. Whitten denied that it was his intention to nullify the court decree; however, he declared that when it came to appropriations, "we don't have to pay any more attention to the courts than we want to."

The impact of the House action sent shock waves into civil rights ranks, raising serious doubts as to the congressional will on its own school desegregation legislation. Despite the fact that HEW, under reorganized enforcement procedures, continued to talk tough about its future plans and, conceding the goodwill and intentions of its compliance officers, the agency would obviously have been crippled in its enforcement efforts by the Whitten amendment. Some civil rights observers thought the amendment would so seriously restrict future HEW desegregation efforts as not only to legalize freedom-of-choice desegregation plans but to make them the only sort of desegregation plans acceptable. Rep. Goodell, for example, put it this way:

> The indirect effect of this, I fear, will be that school districts which are negotiating with the federal government as to how they can get full integration in their school systems . . . will find themselves in a position that when the school board redistricts it will not be able to assign pupils unless the parents of all these pupils agree and give their consent.

The Whitten amendment -- pushed in the Senate by Georgia Senator Richard Russell -- ran into opposition in the Senate Appropriations Committee. Liberals succeeded in adding a clause making the appropriations restrictions applicable only to instances where HEW might attempt to "overcome racial im-

balance." Southerners on the committee gained concessions from their northern colleagues when the committee approved another Russell-sponsored amendment requiring HEW to assign as many compliance officers to northern states as to the South.* The committee also approved two other segregationist amendments, preventing HEW from cutting off funds derived from timber taxes or from denying school lunch and medical service funds to southern schools. In September, the full Senate approved the committee bill with the amendments cited.

House proponents of the legislation, however, were set for a showdown fight and in a House-Senate conference committee succeeded in reinstating the Whitten Amendment. The appropriations bill was resubmitted to the House which in an abrupt about-face rejected the Whitten Amendment outright by a 175-167 vote. Southern civil rights forces, prepared for the worst, were astounded; southern congressmen abjected. "We had the votes," lamented Georgia Congressman John Flynt, "if the people had been there."

The Congress v. the Courts

Beyond the immediate effects of the congressional action on school desegregation (and the mere fact that the Whitten Amendment could gain the northern support that it

*The amendment seemed to represent a basic contradiction. For to require HEW to devote as much effort to desegregation in the North as in the South was to give HEW the mandate to move against de facto segregation everywhere. Yet Title IV of the Civil Rights Act forbids any action to overcome racial imbalance inherent in de facto segregation.

did was in itself a sobering commentary on the national commitment to integration), civil rights forces saw another potentially greater threat both to the civil rights cause and to civil liberties. Implicit throughout the House debate on the Whitten Amendment was the sentiment for congressional restraints on the Supreme Court. That sentiment was translated into action with passage of the controversial "anti-crime" bill, a portion of which specifically nullifies a Supreme Court decision in regard to the admissibility of voluntary confessions in criminal proceedings. Most certainly it was a factor in the decision of some senators to oppose the elevation of Justice Abe Fortas to Chief Justice of the Court.

Yet in the realities of American politics, even pessimistic civil rights advocates doubted that the Congress will succeed in actually bringing about a legal reversal of the Supreme Court's school desegregation decisions. Even an attempt to do so would bring the nation to a constitutional crisis such as it has not had since the Civil War. More likely, there will be continued efforts to render the rulings meaningless through appropriations restrictions and reductions. Northern liberals who seem to have no hesitance in siding with southern segregationists on such restrictions when they see de facto segregation threatened would hardly go along with an overt racist effort to nullify the courts. Southern congressmen, too, apparently have learned just how far they can take their northern colleagues. House debate on

the Whitten amendment, for instance, was largely void of the fire-eating oratory characteristic of southern congressmen in the wake of the 1954 Brown decision. Thus if current trends in the Congress continue, trends which increasingly seem to reflect opinion of a portion of white middle-class America, politely affirmative on such easy either/or issues as the end of de jure segregation in the South, but increasingly testy and antagonistic toward implementing measures that will cost more than lip service, dismantling of other civil rights enforcement and procedures might also be expected.

The federal structure itself perhaps doomed the administrative effort to achieve desegregation. Empowering an agency to carry out congressional mandate allows legislators (who control the real power) the right to give and to take away -- to speak out vehemently for civil rights and then on critical roll calls to cripple the agency charged with gauranteeing those rights. In 1964, the nation seemed bent on conferring citizenship on Negroes. Stokely Carmichael articulated black power in 1966 and white power seemed to breathe a sigh of relief that Negroes no longer deserved nor even desired the honor.

The fact is that while Northerners have only recently begun to wrestle with the thorny problems of de facto segrega-

tion, many Southerners at last have come to view the process of school desegregation as a rather dull serial in which each year begins with high expectations and ends with disappointing results. They see the slow pace of school integration as a barometer of the whole national will in the matter of civil rights enforcement. For certainly all of the law and all of the court decrees necessary for the fulfillment of a century's promise have been made. What remains wanting, after all of the high and noble sentiments have been expressed, is the commitment to implement them.

In the meanwhile, the disgrace of continued failure to bring about an end to dual schools was having precisely the effect that white racist elements in the South had striven without success in previous years to bring about. As the summer of 1968 unfolded and a new school year approached, many Negroes, reflecting in varying degrees a concept of "black awareness," had come to feel that school desegregation is no longer a relevant issue. "Why don't whites ever transfer to our schools? Why should we be the ones to do all the sacrificing?" Some voice the attitude, too, that if "quality" education can be achieved in an all-Negro school, then why should Negro children suffer the pain, the estrangement, the cruelty they subject themselves to in desegregating a "previously all-white school." "Separate but equal," never achiev-

ed when it was the law of the land, becomes now a sour goal of the disappointed, disillusioned, and betrayed.

APPENDIX I

JEFFERSON COUNTY AND MACON COUNTY SCHOOL DESEGREGATION DECISIONS

by

William Robert Gignilliat, III

and

Kenneth M. Horwitz

* * * * * * * * *

APPENDIX I

The Jefferson County and Macon County decisions, analyzed in Appendix I, were the most significant school desegregation court actions of the 1960's. Jefferson County initiated a period of extensive judicial examination of the efficacy of freedom-of-choice as a means of abolishing the dual school structure and eliminating its effects. The Fifth Circuit Court of Appeals in Jefferson stressed school administrators' affirmative duty to erase the designations "Negro" and "white" schools and to offer children of both races a desegregated, equal education.

The federal district court for the middle district of Alabama, in its historic Macon County decision, recognized state school officials' responsibility for disestablishing the system of school segregation still prevalent in Alabama. Placing state officials under court order, federal district judges in effect undertook supervision of the elimination of the dual school structure throughout the state of Alabama.

JEFFERSON COUNTY AND MACON COUNTY
SCHOOL DESEGREGATION DECISIONS

The Federal Mandate

Congress in Title VI of the Civil Rights Act of 1964 gave to the Department of Health, Education, and Welfare (HEW) authority for securing school desegregation in all local school systems receiving federal financial assistance. Pursuant to the provisions of Title VI and to the subsequent regulations,[1] HEW issued Statements of Policy (guidelines).[2]

Under the guideline procedures based upon the HEW regulations, school districts without dual school systems (presumed to be without racial discrimination) could file HEW Form 441 indicating that they were in full and immediate compliance with Title VI and the HEW regulations. These school systems would then be eligible to receive federal aid, and had no further obligation. Only if a complaint were filed and substantiated would HEW require additional assurance from the school district.

A district which operated a dual school system was required to file HEW Form 441-B. This indicated the school district had submitted a voluntary plan to desegregate its schools. In the South this was usually a freedom-of-choice desegregation plan. The guidelines included the basic standards and requirements to which a desegregation plan must conform to be acceptable. HEW had the authority to decide if the plan was acceptable and to determine if the school district was complying

---

[1] 45 C.F.R. Part 80 (1967). These have not been revised since they were first issued.

[2] 45 C.F.R. Part 180 (1967). The guidelines have been revised three times since they were first issued. The three revisions were in March and December, 1966, and September, 1967. It would be well to note here, as will be discussed later, that the guidelines are not regulations, were not signed by the President, and their authorization has a different basis.

with the plan subject to review. If the school system was not in compliance, or refused to desegregate, HEW was authorized to terminate all federal financial assistance to the school district. (It should be made clear that enforcement action ultimately ending in fund termination was not an arbitrary procedure by HEW compliance officials; rather HEW enforcement action included administrative safeguards: notification of suspected noncompliance, requests for voluntary modification, informal and formal hearings and appeals.) If a school system continued to refuse to comply with the requirements of the guidelines and had its funds terminated by HEW, the only way to force the district to desegregate was by going into a federal district court and obtaining a court order against the school system.

If a school district under court order to desegregate wished to continue to receive federal aid, it was required to submit to HEW the court order, accompanied by an assurance of compliance with that order. When both conditions were satisfied, the school district was automatically eligible to receive federal aid.

If a school district under a court order to desegregate would not meet these two conditions, the plaintiffs or the Justice Department could seek to rectify the situation by further litigation either in the form of a contempt proceeding or a stronger order to desegregate.

In the Fifth Circuit, a relatively large percentage* of school districts are under court order, with an even larger percentage of school children in court order districts. There are three basic reasons for this development. First, after the Brown case in 1954 and before the Civil Rights Act of 1964, the only remedy against a segregated school system was a court order. In this ten-year period most large cities in the South were put under court order to desegregate. Second, after 1954, many school districts failing to comply with the HEW guidelines

---

*See Tables 1 and 2.

were brought into court to force compliance. Third, school districts desiring to avoid the stricter HEW requirements sought court orders.

The Jefferson County Case

United States v. Jefferson County Board of Education is important not only because it gathered and analyzed school desegregation law developed since 1954, but it set forth a model decree designed to produce uniformity within the Fifth Circuit. It gave major emphasis to the affirmative duty of the school boards to eliminate discrimination in public schools. The fact that a model decree was issued indicated that the Fifth Circuit Court of Appeals would no longer tolerate an evasion of the law of the land and was determined to use the power in its hands to stop such evasion.[3]

Jefferson County consists of nine school desegregation cases consolidated for hearing on appeal by the Fifth Circuit Court of Appeals.[4] Judge Wisdom wrote the first opinion, which was that of a three-judge court handed down on December 29, 1966, and which contained a major discussion of all the issues involved.[5] There was one dissent by District Judge Harold Cox, sitting by designation, who requested a hearing of the case by all twelve Fifth Circuit Court of Appeals judges. The en banc (full court) hearing produced a short, six-paragraph per curium opinion (an unsigned opinion by all concurring judges) which adopted with slight modification the opinion and model decree written by Judge Wisdom. The en banc opinion was handed down on March 29, 1967.

---

[3] 372 F.2d 836 (5 Cir. 1966) affirmed on rehearing en banc Civil No. 23345 5 Cir., filed March 29, 1967.

[4] Three cases were appealed from the United States District Court for the Northern District of Alabama; five were appealed from the United States District Court for the Western District of Louisiana; and one was appealed from the United States District Court for the Eastern District of Louisiana. Two of these were added by the en banc court.

[5] 372 f.2d 836.

Although much of what was in the Wisdom opinion (particularly much of the discussion of the guidelines) is dicta (statements necessary to support directly the holding of the decision), its discussion of issues and problems makes clear the ramifications of the decision and the Model Decree.[6] In the en banc decision, there was an overwhelming acceptance of Judge Wisdom's opinion.[7]

Judge Wisdom's expression of the court's impatience with delay was apparent: "The clock has ticked the last tick for tokenism and delay in the name of deliberate speed."[8]

Judge Wisdom's opinion began with the Supreme Court's pronouncement in the Brown cases[9] -- as all school desegregation cases must -- updating it by noting the developments in the law. Making it clear that the Supreme Court did not have token desegregation in mind as the ultimate goal and that Negro school children have more than a mere right to consideration for admission to white schools,[10] the opinion indicated it has been apparent since the Brown II decision, 1955, that a single racially nondiscriminatory system must be provided.

The court emphasized that the problem in the Fifth Circuit remained the undoing of de jure segregation -- of eliminating the dual school system. The decision defined de jure and de facto segregation very carefully, attaching a meaning that is important to note in order to

[7]There were eight judges concurring in the en banc decision, three judges dissenting, and one separate opinion concurring in the result.

[8]372 F.2d at 896.

[9]Brown v. Board of Education, 347 U. S. 483 (1954), Brown I; Brown v. Board of Education, 349 U. S. 294 (1955), Brown II.

[10]Braxton v. Board of Public Education of Duval County, No. 4598-Civil-J, S. D. Fla., August 21, 1962; aff'd. 326 F.2d 616 (5 Cir. 1964), cert. denied 377 U. S. 924 (1964).

avoid misunderstanding the court's decision. De jure segregation, the sense of the decision holds, is segregation imposed by force of law, or in existence because of prior imposition by force of law. Force of law would include any state action, be it judicial mandate, legislative enactment, official policy, or act of a public official. De facto segregation, according to the sense of the decision, is segregation which is fortuitous, resulting entirely from private action by individuals which is in no way affected or prompted by state action. The schools in the South were segregated according to race by force of law; the schools in the South are still de jure segregated.

Confusion over duties, which the court in this decision laid to rest, can be seen in the distinction made by some between the words "integration" and "desegregation." The court's opinion emphasized throughout that the problem in the Fifth Circuit was not one of de facto segregation or racial balance, but of eliminating de jure segregation. Until the effects of de jure segregation are eliminated, de facto segregation and its concomitant problems need not be considered by the court. In the eyes of the court, this elimination must take place with the "complete disestablishment of segregation by converting the dual system to a nonracial unitary system."[11] Judge Wisdom stated repeatedly that it is the duty of school administrators to eliminate segregation imposed by force of law, and that whether one said "desegregate" or "integrate," the meaning was the same.

The stress placed on the duty of the school boards to eliminate discrimination was in large due to the lack of desegregation in the South and to the unwillingness of most southern school boards to desegregate. The need for this stress was more apparent when one looked at the argument of the counsel for Alabama in the Jefferson County case, which was a typical attempt to make a distinction between the words "integrate"

---

[11] 372 F.2d at 846, n. 5.

and "desegregate," indicating that counsel considered the two words to be words of art (words idiomatic to the field of civil rights). "Desegregation" was defined as the maintenance of a dual school system with the limitation that Negro children would be allowed admission to white schools on a nonracial basis, if they applied. "Integration" was defined as actual attendance of Negro children in a school with white children. The Fifth Circuit expressly rejected this distinction and pointed out that the authorities persuasive upon the court made no such distinction.[12]

The distinction had been based on the well-known Briggs dictum, which is extracted from a United States District Court decision handed down six weeks after Brown II.[13] The words most quoted, and those now disapproved by the courts of appeals which have considered the question are as follows: "The Constitution, in other words, does not require integration. It merely forbids segregation."[14] The basis for this dictum has been discredited. The dictum itself has lost judicial acceptance, but a great number of cases cited the dictum with approval. The Fifth Circuit and other courts of appeals came to realize the stultifying effect of these words on the elimination of discrimination. The court noted that "the dictum may . . . be defensible if the Briggs court used the term 'integration' to mean an absolute command at all costs that each and every Negro child attend a racially balanced school."[15]

---

[12] Judge Wisdom pointed out that the Supreme Court has avoided making a distinction. Further, the Eighth Circuit rejected any distinction in Smith v. Board of Education of Morrilton, 365 F.2d 770 (8 Cir. 1966) as did the Third Circuit in Evans v. Ennis, 281 F.2d 385 (3 Cir. 1960) cert. denied 364 U. S. 933. The Civil Rights Commission used the words interchangeably in Survey of School Desegregation, 1965-66. Also the court noted that the words are defined to be synonyms in Webster's New Third International Dictionary.

[13] Briggs v. Elliott, 132 F. Supp. 776 (E.D.S.C. 1955).

[14] 132 F. Supp. at 777.

[15] 372 F.2d at 865. See also 372 F.2d at n. 61.

However, it was clear that this had not been the construction placed upon the dictum by the courts and school authorities, and so the Negro individual had been left with the necessity of asserting his individual and class right -- a right which would, under Briggs, be continuously and unconstitutionally denied him by state action until, as an individual, he acted. It cannot be over-emphasized that the Fifth Circuit Court of Appeals expressly rejected the dictum and overruled prior cases to the contrary, because many southern politicians and school boards have used the dictum as support for their position that they were under no particular duty to promote desegregation. Therefore, most have made no effort to do so other than to allow Negro children to go to white schools by operation of the pupil placement laws, leaving Negro Southerners, as a group, still segregated.

Administrators' "Affirmative Duty"

The court regarded as its task the elimination of the duality of school structure and of the labels (white and Negro) attached to the schools. Permitting school desegregation to take place was not enough; discrimination had to be ended since it was discrimination that was the forbidden act. Judge Wisdom adopted in his opinion the statement made by Judge Sobeloff in Wanner v. County School Board of Arlington County: "If a school board is constitutionally forbidden to institute a system of racial segregation . . . it is likewise forbidden to perpetuate a system that has been so instituted."[16]

The right to desegregated schools and to a nondiscriminatory school system has been established as a personal constitutional right. But cases subsequent to the original school segregation cases were class actions, and school systems were ordered to halt discrimination against Negroes as a class. Judge Wisdom stated in Jefferson County: " . . . .

---

[16] 357 F.2d 452, 454 (4 Cir. 1966), quoted 372 F.2d at 877.

Relief to the class requires school boards to desegregate the school from which a transferee comes as well as the school to which he goes."[17] The court in Jefferson County emphasized the Supreme Court's procedures in the school segregation cases:

> . . . . MOREOVER, THE DELAY OF ONE YEAR IN DECIDING BROWN II AND THE GRADUAL REMEDY BROWN II FASHIONED CAN BE JUSTIFIED ONLY ON THE GROUND THAT THE 'PERSONAL AND PRESENT' RIGHT OF THE INDIVIDUAL PLAINTIFFS MUST YIELD TO THE OVER-RIDING RIGHT OF NEGROES AS A CLASS TO A COMPLETELY INTEGRATED PUBLIC EDUCATION.[18] (Emphasis supplied by the court.)

In order to establish the fulfillment of these rights, the court imposed an "affirmative duty" upon school authorities to see that desegregation was accomplished, a duty which prior to this decision was not made clear to the school administrators in the South. The Fourth, Sixth, and Eighth Circuit Courts of Appeals announced a course of action that required the initiative in school desegregation to come from school authorities.[19]

Judge Wisdom repeatedly stated the school administrator's duty to eliminate segregation imposed by force of law to "bring about an integrated, unitary school system in which there are no Negro schools and no white schools-- just schools."[20]

[17] 373 F.2d at 868.

[18] Id. at 868.

[19] Bowman v. County School Board of Charles City County, Civil No. 10793 (4 Cir., June 12, 1967); Northcross v. Board of Education of the City of Memphis, 302 F. 2d 817 (6 Cir. 1962); Clark v. Board of Education of the Little Rock School District, 369 F.2d 661 (8 Cir. 1966). These four circuits cover 22 states: the Fourth Circuit includes Maryland, Virginia, West Virginia, North and South Carolina; the Fifth Circuit includes Florida, Georgia, Alabama, Louisiana, Mississippi, Texas, and the Canal Zone; the Sixth Circuit includes Ohio, Michigan, Kentucky, and Tennessee; and the Eighth Circuit includes Minnesota, Iowa, Missouri, Arkansas, Nebraska, North and South Dakota.

[20] 380 F.2d at 389.

The Fifth Circuit Court of Appeals concluded that "a national effort, bringing together Congress, the executive, and the judiciary may be able to make meaningful the right of Negro children to equal educational opportunities. The courts acting alone have failed."[21] It considered the methods devised by HEW to be alternatives to court-formulated methods of implementation. The court turned in this direction for several reasons.

Under HEW regulations, if a school system was under a final order of a court and had agreed to comply with it, the requirements for that school system under the Civil Rights Act of 1964 were deemed satisfied. This being so, if the courts required less than HEW, school systems could avoid the stiffer standards of the administrative agency by seeking a court order.[22] The satisfaction of HEW desegregation requirements becomes more significant when one considers that the enforcement mechanism of the Civil Rights Act is the withdrawal of federal financial assistance so that, in effect, federal judges are in the position of ratifying the dispensing of federal financial assistance to those school districts under a final court order. There is a constitutional mandate[23] supported by national and congressional policy in favor of fewer delays in integration, for segregation is not just a wrong against an individual plaintiff in a particular case, but against a whole class of citizens. The need for uniformity in treatment and in granting of rights to this class was a strong argument to the Fifth Circuit Court. The use of

---

[21] 372 F.2d at 847.

[22] For instance, such was the case with twenty Louisiana school districts. See 372 F.2d at 859.

[23] In Bradley v. School Board of the City of Richmond, 382 U. S. 103, 105 (1965), the Supreme Court stated, "Delays in school desegregation are no longer tolerable."

guideline requirements was a means to fulfill that policy.[24]

It should also be noted that HEW was considered by the courts to have a special expertise in the field of education, an expertise which federal judges do not usually possess. It should come as no surprise that the Fifth Circuit Court of Appeals regarded the guidelines in a very favorable light, for not only this court, but also the Fourth and Eighth Circuits indicated as early as 1965 that great weight should be given the guidelines. The Fifth and Eighth Circuits have indicated that the guideline standards would rarely, if ever, be other than the minimum.[25] The Fifth Circuit, in Davis v. Board of School Commissioners of Mobile County,[26] ordered changes in a school desegregation plan to conform with changes in the HEW guidelines.

---

[24]There has been a three-judge district court decision involving the guidelines directly. Alabama NAACP State Conference of Branches v. Wallace, 269 F. Supp. 346 (M. D. Ala., 1967) involved two aspects of the guidelines (45 C. F. R. Part 180). The first was whether a state may constitutionally legislate to declare null and void in that state the action of a federal agency under an Act of Congress. The court answered that the state may not so legislate, whether or not the agency action is valid. The second was whether the guidelines were valid. The court held that it must defer to decision and holdings of the Fifth Circuit Court of Appeals in Jefferson County to the effect that the guidelines were constitutional and within the 1964 Civil Rights Act. In arriving at this decision, the district court made the following observations about the guidelines:

> The guidelines, as their title indicates, are simply a statement of policies for school desegregation plans by the Office of Education, U. S. Department of Health, Education, and Welfare. They are not an exercise of rule-making power and hence do not have the 'status of law.' Any department or agency action terminating or refusing to grant or to continue financial assistance is subject to plenary judicial review. In the absence of judicial review, the school authorities may and should respect the guidelines as a reliable guide to what the Department's enforcement action should be.

[25]Singleton v. Jackson Municipal Separate School District, 355 F.2d 815 (5 Cir. 1966); Price v. Denison Independent School District, 348 F.2d 1010 (5 Cir. 1965); Singleton v. Jackson Municipal Separate School District, 348 F.2d 729 (5 Cir. 1965); Bowman v. County School Board of Charles City County, Civil No. 10793 (4 Cir. June 12, 1967); Smith v. Board of Education of Morrilton, 365 F.2d 770 (8 Cir. 1966); Kemp v. Beasley, 352 F.2d 14 (8 Cir. 1966).

[26]364 F. 2d 896 (5 Cir. 1966).

Again, in Jefferson County, the Fifth Circuit welcomed the guidelines as an effective, prompt, and orderly method of eliminating dual school systems in the South -- emphasizing that the guidelines were simply being used to disestablish de jure segregation. Indeed, the court recognized that failure of the courts to do more than effect a qualitative change was the factor that moved Congress to act in 1964.[27]

Though it welcomed the Civil Rights Act and the guidelines, the court made clear the nonbinding nature of the guidelines on federal courts, indicating that the guidelines were merely statements of policy which HEW might use to inform those with whom it dealt of what it considered to be evidence of compliance with the Civil Rights Act of 1964.

Since the Fifth Circuit Court of Appeals adopted the requirements of the guidelines as their own, there was another facet of the validity of the guidelines which the court in Jefferson County had to decide: Were those requirements used in the guidelines, without regard to whether they were authorized by the Civil Rights Act, a constitutional method of eliminating segregation? The court, not restricted by authorizations given in an Act of Congress and limited only by the provisions of the Constitution,[28] decided it was justified in finding that it might use the guidelines' provisions, including faculty integration and percentages.

The faculty integration provision in the guidelines was found by the court in Jefferson County to be necessary for achieving a unitary school system. The court stressed that the rights it dealt with were constitutional and not established by statute.[29] Judge Wisdom, in his

supporting analysis, cited and approved the following statement of the Fourth Circuit:

> First the mandate of Brown v. Board of Education, 347 U. S. 483 (1954), forbids the consideration of race in faculty selection just as it forbids it in pupil placement. See Wheeler v. Durham City Board of Education, 346 F.2d 768, 773 (4 Cir. 1965). Thus the reduction in the number of Negro pupils did not justify a corresponding reduction in the number of Negro teachers. Franklin v. County Board of Giles County, 360 F.2d 325 (4 Cir. 1966). Second, the Negro school teachers were public employees who could not be discriminated against on account of their race with respect to their retention in the system. Johnson v. Branch, 364 F.2d 177 (4 Cir. 1966) . . . .[30]

This result is also indicated in Brown II. In Bradley, the Supreme Court decided that faculty desegregation was a necessary concomitant to student desegregation, and that an immediate beginning in faculty integration should be required by the courts. In Rogers v. Paul, decided at the same time as Bradley, the court held that discriminatory racial allocation of faculty denied students, in and of itself, equal educational opportunity.[31] The Fourth, Fifth, Sixth, and Eighth Circuit Courts of Appeals have all recognized, in the wake of Bradley, that faculty integration is inseparable from student integration.[32] It would seem that in light of these cases there would no longer be any question by school officials that faculty integration is required.

The court interpreted the percentage requirement of the freedom-of-choice guidelines to be a general rule of thumb to be used (both by

Board of Education of Little Rock School District, 369 F.2d 661 (8 Cir. 1966); Wheeler v. Durham City Board of Education, 363 F. 2d 738 (4 Cir. 1966); and Mapp v. Board of Education of the City of Chattanooga, 373 F.2d 75 (6 Cir. 1967).

the courts and by HEW) as an indicator to determine if progress toward the elimination of the dual school structure was being made. The percentages were to be used only in measuring the progress in those school systems electing to use the freedom-of-choice method of pupil assignment for desegregation. The percentages were not an inflexible requirement, but only an attempt to set out some objective criterion for determining whether free choice operated to eliminate the dual school system; that is, whether there was truly a free choice. Percentages were not to be the absolute determining factor, only one of several.

In addition to the percentages, other provisions included the mandatory exercise of choice, notice to parents and the public, non-discriminatory transportation, protection from interference, school equalization, faculty integration, equality of facilities within each school, and others. The court would look to each of these factors to see that a true freedom-of-choice was being assured each student.

The court pointed out that courts have used the percentage criterion in determining whether constitutional rights have been violated in other types of cases -- namely, voting rights, jury and jury venire, and reapportionment [33] -- not to effect a racial balance, but rather as an

---

[33] See 372 F.2d at 886-888, n. 107 and n. 108, for a discussion of Supreme Court and courts of appeals cases in which such use has been validated and used by the courts. Judge Wisdom cited and quoted a voting rights case which was particularly suitable here:

> An appropriate remedy should undo the results of past discrimination as well as prevent future inequality of treatment. A court of equity is not powerless to eradicate the effects of former discrimination. If it were, the state could seal into permanent existence the injustices of the past.

United States v. Duke, 332 F.2d 759, 768 (5 Cir. 1964). For instance, the power of a court of equity (and all federal courts sitting on desegregation cases act as courts of equity, Brown II) extends to re-registration of all voters in a number of parishes where discrimination has occurred. United States v. Louisiana, 255 F. Supp. 353 (E.D. La. 1963) aff'd. 380 U. S. 145 (1965). It would seem that the power of courts are quite extensive where discrimination has been widely practiced, as in the South. It should also be emphasized that the Supreme Court, in Brown II, left very wide discretion in the lower courts and has relatively infrequently guided the direction of their efforts.

objective indication of whether discrimination was being practiced. The percentage was used only as evidence that this factor, discrimination, existed.

The Fifth Circuit Court of Appeals emphasized that the goal as an end in itself was not freedom-of-choice, but disestablishment of the dual school system. Freedom-of-choice was merely a method of implementing the requirement of the Constitution, and if it does not work, something else must be devised. It is clear that the freedom in freedom-of-choice must indicate a true freedom, unrestricted by official or other acts. It was not clear what course the courts would take should it become apparent that there was no true freedom-of-choice; however, the Fifth Circuit warned:

> If school officials in any district should find that their district still has segregated faculties and schools or only token integration, their affirmative duty to take corrective action requires them to try an alternative to a freedom-of-choice plan, such as a geographic attendance plan, a combination of the two, the Princeton plan, or some other acceptable substitute, perhaps aided by an educational park. Freedom-of-choice is not a key that opens all doors to equal education opportunities.[34]

The significance of recent opinions must be in the emphasis placed by the court on the affirmative duty of the school boards not just to stop segregation but to eliminate discrimination and its effects. It is not at all inconsequential that the court of appeals chose to insure this result by setting out a model decree as a minimum that, although not all-encompassing, prohibited the use of a great number of methods of discrimination and avowed such methods would be prohibited by injunctions issued within the Fifth Circuit in the future. It was to be expected that, should loopholes be found in the Model Decree which would enable school boards to reduce its effect, the courts would quickly eliminate those loopholes.

---

[34] 372 F.2d at 896.

The express resolve of the Court of Appeals of the Fifth Circuit that schools be integrated was set forth in the opinion and Model Decree of Jefferson County. It is significant that in both the Model Decree and in subsequent action the court maintained its resolve that the guidelines were to be minimum standards. Except for minor wording changes and a few additional provisions and structural reorganization, the Model Decree set forth in Jefferson County was essentially the same as the guidelines. However, there were differences which are significant and should be noted. Section IV(a) of the Model Decree provides that a new choice at the first of the new school term will be given any student who was not assigned to the school of his choice (for whatever reason). Section VI of the Model Decree provides for remedial education of children disadvantaged by segregated schooling. Section VII of the Model Decree provides for choice of sites for new construction which will not tend to perpetuate dual schools. (The last provision -- as to construction -- may be covered by the HEW regulations by implication).[35]

Although the Model Decree contained provisions which the guidelines did not, there are only minor provisions in the guidelines which do not have comparable provisions or substantive content in the Model Decree. Most of these missing provisions can be inferred from the language of Jefferson County.[36] The guidelines also contained a provision against allowing transfers of students between school systems to avoid integration, which was not provided for in the Model Decree.[37] Note particularly that, even though the percentage provisions are not in the Model Decree, they are expressly approved in both opinions and will be applied as provisions of the Model Decree.

[35] 45 C. F. R. Part 80 (1967).

[36] 45 C. F. R. 181.17(a) and (b) (1967).

[37] 45 C. F. R. 181.16 (1967).

The court, in Jefferson County, set a minimum standard for school desegregation, and it is apparent that the court meant minimum. The treatment of cases subsequent to Jefferson County evidenced the Fifth Circuit's determination.

In companion cases involving the school boards of Houston and Bibb Counties, Georgia, the district court approved desegregation plans submitted by the school board that did not conform to the requirements set forth in the model decree of Jefferson County.[38] The district court-approved plans included none of the safeguards provided in the Model Decree and on the basis of a supposed shortage of money the choice form mailing requirement was waived. The plaintiffs appealed immediately to the Fifth Circuit Court of Appeals. Four days later, the court of appeals summarily reversed and remanded the cases back to the district court with instructions to conform the decrees containing the desegregation plans to be entered for the school system in light of Jefferson County.[39] As a result, the decree arising out of the further proceedings was almost identical, even to wording of the Model Decree.[40] Similar treatment has been given in at least one other case.[41] It is to be expected that future cases will be treated no differently.

There was marked contrast to the above in the reception given to school desegregation suits in the Middle District of Alabama. In the

[41] Richard v. Christ, Civil No. 22300 (5 Cir., May 24, 1967).

Macon County case and in cases using essentially the same decree,[42] the court regarded the model decree of Jefferson County as a true minimum, for in the cases cited[43] the provisions of the Model Decree were applied to specific factual situations and were directed toward alleviating local discriminatory devices. For instance, the district court ordered the school boards to meet the requirements of a revised transportation provision. In another provision, reapproval must be obtained from the state Board of Education (which is itself under court order not to discriminate on account of race) before construction can begin on any new projects.[44]

Jefferson County goes considerably further than most district judges have been willing to venture; indeed, in a number of areas of the South, district judges have balked at any desegregation and have slowed progress on that which they could not avoid. In spite of the fact that prior to Jefferson County a number of judges adopted plans with similar provisions,[45] one might ask, in view of the pressure brought on or the private convictions of district judges, just what effect Jefferson County would have in requiring district judges to follow its lead.

42 Lee v. Macon County Board of Education, 267 F. Supp. 458 (M. D. Ala., 1967), 36 L. W. 3225, judgment affirmed; sub. nom., Wallace v. U. S. (December 5, 1967); Harris v. Crenshaw County Board of Education, Civil No. 2455-N, M. D. Ala., April 28, 1967; and Franklin v. Barbour County Board of Education, Civil No. 2458-N, M. D. Ala., April 28, 1967.

43 Cases cited at n. 42 supra.

44 See Macon County discussion infra at p. 37.

45 Judges Grooms and Johnson of the Northern District of Alabama, Judge Thomas of the Southern District of Alabama, Judges Heebe and Christenberry of the Eastern District of Louisiana, and Judge Russell of the Southern District of Mississippi are among those who handed down decisions prior to Jefferson County more or less comparable to the standards in the Model Decree.

Implicit in the question is a query as to the system of administration of justice and how rulings of upper or appellate courts affect rulings in lower courts.

Stare Decisis is a matter of policy not absolutely binding on the lower courts.[46] As a matter of law, the lower courts may not violate the Constitution. Therefore, as to those matters of law on which the Supreme Court has spoken, a lower court would not rule contrary to a doctrine of law announced by the Supreme Court. However, it is indeed improbable that anything would happen beyond reversal of the lower court decision, if appealed, if such a ruling should occur. (There is the extremely unlikely possibility of impeachment.) Also, in most cases, there is room for interpretation and factual analysis which would permit a lower court judge to avoid a certain decision if he so wished, again at the risk of reversal. Once the Supreme Court has ruled on a point of law, it is the law of the land, and the decision is binding on all lower courts,[47] state and federal, although it is clear that certain state courts avoid many decisions in cases to which they are not a party. A federal court is in no way bound by the decision of another court on the same level (i.e., district court-district court), except in the same case, nor is a district court in one circuit bound by a decision of a court of appeals in another circuit. It is just as clear that any court may adopt the decision of any other court if it wishes,

---

[46] Once jurisdiction in a case is taken, if a previous case similar in fact and question of law has been decided by a court above or by the same court, then the court is limited by Stare Decisis, which is the practice of following precedent. It is rare indeed for a case to have exactly the same issues of fact and law, so that, as indicated, the lower court may distinguish a case on its facts and decide it contrary to previous authority, subject of course to the possibility of reversal by the higher court.

[47] Bower v. U. S., 192 F.2d 515 (5 Cir. 1951). CERT. DENIED, 343 U. S. 943, REHEARING DENIED 343 U. S. 988 (1951).

if there is no binding precedent which it must follow. There are also several district court decisions which indicate that district courts are bound by decisions of their court of appeals; however, the district court would be free to make factual distinctions and vary their decision accordingly.[48]

It must be emphasized that once there is a conclusive and final adjudication as to all questions of fact or law by a court, the parties are bound. This is referred to as "Res Judicata," and applies to questions of law and fact, but only when the parties and the questions are the same in the two cases under consideration. Stare Decisis acts only on questions of law.[49]

In view of the summary reversal given the district court, approved desegregation plans for Bibb and Houston Counties,[50] and in view of the rule of Stare Decisis, it would seem that few judges would invite similar treatment of one of their own cases, and those who do would quickly be required in each case to follow Jefferson County.

Lee v. Macon County Board of Education[51] decided March 22, 1967, by a three-judge federal district court[52] in the Middle District of Alabama, had been before the district court in Alabama on several occasions. To understand the novelty of this decision, which is the remedy that the court fashioned, it is necessary to outline the prior history of the case.

[52] 28 U. S. C. 2281 (1964).

The suit was originally filed in 1963 on behalf of Negro school children by their parents against the Macon County Board of Education as a typical school desegregation class action to desegregate public schools in the county. The district court in the first decision ordered the public schools of Macon County desegregated.[53] On three separate occasions during the following school year (1963-1964), the district court had to enjoin state officials from various types of interference in desegregation attempts of the local (Macon County) school board.[54]

The second time this case came before the district court, in early 1964, the court permitted the plaintiffs to add as defendants the Governor of Alabama (in his capacity as Governor of the state of Alabama, and as ex officio head of the State Board of Education), the State Superintendent of Education, and the individual members of the Alabama State Board of Education. These defendants were necessary because of the relief sought by the plaintiffs in their supplemental complaint, which requested the district court: "(1) to enjoin the

---

[53] Lee v. Macon County Board of Education, 221 F. Supp. 297 (M. D. Ala., 1963). The district court found that the action was a proper class action; that the defendant school board operated a compulsory biracial school system; that all pupils, teachers, and other school personnel were assigned solely on the basis of race or color; that the school board was under a constitutional obligation to eliminate the compulsory biracial school system; and held that the school board's discriminatory conduct violated plaintiff's rights under the Fourteenth Amendment. The court enjoined the defendants from "failing to make an immediate start" in desegregating the county's schools and ordered the Board of Education to submit a general plan for desegregating the county's schools.

[54] United States v. Wallace, 222 F. Supp. 485 (M. D. Ala., 1963) was a temporary injunction against Governor Wallace's directing by executive order that no integration occur in the public schools of Tuskegee, Birmingham, and Mobile, and against the governor's use of state patrolmen to interfere with integration. Lee v. Macon County Board of Education (order of February 3, 1964) was a temporary restraining order against Alabama and Macon County school officials to prevent them from interfering with the admission of Negro students to one school in the system, Macon County High School. United States v. Rea, 231 F. Supp. 772 (M. D. Ala., 1964) was an injunction against the use of town civil disturbance and fire ordinances enacted as subterfuge measures for preventing integration.

defendants from operating a dual school system based upon race throughout the state of Alabama; (2) to enter an order requiring statewide desegregation of schools in the state of Alabama; (3) to enjoin the use of state funds to perpetuate the dual school system; and (4) to enjoin as unconstitutional the 1963 tuition grant law."[55] A three-judge district court was impaneled to hear the case.[56]

The court concluded that the state of Alabama maintained and operated a dual school system based upon race throughout the state of Alabama and that it was the policy of the state, and, in particular, of the defendant state officials, to promote and encourage racially segregated schools. Therefore, the defendant state officials were enjoined from:

> Interfering with, preventing, or obstructing by any means, the elimination of racial discrimination by local school officials in any school district in the state of Alabama;
>
> Approving, authorizing, or paying any tuition grant . . . for the attendance of any person in a school in which enrollment or attendance is limited or restricted upon the basis of race or color;
>
> Failing, in the exercise of its control and supervision over the public schools of the state, to use such control and supervision in such a manner as to promote and encourage the elimination of racial discrimination in the public schools, rather than to prevent and discourage the elimination of such discrimination.[57]

The court did not enter the order requested by the plaintiffs requiring statewide desegregation of the public schools in Alabama. But the court specifically warned the defendant state officials that " . . . . it is only a question of time until such illegal and unconstitutional

support of segregated school systems must cease."[58]

The foregoing history of the case sets the stage for examining the court's third decision of Lee v. Macon County Board of Education; the decision of March 22, 1967.

The three-judge district court opinion reviewed the court's position on the second decision of the case:

> It was only 'through the exercise of considerable judicial restraint' that this court refrained in July, 1964, from requiring these defendant state officials to exercise their control and authority over the various local school boards throughout the state for the purpose of desegregating the school systems on a state-wide basis and to enjoin said defendants from using state funds for the purpose of perpetuating a dual school system based upon race. The exercise of restraint in that instance was prompted by the desire on the part of each member of this court to afford these defendants every opportunity to comply in good faith with their affirmative constitutional duty to desegregate the state's public schools.[59]

The court then affirmed that:

> . . . . It is now evident that the reasons for this court's reluctance to grant the relief to which these plaintiffs were clearly entitled over two years ago are no longer valid.[60]

The court held that the defendants' activities controlled public education in the state of Alabama and that the conduct and activity of the defendants violated plaintiffs' rights under the Fourteenth Amendment to the Constitution of the United States.[61]

The court turned to the problem of devising a remedy which "must be designed to reach the limits of the defendants' activities in these several areas and must be designed to require the defendants to do what they have been unwilling to do on their own . . . ."[62] The court con-

cluded that they could ". . . . conceive of no other effective way to give the plaintiffs the relief to which they are entitled under the evidence in this case than to enter a uniform statewide plan for school desegregation, made applicable to each local county and city system not already under court order to desegregate, and to require these defendants to implement it."[63] The court included in its decree "the minimum constitutional requirements for school desegregation . . . ."[64] which the defendant state officials would be required to implement.

The decision permanently enjoined state officials from discriminating on the basis of race in the operation or the conduct of the Alabama public schools. The additional broad guiding principle governing the specific actions required of state officials was that ". . . . said defendants shall take affirmative action to disestablish all state enforced or encouraged public school segregation and to eliminate the effects of past state enforced or encouraged racial discrimination in their activities and their operation of the public school systems throughout the state."[65]

The decree against state officials set out with particularity the specific duties which the court would require of them. These duties may be summarized:[66]

School Construction and Consolidation.--The State Superintendent of Education was ordered to review all consolidation plans that resulted from statewide surveys prior to this decision. In addition, he was ordered to continue surveying local school systems and to require the survey-makers to meet standards which the court set out. All surveys for construction

or expansion taken before this decision were excluded unless they met the court's standards. Approval of construction or expansion by the State Superintendent of Education could only be given if the action would result in the disestablishment of segregated public schools.

Teachers.--The State Superintendent of Education was ordered to develop a detailed program "for assisting and encouraging faculty desegregation in the local school systems throughout the state . . . ."[67] This program must provide for assistance to local systems in recruiting, placing, and reassigning teachers on a desegregated basis, and for assistance in providing training which may be necessary to upgrade the qualifications of some teachers in order to facilitate faculty desegregation. The State Department of Education must conduct all teacher institutes, in-service training, and certification without discrimination on the basis of race.

School Transportation.--Race must be eliminated as a basis for assigning students to school buses. Overlapping and duplicative bus routes based on race must be redrawn so as to meet nondiscriminatory criteria governing the availability of bus transportation to students within the school district. The reconstructed bus routes must be communicated by the school officials to students and parents in a readily understandable manner.

Equalization of Facilities.--The Superintendent of Education was ordered to develop and submit to the court a detailed program for equalizing the quality of physical facilities, equipment, services, courses of instruction, and instructional materials. The program must also provide the equalization of pupil-teacher ratios, per pupil expenditures, library books per pupil, and other areas of disparity between present Negro and white schools.

Information and Reports.--The State Superintendent of Education was required to submit reports to the court and to make available records and

---

[67] 267 F. Supp. at 481.

other information on school desegregation.

Interference.--State officials were ordered not to interfere with, prevent, or obstruct the elimination of racial discrimination by local school officials in any school system in the state of Alabama.

Desegregation Plans for Local School Systems.--As noted above, the court decided that the only effective remedy would be a uniform statewide desegregation plan which state officials would be required to implement. All school systems in Alabama that were not already under court order to desegregate were required to adopt a desegregation plan for all grades, commencing with the 1967-68 school year. The Decree Macon County included a model decree (based upon the Jefferson County Model Decree) for the desegregation plans that local systems would adopt. There were variances in two particular sections which the court included to meet their own factual situation. The first change applied to the distribution of explanatory letters and choice forms, omitting the section that would enable school districts when unable to comply with the first class mailing provision to propose alternative methods for giving maximum notice. This omission made the section consistent because the court had also omitted the first class mailing requirements. The second change concerned the transportation section wherein school officials were directed to redraw bus routes and criteria governing the availability of bus transportation so that race would no longer be a basis for assignment and overlapping and duplicative bus routes would be abolished. Extensive reports to the court on the new routes were to be filed.

Since the decree was directed against state officials, the Alabama Superintendent of Education had the responsibility for getting all local school systems to adopt desegregation plans based upon the Model Decree. After the March 22 decision, the Alabama Superintendent of Education submitted desegregation plans of all but one of the ninety-nine affected school systems under the terms of the decision. The state Superintendent was not to judge the acceptability of the plans; rather the court would

review them to determine whether they met its requirements.

Apparently, if the desegregation plans failed to meet the court's Model Decree requirements, the court on its own motive would require the school district to modify or expand the substantive content of its plan, or, alternatively, the plaintiffs in the case could ask the court to make a particular school board a party to the suit. The district court's action against Bibb County, Alabama, substantiated this proposition.

Bibb County failed to file a desegregation plan embodying the Model Decree requirements. Refusal to comply with the court's statewide school integration decree caused the Bibb County School Board to be brought into the Macon County litigation and placed under a direct court order to comply with the court's statewide decree. This action indicates that if other school districts refused to comply, the court would possibly treat them as they did Bibb County and place them under a direct court order.

In summary, the court in the Macon County case had to eliminate the influencing factors of freedom-of-choice type desegregation plans which Alabama state officials had used to deter desegregation. In order for freedom-of-choice plans to be free, all barriers had to be removed: intimidation, coercion, unequal facilities, segregated transportation, school location, and faculty segregation. The decision and decree did more than just neutralize the power of the Alabama state officials over Alabama public schools: it enjoined their unequal and discriminatory activities; and in further relief, the court put the state officials under order and decree to take the affirmative action which was mandated by the Fifth Circuit Court of Appeals in the Jefferson County decision. The court warned state officials that their responsibility for taking affirmative action must be shouldered; for, if they did not assist local school systems in desegregating, the court would order the state to discontinue state funds to segregated school districts.

Action by state school officials -- approved by the court -- resulted in 1967 in orders closing more than eighty all-Negro schools maintained solely for separating children by race. If state school offcials interfere with school desegregation so that a factual situation exists similar to that presented to the court in Macon County, other district courts could be petitioned for relief corresponding to that fashioned by the district court in Macon County.

Following the March 22 order, compliance officers from HEW continued their efforts, including withholding federal funds, to bring school systems in Alabama (formerly under the guidelines) into voluntary compliance with the Civil Rights Act. In the course of this action, HEW declared that the Lanett School System was not eligible for federal aid. Lanett officials protested to the court that it had submitted a desegregation plan pursuant to the Macon County order, which the court had approved, and that they had assured the court they would adhere to the plan for the 1967-68 school year.

On July 28, 1967, the three-judge district court panel decided that it was up to the court to determine whether Alabama school systems were in compliance with their March 22 statewide desegregation order. The court reasoned that all the Alabama school systems were under a court order and had agreed to comply; therefore, HEW requirements were satisfied. The court ruled that HEW could continue to cut off funds for noncompliance, provided HEW had the court's approval.

In effect, this decision was the first statement by a federal court reiterating that HEW could take action against court-order districts, but only with specific approval by the court. The court invited HEW to continue its investigations and determinations regarding compliance and to report any failures in compliance to the court.

After this decision, HEW compliance officials have made it known that they consider some court-order district failing to perform as well as some guideline districts. HEW reportedly has changed its hands-off

policy towards court order districts and has begun to review a school system's compliance with its court-order in those districts previously considered immune, so that HEW can report noncompliance with the court order to the courts.[68]

Theoretically, the Jefferson County decision would require all court-order school districts within the Fifth Circuit to be placed under guideline-type desegregation plans. The problem inherent in this situation is that there is no specific party designated to conduct extensive investigations to determine whether the plans are working. Under Jefferson County and Macon County, the court would learn of non-compliance only to the extent of the coverage of the reports that have to be submitted, or if the plaintiffs investigate and demonstrate to the court that the school district is not in compliance with its court-order desegregation plan. Since Jefferson County was an attempt by the Fifth Circuit to bring together the efforts of the district courts and HEW to create uniformity, the Lanett County decision was an important step toward furthering this goal.

The actions of the Fifth Circuit Court of Appeals and the Alabama district courts appeared in 1967 to herald an era of unprecedented cooperation among the various branches of the federal government -- cooperation aimed at destroying the system of segregation in southern schools.

APPENDIX II

The following telegram was sent on September 16, 1968, to the candidates for President of the two major political parties, Vice President Hubert H. Humphrey and Richard M. Nixon. It was signed by individuals from all parts of the South who have worked intimately through private organizations with the discouraging problem of school desegregation in the South. The telegram was sent in part because of their awareness out of past bitter experience that federal courts alone cannot prevail against the lawless spirit of resistance, that they need support and an arming with sanctions from the other branches of government.

> We the undersigned, who have long been concerned with southern school desegregation, are deeply dismayed at the lack of progress in this vital area. The effects of segregation in the South are a national, not simply a regional, problem. The issue is a key one in our country's effort to unify itself.
>
> Southern school systems, both those under federal court order and Department of Health, Education, and Welfare guidelines, have most often adopted so-called freedom-of-choice plans, placing the burden of school desegregation upon Negro school children and their parents. The Supreme Court in May, 1968, declared that freedom-of-choice was not an end in itself; in order to be acceptable school desegregation plans must be plans that work -- that is, they must eliminate the dual school system and its effects.
>
> We feel that freedom-of-choice as a method of ending the dual school structure still prevalent in the South has not worked, is not now working. What is your opinion on this important matter?
>
> The Department of Health, Education, and Welfare was authorized by Title VI of the Civil Rights Act of 1964 to terminate federal funds to school districts which perpetuated segregation. Do you, as a candidate for the nation's highest office, feel that this is an effective method of enforcing the law?
>
> If you are elected President of the United States, what action will you recommend to assure all Americans that the nation's fundamental law requiring an end to racial discrimination in education will be enforced?

Dear Emory:

Thank you for your note dated February 4, 1969, informing me of your availability for our District 8 Summer School program.

The school will be at Blue Ridge Assembly, Black Mountain, North Carolina, Asheville Hall, July 6-11, 1969 (as it was the last time you were with us.

As soon as our program is firm, I will send you a copy.

With kind personal regards and best wishes for your continued good health and success, I am

Fraternally yours,

John D. House
Education Director

JDH:jjb
opeiu 339
cc: Int'l. Executive Officers

P.S. What honorarium do you think would be appropriate?

February 11, 1969

Mr. John D. House
Education Director
United Rubber, Cork, Lineoleum
and Plastic Workers of America
AFL-CIO, CLC
87 South High Street
Akron, Ohio 44308

Dear John:

I look forward to being with you for the District 8 Summer School this summer.

Although it will not cover the cost to the Southern Regional Council, I would suggest an honorarium of $100, plus my travel expenses. We can discuss this later but the check should be made payable to the Southern Regional Council but sent to me.

Best personal wishes.

Sincerely,

Emory F. Via, Director
Labor Program

Mr. Emory F. Via
Director Labor Program
Southern Regional Council, Inc.
5 Forsyth Street, N.W.
Atlanta, Georgia 30303

Dear Emory:

This is to formalize our invitation for you to act as instructor in our District 8 Summer School at Blue Ridge Assembly during the week of July 6, 1969.

I have approval for paying the honorarium you suggest, plus your travel expense and board and room at the Assembly.

We will be using the same facilities as when you were there before - Ashville Hall - and would want you to take the first morning session on the same subject with which you dealt (updated) the last time.

As soon as you have arranged your travel schedule please let me know so that I can have someone meet you at the airport if you are coming by air.

We will be looking forward to seeing you, and to hear from you again soon.

With best wishes and kind personal regards, I am

Fraternally yours,

John

BURDEN OF TRUTH

by Patricia Eames,
Assistant General Counsel, Textile Workers Union of America

On August 9, 1962, the National Labor Relations Board decided two cases where employers in the South used the race issue to fight unionization. The unions involved requested the NLRB to nullify elections which they had lost and to hold new elections.

In one case brought by the Amalgamated Clothing Workers against the Sewell Manufacturing Company of Georgia, race propaganda of a highly emotional content was involved. The employer distributed photographs of IUE President James B. Carey dancing with a Negro. In addition, copies of the hate sheet, Militant Truth, which charged that unions demanded "racial integration, socialistic legislation and free range for communistic conspirators" were distributed to the workers. The company also said that union funds were used to promote civil rights organizations and that the union followed the communist line.

The race issue was also raised in a second case involving the Allen-Morrison Sign Company of Virginia which the Textile Workers Union attempted to organize. A letter from the employer stated that the AFL-CIO used "dues they collected from members to try and promote integration." The employer also mailed workers a one-column reprint from Militant Truth regarding TWUA's action in placing under trusteeship a local union which had sought to help finance a segregated private school.

The NLRB set aside the Sewell election and ordered that a new election be held. It stated that "the Board does not intend to tolerate as 'electoral propaganda' appeals or arguments which can have no purpose except to inflame the racial feelings of voters in the election." In the Allen-Morrison case, the Board did not set aside the election explaining that the employer's "letter was temperate in tone and advised the employees as to certain facts concerning union expenditures to help eliminate segregation."

Out of the Sewell case has come a rule which should prove of great practical importance. The Board stated that from now on "the burden will be on the party making use of a racial message to establish that it was truthful and germane, and where there is doubt as to whether the total conduct of such party is within the described bounds, the doubt will be resolved against him." The fact that any employer who raises the race issue automatically places himself on the defensive and risks a new election should considerably deter the use of the race issue.

Certainly, we can all celebrate the eventual reduction of the number of situations in which the race question is dragged into union organizing campaigns. But we should realize that this matter will not significantly advance unionization in the South. Employers have lost one weapon.. They still retain their heavy artillery of brain washing; fear of the employer's power to require employee attendance at captive audience meetings; threats of plant closing and refusal to honestly negotiate with the union. As a final overwhelming proof of his power, the employer can discharge one or two union adherents and thereby intimidate all others. The only remedy which the NLRB will order for any of these offenses except discharge is that the employer post a sign in the plant stating that he will sin no more.

The decision in the race hate propaganda case is laudable but it only scratches the surface of the problem of bringing industrial democracy to the South.

PAGINATION INCORRECT

Labor fights major battle against shutdown of Darlington Mills

LABOR - SOUTH

By ALEXANDER UHL

The crucial issue of whether a corporation has the right to shut down a plant "for whatever reason" and fire hundreds of employees ruthlessly because they voted union, is now being studied by the United States Supreme Court.

The National Labor Relations Board has said "No." So have the Department of Justice, the AFL-CIO and the Textile Workers Union whose members were the victims of the Darlington textile plant closing in Darlington, South Carolina, eight years ago.

Behind the case is the Deering Milliken textile empire, which owned and controlled some 27 textile mills, of which Darlington was one. The plant was shut down after a collective bargaining victory by the Textile Workers and the case has been the center of a bitter battle ever since.

The National Labor Relations Board found by a four to one vote that the shutdown of the mill was illegal and ordered later, by a three to one vote, that Darlington's 500 former employees be awarded back pay from the time of their discharge until they got new jobs either on their own or with the Deering Milliken chain. The Board held that Deering Milliken was a "single employer" and could not plead that Darlington was an entirely independent entity.

At stake are millions of dollars in back pay. Perhaps of even greater importance is what the Supreme Court will have to say about the responsibility of an employer to his workers in the event that he shuts down his plant and goes out of business "for whatever reason he chooses."

So important are the issues that both management and labor brought up their biggest guns to argue the case.

The Deering Milliken chain hired Senator Sam J. Ervin, Jr. to represent it. The Senator, whose appearance has raised "conflict of interest" criticism, maintained that he was fighting for free enterprise. He argued that a corporation has the right to shut down for any reason it chooses. He further argued that the Darlington plant had been closed because it was an uneconomic operation and would have become more uneconomic if the union succeeded in winning gains for its workers. He contended that Darlington was not an integral part of the Deering Milliken chain and that, anyway, the NLRB decision was unconstitutional.

KENTUCKY LABOR NEWS FEATURE

The Department of Justice appeared for the NLRB and told a different story. It cited evidence that the real reason for the Darlington shutdown was the determination of Roger Milliken, president of the corporation, to crush the union and held that this was a violation of Taft-Hartley. It further contended that Darlington was a part of the Deering Milliken complex, which should be held responsible for the consequences of the Darlington shutdown.

Labor was represented by the AFL-CIO legal department and by Irving Abramson, counsel for the Textile Workers. In its brief, the AFL-CIO contended that the Darlington shutdown was clearly an unfair labor practice because it was in retaliation for the union vote; that the NLRB decision was in line with numerous previous rulings which forbid an employer to shut down either entirely or in part in order to avoid dealing with a union and, finally, that there is no "absolute prerogative" for an employer to go out of business or "to perpetuate an illegal discontinuance."

Abramson, speaking for the Textile Workers, cited evidence to show that Roger Milliken was determined to keep the union out of the company mills and that the Darlington shutdown was used as an example of what would happen if any other Deering Milliken mills were organized.

Abramson told the court that the NLRB decision, in fact, did not go far enough in doing justice by the discharged workers. He contended that Deering Milliken ought to be ordered to reopen the Darlington mill and to take back the dicharged workers with full back pay. Unless this is done, he declared, the effect of what happened at Darlington will not be lost on workers in other Deering Milliken mills who want to organize.

He was critical of what he called the NLRB's "attempt to strike a balance between the 'conflicting interests' of the guilty employer and the innocent victims of the discriminatory plant shutdown."

Abramson further criticized the Board for its failure to hold Roger Milliken individually responsible for what happened at Darlington.

"We submit that holding Roger Milliken personally liable for the unfair labor practices for which he was primarily responsible would not only be fully warranted by the record and entirely consistent with the Act as construed by the Board, but moreover would provide substantial deterrent value to the otherwise pathetically inadequate Board remedy," he said.

A UNION IN DANVILLE VOTES TO INTEGRATE

Labor

Special to The New York Times

DANVILLE, Va., Sept. 10—Members of the United Textile Workers Union here have voted overwhelmingly to integrate separate white and Negro lcoals at the Dan River Mills plant in this racially troubled city.

The vote, taken at meetings of the two locals on Sunday, abolished the union's last "Jim Crow" local, officials said.

Irving Burton, president of the merged Negro local, is a leading candidate for vice president of the integrated local in a union election scheduled for Oct. 6.

Howard Robertson, manager of the union's Southern Joint Board here, said about 50 members of Local 250, the Negro unit, had voted unanimously for the merger. About 400 white members of Local 248 attended that group's meeting Sunday Mr. Robertson said, and "all but three" favored the integration plan. The union claims a membership of about half of the 10,000 employes at Dan River Mills.

The mill is the largest industry in this Southside Virginia city, employing nearly a third of the local labor force.

Last month, mill executives quietly ended segregation in company cafeterias and rest rooms. Negroes have continued intermittent picketing at the mill's main plant, however, charging that the company discriminates in hiring and promotion.

Supreme Court Studies Case:

Can Plant Shut Down to Beat Union?

By ALEXANDER UHL

WASHINGTON (PAI)—The crucial issue of whether a corporation has the right to shut down a plant and fire hundreds of employees ruthlessly because they voted union is now being studied by the United States Supreme Court.

The National Labor Relations Board has said "No." So has the Department of Justice, the AFL-CIO and the Textile Workers Union, whose members were the victims of the Darlington textile plant closing in Darlington, South Carolina, eight years ago.

Behind the case is the Deering Milliken textile empire, which owned and controlled some 27 textile mills, of which Darlington was one. The plant was shut down after a collective bargaining victory by the Textile Workers, and the case has been the center of bitter battle ever since:

The NLRB found by a four-to-one vote that the shutdown of the mill was illegal and ordered later, by a three-to-one vote, that Darlington's 500 former employees be awarded back pay from the time of their discharge until they got new jobs either on their own or with the Deering Milliken chain. The Board held that Deering Milliken was a "single employer" and could not plead that Darlington was an entirely independent entity.

At stake are millions of dollars in back pay. Perhaps of even greater importance is what the Supreme Court will have to say about the responsibility of an employer to his workers in the event that he shuts down his plant and goes out of business "for whatever reason he chooses."

So important are the issues that both management and labor brought up their biggest guns to argue the case.

The Deering Milliken chain hired Senator Sam J. Ervin, Jr. to represent it. The senator, whose appearance has raised "conflict of interest" criticism, maintained that he was fighting for free enterprise. He argued that a corporation has the right to shut down for any reason it chooses. He further argued that the Darlington plant had been closed because it was an uneconomic operation and would have become more uneconomic if the union succeeded in winning gains for its workers. He contended that Darlington was not an integral part of the Deering Milliken chain and that, anyway, the NLRB decision was unconstitutional.

The Department of Justice appeared for the NLRB and told a different story. It cited evidence that the real reason for the Darlington shutdown was the determination of Roger Milliken, president of the corporation, to crush the union—and that this was a violation of Taft-Hartley. It further contended that Darlington was a part of the Deering Milliken complex, which should be held responsible for the consequences of the Darlington shutdown."

In its brief, the AFL-CIO contended that the Darlington shutdown was clearly an unfair labor practice because it was in retaliation for the union vote; that the NLRB decision was in line with numerous previous rulings which forbid an employer to shut down either entirely or in part in order to avoid dealing with a union; and, finally, that there is no "absolute prerogative" for an employer to go out of business or "to perpetuate an illegal discontinuance."

Attorney Irving Abramson, speaking for the Textile Workers, cited evidence to show that Roger Milliken was determined to keep the union out of the company mills and that the Darlington shutdown was used as an example of what would happen if any other Deering mills were organized.

Abramson told the Court that the NLRB decision, in fact, did not go far enough in doing justice to the discharged workers. He contended that Deering Milliken ought to be ordered to reopen the Darlington mill and to take back the discharged workers with full back pay. Unless this is done, he declared, the effect of what happened at Darlington will not be lost on workers in other Deering Milliken mills who want to organize.

Abramson further criticized the Board for its failure to hold Roger Milliken individually responsible for what happened at Darlington.

"We submit that holding Roger Milliken personally liable for the unfair labor practices for which he was primarily responsible would not only be fully warranted by the record and entirely consistent with the act as construed by the Board, but moreover would provide substantial deterrent value to the otherwise pathetically inadequate Board remedy," he said.

Union bid meets rebuff in South

Workers at six J. P. Stevens mills in North Carolina put crimp in AFL-CIO campaign

Labor's drive to extend unionism in the Deep South got a setback last week. Employees of six J. P. Stevens & Co. textile mills in Roanoke Rapids, N. C., rejected union representation 1,684 to 1,186.

The defeat was a heavy blow to AFL-CIO's Industrial Union Dept., headed by United Auto Workers Pres. Walter P. Reuther. IUD is engaged in a two-year, $1-million campaign to organize 26 of Stevens' plants, and it had hoped for a breakthrough at Roanoke Rapids.

Protests. The all-out IUD campaign against Stevens, in which the Textile Workers Union of America is cooperating, has been bitter from the start. Prior to the election, IUD filed more than 250 separate unfair labor practices charges against Stevens in National Labor Relations Board offices throughout the South.

Now, James W. Pierce, IUD organizing coordinator in the South, charges that Stevens "committed all kinds of unfair labor practices" in the election, including "captive audience meetings, surveillance, threats, and coercion and intimidation—even intimidating union observers in the election." He expects NLRB to order another election.

J. P. Stevens denied the charges. A company spokesman said the vote demonstrated "decisively" that a majority of employees don't want union representation.

Elections are pending in two other Stevens mills, in Greenville and Piedmont, S. C. None of the Stevens plants is organized.

Just a part. The drive to unionize Stevens mills is part of a larger campaign by IUD and cooperating unions. IUD coordinates efforts and assists in financing the work, and the unions have assigned organizers to work with IUD in the South and pick up part of the cost.

Some gains are claimed, but nothing "spectacular" has been accomplished so far, IUD spokesmen concede. They had hoped for dramatic impetus from a victory at Roanoke Rapids. **End**

3 Union Officials Arrested For Not Leaving Motel

Carolina Labor News 10/15/65

ALBEMARLE—Three union officials were arrested Monday afternoon when they refused to leave an Albemarle motel after the owner requested them to do so.

Dewey Sides, owner and operator of the Sunset Motel, signed the warrant charging the Textile Workers Union of America representatives with trespassing.

They are in Albemarle because of a strike at the nearby Collins and Aikman Corp., plant. The strike began 11 days ago.

The three men, Scott Hoyman, international representative of the TWUA, Tom Barker and Michael J. Botellho, posted $100 bonds each and were released. They went back to the motel immediately.

Sides said he did not know what his next step would be.

Meanwhile in New York, TWUA General President William Pollock asked the federal government to investigate the treatment of union representatives in Albemarle.

About 20 persons, most of them striking workers at the nearby Collins & Aikman textile plant, were standing outside when the union organizers were taken into custody by Stanly County sheriff's deputies.

Botellho told the gathering "your sheriff is arresting me under pressure from Collins and Aikman."

He said he would "use every resource at my disposal to sue the sheriff, motel owner and anyone else who participates in this false arrest."

Trial for the three was scheduled for Oct. 25 in Albemarle Recorder's Court.

Sides took the legal action after asking the men to leave on two occasions. Each time they refused. Sides said he needed the rooms and added, "some of our other regular guests are beginning to get sore."

Hoyman said they declined Sides' offer of accommodations at another motel he owns because they prefe to remain near the plant.

He said the union men can bes conduct business and see that it is conducted in a peaceful manner by maintaining rooms at the Sunset Motel, where they have been for almost two weeks.

Labor Probe Of S.C. Plant To Continue

GREENVILLE (AP) — Hearings on alleged im proper labor practices at South Carolina plants o the J. P. Stevens textile chain continue here Mon day.

Six witnesses testified Saturday as the Industria Union Department continued its charges of irregu larities in the May 13 election at the Duncan plan of the company.

It appears likely that similar charges involving alleged improper practices at the Estes plant at Piedmont will begin next week as scheduled.

Testimony was received Saturday from James Pierce, coordinator for the IUD in the Southeast. He said that proper eligibility lists were not supplied by the company the day before the union election.

Others testifying for the union were Miss Bonnie Seagraves, who works in the preparation department at Duncan; John Freeman, a loom fixer; Mrs. Lois Reece, a unifill tender and Jimmy Riddle and Robert Hamblin, weavers.

The hearing before a National Labor Relations Board examiner began Friday.

Union Organizers Ordered To Vacate Mo

Carolina Labor News

Room During Strike, Invoke CR Law To St

10/15/65

ALBEMARLE — Union organizers have refused to leave a local motel, saying they were asked to leave only because of a strike at the nearby Collins and Aikman Corp. plant.

Dewey Sides, owner of the Sunset Motel, said he asked representatives of the Textile Workers Union of America, AFL-CIO Friday to vacate their three rooms by noon Sunday.

He said the rooms were needed for regular guests, salesmen and others, who regularly stop at the motel.

Sides offered the four union representatives accommodations at another motel he owns, Miller's Motel, seven miles north of Albemarle.

However, Scott Hoyman of Greensboro, an international representative of the TWUA, said the union men have conducted themselves properly, and that their remaining at the motel is essential for the conduct of the strike.

Sides said that legal action to evict them—if he decides on such action—will not be taken before Monday.

Hoyman said that he believes the union men have a prior claim on the rooms under the North Carolina law on obligations of an innkeeper and under the public accommodations section of the f eral Civil Rights Act.

"If we had any other occupati we would have been allowed stay," he declared. "The only r son we are being asked to move that we are representatives of union conducting a strike, and don't think that is sufficient re son."

Hoyman is sharing a room wi another international represent tive, John Kissack of Charlotte.

Another room is occupied by To Barker of Leaksville, also an in ternational representative, and th third by Michael J. Botellho of De catur, Ga. He is assistant regiona director of the union.

The motel has 34 units. The union men have been guests since the strike began Sept. 30 after negotiations for a first contract broke down.

The union won an election in December of 1964 to represent the 750 production employees of the plant, which makes upholstery fabrics and carpeting for automobiles.

Hoyman said that only about 180 production workers have remained at their jobs.

He said there also are 250 clerical and supervisory employees at work. Albemarle is headquarters for the auotmotive division of Collins and Aikman.

NEW YORK TIMES, TUESDAY, OCTOBER 19, 1965.

Strike Bitter in Carolina Textile Town

By BEN A. FRANKLIN
Special to The New York Times

ALBEMARLE, N. C., Oct. 15—Labor and management militancy and a bitter two-week strike at the big carpet mill here have plunged this small city deeply and unwillingly into the renewed union struggle in the southern textile industry.

The situation here is regarded by many observers as typical of the revived union effort to organize workers at companies with a long tradition of nonunion employment.

For nearly three years, the Textile Workers Union of America, backed by the Industrial Union Department of the American Federation of Labor and Congress of Industrial Organizations, has been waging an uphill fight. It seeks to organize the hundreds of low-wage textile mills that have been part of the Southern landscape since the turn of the century.

According to the Labor Department's Bureau of Labor Statistics, North Carolina workers as of last July had average weekly wages of $74.07, the lowest in the United States, even below the average $75.40 in Mississippi. North Carolina also has the lowest percentage of union members in its labor force.

The textile industry is by far the biggest single employer in North Carolina, with about half the state's manufacturing workers on its payroll. Low wages and the nonunion shop predominate particularly in textiles, where profit margins are small and the work force has long been largely unskilled and semiliterate.

The battle here began a year ago at the modern plant of Collins & Aikman, Inc., a major supplier of automobile carpeting with eight plants in North Carolina. The textile union petitioned the National Labor Relations Board last October to hold an election among 724 eligible production workers here on certifying the union as their collective bargaining agent. Last Dec. 11 the union won the election, 388 to 247.

After an unsuccessful company challenge to election procedures, the union was certified as bargaining agent last May 3. Production workers walked out Sept. 30 and the talks were broken off indefinitely last Wednesday. Altogether, there were 18 bargaining sessions.

The company insists that it has been bargaining in good faith and that the union's demands are unreasonable. But union officials say they are now convinced the company's strategy is to "stall on the contract" until next May.

Under N.L.R.B. procedures, one year after certification the company may petition for a decertification election, in which votes could be cast by both the strikers and the new workers the company has been recruiting.

"The scabs inside would be voting to save their jobs," a union spokesman said.

In a letter dated Sept. 22 the company said:

"We would like to make it clear to you—as clear and as plain as we possibly can—that a strike will not force us to sign any contract terms which we believe would not in the long run work out to the best interests of this company and its employes. Those whose jobs are filled while they are out on strike will have no right to return to their jobs after that—or get their jobs back—even when the strike has ended."

Wages in the plant, which the company says average about $1.80 an hour, are not at issue, according to John Kissack, the union's international representative here. "We are talking about workloads, grievance procedure, seniority, safety provisions, and the most basic kind of union contract," he said.

Albemarle plainly does not sympathize with the union. There have been enough incidents of what union officials bitterly call "harassment and intimidation" that Odell Clark, chief investigator for the House Education and Labor committee, came here yesterday at the union's request to investigate.

Among others, he talked to Mrs. Donna Earnhardt, 23 years old, who is pregnant with her fifth child. She told newsmen that her doctor at first refused to accept her as a patient "because we are on strike." Later he relented, she said, provided "we pay up before delivery."

Labor-Soc

Industrial Union Dept. And Textile Workers File For Election At Four J. P. Steven's Plans

CHARLOTTE—The Industrial Union Department, AFL-CIO (IUD, AFL-CIO) today made the first move for a secret ballot election for J. P. Stevens Company workers by filing a petition with the National Labor Relations Board in behalf of approximately 2,600 employees at the company's four plants in Roanoke Rapids, N.C.

The action stems from a sixteen-months organizing ccampaign directed by the IUD, AFL-CIO at 25 major plants of J. P. Stevens located in both the Carolinas, with a total employment of 25,000 workers. The announcement was made at a press conference in the Sheraton-Barringer Motor Inn in Charlotte called by ten officers of the IUD and Textile Workers Union of America, AFL-CIO, and included Nicholas Zonarich, IUD Organizational Director, William Pollock, General President of TWUA and John Chupka, TWUA General Secretary-Treasurer.

Jim Pierce, Charlotte, IUD Coordinator for the Carolinas said in a formal sttaement: "The petition which we filed today with the Eleventh Regional office of the National Labor Relations Board in Winston-Salem was supported by the signed authorization cards of a substantial majority of all workers who will be eligible to vote at the J. P. Stevens Company's Roanoke Rapids plants. They are eager for an immediate election, as early as next week if it is possible, so that they may vote in an atmosphere free of management inspired coercion and intimidation. They are ready to disprove the oft-repeated public sttaements of J. P. Stevens Company spokesmen that their employees don't want to be represented by a union."

Early last year the NLRB issued complaints against J. P. Stevens involving 153 separate actions of unfair labor practices, including discharge of 53 employees. A trail examiner started hearings on March 24, 1964 and concluded them on September 13. His intermediate report is expected shortly. Last Occt. 30 the NLRB issued further complaints charging Stevens with an additional 51 violations and the discharge of 18 employees.

Hearings on these complaints are scheduled to begin before an NLRB Trial Examiner on Feb. 1 in Rock Hill, S.C., and will be held later in the month at Roanoke Rapids on the cases involving J. P. Stevens workers in that city.

Pierce's statement added: "Since the middle of 1964 we have filed charges involving the discharges of another 50 J. P. Stevens workers for their open and active support of the union organizing campaign."

Press Spotlights J. P. Stevens Chain Anti-Labor Policies

Carolina Labor News

Labor South

10-27-65

The Washington Post, one of the nation's most respected newspapers, has concluded a four-part series by Frank C. Porter, a staff writer, detailing some of the problems entailed in organizing the textile industry in the South, particularly in the J. P. Stevens chain, second largest in the country.

Porter visited a number of southern communities where Stevens plants are located and talked with workers who have been discharged following attempts to organize their plants, to union officials and to representatives of the company, the National Labor Relations Board, and to civic leaders.

The series was syndicated by the Washington Post-Los Angeles Times News Service, and has attracted wide attention. The growing seriousness of the southern organizing problem was spotlighted recently when the House Education and Labor Committee held hearings on the subject.

Among those testifying was Nicholas Zonarich, organizational director of the AFL-CIO Industrial Union Department, which has been spearheading the organizing drive in conjunction with the Textile Workers Union of America and other unions.

"Real Public Service"

Zonarich declared "The Post and Frank Porter have performed a real public service through this real and factual series on the J. P. Stevens Co. It is apparent that this series was stimulated by the recent exploratory hearings by the House Labor Committee at which the IUD testified. As a matter of fact, we have been getting a number of inquiries since the series was published.

"The public is entitled to all the facts honestly revealed as they were by Mr. Porter. It is clear that what we have been saying about the ugly actions of the J. P. Stevens Co. is true," Zonarich said.

The IUD, TWUA and other unions have indicated they will seek further probes.

Labor-Gov

TWUA Asks Congress to Probe Anti-Union Conspiracy in South

TEXTILE LABOR

Oct. - '65

Charging southern textile manufacturers with a "continuing conspiracy" to deprive their employees of the legal right to organize, TWUA's Executive Council urged House and Senate labor committees to open an investigation into this "pattern of intentional law-breaking."

The council pointed out that the conspiracy is "sustained in major southern textile areas by the maintenance of a blacklist through which discharged, union-minded workers are denied employment in any mill and forced to leave town."

Masterminded by lawyers who specialize in union-busting, the anti-union plot is "aided and abetted in some cases by the local press, the police and merchants eager to do the bidding of the big mill which is usually the town's major employer," the council said.

"These lawyers and their corporate clients have learned through long experience that the penalties imposed upon guilty employers by the National Labor Relations Board are so innocuous and so long-delayed that they can thumb their noses at the law with impunity," its statement continued.

"It is more than coincidence that, in every case in which one of these lawyers appears, the company's tactics are predictable and, indeed, follow the identical pattern. The anti-union notices, the threatening letters, the propaganda

(Continued on Page 19)

Probe of Southern Conspiracy Urged

(Continued from Page 24)

handed out by the company and appearing in the local press, and the plant superintendent's coercive speech just prior to every NLRB election contain the same language from plant to plant with depressing regularity."

The council cited company actions during a recent and continuing organizing drive at 25 North and South Carolina plants of J. P. Stevens & Co. as "a prime example of violations of the labor laws on a scale so vast and widespread that they can only be explained as part of a carefully-calculated, cynical plan of deliberate law-breaking designed to smash the campaign before it got started."

In addition to paying union adherents, threatening to close plants down, and "brainwashing" its employees, the company "brazenly" launched upon a plan to discharge every worker known as a union leader or committeeman in every plant at which union activity occurred, the TWUA council said. Between June 1963 and August 1965, at least 200 such discharges were recorded, the council added.

Even while an NLRB trial examiner was concluding—during the first of a series of hearings on TWUA charges—that J. P. Stevens Co. "flagrantly, cynically and unlawfully interfered with, restrained and coerced its employees in the exercise of their rights under the act," the company pursued its policy of "ruthless extermination of the union's influence," the TWUA statement said.

"Employees who gave testimony before the NLRB were immediately discharged. By the time the first round of hearings was over, a whole new set of discharges and further acts of coercion had been brought to the NLRB's attention. The labor board issued a new complaint and a second round of hearings was held.

"Incredible as it may seem, while the second round of hearings was in progress, the company still continued to flout the law and defy the NLRB. At the present time, a wholly new third round of hearings has been ordered on these additional cases and more are arising every day."

William Pollock, TWUA general president, said the southern textile worker "wants and, under the law, is entitled to a union. He is unable to get it because of the anti-union terror maintained by the conspiracy among the textile giants, with the help of their lawyers."

"These employers function securely in the knowledge that the Taft-Hartley Law they are violating has, so far, afforded their workers and the unions little, if any, effective relief," Pollock continued.

"The Congressional investigation we seek should inquire into the pattern of intentional law-breaking carried on by these manufacturers and should reevaluate the remedies provided by the Taft-Hartley Act against repeated violators, such as J. P. Stevens, with a view to amending that law to provide remedies that will deter such violations."

U.S. REPORT

Emp - Ga

Textiles Employ Most Georgians; Apparel Industry Is Second

Atlanta Constitution

12/16/65

The textile industry is Georgia's largest employer among industrial group, the U.S. Department of Commerce's Bureau of the Census said in a report released Wednesday.

The report, based on the bureau's 1963 census of manufacturers, showed that textile manufacturers in Georgia employed 94,000 workers at the time of the census and that their payroll for the year was $334 million.

The second most important employer among industry groups was the apparel industry with 56,000 employes, Atlanta field office director Daniel M. Paul said.

The total number of employes in Georgia manufacturing plants in 1963 was 355,000, an increase of 41,000 — or 13 per cent — since the last census of manufacturers was taken in 1958.

The report also showed that in 1963 there were 6,237 manufacturing plants in the state. Some 2,069 of them had 20 or more employes. The manufacturing payroll for 1963 totaled $1.5 billion.

NLRB TELLS J. P. STEVENS COMPANY RE-INSTATE 20 WORKERS IN CAROLINAS

Carolina Labor News 2/4/64

WASHINGTON—A trial examiner for the National Labor Relations Board has recommended that J. P. Stevens & Co., Inc., be ordered to cease alleged discrimination against employes because of union activity and that it reinstate 20 fired workers.

The recommendations of the trial examiner, Horace A. Ruckel, are yet to be acted upon by the NLRB.

Ruckel conducted hearings in 1964 and 1965 in Roanoke Rapids, N.C., and Rock Hill and Greenville, S.C., upon complaints by the Textile Workers Union of America and the Industrial Union Department, AFL-CIO.

The examiner's summary said in part:

"The record of the 1965 hearing reflects the continued, systematic determination of this employer as revealed by the record of the 1964 hearing, to destroy the union root and branch by discharging its most active members on any pretext which might come to hand, or could be invented, by threatening to discharge others unless they come to management and renounce the union, and by provoking the resignation of still others from (the) respondent's (Stevens') employment. No other conclusion can be drawn than that the respondent has largely succeeded in its purpose."

The hearings consolidated 25 cases brought by the union from two Stevens plants in the Rock Hill area, five in the Greenville area and the Patterson plant at Roanoke Rapids.

Ruckel recommended to the board that it order the company to reinstate these workers: Ben Surratt, Wylie Hill, Hubert Varnadore, John Fullbright, Oliver Durham, Willard Page, Junior Hulsey, W. O. Epps, Jake Owens, Arthur Dean, Frank Wojeck, James Hill, Leroy Reeves, Willis Young, Rufus Finley, Donald Jones, William Coker and James Rosemond of plants in the Greenville area, and John Little and Leslie Hancock of the Patterson plant at Roanoke Rapids.

The examiner recommended dismissal of complaints asking reinstatement of Juanita Faulkenberry of Republic plant No. 1 at Rock Hill; Daniel Murray of Patterson plant at Roanoke Rapids, and Bobby Spoon, Franklin Moore and Joe Manley in plants in the Greenville area.

Ruckel recommended that the board order the big textile manufacturing firm to cease altering working conditions for the purpose of defeating union organizational efforts, discharging employes for testifying at hearings, discriminating against workers in order to discourage union activities of other employes to report to the company union activities of other employes, permitting employes to engage in antiunion activity while prohibiting other employes from engaging in activities in behalf of the union, and of encouraging employes from withdrawing from the union.

Ruckel's report, asserting his belief that his recommendations do not entirely fit the situation, recommended to the board that it consider such other remedies which it might deem appropriate.

CRA - Suits — Employment

Suit Filed In U. S. Court

News Leader 1/18/66

Another in a series of suits charging employment discrimination has been filed in federal District Court here.

In a suit filed yesterday 10 Negro employes of the Friedman-Marks Clothing Co. asked that the court issue an order restraining the Richmond clothing firm from continuing its alleged discrimination on the basis of color.

Also being sought by the Negro plaintiffs is a court order that would force the company to permit transfers from the sponging department to the cutting department.

The Negroes, employes in the sponging department, say they were denied transfers to the higher-paying and more "prestegious" cutting department because of their race.

According to the Negroes, the company, with a few exceptions, has reserved jobs in the cutting department for white employes while assigning only Negroes to the sponging department.

The company has 20 days from official notification of the suit in which to file an answer with the court.

Feb. 1976 Labor - N.C.

TWUA Calls for 'Stiffer Penalties' For Stevens Repeat Union-Busting

TEXTILE LABOR

A National Labor Relations Board trial examiner's decision, upholding a second set of charges of union-busting against J. P. Stevens & Co. Inc., prompted TWUA to call for "new and stiffer remedies to bring the nation's second largest textile chain in compliance with federal labor law."

The trial examiner found that the company had illegally discharged another 19 employees for union activities and recommended that they be reinstated with back pay at 6% annual interest.

General President William Pollock said Trial Examiner Horace A. Ruckel's latest findings, released by the NLRB in Washington "clearly demonstrates that in every situation right down the line where Stevens workers have sought to form a union, the company has been guilty of violating the law."

"All of J. P. Stevens' actions are tinged and tainted with illegality," Pollock said. "Two rounds of hearings have produced the same findings. Two elections among Stevens workers in Dunean, S. C., and Roanoke Rapids, N. C., have been set aside. A third round of hearings on similar violations is already scheduled.

"The NLRB's own trial examiner, in his latest decision, takes the highly unusual step of calling for new remedies. In doing so, he confirms our union's long-held conviction that the present arsenal of NLRB remedies, developed over a period of 30 years, is still inadequate.

"At the same time," Pollock said, "the trial examiner's report renders completely ludicrous the company's frequent public protestations of innocence.

"Incredible as it seems, with two rounds of hearings completed, the com-

(Continued on page 22)

Stevens Again Tagged Union-Bust

(Continued from Page 24)

pany still continues to flout the law by discharging and intimidating workers in defiance of the NLRB. The situation clearly calls for new and stiffer remedies to bring J. P. Stevens in compliance with the labor laws of the land," Pollock said.

The eight plants involved in the present case are the Republic plants 1 and 3, located near Rock Hill, S. C., the Dunean, Blackhawk, Slate and White Horse plants near Greenville, S. C., the Estes Plant at Piedmont, S. C., and the Patterson plant at Roanoke Rapids, N. C.

At the end of an earlier hearing held in 1964, Ruckel had recommended the reinstatement of 69 Stevens workers also fired for union activity during the course of an organizing campaign conducted jointly at 25 Stevens plants in North and South Carolina by TWUA and the AFL-CIO Industrial Union Department.

The examiner's summary said in part:

"The record of the 1965 hearing reflects the continued, systematic determination of this employer, as revealed by the 1964 hearing, to destroy the union root and branch by discharging its most active members on any pretext which might come to hand, or could be invented, by threatening to discharge others unless they come to management and renounce the union, and by provoking the resignat still others from (the) respon (Stevens') employment . . ."

Unions — Worker Problem

* * *

CONSTRUCTION UNIONS in St. Louis push a roadblock in the path of "Operation Breakthrough," the Government experiment in mass-produced housing. Urged on by the unions, St. Louis aldermen refuse to exempt the prototype housing from city zoning and building codes. The waiver request will be renewed at a city council session today.

* * *

VOLUNTEER ORGANIZERS: The Textile Workers Union calls on rank-and-filers to "help us organize." Workers who sign up as volunteer organizers will provide leads to likely targets for union drives, gather names and addresses of pro-union workers.

* * *

"WORKERS' PARADISE" fails to produce enough kids who want to be workers. In Red Hungary, a survey of 2,600 students shows that 60% in comprehensive high schools and nearly 75% in purely academic high schools aim for professional careers rather than blue-collar jobs. But manpower experts say only 25% of the students can hope for higher education.

* * *

UNIONIZED TEACHERS could hamper Nixon's effort to integrate faculties.

Some locals of the American Federation of Teachers voice concern about the President's call for a racial mix of teachers in each school that's "substantially the same as it is throughout the system." "We don't want forced transfer of black teachers to white schools, or white teachers to black schools," declares a New York City union official. The president of the Chicago local vows to block "forced integration" until officials "provide safety" for white teachers assigned to black schools.

Seniority rights spelled out in some locals' contracts could slow integration. The Chicago local's contract permits only 10% of the teachers at each school to be assigned without regard to seniority rights. Local leaders warn that equal employment laws in some states prohibit the classification or assignment of employes on the basis of race, religion or nationality.

Many administrators claim they're more worried about recruiting additional black teachers than they are about the racial distribution at each school.

* * *

THE CHECKOFF: Former Labor Secretary Willard Wirtz and John Gentry, who recently left the Labor Department, form a partnership in Washington "to engage as counsellors-at-large in such matters as appear interesting and worthwhile." . . . A Washington comedy writer complains that an Equal Employment Opportunity Commission ruling that supervisors can't tell Polish jokes violates the First Amendment's guarantee of freedom of speech.

CHARLOTTE: *Speaking Up*

Better Training, Pay, Fringe Benefits Goal of Union

THE MORNING TREK: Domestics in Charlotte sometimes spend as much as two hours each morning getting from their homes to jobs.

Domestics United, Inc. of Charlotte is one of the few antipoverty organizations in the state that is operated almost entirely by poor people themselves. In this case, low-paid domestic workers have banded together in an attempt to get their pay raised and working conditions improved and, along with the benefits, to improve the skills they can offer their employers.

DU, as the agency is called by its organizers, began two years ago when an official of Charlotte's community action program, the Charlotte Area Fund, noticed a small girl escorting her even smaller brothers to three different houses each morning. The official wondered why this little girl had to take the responsibility for her brothers.

He found out that her mother was a domestic worker, and in order to get to her job across town she had to leave home practically at dawn. It was her eight-year-old daughter's job to deliver the little brothers to the homes of neighbors for the day. The case was not unique.

The official tried to start a daycare project for the children of domestics. This project didn't materialize but it did focus attention on the plight of several thousand women in Charlotte who worked as domestics. In the spring of 1966, the United Church Women of Charlotte and the Charlotte Area Fund organized a meeting that included domestics to talk about the problem.

The first meeting drew only 40 domestics, but another meeting a month later garnered around 200 women who worked in private homes. Soon the women themselves were taking over the effort to oranize and plan for the betterment of their jobs and to solve some of their family problems that went along with the jobs.

The United Church Women and the Charlotte Area Fund withdrew to the sidelines but continued to encourage the domestics because they saw that the problems of these women were woven into the very fabric of poverty and the Negro dilemma: the low pay, the children left alone at home, or the teenager who drops out of school to take care of the younger members of the family, and not least, the pervading lack of respect the women felt toward themselves and their jobs. In a few cases, a domestic worker displayed real pride in the job she was doing, but this was the exception rather than the rule. The organizers wanted to change that rule.

The early meeting raised a small tempest in Charlotte as the word spread among housewives that their "domestics" were organizing, forming a *union*, and would proceed to demand unheard of wages. Mrs. Wilhelmina Adams, a domestic who has been at the forefront of Domestics United since its inception, recalled how the group tried to stem the tide of rumors.

Underground

"We had to go underground, she said, "and keep the press out of our meetings. A union wasn't our idea at all. We never thought about striking or anything like that. Some of the girls lost their jobs because people in Charlotte thought we were forming a union."

The main idea of Domestics United, Mrs. Adams said, was to train domestics in the skills of housekeeping and in a broader range of duties such as child care, care of the elderly, and even some simple nursing skills, so they could get better jobs or better pay for the jobs they had. Many women needed to learn how to drive a car because their employers wanted them to pick up the children or do the grocery shopping. Others needed instruction in the use of new applicances. Ironing was another major skill domestics needed to improve.

Looking back, Mrs. Adams said she remembers "no real trouble" in getting employers to raise wages to $1.40 an hour and sometimes $1.60 an hour. "Most of them want to pay the going rate," she said. "I've even had people I never heard of to call me and ask what the going rate is now. They say they don't want to pay less than they should."

Monetary Benefits

Other monetary benefits such as payment of the employees' social security and a paid vacation are sought by members of Domestics United. Mrs. Adams said she believes many employers are offering these benefits now.

It is difficult to know just what role Domestics United has actually played in attaining better pay and conditions for its members, because no systematic contact is maintained between the organization and employers, or even between the organization and its members. But it seems evident that domestics' wages in Charlotte have gone up during the two-year existence of Domestics United. This may be explained partly by the publicity given to the domestics' problem through DU activities

PAGINATION INCORRECT

and partly by the fact that many domestics are more confident about asking for the higher wage, or are asking for the first time.

More concrete achievements of the organization are the training courses it has offered and the placement service it has rather inadvertently drifted into providing for its members. However, two courses involving a total of 30 women is rather meager achievement for two years of operation.

It is true, as Mrs. Adams pointed out, that Domestics United has been limited by lack of funds. This limitation was removed, to a large extent, when the organization received a grant of $12,600 from The North Carolina Fund last April. It has used the money to rent a two-room office and to hire Mrs. Adams as executive director on a part-time basis.

Training Courses

The two training courses sponsored by Domestics United were for skills in post-natal child care. Mrs. Adams said all 30 women graduated from the two courses have since been hired to care for babies during the first few weeks after birth. This job includes the usual housekeeping duties as well as baby care, and it is temporary, lasting until the new mother is able to resume these duties herself.

In addition to these two courses, Domestics United has sponsored drivers' training through Piedmont Community College. Mrs. Adams said several women have gotten their drivers' license.

The training courses were all offered before Domestics United had money of its own under the Fund grant. Resource people gave their time free of charge, and classroom space was donated by the Red Cross. There was no charge to the women enrolled.

Mrs. Adams said she is planning, with the help of her 25-member board of directors, a training course focusing on general housekeeping skills. Fifteen women are already signed up for the course with many more on the waiting list.

The board of directors, which meets monthly, is composed of an equal number of representatives from the domestics, from the Negro community at large, and from the white community.

Membership in the organization has risen from 400 in the summer of 1966 to 650 today. This is only a small percentage of the estimated 6,000 domestics in Charlotte. Mrs. Adams said many women refuse to join Domestics United for fear the welfare department will find out they are earning a little income and reduce the amount they receive from welfare.

"Nobody's going to find out they're working because our files are private," she said. "But they're scared anyhow."

Much of Mrs. Adams' time is taken up with filling placement requests from unemployed domestics and from housewives looking for help.

Placement Service

"I'm not supposed to be running a placement service," she admitted. "But it seems like that's about what I've ended up doing."

She has placed some 50 domestics since the office opened in April, she said, noting that the number might be higher but there is no accurate record.

Mrs. Adams would like to have a workshop for employers "to help them understand about the domestic worker, about how she maybe gets up at five in the morning and fixes breakfast for her family so by the time she gets to work at nine she's already tired, while her employer is fresh as a daisy."

Many domestics are always worried about family problems and "how to make ends meet," Mrs. Adams said. The employers might be more sympthetic in their demands if they understood this.

Much can also be done to improve the way domestics view their jobs, Mrs. Adams said.

"A lot of women hate the idea of training for domestic work," she said. "They say that if they're going to take training, they might as well train for something better. But I tell them this work is a profession. You even have to be a school teacher sometimes and help the children with homework. You have to do a little bit of everything. You got to be proud of your profession."

Success Story

Domestics United has its success stories. Mrs. Oneeda Webb is one of them. She started to work at the age of 15 as a domestic in Jacksonville, N.C. At the time Domestics United was organized she was working for $9 a day, or $45 a week. Now she makes $75 a week, no small increase for her and her family.

Mrs. Webb is a graduate of one of the DU child-care courses, and one of her recent employers, Mrs. Harvey Ritch, said Mrs. Webb "did anything that came to hand, the baby care and the housework. I was very pleased."

Mrs. Ritch read about Domestic United in the newspaper and called Mrs. Adams when she needed someone to take care of her new baby for a few weeks. She said she did not mind paying the higher wage required by DU.

"Not under the circumstances. I couldn't afford that on a permanent basis. But I wanted someone special and I didn't feel the wage was out of line for that," she said.

Could Do More

Undoubtedly Domestics United could do much more to train and upgrade the position of its members. Its slow progress may be due partially to the reluctance of domestics to risk their job, or their welfare check, by joining. Further, its executive director, Mrs. Adams, is new to the business of managing an office, of planning and getting things done with efficiency and dispatch. So are many members of its board of directors.

Nevertheless, DU is a pioneer in the organization of domestics and must be credited with setting a precedent for other communities. Mrs. Adams, whose fame is spreading now that she's a director of the National Committee on Household Employment, has inquiries from other cities in North Carolina and from other states. The word is getting around that the position of the household worker need not remain on the bottom of the wage ladder, that the domestic has a respected place in the labor market and rights that should be respected.

Kate Erwin

POSTNATAL CARE: Special Skills Required

RALEIGH: *Mutual Gain*

Housewives, Maids Work For A Fair Deal for Domestics

The so-called "domestic," otherwise known as maid, cook, servant, or just "help," has long been at the rock bottom of the labor market.

In North Carolina, she works for an average seventy cents an hours. Her working conditions, job benefits and protection from exploitation depend entirely on the disposition of her employer.

As more job opportunities have opened for the uneducated and poverty classes that traditionally provide household labor, the supply of domestic workers has dropped considerably below the demand.

Some people, particularly militant members of the black community, welcome the new trend, believing that the "domestic"——trailing clouds of social and economic injustice——must go. Others contend that because a need for household workers continues to exist, the position of the domestic should be upgraded with new skills, new pay, more professional employer-employees relations, and greater dignity.

The latter view is being put to the test by an experimental training program for domestic workers in Raleigh. Organized on a volunteer basis by a group of white housewives and black community leaders, Household Assistance, Inc., has trained some 60 women for domestic service since March, 1968.

North Carolina State University supplied funds under Title I of the 1965 Higher Education Act to pay a home economics instructor for the first ten-week course. The remarkable list of contributions of services and materials from the community included classroom facilities from the American Red Cross; course lectures in specialized fields by the police department, dairy council, state board of health, consumer marketing department, farmers home administration, to name a few agencies, and a local pediatrician, veterinarian, and an authority on the care of china, crystal, and silver.

A motel offered facilities for demonstration and practice; a local convalescent home, instruction in care of the elderly; a beauty school, tips on grooming; a Raleigh printing company, publicity and printing.

The twenty-three women in the pilot course met from nine to twelve each morning Monday through Friday for classroom instruction. In the afternoons they were taken to private homes where they worked as "apprentices."

The housewives for whom they worked agreed to spend time supervising and teaching their apprentices. They also filled out detailed evaluation forms every day so that the Instructor could follow the progress of each student.

CODE FOR

WAGES

A domestic employee who works full-time for one family should receive a minimum of $1.45 per hour as a beginning wage. An employee who works "by the day" should receive a minimum of $1.60 per hour as a beginning wage because of the less secure and often more strenuous nature of her work. These minimum beginning rates should rise in response to changes in the Federal Minimum Wage. Overtime that is required or made necessary by the employer should be compensated for at the rate of time-and-a-half. Optional overtime that is simply offered to the employee as a "take-it-or-leave-it" proposition should be paid for at the usual rate.

HOURS

Exception to the usual eight-hour day or five-day week may be noted in the written Contract. The Contract should also state specific hours of arrival and departure. Time spent in transit to and from work is not included in working time. All variations in the schedule agreed upon, such as overtime requests, anticipated absence, or late arrival, should be announced in advance by both parties. An adequate lunch period is expected within the eight-hour day, although it is recognized that many employees must continue to have responsibility for children during this time.

SOCIAL SECURITY

Social Security taxes will be paid in accord with Federal Law. If an employer pays an employee $50 or more cash wages in a calendar quarter for household services, the taxes apply. . ." Details and method of payment are available in Circular H, which may be obtained from the Department of Internal Revenue.

CONTRACT

The domestic employer and employee should make use of a written contract, which can spell out in detail the responsibilities for both.

Later in the spring, HAI offered a Party Aid course with instruction in the skills of serving and preparing food and drink for parties. Most of the twenty students in this course were employed during the day so they met two evenings a week for six weeks.

After getting these courses under way, the backers of Household Assistance took on the task of placement for their trainees. At the conclusion of the household assistants course, every trainee who wanted work was placed on a job. Requests for party aides flowed in more slowly, and it was decided that there is not yet a sufficient demand for party aides to justify a second course.

Money for a second ten-week course for household assistants was granted by the North Carolina Fund. This time, in contrast to the first course where all the students were drawn from the ranks of the unemployed, the twenty women participating were employed.

The shift from unemployed to employed trainees came after much discussion by the HAI board. On a practical level,

DOMESTIC WORKERS

RAISES

The domestic employee should receive periodic raises, as agreed upon in the Contract, taking into consideration the following:

* Satisfactory completion of an initial trial period
* Rise of the Cost of Living Index
* Raise in the Federal Minimum Wage
* Increased responsibility of the employee
* Increased skills gained by her in a training course
* Increased value by virtue of length of service and better understanding of family needs
* Recognition of the value of a raise in pay as an incentive as well as a reward

TRANSPORTATION

The domestic employee should ordinarily provide her own transportation. Due to the lack of a public transporation system in this community, this is open to negotiation. Should the employee be required to use her own car for her employer's business, such as car-pooling or marketing, she should receive compensation at the rate of 10¢ a mile.

VACATIONS

The full-time employee should receive two weeks of paid vacation per year. The day-worker should receive two such days each year for each day-per-week she works regularly for one employer. Employer and employee should arrange in advance a mutually agreeable vacation period for the full-time worker. However, because of the difficulty of coordinating vacation time with several different employers, the day-worker should be free to select her own two weeks, notifying her employers well in advance.

COMMUNICATION

The domestic employer and employee should strive to develop and maintain good communication between themselves, recognizing that this is essential for a mutually satisfactory relationship. They should agree to candidly and politely express what is on their minds, whether it concerns disappointment in work done or pay received; misunderstandings or mistakes; instructions or questions.

PAID HOLIDAYS

The domestic employee should receive five paid holidays a year. These would include Thanksgiving, Christmas, and New Year's Day, and two of the following: Labor Day, Memorial Day, Fourth of July, Good Friday, or Easter Monday. The employer of a day-worker should provide one such holiday for each day-per-week she employs her; and it is suggested that the employee rearrange her schedule so that one family not be without her services two consecutive weeks (as happens in the case of Christmas and New Years). If a holiday falls on the weekend, the employee should be given a week day off during the week following or preceding. If an employer is out of town and does not wish her employee in the home during this absence, she is obligated for the day's wages unless the absence has been discussed and agreed upon in advance (perhaps a clause in the contract), or unless employee or employer finds an acceptable substitute job.

LEAVE

A "sick or sympathy" leave of five days per year is considered the ideal. Recognizing, however, that this is among the more controversial subjects in domestic employment, this Code simply stipulates that this will be negotiated by the individual parties. A Contract might stipulate, for example, that such leave will be granted after the initial trial period; or when the employer is confident of the conscientiousness of the employee; or perhaps, that half pay will be given for such days. In any event, the earliest possible notice should be given to the employer. (Sympathy refers to death or illness in the employee's family, and other such emergencies.)

This code was developed and published by the Chapel Hill Human Relations Council.

employed women formed a more uniform group and were easier to teach. They could practice their skills on their jobs.

The HAI directors screened prospective enrollees in the second class more carefully than for the pilot program. Several young girls were helped to find other jobs or sent to job counselors because it was felt that they had the potential for other kind of employment and would be disappointed with domestic work.

Efforts were made to educate the employer as well as employee. The instructor wrote the employers of each of her students asking their cooperation. Each employer received a copy of the HAI code of standards, adapted from the code of the National Committee on Household Employment.

The code calls for employment on a businesslike basis: sets regular hours for full-time, day and part-time work; stipulates that the employer should pay half the employee's social security, and that paid vacations and sick leave should be arranged. It also recommends a wage of $1.40 an hour, with plans to raise it later to meet the national minimum wage that stands now at $1.60 an hour.

Household Assistance, Inc., has just completed its third training course and is now looking for further sponsorship for classes. Graduates of all three of its courses are looking into the possibility of starting a business which will contract with apartment houses and private households for service.

There are also some indications that the local technical institute might offer training for domestic workers.

As one backer of HAI put it, "These things will take a long time to work out but I think they can be done. HAI has just scratched the surface of the problem. Domestic work is the lowest job of any today, and there won't be this supply of labor much longer under present conditions."

Certainly fewer and fewer Negro women in North Carolina, forty-four percent of whom were domestic workers in 1960, are seeking work in private homes. Whether they can find a living wage and a new dignity in such work in the future may depend on the success of experiments like Household Assistance, Inc.

January 5, 1969

Dr. Vivian W. Henderson
President
Clark College
Atlanta, Georgia 30314

Dear Vivian:

I want to thank you personally and on behalf of BLS and SRC for your participation in our conference on December 17th. We felt that it was important to get a better understanding of the information in the employment survey. You contributed significantly in this effort and in providing a meaningful interpretation as to what the data mean for Atlanta. We are all appreciative of the thought, time and effort which you put into this undertaking. We felt that we had a good representative turnout for such a conference and that this argues well for the data being constructively used.

Again our thanks and I trust we will have further opportunities to work together.

Sincerely,

Emory F. Via, Director
Labor Program

EFV/km

URBAN EMPLOYMENT SURVEY

BLS REPORT NO. 370
OCTOBER 1969

EMPLOYMENT SITUATION IN POVERTY AREAS OF SIX CITIES, JULY 1968 - JUNE 1969

U.S. DEPARTMENT OF LABOR
BUREAU OF LABOR STATISTICS

A STUDY SPONSORED BY THE
MANPOWER ADMINISTRATION

For most Americans, 1969 was a year of relative economic well being. Employment was at record levels, and the unemployment rate was near post-Korean War lows. However, a large segment of our population was not sharing in this prosperity. In the Concentrated Employment Program (CEP) 1/ areas of six major U.S. cities, many of the mainly black and Spanish-American residents were plagued by high unemployment rates and low weekly earnings and annual incomes. They were also concentrated in less desirable occupations--a large proportion worked in service and nonfarm laborer jobs that are often seasonal and provide only intermittent work. In addition, many CEP area residents were not even seeking work because of poor health or discouragement over their job-finding prospects. In each of the target areas, the proportion of persons with employment problems was much greater than for persons in the Nation as a whole.

This report, which sheds new light on the employment problems of people in poverty areas, presents the first detailed results of the Urban Employment Survey (UES). The survey was conducted by the U.S. Bureau of the Census for the Bureau of Labor Statistics with the cooperation and financing of the Labor Department's Manpower Administration. It provides information on the employment status, work experience, earnings, income, and educational attainment of persons living in each of the CEP areas of six large U.S. cities--Atlanta, Chicago, Detroit, Houston, Los Angeles, and New York City. 2/ The data refer to the 12-month period, July 1968 through June 1969. Releases on the employment situation in each of these areas have also been prepared by the regional offices of the Bureau of Labor Statistics and are available on request from the Bureau.

Population

Approximately 815,000 men and women 16 years and over resided in the six poverty areas surveyed during the July 1968-June 1969 period. The New York City survey area also includes similar neighborhoods outside the CEP areas. It made up nearly half of this target population (389,000). In addition, the survey covered 117,000 persons in Chicago, 98,000 in Detroit, 82,000 in Houston, 68,000 in Los Angeles, and 60,000 in Atlanta.

1/ Concentrated Employment Program areas are target poverty areas in which the Department of Labor has combined separate manpower programs in order to concentrate the effects of these programs in specific neighborhoods. Since the boundaries of the CEP areas were made for administrative and program purposes, the areas are not entirely homogeneous in relation to one another; comparisons and conclusions concerning area differences should be made with caution.

2/ The six areas will be referred to interchangeably as CEP, UES, poverty, or target areas in this report.

November 18, 1969

Dr. Vivian W. Henderson
President
Clark College
Atlanta, Georgia 30314

Dear Vivian:

Enclosed is the release and back-up data on the recent BLS employment survey for Atlanta. You will note that in every case they are talking about either the CEP area or the area within the actual city limits.

If it would be useful we could get copies of the survey instruments used to collect the data. There may be further specialized tabulations produced. I will have BLS send them directly to you. Also they will send you a copy of a report digesting what was found in other cities.

We are delighted that you will be able to take part in the Employment Conference on December 17. You are to let me know, per your suggestion, how formal your presentation will be. It can either be a speech with a panel of reactors or a lead-off panel presentation with other members both reacting and doing their own thing.

If we limit the program to one long afternoon (instead of all day) we probably will have no more than 1½ hours for the panel and your presentation. I will act as chairman. Al Kehrer, a businessman and a representative of EOA (probably the CEP director) will be the other members of the panel.

Let me know if you need other information.

Sincerely,

Emory F. Via, Director
Labor Program

Mr. Bradley N. Currey, Jr.
Sr. Vice President-Marketing
Trust Company of Georgia
20 Pryor Street, N. E.
Atlanta, Georgia

Dear Mr. Currey:

First, let me thank you for agreeing to serve as a panel member on the Atlanta Urban Employment Survey Users' Conference which is jointly sponsored by BLS [Bureau of Labor Statistics] and SRC.

Enclosed is a summary of the study and an accompanying news release. Also enclosed is a summary of the findings in the six cities throughout the U. S. where similar studies were made.

The first part of the program will be presentations by various BLS officials describing the survey, the basic findings, what they had hoped to do, and some problems regarding the use of the data. The task of the panel will be to respond to an overview presentation made by Dr. Vivian Henderson, to add your own insights and questions, and in general to discuss what public and private agencies should be doing as a result of what the data show.

I look forward to our being together on December 17 and trust that we will have a meaningful conference. Please let me know if you have any questions.

Sincerely,

Emory F. Via

Mr. Malcolm J. Meredith
Sears Roebuck & Company
Department 107-T
675 Ponce de Leon Avenue, N. E.
Atlanta, Georgia

Dear Mr. Meredith:

Enclosed is the announcement of the employment conference jointly sponsored by BLS and SRC. We would very much like to have you serve as an in-audience resource person. We are asking five other people to serve in a similar capacity. They will include representatives of EOA, SRC, Atlanta Urban League, NED and an economist. We are asking these resource people to look at the data in advance of the conference so that they will be specially prepared to either raise questions or to add their own interpretations as to what the data mean for their own programs or for Atlanta in general. The degree of such participation will, of course, be left entirely to each individual resource person.

I have enclosed a copy of the Atlanta survey and a summary of surveys in other cities.

Sincerely,

Emory F. Via
Director
Labor Program

U. S. DEPARTMENT OF LABOR
BUREAU OF LABOR STATISTICS
SUITE 510, 1371 PEACHTREE STREET, N.E.
ATLANTA, GEORGIA 30309

ANNOUNCING

ATLANTA URBAN EMPLOYMENT SURVEY

USERS' CONFERENCE

sponsored

by

Bureau of Labor Statistics
U.S. Department of Labor

and

Resource Development Center
Southern Regional Council

Time: 1:30 P.M.

Date: Wednesday, December 17, 1969

Place: Clark College
Kresge Hall
240 Chestnut Street, N.W.

The initial findings of a year-long survey of work-related problems of two populations of the City of Atlanta were recently released. Samples of residents of the area designated as the Concentrated Employment Program target area and the rest of the City of Atlanta were interviewed by trained Bureau of the Census interviewers on a broad range of subjects including labor force status, hours of work, occupation, earnings, income, barriers to employment, employment needs, etc. Staff of the Bureau of Labor Statistics will describe the surveys, including future plans and experimental work, and first findings. A panel comprised of representatives of the Southern Regional Council and other community organizations will present their reactions and interpretations of those findings. All persons attending are invited to participate in a free and open discussion of this first report.

- Please return enclosed card -

OPEN DISCUSSION

January 5, 1970

Mr. E. T. Kehrer, Director
Southern Office, Civil Rights Department
AFL-CIO
40 Marietta Street, N. W.
Atlanta, Georgia

Dear Al:

I want to thank you personally and on behalf of BLS and SRC for your participation in our conference on December 17th. We felt that it was important to get a better understanding of the information in the employment survey. You contributed significantly in this effort and in providing a meaningful interpretation as to what the data mean for Atlanta. We are all appreciative of the thought, time and effort which you put into this undertaking. We felt that we had a good representative turnout for such a conference and that this argues well for the data being constructively used.

Again our thanks and I trust we will have further opportunities to work together.

Sincerely,

Emory F. Via, Director
Labor Program

EFV/km

January 8, 1970

Mr. Charles Bulloch
Bureau of Labor Statistics
Department of Labor
Suite 540, 1371 Peachtree Street, N. E.
Atlanta, Georgia

Dear Charles:

All in all, I think the Employment Survey Conference went reasonably well. Certainly the Bureau of Labor Statistics folks, including you, did very well by us, indeed.

At some point an informal post-mortem might be useful, especially if it would assist us in determining how further to make the data relevant to Atlanta's needs.

Personally, and on behalf of SRC, I want to thank you for your cooperation and work and trust that we will have other opportunities to work together.

Give my good regards and appreciation to the other members of the BLS staff.

Sincerely,

Emory F. Via, Director
Labor Program

EFV/km

FOR RELEASE: A.M. Editions, Friday, October 24, 1969, or thereafter

SERIOUS EMPLOYMENT PROBLEMS PLAGUE SOME ATLANTANS

In a period of high economic activity, residents of Atlanta's Concentrated Employment Program (CEP) target area[1/] are experiencing serious employment problems, according to Brunswick A. Bagdon, Southeastern Regional Director of the U.S. Department of Labor's Bureau of Labor Statistics. During the 12 months ending June 1969, unemployment among CEP residents averaged 8.6 percent as compared to an average of 5.2 percent for the City of Atlanta. Moreover, nearly one of every four workers residing in the CEP Area was unemployed at some time during this period, as compared to one in six for the City.

Announcing the initial findings of a 12-month's survey of the City of Atlanta, Mr. Bagdon said that:

-------The median annual income of CEP Area families was $4,900 as compared to $7,600 for all families in the City and $8,600 for the United States.

1/ Concentrated Employment Program Areas refer to target areas in which the U.S. Department of Labor has combined separate manpower programs in order to concentrate the impact of these programs.

-------Median weekly earnings of CEP Area residents working full time were $81.00 as compared to $106.00 for Atlanta.

------In the CEP Area full-time Negro workers had median weekly earnings of $77.00, more than 20 percent below the $98.00 median for white workers.

-------More than one-sixth of the adult men in the CEP Area worked as laborers and more than one-fourth of the women were domestics in private homes.

These are some of the major findings of the Urban Employment Survey in Atlanta--a comprehensive study of residents based on household interviews conducted during the 12-month period ending with June 1969. The primary focus of the survey is the Concentrated Employment Program target area of Atlanta. The CEP Area lies roughly within a 2½-mile arc around downtown Atlanta on the west and south sides. Residents of the CEP Area have more employment problems and lower incomes than residents in the City as a whole. The Urban Employment Survey (UES) is designed to identify and measure these and other social and economic problems of CEP Area residents.

Begun in the summer of 1968, the UES is a continuing survey directed by the Bureau of Labor Statistics with the cooperation and financing of the Manpower Administration. The Bureau of the Census is collecting the information. In addition to Atlanta, similar surveys are underway in the CEP Areas of Chicago, Detroit, Houston, Los Angeles, and New York. Atlanta and Detroit

were selected for parallel surveys of the remainder of the City not included in the CEP Area.

The population of Atlanta's CEP Area is predominantly Negro. Of the approximately 60,000 persons 16 years of age and older living there, 46,300 are Negro and 13,800 are white. This population is, then, about 77 percent Negro as compared to a ratio of 44 percent Negro for the City.

Nearly two-thirds (64 percent) of the surveyed residents in the CEP Area were in the labor force, that is, working or seeking work. Of those not in the labor force, 21,700, more than half were keeping house and nearly one-fifth were unable to work.

Annual money incomes were sharply lower in the CEP Area than in the City as a whole. They were also lower for Negroes than for whites. Nearly one-third of the families of 2 or more members in the CEP Area had annual incomes of less than $3,500 as compared to about one-sixth of the families in Atlanta. More than half (54 percent) of the target area Negro families had incomes of under $5,000. For white families the ratio was 39 percent.

Educational attainment was found to be low in the CEP Area. Median years of school completed by men 25 years of age and over in the target area was 9.4 years; in sharp contrast to the 12.2 years found for the City. The median for the CEP Area women was 10.2 years, two years fewer than the median for women in Atlanta.

This Atlanta release is being issued simultaneously with releases for CEP areas of Chicago, Detroit, Houston, Los Angeles, and New York and a combined report covering all six areas. More

detailed information concerning work experience, reasons for nonparticipation in the labor force, earnings, education and related data will be available in reports now in preparation. Copies of all releases and reports may be secured from the Southeastern Regional Office of the Bureau of Labor Statistics.

TECHNICAL NOTE

The Atlanta Urban Employment Survey is designed to measure social and economic characteristics of residents in the Atlanta Concentrated Employment Program (CEP) Area. The surveyed area, referred to as the CEP Area, consists of the CEP Area 1/ less two Census tracts (F-61 and F-62) in the West End area; and, as such, the UES and CEP Areas do not coincide. The parallel survey for the balance of the City includes all additional areas within the political boundaries of the City of Atlanta.

1/ The Atlanta CEP Area contains 30 census tracts located within about a 2½-mile radius around the center of the City. These tracts cover essentially five Neighborhood Service Center Areas established by Economic Opportunity Atlanta. The centers and census tracts are as follows:

Neighborhood Service Center Area	Census Tracts
Nash-Washington	F-22, -23, -25, -26, -36, -37, -38, -39, -43.
West End	F-41, -42, -59, -60, -61*, -62*.
Pittsburg	F-57, -58, -63, -49**, -50**, -55B, -67.
Summerhill-Mechanicsville	F-44, -45, -46, -47, -48, -55A, -56.

* Excluded from the CEP Area and, thereby, covered in the balance-of-City survey.

** Not served by Service Center.

The Neighborhood Service Center Areas include, in addition to neighborhoods of the titles, the following neighborhoods and communities.

Neighborhood Service Center Area	Neighborhoods Included
Nash-Washington.....	Vine City, Lightning.
West End.....	Oakland City West, Smoky Hollow, Bush Mountain, Oakland City East, Adair Park, Heard's Bottom, Woody Hill, Center Hill.
Price.....	Carver Homes, People Town, Joyland, South Atlanta, Primrose Circle.
Summerhill-Mechanicsville.....	Oakland, Grant Park, Capitol Homes.

Although the CEP Areas covered by the Urban Employment Survey are sometimes described as slum areas, it should be noted that these are diverse neighborhoods which often include a substantial number of persons and families who are not living in slum or poverty conditions and who do not have serious employment problems.

In this report, data for Negroes and other races have been used to represent the situation for Negroes who comprise over 99 percent of the group 16 years of age and over in Atlanta.

The data upon which this report is based were collected by Census Bureau interviewers over a 12-month period (July 1968-June 1969) from a sample of about 3,500 households in the Atlanta CEP Area and a like number in the balance of the City of Atlanta. Since the estimates in this report are derived from a sample, they may differ from measures that would have been obtained had a complete census been taken. Therefore, differences between levels and rates, particularly for small estimates, should be interpreted with caution.

The standard error is a measure of sampling variability, that is, the variations that occur by chance because only a sample of the population is surveyed. The chances are about two out of three that an estimate from the sample would differ from a complete census by less than the standard error. The chances are about 19 out of 20 that the difference would be less than twice the standard error.

Following are statistical tables for Atlanta CEP Area and for the City of Atlanta. Tables A and C show the average standard error of the levels presented in this report while Tables B and D show the standard error of the rates and percentages.

Table A

Standard Errors of Level of the Annual Estimates for Atlanta CEP Area

Size of estimate	Standard Error
5,000	200
15,000	400
20,000	450

Conference on
Atl. Urban
Employment
Survey –

U. S. DEPARTMENT OF LABOR
BUREAU OF LABOR STATISTICS
SUITE 540, 1371 PEACHTREE STREET, N.E.
ATLANTA, GEORGIA 30309

January 26, 1970

Dr. Emory Via
Southern Regional Council
5 - Forsyth Street, N.W.
Atlanta, Georgia 30303

Dear Emory:

Rough draft transcripts of the remarks of the program participants for the Atlanta Urban Employment Survey Users' Conference are enclosed. As we discussed, the transcripts are just as they came from the tape. The speakers have not seen them nor will they unless it is decided to publish a proceedings of the Conference.

We have an additional set of the transcripts which would be available for editing, amending, and extending, etc., should you decide that publishing verbatim proceedings is desirable.

Transcription of the questions and comments following the formal presentation has begun. Should you need this record immediately, we can expedite completion of the tape. Otherwise, I expect it will be finished by the end of the week. Finally, as a precautionary note, should you decide to do any kind of publication, whether complete production or a summary, I would especially want to present Mr. Burdetsky with an opportunity to review his remarks.

If you have any questions or we can otherwise help, please let me know.

Sincerely,

Charles

Charles S. Bullock, Jr.
Deputy Regional Director

Atl UES
Users Conference
12/17/69

December 17, 1969

The first findings of the Atlanta Urban Employment Survey are presented in the brochure you now have. They are principally in the form of numbers. I do not intend to cite all of them to you. I might say that the Survey findings do seem to have something for every one. There are some things in Atlanta which one can point to with pride and others which should be viewed with alarm. Users will find examples of both in the initial report of the Survey.

In this report, data are presented for the CEP Area and for the City (A map is included in the report.). I would caution you explicitly that this is not the Atlanta Standard Metropolitan Statistical Area. In time we expect to release information for that part of Atlanta not in the CEP Area, i.e., the rest of the City.

The Survey deals with the non-institutional population 16 years of age and over. These populations --for the CEP Area and the City--are described in terms of color, sex, and age for a variety of characteristics relating to labor force status, earnings, income, and educational attainment. Later reports will present more detail and will include information concerning modes of transportation, job hunting intentions and methods, barriers to employment as identified by the respondents and findings relating to motivational factors and attitudes towards work.

The plan of this first release was to present data for the CEP Area and for the City. For each of these two geographic areas data are shown for the total population, the Negro population, and the white population. It is now my belief that data for Black and white combined serve no useful purpose and that eliminating them might avoid some misinterpretation. It appears to me now that maximum understanding ~~would~~ will be better assured by restricting the tabulated data to that for Negroes and whites separately.

Another note regarding publication--in the interest of reasonable accuracy, data are not shown if the aggregate is 1,000 or less for the CEP area or 2,000 or less for the City. Unpublished data will be available to serious users with the understanding that they will not be published.

As is immediately evident from Table 1, the CEP Area population is predominantly Negro--close to 3.5 Blacks to 1 white, while the split for the City is 44 Negroes to 56 whites. Interestingly, the recent City election found 40 percent Black registrants and 60 percent white on the basis of 215,000 registrants.

Separate tabulations available for these agers

Another interesting aspect of the population estimates concerns the ratio of men to women. In the CEP Area, the Survey indicates 16,400 Negro men 20 years of age and over and 24,300 Negro women in the same age

group. The number of males exceeds the number of females by 48 percent. For the white CEP population, the ratio is 38 percent. For the City, the differences were 33 percent more Negro women than men and 30 percent more white women. This can be explained and forgotten in terms of the well publicized Census report of the under count. But I wonder if there are other explanations.

I expect some people will be surprised by the labor force participation rates shown by the Survey. This is the proportion of the population that either has a job or is looking for one. In general, Negroes have a higher labor force participation rate than whites in both the CEP Area and the City. The difference in rates is much more pronounced for women that for men. It was interesting to note that the labor force participation rates for Black and white women was higher for the City than for the CEP Area residents.

The situation with respect to unemployment is probably pretty much what was expected. Negroes have higher rates of unemployment than whites. This is especially true of women and teen-agers. Black men have higher rates than white men but not sharply higher; for men 20 years of age and older, 3.0 vs. 2.6 percent in the CEP Area and 1.9 vs. 1.4 percent for the City.

Negro men in the Atlanta CEP Area experienced the lowest unemployment rate of the 6 areas (4.3 - 10.1 Los Angeles. Not precisely comparable).

Negroes also tended to experience more unemployment over-time. About one of every seven Black men was unemployed sometime during the year as compared to a proportion of 1 of every 12 for white men. For women the ratios were 1 in 5 for Black women and about 1 in 8 for white women.

The occupational distribution probably confirms what most people here would expect. The proportion of white adults in white collar jobs--whether male or female--is significantly higher than the proportion of Blacks. A much higher proportion of Negro men is engaged in laborer and service activities. Very small proportions of Negroes--male or females--are engaged in sales occupations or as managers or proprietors--in the range of 1 to 3.5 percent.

In terms of industries in which employed, while most of us are wage and salary workers, a higher percentage of whites are self-employed. More Negroes work in Government than do whites. As the occupation statistics indicate--the service industries, including domestics service in private households, employ the most Negro

women. The manufacturing industries employ the largest proportion of men regardless of color. The trade industries require the next largest proportion.

Income data coming from the Survey suggest strongly that some of Atlanta's residents live in poverty. Negro women of the CEP Area working full-time had median earnings of $61.00--the median for all Negro women with earnings was $52.00. For Black men the medians were $92.00 and $85.00. In sharp contrast, 7 of each 10, white male CEP residents working full-time earned $100.00 per week or more. Median weekly earnings of CEP Area Negro male household heads were $91.00 and for Negro women household heads $52.00. For their white counterparts, the medians were $112.00 and $75.00 respectively.

The annual income data suggest there are also some wealthy people living in Atlanta and perhaps in the CEP Area as well. Median incomes of families of 2 or more persons ranged from $9,000 for whites in the City down to $4,700 for Black families. Those who favor income maintenance plans should find support for their view in the fact that one of each three Black CEP Area families had an annual income of less than $3,500--for whites a little more than 1 in 4 were at this level. Fewer than 1 of every 5 Black families in Atlanta enjoyed

incomes of $10,000 or more in contrast to more than 4 of every 5 white families. The relationship between the two racial groups in the CEP Area was about the same--9.2 percent for Black families and 20.4 percent for whites. Almost half the unrelated individuals living in the CEP Area has annual incomes of less than $2,000.

CEP Area residents, regardless of color, have completed fewer years of schooling than their counterparts in the City. This says nothing for the quality of the schooling. Only 1 in 4 CEP Area Negro males 25 years or older has completed high school--37.5 percent have completed fewer than 8 years of formal schooling. For females, the proportion is 1 in 3. For one of the more striking comparisons--consider that 66 percent of the white men in the City and 72 percent of the white women have completed high school or better. Given the larger proportion of women in the adult population, one can better understand the often cited need for a higher share of vocational training programs for adult women.

These are a few of the findings of the Atlanta Urban Employment Survey. After you have read the initial report, I hope you will give us some indication of the kind of additional information you would find helpful.

We expect a considerable flow of additional information in the next several months. We would be happy to include you in planning its use.

Thank you.

Mr. Charles Pierce Speech Before the UES Users Conference

Most of what I have to say maybe should be saved for next year around this time. Based on what Dr. Henderson said, it seems like we could possibly have the same problem next year. Emory will be calling asking me to justify what is happening in ACEP during the year. I'm here primarily, I was sitting here thinking, to gather suggestions as to how we can use the data. One thing that I'm pleased about, I'm certain that all of us at EOA are pleased about, is that over the past few years, it looks like every month a usrvey is being conducted and if you cooperate well with the persons conducting the survey, you sort of impose on staff, the counselors, and what have you in the program to participate. But, all of a sudden, once the survey is done, you never see it again. I believe the fact of the matter is that this doesn't help over the years. What we ended up doing is not having the data that was collected based on those surveys. You had to pick up a piece of data here, a piece of data there and build as we have done on developing proposals. The sad part about it is that we have to admit the proposals developed are probably the best we could do with the information that we had. But the question is that to serve the people in the community - there are pros and cons about that - and inasmuch as we are going to get additional information, it certainly would help the CEP staff, EAO as well as others. Because there is another point I would like to make here, that there are a number of agencies involved in Manpower programs throughout Atlanta, specifically the CEP area, and I think it is high time we stopped operating, and we are guilty of some of this - it is high time we stopped operating in our own little hives and developing projects and get the other

guys to try to see what they are doing, too see if we can't concentrate on the residents of a community and not on how well we are going to be evaluated at the end of the year. Because usually what happens is that based on the evaluation, we all come out looking bad anyway. It is high time that we get together, and my hope is that with the additional data that will be distributed that we will not take it and read it in our own little biased ways and adapt it to the needs of ourselves just as individuals. So often you can get into that kind of hangup, If Ican use that expression, in taking such such a document and others. The first question a lot of people ask is how will it benefit me? We are not the persons who would really benefit from what is selected, but the persons in the community. The other point I would like to make is the information collected and distributed in Atlanta, Houston, Los Angeles, and other cities to me is of no value if only the persons on the local level are subject to the needs of the poor people, black people, white. It if of no value because there is another element that we all know about once we develop a proposal and some other points and send a check and if these persons are not sensitive to what is projected in figures like this, that is if they are not going to fund the program based on actual needs for their community, I see very little hope for it. So I gues I am quite obviously talking to Congressmen. Unfortunately we don't have any here with us but if you have any good friends you might want to pass that on to them. Very seriously, though, we here in the field can take the document, review it, put heads together by agencies and try to come up with the best proposal that we can based on actual needs in a community. But low and behold the next week you submit it and when it comes

back it has been narrowed down to some activity that really does not serve the purpose. So anumber of people have to be sensitive, and trusted to being sensitive that we all start living up to the fact that the community hasn't failed but the system has failed the community. There are a number of people in this town right now, as certainly the gentlemen preparing this information are aware of, who frown on what is collected. But that is not the thing to do - sit up frowning and say that I'm not to blame. The point is that there is a problem, how are we going about correcting it. As Dr. Henderson said, not only correcting it but preventing it in the future. So I will stop as I don't want to preach and I will listen to you.

Mr. E. T. Kehrer Speech Before the UES Users Conference

Thank you Emory, Vivian Henderson, Bradley Currey, Charles Pierce and other speakers and participants in the Conference. My response to Vivian was that we accept the challenge of Atlanta's business community and Clark College and the Atlanta University system for a solution to the labor problems. They raised the conditions to the point that when unions are no longer necessary, we will be glad to fade out of existence. In our lifetime, however, I guess that won't happen. I want to talk just a moment or two about my reaction to the figures and the study because I found it very exciting, very useful. I fould it so useful in going past the kind of simple thing that Brad Curry talked about. We are accustomed to Atlanta as the cite of one of the lowest unemployment rates in these United States. As a matter of fact, just by coincidence the Goergia Labor Department's latest figures came out and got to my desk the same day as this study did. And low and behold, to find that Atlanta unemployment is listed for the month of October as 2.3 percent. Our business and governmental leaders have, I'm afraid, been going around the country selling Atlanta on this basis. It is totally without foundation and doens't begin to realistically examine the true picture we find in our community. One of the things that I think this study does, and I'm hopeful that the additional statistics will give us, is the capacity to zero in part this 2.3 percent figure which we have been handing out for years. I hope that this is what you gentlemen do, in the Labor Department, in the Bureau of Labor Statistics, is take a copy over to Sam Caldwell and suggest that he read it. It is kind of required reading for he and his staff at this time, because they are going around selling

us on this basis. As long as we do that, that doesn't get after problems which are facing our communities. I find further that the survey is very helpful to us in doing some serious thinking about what is our local and state and Federal economic and social policy to be in the years ahead. I was aware of the figures generally on unemployment among teenagers in Atlanta. We found this out when we were out trying to put an end to Dixie Hills back in 1967. When we began to count heads and found that one of the elements in Dixie Hills rioting, if you want to call it that, was the enormously large group of teenagers who were unemployed and walking the streets. But I think that anyone serious about this should spend a great deal of time going over the figures of this study particularly for that group of 16 to 19 year old citizens. And what is said for us in terms of what we are doing and what we are not doing. Now if Mr. Agnew will permit me to say it, my view is that thepresent course of the Nixon administration and his economic policy will absolutely require a higher level of unemployment. The question then comes as to which and on whom this unemployment falls. And if we are saying that in the central part of Atlanta we have 16 to 19 year olds already induring some 30 percent unemployment and we have an economic policy which is going to escalate unemployment, clearly what does that figure turn out to be and what have we done for our city? If the administration's economic policy is to shut down job corp, main neighborhood type youth corp, to stimulate such interest that at the very time we are trying to provide greater job opportunities and training in the whole construction contract field, we are in fact putting the lead on housing and building.

If the administration policy si to cut title one money and then permit the states to abuse and misuse money, where they do have it and where we find the call for education absolutely requires once and for all the abolition of the bill school system in our city. And find the administration in fact taking the opposite course than this study for me indicates that we face in this town, in this state, in this country, a disaster of major proportions. Because I don't know whether that document shows a relationship between Atlanta and Houston, Chicagl, Los Angeles, and New york. One of the documents I received has and it absolutely impreative that we study the relationship between figures for each of these communities. The story is not meat to Atlanta. It is true throughout the entire nation. So I applaud the issue of this document and look forward earerly to the additions to it. Because I think what we have here is an opportunity in terms of the hard cold facts to be able to think more clearly and plan programs to meet the extremely urgent and serious problems for our nation.

Thank you.

Mr. Bradley Currey Speech Before the UES Users Conference

Dr. Henderson made one reference to the good old days, the fact that "don't go North, things aren't what they used to be". We found out and Don Garner and a bunch of other folks who were working in the earlier NAB effort, one thing about the good old days I would like to pass along to you. Things weren't ever what they used to be. We found out that they weren't that good back in the good old days and what we had to do was to create some new days that were a little better. Let me start off by making a couple of economic comments because that is where Dr. Henderson started. Productivity - we must be living in a tremendously productive economy or else you and I wouldn't be able to be here. We would be out marginally ekeing out a living, scratching out dirt or harvesting. We do live in a tremendously productive economy. Now the answer, the only answer, to the solution of the employment problems has got to be this question of productivity. The historical method that business is using to increase productivity is to invest in fixed assets, invest in equipment and machinery, so as to multiply the productivity. One thing that has been suggested here this afternoon that I would like to hone in on a little more precicely is that also tied and just as essential to productivity, is the element of training. Somehow or another that has gone without saying in the businesses - investment in machines because it has to have trained people to use these machines. But, please understand that the decision to train people was not a decision to train people to enable those people to be more productive. Rather, to enable them to use the capital good. Thereby increasing productivity. I think there is a fair distinction here and nothing immoral about it. I'm not accusing anybody of

doing anything wrong. I'm simply saying that the productivity of labor thus far has been a function of capital investment in large measure and to a degree of training teken place somewhat as a matter of necessity in terms of using the equipment, Now we are in a situation where the productivity of labor, the productivity of people relating to the ability to support themselves is going to require some investment in order for those people to become sufficiently productive, to be able to use all the equipment, machinery and technology, and ability that they themselves have at their command. Now there are some apptitudenal questions that we found in the earlier NAB efforts and I'm confident that they are still around. Now we have apptitudenal questions as far as the general public is concerned. Don Garner and some of the others of you may remember, the speeches we had to make on the various ways that people are paid not to work. There is a big, big misconception here that there is a foundation somewhere in this country where people go who don't want to work and they pay them. We found that there wasn't any such thing. That there was unemployment compensation. That beyond unemployment compensation which ran for a fixed period of time and some right strict rules which apply to it, there were only those elements that you all know about, old age assistance, disability, and aid to disadvantaged children and aid to the blind. These were four that were clear and distinct and distinguishable and did not apply to the able bodied person who had a job offered to him. Now that was a simple misapprehension to have to be corrected in the effort to try to get business men to make commitments for the hard core unemployed. But, it happened to be just one misaprehension I'm sure confused many people. The general public is no different from a lot

of business people. I venture to say that there are similar, although I don't know directly because I don't know enough about it, misapprehensions and incorrect use just as common in the labor movement as there are in the business sector. There is though no doubt and misapprehension now relevant to the people in the CEP area. In order to do anything about these things we have got to define what those are and then we have got to get enough facts to deal with them. Now that leads us to the subject of these data, these statistics. There have been very imprecise definitions of our problems. There have been these impresice definitions not because anybody wanted to be imprecise, but because all we had were approximate raw data. We talk about the unemployment rate and the national economy and it turns out to be different than in Atlanta, and it turns out to be different in such and such a Census tract and even more different in such and such a block within the Census tract. So, in order to get agreement on the facts, we have got to have precise data. We have got to overcome these simplistic views of complex situations by breaking down the problems in their component parts and defining them very precisely and highlighting them outside the pages of statistics which so few people understand, so that people that don't deal with statistics can understand them and plan to carry out and chanhe some of the situations. Now we found in the NAB effort that there is a tremendous shortage of skills. There are a lot of jobs around and many of them are good jobs, but there is an inadequate number of people sufficiently skilled to fill those jobs. We found that there were a lot of people around who wanted work, wanted meaningful work, wanted work that was on a job ladder and that sort of thing, but didn't have the entry level skills. We then

set about trying to figure out occupational training and that sort of thing, how to go about this problem. We found that in order to find a solution to, and let's just take this simple training problem, that we had to understand that the solution to a problem was practically possible. That is, that we were not dealing with something that is totally out of the question. For example, making a Ph.D. out of me Dr. Henderson - now practically out of the question and no use trying. If there is no way to do so, there is no point in devising the program on how to make a Ph.d out of B. Curry. It won't work. On the other hand, if the job is to teach me one more level of an economics base, one that I already know a little something about, it might be possible to do that given the proper inclination. Now we have got to understand that there is a practical solution to the problem, it can be done. It's not impossible. In order to do this, you have got to break down the problem into its component parts. Secondly you have to understand that it is economically feasible. This it is profitable to the economy, and productivity to solve this problem. The problem for example of mothers. It is not economically feasible and practical to train for employment a 25 year old mother with three children when you know darn well it is going to cost more to keep her children in day care than she could possible earn? I think it is not economical at that point. I think you should work on somebody else to provide her with adequate living so she can support her children, so that they won't go into that next stage. So it has to be practically possible and economically feasible. And thirdly, it has to be the solution or there has to be this thing, this solution within context of an agreed upon problem. If you can't get the City Government,

State government, and Federal government and business sector and community leaders in the CEP area all to agree that this is the problem and that this is the solution to it, then it doesn't make any difference who it is even if it is practically possible and economically feasible, it won't be done. Now here is something the Archbishop would understand. I recall from early theology that you have to save the world one man at a time. Don't you Archbishop? You can't save it all at once and everybody at one time. You have to go one man at a time and chew up an elephant in little bites. You have to solve this problem a little bit at a time and man or a human being at a time, and that leads me if I may to my last point - the problem of recruiting, training and following up on people in order to make them more productive in the economy is one in which we have to have a much more precise definition of responsibility. This business of having serious overlapping of employment training and serious overlapping of vocational training with nobody knowing who is responsible. In fact, nobody being responsible because everybody is responsible simply won't work. In the long run the field of vocational education is going to be one that has to be concentrated in the schools. It's got to be concentrated into the situation where an individual gets the training that will qualify him to get up the job ladder. That is part of business responsibility and I'm here in part because I'm trying to work within the context of business organizations, chambers of commerce, NAB, and these other sorts of things to get the business organizations to deal with these responsibilities effectively. I know the rest of these people are in the same position so far as their own organizations are concerned and I respect them for it. Back to my original point. Productivity is the answer.

Productivity in individuals, in you and me, and the others just like us. Productivity is a function, a part of the investment in equipment and fixed assets. But, it is also a function of training people. And I think that if these figures can be brought to bear with a very bright light, with a very intense light on some of these very fine, narrow areas, we may be able to get some place. And, for that purpose, for that very simple, elementary purpose, these figures will be more precisely defined and more clearly stated so far as the conclusions are concerned.

Thank you.

Dr. Vivian Henderson Speech before the UES User's Conference

Thank you very much Emory. Let me say first of all that we are pleased that you are here at Clark College and the University Center and let me add my word of welcome to you. We have a great interest in social problems and a new operation called Southern Center for Studies and Public Schools which has a great deal of interest in the problems we have discussed. So you came to our campus and we are pleased that you are here.

First of all, I will say very quickly, nothing in the survey, of course, as done and the materials presented surprised me. A few years of looking at the problems of employment, unemployment, labor force participation, etc. have lead me continaully to the conclusion that in the Concentrated Employment Areas, now called the various poverty pockets of our society, and in cities like Atlanta, these findings simply substantiate what we have known for some time. I think in many ways they sharpen our focus on one or two points. They certainly sharpen focus on where we have to put a greater part of our efforts if we are going to solve problems and bring some of these people in these neighborhoods into the mainstream of our society. I noted in the New York Times yesterday, I have not checked in terms with any official publication, that we are in the fourth month of our economic recession. It said that we are actually now in the fourth month of recession. I'm not too sure that this is factual in the sense of a recession or that rather we are going downhill. But I think this was reported yesterday if anybody saw it. Now I mention this only because of the findings here, in this paper, which suggests to me the problem will get worse before it will get better; Not only because of the fourth month of the recession and the possibility that this will continue or will become wores and I hope it will not. Hope is

simply, what do you call it, a sort of stopping action for the moment, hoping we can recover and move forward again. But also, because every time we have a depression, and this depression comes about 95 months after our last serious depression, it becomes more difficult for people who are trapped in poverty circles, trapped in unemployment situations, trapped outside the labor force, to get back into the labor force. It is more difficult for them to move from the point where they are, in terms of low occupational totem pole, etc. Well I think this is timely, and the users of this knod of information not only have to think in terms of a corrective measure at this particular point in time, but have to correct what is there. I think there is a preventative concept which is extraordinarily important particularly as it relates to the marginal worker. What this study says to me is not really my concern, but it does suggest to me real concern about those who are in captive unemployment. That concern, of course, I have always had. But what really concerns me about this study is what it shows, what shock is brought out in the data. The marginal employers and employees, those who can go one way or the other, and this is where the large number of people are today - to me this is what Atlanta's problem is - the marginal worker. This is reflected not only interms of income but it also reflects occuaptional statement. Secondly, I will argue that this study has shocked my views about the whole occupational structure of the Atlanta labor force, black and white, concentrated employment and otherwise. We have obviously a fairly good occupational structure in Atlanta. We have heavy industry; we have government, we have the services industries, we have a lot of education, etc., etc.

But the study somehow or another, as I read the material and looked up the data, made me reflect again on whether Atlanta can continue to boom with the kind of occupational structure it has, which has really grown out of a service type of industry and tremendous service base industries. I say that when I'm talking about service producing and service base because I am including here things like government. I am thinking here not just of household services, but of professional services, police and so forth. I suppose, in other words, that I'm trying to say here that these things suggest to me something about the City of Atlanta that I can't quite put my hands on. It disturbs me because I'm sure there are people who are trapped in in these various positions of sub-employment, unemployment, marginal status, and I wonder whether there is enough of a grip in the economy, enough of the thrust in the economy that they can be absorbed. With a recession, or a concept of a recession I read about the other day, it disturbs me even more.

Now the second part of this is, that it also reflects what has been traditional about Southern economics and Southern regions or Southern cities and communities. It reflects very clearly that the South has traditionally benefited in the national image and the national eye from misleading data regarding occupations, industries, etc. In this sense, and that is the traditional reports on employment and unemployment dealing with two and three percent unemployment, for example, that simply misleads us and doesn't tell us the real truth about how the problems of unemployment and employment have different impacts on different groups.

Now that I have made the two points, the South has also been in the economy which traditionally has, using the words again, "high levels of underemployment". People have been able to get a job, but the fact of the matter is that they don't get a job worth a damn. They can be employed, but, if you take these occupational data here and look at them, you will find that a tremendous part of the problem is that they can get a job, be employed, but they don't go anywhere and they don't make any money. Consequently, you end up with a lot of people, no, you end up with a city really, that reflects an extraordinarily good image in terms of its employment status and underemployment status. But the fact of the matter is that beneath the data, you will find that there are problems involving the quality of employment people have. Now I don't know what is going to happen in the future in terms of the occupations and labor turnover trends. But certainly one of the real problems we have about a city like Atlanta, and I was pleased that Mr. Bullock pointed out that we would be getting this kind of data, is the whole question of those who are not counted, those outside the labor force. The whole question of the rise in the costs of services, employment, the rise in wages, which I hope will continue, is what this does to many people. The younger people as well as the middle-aged people, simply do not have the level of productivity. In the words of the economists they don't think they ahve it and people aren't prepared to pay for it if they don't. This seems to be a growing group in terms of those who will not be counted in the traditional labor force participation and labor force statistics. For those not counted and those outside the labor force have become extraordinarily important. Now we are reminded here of the study that was done, I believe, by The Georgia

Department of Labor for Mr. _____, the man previously before Mr. Caldwell. I don't know how many people saw this study, but I'm sure the people in the Labor Department did. It was kept rather secret for a long time. This was a very interesting peice of work. It dealt with several poverty areas and with the question of those outside the labor force if I recall correctly. It involved some 44 thousand or 45 thousand people. Now it seems to me insofar as the implications of this survey are concerned with the City of Atlanta, that one thing that it did and the one thing that the Nixon Office ought to do is to bring together what is the status of the people outside the labor force, the status of people who are unemployed, those two groups, particularly the hard core, and let's get some notion as to what kind of training needs these people need themselves and are entitled to. The study that was done by this group for example, on the female side of the question, pointed up the fact that most people are not interested in them. I don't know whether it is 51.1 percent of whether it is 49.9 percent, so I will just say that it is many, many people who are involved here who had worked and were not interested in guaranteed income per say. They wanted occupations that will lead them somewhere, not dead-end jobs. A lot of what we see in these data here are not detailed enough. Based on previous experience, they suggest that people are locked into dead-end jobs and they can't go anywhere in terms of occupationas and in terms of money. I will argue in other words that the implication here combined with other pieces of research which have already been done, would suggest that we really don't need a whole lot more inquiry to establish the fact that we have got to have a revolution in our thinking about occupational training and in the preparation of people

for mobility in the labor market. I will argue that one of the implications here for the City of Atlanta is what would the private sector do in terms of occupational training in terms of those on the job. Those who are at the marginal level of employment, where can they go in the present employment situation to move them further up the ladder and recude their vulnerability to the recession that I described or to reduce their vulnerability as to marginal employment. I'm convinced that we have not done enough of this in the City of Atlanta. I had the good fortune, or misfortune, to chair the President's Task Force on Occupational Training in Private Industry. I'm always afraid to go back and read it because I think we made so many boo-boo's in it. But there was one that we did not make and that is that the private sector has a tremendous challange before it to train people who are already employed and are in marginal positions and locked into marginal positions but have the potential of moving up the ladder and reducing their vulnerability to certain aspects of our society and economy. I think this is one of the major implications I find in this data. Now if you take that implication, in places like banks, insurance companies, Clark College and places like the Atlanta University Center, where we employ a lot of marginal people, what is it that we do with people in this category in certain types of industries to move them up the ladder?

Moving on very quickly, it means also that implications with regard to the whole credentials game, and we have heard this story before. I am concerned here that as we talk about the whole question of employment, unemployment and the marginal worker, I continue to emphasize this marginal worker - the guy

who is in and out of the labor force, the guy who is on the job every day and can't go anywhere. The question that really comes to my mind now is what are we really doing about the question of credentials and licensing? In the health professions, for example, we look at these service occupations here, we look at the funds being channeled to them in terms of wages, we look at the patterns in terms of distribution of these services. A lot of these people in the health occupations, for example, are employed for sure, but because of the credentials game, because of the licensing procedures, many of these people simply can't go anywhere. I don't find enough concern on the part of labor economists, people in the CEP programs, people who would be using this data of trying to structure ways and means whereby we can get around the licensing game, if we can't alter it. For example, here at Clark College, we are always looking for Ph.D's, the credentials game. I am citing this as an example of the credentials game and what it can do to you. We know that we have a lot of good people who do not have a license, or a union card, as we call it. My point though is that this whole question of high school certification - I think there are implications here for the vocational education program. I am convinced that there is still too great a distance between the realities of the employment world and what is going on in our vocational and technical development program.

Moving on very quickly, then, I think the whole question of Job training is still one before us. I don't think we have done enough here really to alter some of these specifications we impose in regard to jobs and people holding jobs. Cities like Atlanta, which again in spite of Al Kehrer, are not unionized to the extent that you want it unionized, have a change

to beat the game before it becomes unionized. All I'm saying here is that we really do have something here about altering job arrangements so that we can make more opportunities for people. I did have a note here about the National Alliance of Businessmen, but I won't say anything about that but just that I do believe that the next stage of that program development has to be the problem of marginal workers. And I'm sure that more is going on than what I'm familiar with here, but I do think that conservative programs to get people moving up the ladder, not just to get the hard core which is unemployed which I think is a minor part of the problem, still is not as great as some of the problems we have with mobility.

Now finally, when it comes to the research questions, we cannot avoid the fact that leads off here in terms of the concentrated employment. Read in terms of the virtue of the number of data there is obviously the question of racial discrimination in employment. A lot of people will argue that we don't have racial discrimination in employment. Well, this is, of course, not true. Jim _____ has been doing some researching and will maybe comment on it later on. But there is certainly the whole question of opening up jobs in top management, second addition arms, third addition, and fourth and fifth addition arms of management, the professional, white-collar jobs so that we can push people further up the ladder who are down at the bottom. All of these are very serious questions and at least I find these implications from the data that is here.

You have already talked about the underemployment problems which I hope we will further refine on the basis of research for a City like Atlanta.

Now the question of subemployment. You know we have three categories here - subemployment, the unemployed, those outside the labor force, and those so-called underemployed. I think a city like Atlanta can be a laboratory for the researchers. To come up with a definition that we are probing for is so hard.

Finally, we come to the question of immigration. I think that we know today that there is a kind of reverse trend in immigration patterns. It is not a question anymore of the brother leaving the lower South and moving North. We find now that the message up North to the brothers down South is to stay home, don't come up here, things ain't what they used to be. The point to be made is that a City like Atlanta is a very attractive place for the rural migrant, the immigrant from the smaller cities and the smaller towns. We don't know enough about them. We don't know enough about their adjustment tothe labor market. We could talk about the Concentrated Employment Areas to be sure but I'm not too sure of how many immigrants are inducted in these kinds of areas. But the fact is that there is training in terms of labor market policies, in terms of private policies, in terms of action, in terms of the whole host of questions. The City of Atlanta will become more and more attractive to the rural non-metropolitan migrants to come into the City looking for employment opportunities. We need to really think seriously about how this City will adjust to this. This will require the thinking of a team of Commerce people, the public and the private sectors, if we are going to do anything about it. We have a little something going here at Clark College tonight, a migration study that is generally

what this is leading up to. We got a $50,000 grant from the Manpower people and the State Department of Labor to do some work on the whole question of, what do you call it, the work adjustments or something to that effect, of the migrants into the City of Atlanta. What I'm really getting her is that we are talking about research. I don't know how much it involved the migrants. I was pleased to get those cards. We are going to invest in the UES cards. I hope we will anyway. We would like to get all of them that we can afford. We buy and use your government money and give it back to you. Well you know, that is the way it goes. So that I do think we have a lot to do here. The other part about this is the migration, not of the rural guy, but his employment. But I'm really interested and concerned about this data and what it means in terms of the migrants into the City of the marginal worker again. The guy who has just enough to get into the City and live for a while. The multiplier of all this is and finally is a whole lot of policy questions that go beyond the question of employment when it comes to labor market adjustments of migrants and other kinds of workers.

You also have housing policies. The City of Atlanta has for a long time had some kind of a legal shenanigan that they did but I understand there is nothing to it. A person now does not have to be a resident for a whole year before he can qualify for public housing. I don't know if it is true or not, but for a long time you had to be a resident of Atlanta for X number of months or a year or two years before you could qualify for public housing. Well, look at the relationship here, the housing policy and employment policy, a very definite relationship between the relationship of the workers to a local job market and this whole question of adjustment in terms of

housing. The relationships to help and help services. I would hope the CEP people and the users of the data will get their heads out of the sand and just the whole question of job marketing analysis. That they would bring into greater relationship these things I tried to mention - about how the housing, health, etc. But we always bring in education. We never have any problems here. I'm going to prove that everybody is not qualified, particularly blacks. I'm arguing that we need to go beyond that. We need to talk about policies involving housing, health, transportation policies and so forth and so on. And I must say we have done a little bit here. Finally we could do a great job by putting more money in the Atlanta University system to build this kind of research.

Thank you.

Dr. Emory Via SPEECH BEFORE THE UES USERS CONFERENCE

Being the co-sponsors of the program, I would like on behalf of the Southern Regional Council and its Resource Development Center to add my voice of appreciation to the various members of the BLS staff, both nationally and regionally for their contribution to this program.

It is perhaps not completely remiss to remark on the fact that so many distinguished specialists, and let us say bureaucrats, were able to make so many presentations in so short a period of time. Because I have known at least one or two of them alone to go longer than the total took. But, in any case, we appreciate that and those of us on this part of the panel will make the same effort to do likewise, except that we are under the special injunction to get through faster so that those of you in the audience who have had to sit quitely will have a chance to comment on any aspect of the afternoon's program. I do think that the surveys that have been done in the six cities, especially the one in Atlanta, provide us with a really new opportunity to focus on the kinds of problems we still need to work on. I trust that the panel this afternoon and others of you will pick up on some of the remarks that the BLS staff people made in terms of both what is indicated for further research interests and how to tie down some of the tough problems of either conceptualization or interpretation. Also, what are some of the kinds of action different groups, business groups, governmental agencies can and should be taking in order to meet the kinds of problems revealed. To start us off on the panel this afternoon we have asked Dr. Vivian Henderson, who is president of Clark College, host university this afternoon, and who is in his

own right a labor or manpower economist and has given distinguished service on a number of national and regional panels dealing with the problems of manpower, welfare, and economic development, to lead off this afternoon's panel presentation. He will give us a rather quick overview, I think, pointing up some of the problems as he sees them and then we are asking other members of the panel to respond either to his comments, to what has already been said by the BLS staff people, from their own reading of the data or to talk about what it means for Atlanta, what it means for the particular programs they are interested in. Let me, having said this about Dr. Henderson, quickly introduce the other members of the panel, Mr. Bradley N. Curry, Jr., is the senior vice-president in charge of the marketing offices of the Trust Company of Georgia. One reason that he is on the panel is that up until the new regime in the group called the National Alliance of Businessmen, he was quite active with that program and has had a very serious interest in problems of employment, hard-core employment and what this means to the Atlanta community as well as to the larger communities. E. T. (Al) Kehrer, to my left here, heads the Southern Regional Office of the Civil Rights Department of the AFL-CIO. As such, and because of his own interest as a citizen, he has had a good bit of experience in problems on employment and discrimination, the problems of unemployment and also the kinds of programs that might be utilized to remedy some of the difficulties that we still have in our society related to manpower.. and to my far left, Mr. Charles Pierce, who has been with the Economic Opportunity Atlanta Program for several years now and more recently has become the director of the Atlanta Concentrated Employment Program and those of you who are still finding your way in some of these things will note that this is a major manpower effort operating largely in the area where the most intensive

part of the survey was conducted. I'm very pleased that these gentlemen have consented to be here and take part in the panel. I think it gives one of real quality. And now having gone through this lengthy introduction, Vivian Henderson if you will, tell us what is on your mind.

In talking about these problems, reservations, etc, about the data, I just want to make it clear that we are not downgrading the survey, or the results, or the methods or anything else. What we are simply trying to do is put the results of the survey, that Mr. Bullock will be talking about, in perspective, so that the results can be used properly, they can be understood properly and so there can be no, what amounts to, massive misunderstanding of the data. Because this, like any new survey, does have its essential problems. It has problems which like anything else which is fairly new, or begun in recent times which has been evaluated to the extent as many of our other surveys which have been conducted for quite a few years. Now, as I say, all new surveys have some problems of this kind, but in this particular survey, we have this type of problem plus some others. I would like just to mention fairly briefly some of these problems to give you an idea of what to keep in mind when you look at the data itself and what to keep in mond when you try to understand what it is that these figures show and perhaps how to attack some of the problems that we are all concerned with. Now first, of course, I think we might want to step back very quickly and describe the fact that this is a survey conducted in households as Mr. Milligan said, bs being conducted by the Census Bureau, who is probably, in my opinion, the finest organization of its kind in the world and conducted with trained, full-time interviewers. These are people who have been through the mill, have been in situations that they have been trained for and they have a program of reinterview of the people who respons. They have a program of editing the responses, an allocation program which in a sense covers those people who don't respond to particular questions.

So, the survey itself is built on a tremendously long history of accurate and reliable collection of data. But we really have to go beyond that to look at this particular vehicle because the vehicle that is being used, which we call the Urban Employment Survey, is a new schedule, it is a very long schedule, it asks questions, many of which are fairly new, although the basic part of the schedule is the same as we use every month in collecting the information that we read in papers on employment and unemployment in the nation. We have used essentially the same schedule. But, we have gone beyond that in asking questions, as you will se in the report itself, on many delicate, sensitive items. on many items that it is difficult to respond to. These questions are indepth kind of questions and when you have new questions like these which ask for, not only things like getting to work and the cost of it, and how much do you walk to work, what method did you use to find a job, and things like income and work experience that goes back a year in time, you are going to get responses which are often not exactly precise. But, nevertheless, they are the kind of responses that can give you a very good, a very strong view of what the real situation is.

There are a couple of other things I would like to mention very quickly. As Mr. Milligan pointed out, there is this whole question of the undercount. That is, the sample is drawn and we use the normal methods of collecting the data. But, as we know, for the Negro population and for the white population, there is a certain part of the population that is missed. This is something that again has to be kept in mind in evaluating the data and understanding it, because we don't know to what extent we have missed certain parts of the

population. We know nationally about the proportions of men and women which would show up as Negro, white, etc. We don't know anything about what takes place though in a particular area. There are many considerations such as the military service, which takes men out of a particular area, more in some areas than in others. There is the problem of aged people, wodowed women, which would obviously give you a larger number of women than men. Things such as people not wanting to be counted for one reason or another. So that these are some of the things to be kept in mind.

The non-response for this particular survey, that is people who don't respons to the questions or households of people who can't be found is fairly small. So that unlike many other surveys, I think this is not a major consideration here. It is a fairly small amount of non-response, about equivalent to what we are getting, and again in our national survey, which covers completely different population, largely white middle class farm or urban or combinations. This does not seem to be a problem although it is still something to be aware of.

But, there is one thing and I think we should keep it in mind, that is that this is an area survey. It is not a survey of poor people or a survey of Negroes persay, or even a survey of any particular kind of group. It is a survey which is measuring the conditions, the employment proglems, the employment situation in a particular geographic area. This is something that again does have to be kept in mond because this relates to all the comparisons that can be made to other data, comparisons that can be made to data which is applicable to Atlanta and to many other areas.

So that in many respects what we have to think about is the question of looking at the results sometimes at three different levels. That is, we look at the area and see what this particular Concentrated Employment Program area shows. We look at a second level at what the area shows in terms of the differences between poor people with low incomes, low education and others with higher education, higher incomes. That is, a comparison essentially of the poor and the nonpoor. Then at a third level, in many ways we have to look strictly at the poor. What are the problems, not of the area, not of the difference between poor and nonpoor but specifically of those people who have employment problems, who have large families and low income, who have poor work experience and high unemployment. So these again are very important in understanding what it is we are dealing with.

In this whole area context we have something which is a problem at one time, yet, it is a fantastically useful possibility and useful tool in another way. That is that Atlanta, unlike four of the other six cities is being surveyed in the rest of the city outside the slum or CEP area. So that the data, as you will notice in the volume, covers not only the City of Atlanta as a whole, but also the CEP area. So comparisons can be made between the two. The problem is that the rest of the city is not made up entirely of completely 100 percent different kinds of people as the CEP area, a particular small area of what we like to think of as poor. But there are many poor outside these areas. As we have seen from the results, there are some people who are not necessarily very poor or not necessarily bad off living inside the CEP area. So this calls for a little bit of

of caution in making comparisons between the City as a whole and the CEP area. Again, this provides additional insight. If you look at the tables, you can see for example that the unemployment rate, as one measure, is something like 8.6 percent in the CEP area. You take out this particular CEP area from the City itself, and the remainder for which we will have unemployment tabulations in the future shows an unemployment rate of less than half of that. So that you always have to keep in mind that the City itself includes the particular target area, the CEP area that we are very much concerned with.

There are a few other things that we have to be aware of, and that is essentially the comparisons that are going to be made by us in Washington and Atlanta and by you people who are using the data; the comparisons that we want to make once we get the data and try to understand what it means; the fact that these comparisons can be made with a wide variety of things and they can be made with U.S. figures which have a certain meaning. A much more important use is comparisons with the rest of the UES for the whole city. There are comparisons that will undoubtedly be made to national figures and many other things. There will be other figures brought in, such as health records, to try to understand the health problems in the area. But all of these have to be viewed with a great deal of caution simply because the survey vehicle here obviously differs.

We have a time period here which is somewnat different. This is the data in the UES for the particular set of results covers the July 1968-June 1969 period which, of course, you will find very, very little other data available for that same period. Incidentially, we will be shifting

to a calendar year for our next set of results probably in February or March of this year. But, in making this kind of comparison we also have to keep in mind that the sample on which the survey is based differs substantially between the city and the CEP area. Although the size of the sample is the same, 3,500 households, in each of these two areas because the universe from which samples are drawn are considerably different, this means that a particular finding for the CEP area or a small group of people may be particularly meaningful. We move to the City itself as a whole and that same finding may be washed out in the sampling error and sampling reliability. So this is a means of trying to alert you to the fact that sampling error is one consideration,difference in time between this particular survey and other surveys is a consideration and there are quite a few others.

I think one of the major things, of course, and you may be very well aware of this, is that you can't look at the area and talk about the area's problems and say that unemployment is 8.6 percent which is what I just did, of course, and the unemployment rate somewhere else is 4 percent. You have to look far beyond this. The problems are not for everybody; they are for young people, they are for middle aged people, they are for blacks, for whites, they are for household heads and women. So that in order to really understand and to see what is in the figures, we often have to go far, far beyond just a few topside figures. We have to look and see, well, what is the problem? Is it predominantly one for teenagers? Is the problem predominantly one of the young people who should be going to college, who have very high unemployment and won't work steadily. Is the problem one

of the household heads, the women in the area who cannot find the kinds of jobs they need to support the family. So really all I am actually leading to, is that no topside figures should be used to determine or to try to understand the problems as they exist in these areas or for programs for that matter. It is all a matter of disaggregating and getting down to the particular unit of people, of income or anything else that provides for you the real clue that is needed to an understanding.

Now there are other minor things that have to be kept in mind, I think. There are other comparisons which I am sure everyone will want to make just as soon as you see that, as an example, an income is $3,500 in this area, and the national income is $8,000 for the average family. This automatically starts triggering re-ponses. But of course, this necessarily isn't a good response simply because, the time frame of most of our other data which you are using to compare with are different. Most other figures that you will use to compare it with are on an annual average basis as a whole. In other figures that relate to employment problems, most are on an annual basis. Yet on the other hand the UES figures are on what amounts to a fiscal year basis. Most of the comparisons are slightly different. This doesn't mean that you can't look at Atlanta and say here is a very low income area because not many people are in the high level jobs and there is a tremendously large proportion of household workers. What you have to do is give yourself a little additional leeway in evaluation of the data so that you can understand it properly without drawing very, very fine lines of distinction between things. This is very important not only in this survey, I might add, but

in the work that we are doing in Washington on a national basis and in the other cities as well. It is extremely important to be cautious in using the data but when the results warrant it to feel that you do have something that you can really grab hold of and use.

There are a few other areas again which create a few minor difficulties! The fact that it is a relatively sensitive survey, that it asks sensitive questions and asks questions on income. We know from many years of experience that income questions are touchy, not only for the Negro neighborhoods, not only for the slum areas, but for any particular group. It is a touchy question for everybody. So again, in trying to evaluate what we have, we just have to take it and make sure that what results appear here are warranted by wide differences between groups or among areas, or between the City and the slum area.

The main thing we are trying to get across is that in a new survey of this kind we often take a few years before we understand every little in and out of it. But when we do, we have to recognize that there are problems in the use of it, and these problems do not in any way derrogate the results of it. It just cries out for caution! Simply because we know from the results already that it has provided tremendous insights into the problems that exist in not only the Atlanta area but in other areas as well.

For program purposes and for other purposes, we have seen fairly clearly, I think, the whole array of employment problems, whether it is part-time work, whether it is people not in the labor force, whether it is low earnings

for a particular job, whether it is unemployment, whether it is large families, whether it is a large number of families headed by women. We have seen that these things are problems, We have seen the relative severity of these many things, which Mr. Bullock will be talking about. What is provided again, is a systematic approach to the problem of collecting the data, a good vehicle, that is the survey schedule itself, responses which seem to make quite a bit of sense, results that do give us insights into the employment situation, and then in the upcoming months, expansion of the amount of information available. I don't know if you have seen it, but the report itself is just barely the beginning results. This covers the basic demographic, education, unemployment and employment statistics. We will be getting in the near future the kinds of information that will go far beyond this; not only providing information on what is happening, but in many cases, why. What are the employment problems and what are these problems caused by in many respects.

I will just say again, that I hope I haven't scared you in any way. We are making great use of the data in Washington and in the regional offices. We are making very good use of it and I think we could go ahead with this kind of survey to understand the problems , focus programs better and simply try to get a better hol- of what we all agree is a situation we ought to know more about.

Thank you.

Mr. Milligan

Urban Employment Survey Users Conference

Experimental Surveys

It has been often remarked that "the more things change the more they are the same." Over thirty years ago, the Federal Government launched a household data collection system chiefly in the interest of deriving more objective measurements of unemployment and employment than were previously available.

The new, and in many ways unique, Urban Employment Survey Program was also launched to meet the need for accurate, current data covering the urban slum areas to aid in program planning and evaluation. The order of events cataloging the birth of the UES would go something like this: The UES Research Program was developed as an adjunct to the current ongoing Urban Employment Survey which resulted from the 1967 UES Experimental Program, which was launched from the results of the November 1966 Slum Surveys of "Subemployment Fame" which had its roots in the 4 year research effort of the Monthly Labor Survey. The MLS was an outgrowth of the recommendations of a Presidential commission which was formed as a result of a national publication's criticism of the Current Population Survey. I won't attempt to trace back the CPS's origin to the Work Progress Administration days as time will not permit. However, in the CPS which is the monthly household survey producing the monthly employment and unemployment estimates we have had the vehicle for many research efforts which have become part of the yearly picture of the American labor force. Such studies as dual or multiple

job holders, detailed investigations of the characteristic of the unemployed, and the impact of overtime hours and premium pay have been developed as supplements to the ongoing household survey. They have produced new data which have been very useful in better understanding the changing economic picture.

However, the standard methods of collecting data, characterized by the household interview conducted by a typical white middle class female were not appropriate for the information needs of the administrators of the new manpower programs which were being designed to aleviate the economic problems of the poor residents of the large cities. The results of the 1966 special surveys while showing higher unemployment rates for ghetto residents as compared to the national data, suffered from the lack of special information for this part of the population; for example, it reflected the problem of the undercount, i.e., the black male was not properly represented in these surveys and the number of women as household heads was out of proportion when compared to national data or even comparable data for white neighborhoods.

With these facts in mind an experimental program was undertaken in the Bureau of Labor Statistics, funded by the Manpower Administration and with the cooperation of the Census Bureau. Experimental surveys were located in Boston, New York, and New Haven. The latter was in conjunction with a complete Census of the city. The results of these research efforts are contained in a report, "Pilot and Experimental Program on Urban Employment Surveys" issued earlier this year. The content of the present

UES was developed from this experimental program. The experiences of the 1967 surveys also indicated what many had thought was obvious. We needed a different type of interviewer. We recommended that the visible characteristics of the interviewer should as nearly as possible be the same as those of the respondents. We learned that the information we were attempting to collect on nonparticipation in the labor force and methods used in seeking employment had to be obtained from the persons themselves and not from a random respondent who answered

the knock on the door.

We also learned from our casual interviews in New Haven and New York that many of the respondents did not have same concept of economic activity as the technician and bureacrats who have been defining "work" since the great depression of the thirties.

From these experimental surveys we also learned that the youngsters of these neighborhoods play a larger role in their version of "economic activity" than we had ever been able to measure. We became aware of this but we could not measure it.

As a result of these earlier experiences we have designed a few more projects directed at those problems we were unable to solve. At the present time we have an experimental survey being conducted through the BLS West Coast Office by a San Francisco group, PACT, Inc., (Plans for Action in Contemporary Times). This project which we have entitled "Meaning of Work" is concerned with the perception of work.

Specifically, it is an attempt to find out what are the differences among men who take a job and stay on it; men who take a job but won't stay at it very long; and men who won't take a job. The objective is to develop a method by which the differences among these 3 groups can be recognized. Three different groups of black men will be identified, each having one of the labor force performance characteristics described above. Each respondent will be interviewed on a wide range of subjects, such as his attitudes toward work, jobs, and black and white supervisors and coworkers; and his work and nonwork activities. Comparison of results among the

respondents may provide insights into the characteristics that differentiate the 3 groups.

Another project "Work Experience of School Age Youth in Urban Slum Areas" is being reviewed by the Bureau of the Budget and is slated to be located in Kansas City, Kansas. In this UES research project, we are concerned with investigating the phenomenon of youthful labor force activities. Our objectives are to develop methodologies which will identify the incidence and kinds of work activities in which young people engage, and which will test the differences in obtaining labor force information about young people indirectly and directly. This project will be accomplished by interviewing approximately 600 black male youth, aged 10-19, including those still in school and those out of school. The household interviews with the youth will be preceded by an interview with the parent-preferrably the Mother.

A third project, "Measuring Some Characteristics of Persons in Poverty," tentatively to be located in Boston, is also being reviewed by the Budget Bureau. In this UES research project we are attempting to develop a methodology which will obtain retrospective social and economic data about persons in poverty from current household interviews. The effort is designed as an alternative to costly surveys which entail visiting the same population each year for the duration of the period required--e.g. 5 years. The UES project is designed to obtain 5-year data on mobility and 2-year data on income. Additionally, it may be possible to examine the effects of such things as family composition and multiple jobholding on income and mobility.

We hope that these three projects will be accomplished by the end of 1970. There are other areas of investigation which require more resources than we have at our disposal at this time. Some may be even more important. For example, we would like to undertake a study on the measuring the extent and effects of underemployment and underutilization particularly for those persons living in urban poverty neighborhoods. However, this study, like others, will have to wait for more resources to be made available.

[Urban Employmt. Survey]

MR. BEN BURDETSKY SPEECH TO THE UES USER'S CONFERENCE

I, too, am delighted to be able to participate in this Conference. As Mr. Bagdon said, I came down to Atlanta for somewhat a different purpose, although, I think it is very much related. I have made it a point to visit each of our regional offices, and we have eight of them now, about twice a year mainly to talk to our regional people about the work that we do and try to find out what it is we ought to be doing.

One of the things that I became aware of very early, when I joined the Bureau of Labor Statistics about three years ago, was that there were a lot of people, some in the Department at high levels, who felt that the statisticians were out collecting a lot of numbers for statistical series. We were also accused of collecting all kinds of statistics and publishing vast volumes of data which had no relevance or which were really not useable by administrators. There was a kind of conflict that was developing between administrators of programs and the statisticians.

One of the things that we are conscious of and are trying to improve certainly is the ability to produce information that is needed and used. A meeting like this is certainly a good device for getting our information known and passed out and for discussions of its value. I hope as a result of this Conference, we can get some feel of your opinions as to how this material meets your needs and if there are other areas which we are not covering, what they are.

In October 1966, I joined the Bureau of Labor Statistics. One of the very first things that I was faced with was the problem of helping to mount

rapidly some ad hoc survyes of urban areas. This was a real crash program that involved hundreds of people in the Department of Labor, all the bureaus and offices of the Department of Labor, and lots of state agency people in the employment security system. We studied 13 major cities, of which Atlanta was not one at the time. These were called the Urban Employment Surveys and the name experiemental was put on them because it was the first time that the Bureau of Labor Statistics had developed a technical method for examining the indepth neighborhoods of some of our cities. Now, it might seem that this was only three years ago; yet, in the Department it was apparent that there were debates and these debates also existed with other agencies as to whether or not these problems were really as serious in the cities as some people were saying they were.

One of the purposes that the former Secretary of Labor had was to get an indepth picture of what was really happening in the slum areas of these major cities. A lot of interesting things were found and I think Mr. Milligan will be covering some of them. But this, I want to repeat, was the first major effort to get at the indepth problems of these areas and something about the people living there. Before this time, we had also been accused of producing vast arrays of aggregated data to come out with a national unemployment rate, to come out with a national CPI; these are all well known indicators. But we found out what we had to think about was what was necessary for the local communities. As a result of this great pressure, and I can assure you that it was pressure because a lot of people hadn't yet awakened to the fact that there really was a great need for local area data, state data and regional data, there was a conflict for a while between the natural statistician and those interested in local data.

So, we were launched into the Twentieth Century with this survey and a number of other things that we are doing which will help to pinpoint the problems of the local communities and this also leads to, we think, a kind of restructuring of the role of our regional offices. I discussed this also with Mr. Bagdon this week. We want our regional offices to be BLS's in the field, to get a real handle on what is happening in the local communities and to provide whatever service and support is needed or that we can possibly provide in getting data to the people who need it, serving as technical consultants for any research efforts that are underway.

Let me tell you, one of the problems that we have is that literally hundreds of surveys are being conducted, some of you may know that a lot better than I do, but all kinds of surveys are being conducted by all kinds of people, some of which are fairly good and some of which are poor. But they are being used as a basis for discussing problems or presenting proposals. We had hoped to come up with a reasonably sophisticated system so that others would be willing to ride our survey and use these results to get some of the other surveys stopped that were really bothering the people. Because, as you know, people are being surveyed to death, we recognize that and so it is one of our other goals to come up with a sophisticated survey system that would help to eliminate the need for all these other surveys that have been going on and to come up with some comparable data that could be used to examine city-to-city or within-cities and the rest of the cities which you will learn today. I do think that maybe we have had some success with some of the regional people who have managed to become part of research efforts intheir regions.

I would like to mention that one concept that emerged from the 1966 survey was the concept of subemployment. I am sure that any of you who have had a chance to look at the 1967 Manpower Report of the President found this concept expressed there. Here again, I say that it seems to me we have been in this manpower development training business, we have been in all kinds of social action programs for a lot of years now, but very recently we have learned a lot of things that we never knew before. It was kind of shocking to some people to see that we came up with a sub-employment rate of 45 percent in a place like New Orleans, 29 percent in New York and 42 percent in Phoenix. By sub-employment, we kind of pointed up the fact that there were a lot of people who were, not only out of work, but were working part-time and wanted full-time work or who were earning, and we have some criterion, $60 a week. We considered this sub-employment by various family sizes and found that there were some people who weren't even being counted in the labor force and all kinds of factors that are presented in National aggregated figures. An unemployment rate of 3.4, which we have now, doesn't tell you what is happening now in North Philadelphia. We came up with some figures and some ideas, as a result of those studies, and some new thinking went into the development of the survey design and also into the whole process of allegating money for projects. I know that a byproduct of the 1966 studies was the immediate allocation of about another 175 million dollars in training funds in some of these cities that needed help very badly.

Another thing that we think is very important to do is that when you look at a set of data, they tell you something and when you know all the limitations and restrictions you can understand these and analyze them.

We suggest to our people that you try to get a handle on all other available data in an area, try to get a total picture of what is happening and try to utilize information on prices that are produced by us and by others on interarea family budgets that are produced and various other statistics that are prepared on a social and economic nature. So you can get kind of a package of information which will give you a much better indepth view of what is happening in the cities.

Now, I want to summarize the major purpose of these surveys, to identify, to describe, to measure, and to understand the employment problems of people living in these areas that are being surveyed. In addition to the basic deomgraphic information which we have always collected in great quantities, we are trying to get information about earnings, about education, and training, about migration experience, barriers to employment, problems of looking for work, participation in manpower and training programs, life-time work experience, and attitudes about work and expectations about work. I can remember, as an example, that suddenly everyone was interested in transportation to and from work. As a trainee back in 1955, I worked in a local employment office in Washington, working with trade and industrial people and I used to recall the blank stares that I would occasionally get when we found a job that we thought someone might be qualified for and wanted to send him on a job quite far away. It took me a little while to understand that the individual didn't have the money to get to the job or there was really no transportation to get there. So you know, you learn as you go. But, that was a long time ago and now we are talking about studies to find out about the transportation problems in getting people

back and forth to work. There are all kinds of factors that enter into reasons why people are working, why they are not working, how they feel about work, what their expectations are, why they give up even looking for work; things that we are now all of a sudden trying to find out.

What we have so far is just the beginning of a vast array of data that will be produced as a result of this survey. I think Mr. Stambler will talk with you some about some new tabulations which will be available some time in the future. Also, he or Mr. Bullock will tell you how you can get copies of these tabulations for such uses that you might have.

I want to thank you for coming together and for the opportunity to present with the Southern Regional Council the results of the Urban Employment Survey. I hope that with this exchange we can find from you what further we can do to produce information that is really useful to you as people working in the field.

Thank you.

W.S.J 11/27/72

Letters to the Editor

BLS Statistics

Editor, The Wall Street Journal:

Your editorial "The BLS Fuss" (Nov. 6) commented on charges in the press that the present administration has moved to politicize major parts of the Federal Statistical Program. You take as your point of departure a letter by Geoffrey Moore, Commissioner of the Bureau of Labor Statistics (BLS), chiding the press for making such a charge, particularly in connection with the discontinuance of the press briefings on employment, unemployment and prices, while the press failed to give equal coverage to a report which purportedly exonerated the administration.

Your editorial conclusion is that the press complaints "die hard," and you offer a simple suggestion to lay the complaints to rest: Resume the press briefings "so that reporters could ask their own questions about the statistics."

I could not agree more with your conclusion. As you know, the Congressional Joint Economic Committee, of which I am chairman, has been holding regular monthly hearings on the BLS statistics ever since the press briefings were discontinued over 20 months ago. We recognized from the start that our hearings, while helpful to the press, were not a satisfactory substitute for the regular meetings between the BLS technicians and the press. What was missing was opportunity for the press to freely participate in a "give and take" with the technicians.

Our committee has for 20 months asked the administration, through Commissioner Moore and others in the Executive Branch, to resume the press briefings, but with no success.

You say in outlining why reporters suspected politicization: "The discontinuance followed close on the heels of a briefing in which the top BLS statistical expert at the time, Harold Goldstein, apparently in all innocence, had termed an unemployment decline only marginally significant. Secretary of Labor Hodgson, the same day, had preferred to call it a significant sign of economic improvement. Mr. Goldstein later left his post as an assistant BLS commissioner."

This statement does not do justice to the reporters' case. Harold Goldstein was not an "innocent"; he was speaking as a technician and he was completely correct, as a matter of fact, that the decline in unemployment was "only marginally significant." There has been no contradiction of this fact by any technician, including Dr. Moore. It was Secretary of Labor Hodgson who was playing fast and loose with the statistics.

If Harold Goldstein had waffled on this point, he should have been punished. Instead, he was punished because he did not waffle; He was demoted without advance notice and in effect forced into retirement before his desire. And Secretary Hodgson, who misinterpreted the data, was allowed to go scot-free.

The discontinued press conference between technicians and the press has in effect been replaced by the White House conference. Witness the experience just this past month. The press was informed that Chairman Herbert Stein of the Council of Economic Advisers would discuss the employment numbers. The BLS news release was made available to the press with a political statement by Mr. Stein superimposed on it. Politicization?

I hope reporters will continue to "police" the reporting and interpretation of economic news. The integrity of economic policy is at stake.

WILLIAM PROXMIRE

Joint Economic Committee
U.S. Senate

Washington

Scientific Effort

Editor, The Wall Street Journal:

As a past participant in several reviews of potential environmental hazards due to the SST, I read with some interest William Magruder's comment (Nov. 1) to the effect that he is 95% sure of the environmental safety of the SST. I guess he thinks he knows something that nobody else does, including every scientist that has been looking into this question. I started out as a skeptic of Harold Johnston's ideas, but the more I look at the problem the more I feel that instead of being 95% sure of the SST's environmental safety, we should be 95% unsure of it.

Particularly worthy of disdain was Mr. Magruder's gratuitous reference to the current expenditures in studying this question: $400,000 to Professor Johnston, as against $5.5 billion envisaged for the ultimate program. Big deal!

What in fact is called for is a research program on a much larger scale than our little-science administration is capable of contem-

Selective Unemployment

Secretary of Labor W. Willard Wirtz's forecast that the unemployment rate may fall to 3.5 per cent by the end of June gives ammunition to both sides in the present argument between those who favor continued economic expansion and those who think that restraint is overdue. According to the restrictionists, the nation is approaching virtual full employment; they contend that any efforts to expand jobs further can only create manpower shortages and lead to rising costs that will trigger inflation. The expansionists maintain that the ranks of the jobless can be trimmed still further without serious inflationary strains.

An analysis of just who are the unemployed suggests a need for a shift rather than a reversal in policy. There is little justification for expanding aggregate spending to spur demand. With the unemployment rate for married men down to 1.8 per cent, the lowest level since statistics have been kept, further over-all stimulation might be harmful, generating a rise in prices faster than it increases job opportunities. NYT 1/31/66

But there is surely room for specific measures tailored to relieve selective pockets of unemployment—the 13 per cent rate among teen-agers, for example, and the 7.3 per cent among nonwhites. Because many of these job seekers lack skills, they present a very difficult problem that calls for a more imaginative effort than any now existing to provide training and jobs. The Administration's manpower-training programs have helped, but their significance has been limited by the stress on general measures of expansion. Now, the emphasis must be on expanding the size of the skilled labor force, which will strengthen the defenses against inflation.

Latest figures on those receiving Aid to Dependent Children funds emphasize the social side of the same problem. Although the number of families on general relief is steadily declining, the number of women and children on A.D.C. rolls continues to soar. The chief reason is that Negro men who are unemployed or irregularly employed are deserting their families. A concerted program to find more jobs and better jobs for these unemployed men would pay social as well as economic dividends.

U. S. DEPARTMENT OF LABOR
WOMEN'S BUREAU
516-1371 PEACHTREE ST., N.E.
ATLANTA, GEORGIA 30309

January 31, 1966

Mr. Paul Anthony
Executive Director
Southern Regional Council, Inc.
5 Forsyth Street, N.W.
Atlanta, Georgia 30303

Dear Mr. Anthony:

The Regional Staff Committee of the U.S. Department of Labor is concerned with improving communications with minority groups and members of the Negro community. For this purpose we propose sponsoring a regional conference (at the Progressive Club on March 22) to: (1) discuss available Department of Labor programs; and (2) explore methods of improving dissemination of information on these programs.

We are asking the Association of Colored Women's Clubs, the NAACP, the Southern Regional Council and the Urban League to cooperate with us in this endeavor. If your organization is interested in this conference, we would appreciate your meeting with us to plan the program and discuss appropriate group and individual participants. Our planning meeting is scheduled for February 18 at 10 o'clock in Room 317 at 1365 Peachtree Street. Please let us know if you - or a representative - can attend.

Your cooperation in this matter would be sincerely appreciated.

Most sincerely,

Dianne McKaig

Dianne McKaig, Chairman

February 15, 1966

Mr. W. H. Montague, Sr., President
Georgia State AFL-CIO
Room 208
15 Peachtree Street, N.E.
Atlanta, Georgia 30303

Dear Brother Montague:

I would like to invite you on behalf of the Southern Regional Council to be our guest at a luncheon at which the Attorney General of the United States will be the featured speaker. Mr. Katzenbach will be with us on February 28, 1966. Lunch will be at 12:30 in the Marriott Motor Hotel in Atlanta, at the corner of Courtland and Cain Streets.

The Attorney General will address a group of persons from throughout the South who are especially interested in voter registration and citizenship participation for all peoples. Mr. Katzenbach will speak to the entire region about the Justice Department's plans and commitments in these important areas.

I hope that you will be able to join us for this occasion. It would greatly assist our planning if you would let me know if you will be with us on the 28th.

Sincerely,

Emory F. Via
Director, Labor Program

OPTIONAL FORM NO. 10
MAY 1962 EDITION
GSA FPMR 101-11.6

UNITED STATES GOVERNMENT

Memorandum

TO : Miss Dianne McKaig, Chairman
Regional Staff Committee

DATE: February 21, 1966

FROM : William S. Harris

SUBJECT: Planning Meeting on Proposed Regional Conference

The Planning Meeting for the proposed conference of March 23, 1966 to explain Department of Labor programs and to improve communications with groups and organizations representing disadvantaged individuals was held on February 18. Those in attendance were:

William I. Allgood, Information Office
John Speer, BAT
Julian Colquitt, BES
Phenizee Ransom, BES
Brunswick Bagdon, BLS
William Harris, NYC
Emory Via, Southern Regional Council
Mamie Reese, National Association of Colored Women's Clubs
Sam Harvey, Urban League

The participants unanimously agreed that a conference of this matter is necessary and will serve a useful purpose. It was pointed out that private groups know relatively little about Government programs, and once you get away from the regional level it is even worse. It was the opinion of the group that we would need to reach and to invite a greater variety of representatives, including several informal-type organizations. In discussing the plans of the conference, it was agreed that this first effort could only be the beginning and that follow-up would be required. It was felt that the conference could identify many of the problem areas and hopefully provide recommendations for accomplishing our goals.

The group agreed on the March 23 date at the Progressive Club for the conference. Committees were established and chairmen and members appointed to each. The Committees were as follows:

Arrangements Committee

William I. Allgood, Chairman
John Speer, Member

Invitation Committee

Phenizee Ransom, Chairman
Mamie Reese, Member
Emory Via, Member
Urban League Representative, Member

Buy U.S. Savings Bonds Regularly on the Payroll Savings Plan

5010-108

Program Committee

Dianne McKaig, Chairman
Julian Colquitt, Member
Emory Vie, Member
Brunswick Bagdon, Member

I will work with all Committees. It was agreed that the Committee Chairmen would submit their recommendations by February 28.

It would seem appropriate to me that we give full discussion to this conference at our next scheduled Regional Staff Committee meeting. Particular attention should be given to the types of presentations that would be given by the Department of Labor offices and bureaus.

A copy of this memorandum will be given to each participant of the Planning Meeting and copies are available for the other members of the Regional Staff Committee.

February 24, 1966

Mr. Phinizee Ransom
Bureau of Employment Security
U. S. Department of Labor
1371 Peachtree Street, N.E.
Atlanta, Georgia

Dear Mr. Ransom:

Enclosed are some suggestions of persons to be invited to the proposed conference on March 23.

I have not made an exhaustive list in the various categories. For instance, I have only listed managers of public housing projects currently occupied by Negroes and not those that are predominantly white -- I think a good argument can be made for including the latter.

I have included a number of full time union persons. In my mind they fall into two categories for which the conference might have relevance. They are either persons who have contact with low income people and are concerned with their problems or persons who are related to training opportunities, or both.

I trust that this list will be of some help.

Sincerely,

Emory F. Via
Director
Labor Program

Dear Mr. Via:

Enclosed is a copy of the draft program. Since the Secretary can't fit our conference into his schedule, I am now checking on the availability of Dr. Henderson as our keynote speaker.

We would appreciate your asking Mr. Uhlmer - is this the correct spelling - to serve as recorder of Workshop 3. (If Ruby Hurley is substituted for Sam Williams, perhaps we will shift the workshop assignments to avoid having two gals in the same group.)

Thank you so much for taking time out of an especially busy day to meet with us on Monday. Your assistance - and insight into special areas - was indeed helpful.

Most sincerely,

Dianne McKaig

Dear Dr. Via:

The Department of Labor in cooperation with the Southern Regional Council, the National Association of Colored Women's Clubs, the Urban League and the NAACP is holding a one day conference at the Progressive Club on Techwood Drive, Atlanta, March 23, 1966. The purpose of the Conference is to attempt to improve communication between the Labor Department and the groups and organizations who are working with disadvantaged people.

We would like very much to extend to you and appropriate members of your staff an invitation to attend and participate in this Conference. We feel that the subject matter to be discussed is of interest to your organization and that this opportunity for an exchange will assist the Department in doing a better job of reaching people who do not know about our services and have need of them.

Enclosed is a program for your information. We would appreciate having an indication from you as to the number of individuals that we may expect to be with us. The attached card on the enclosed program together with a self-addressed envelope may be used for furnishing us this information.

We sincerely hope you can attend this Conference.

Very truly yours,

Dianne McKaig

3/8/66

Al:

I am just realizing that Joan's absence has kept me from getting a memo to you. The Regional Labor Department Meeting about whcih you were circularized earlier for names of potential attenders will be held on March 23.

I have put your name in as a recorder for a workshop from which slot I am trusting you will make a great and needed contribution during and following the meeting.

Can you do it? If not let me know post haste.

Program runs from about 9 am until mid afternoon. Aim is to get labor department types to tell briefly how their programs relate to disadvantaged and their problems and for them to field questions, take suggestions, and listen to criticism. One special aim is to upgrade the effectiveness of such programs in actually reaching the disadvantaged.

My pleasure

A.M.

One condition

I'll do it if you get AFL-CIO To endorse R. Dugger.

Ms. Dianne McKaig , Chairman
Regional Staff Committee
U. S. Department of Labor
1371 Peachtree Street, N. E.
Atlanta, Georgia 30309

Dear Ms. McKaig:

It is encouraging to know about the March 23 conference in Atlanta described in your letter of March 9, when the Department of Labor in cooperation with the Southern Regional Council, the National Association of Colored Women's Clubs, the Urban League and NAACP will explore ways and means to improve communications between the Labor Department and other groups and organisations concerned with working with disadvantaged people.

I deeply regret that prior commitments make it impossible for me to join you in this one-day conference. I will be in Knoxville all day for purposes of addressing and working with the United Packinghouse Workers of America in a Convention which was planned many months ago.

Perhaps my associate Regional Director of the AFL-CIO, Mr. Charles H. Gillman, and Mr. E. T. Kehrer of the AFL-CIO Civil Rights Department, both of Atlanta, will be able to attend and participate. I hope so.

With best wishes for a successful and productive conference, I am

Very truly yours,

Paul R. Christopher
AFL-CIO Region VIII Director

U. S. DEPARTMENT OF LABOR

SOUTHEAST REGIONAL STAFF COMMITTEE
1371 PEACHTREE STREET, N. E.
ATLANTA, GEORGIA 30309

March 16, 1966

Mr. Al Ulmer, Director
Community Organization Planning
Southern Regional Council, Inc.
5 Forsyth Street, N.W.
Atlanta, Georgia 30303

Dear Mr. Ulmer:

We certainly appreciate your agreeing to serve as a workshop recorder in the Conference on Expanding Opportunities scheduled for March 23 at the Progressive Club. We would also like to thank you and your organization for your cooperation in this effort to improve communication between the Labor Department and groups and organizations who are working with disadvantaged people.

For your information, we are enclosing a copy of the conference program. As you will note, each workshop panel will work with a third of the conference participants during the scheduled sessions, rotating from group to group.

The workshop panel you have been asked to serve as a recorder will be concerned with enforcement programs. The resources will include the regional directors of the offices of Labor-Management and Welfare Pension Reports, Veterans' Reemployment Rights, Wage and Hour and Public Contracts Division, and the Solicitor of Labor. Each of the regional directors has been asked to give a five-minute presentation on the programs of his bureau specifically related to services for the disadvantaged - particularly Negroes. They have been asked to limit their remarks since we would like to reserve panel time for given-and-take on developing better ways of reaching people who do not know about our services and have need of them.

The panel recorders will, at the end of the day, summarize the discussion which took place during each of the three sessions and present any recommendations which may have developed. They will be assisted by clerk stenos provided by the Department. Since many of the participants will be regional representatives of

interested organizations, we hope that the recommendations will include suggestions on improved communication on a state and local level.

Thank you for your participation in this conference. We are looking forward to working with you.

Should your organization wish to include any publications in the conference kit, please send me 75 copies at your earliest convenience.

Yours very truly,

Dianne McKaig, Chairman
Regional Staff Committee

Encl. 1

Mrs. Frances Pauley, Director
Georgia Council on Human Relations
52 Fairlie Street, N.W.
Atlanta, Georgia 30303

Dear Frances:

The enclosed announcement is of the program we talked about. I think it will give a good opportunity to find out how Labor Department Programs can be related to disadvantaged folks as well as a chance to make suggestions and criticism regarding those programs.

Would you circulate the enclosed announcements to people you feel would especially profit from and/or contribute to such a meeting?

Sincerely,

Emory F. Via
Director
Labor Program

To discuss conference re:
available Dept of Labor Programs
methods of dissemination

Lab Dept - Regional Conference (3/23/66)

2/18/66

Planning meeting for Labor Department Regional conference

How to reach the deprived with labor department sefvices

Conference for March 23, probably Progressive club

EFV: look beyond offcial and customary channels, look beyond the more established groups to less formal, action oriented, groupings Recognize difficulty within bureauracracy(competition/ among programs, traditional methods of work, individual prejudice) as well as recognizing that individuals they want to reach may not respond in traditional ways, there may well be class and cultubal differences.

Program should be aimed at regional groups plus Atlanta local and state Groups telling them about what is available, with focus on what the conference wants to do -- reach the poor and not just an exhaustive run down of services. Program committee should provide a "focusing memo" to go to each of the Lab. Dept. program people who will be participating.

EV give some thought to how break up conference by type of labor dept service. Perhaps "manpower and training", equal employment opportunity(if Sylvester's agency is to be included) and technical services such as labor standards, bls, buruea of lab. mgt reports,

CONFERENCE ON EXPANDING OPPORTUNITIES

March 23, 1966, Progressive Club - notes

HENDERSON:

1. bring a concept of realism to "opportunity".
2. more effective communication USLD & community groups
3. more effective programming to reach unreached groups, disadvantaged groups.
4. bring unreached and d-a groups into the mainstream.

MANPOWER AND HUMAN DEVELOPMENT AND USE:

1. maximization of human resources - education, productivity, remove barriers : Negro, women.
2. objectives of manpower: education, job development, training and retraining.

imperatives are moral and humanistic as well as economic.

UNemployment office must become EMployment office.

Need apprenticeship informations centers (must be approved by Labor-Management committees)

WORKSHOP SESSION 1. Panel 3.

Chairman: functionally informative.

BLS: started in 1884 with work on prison reforms. gives an economic profile, available for consultation and interpretation.

1. Labor force -- wages and industrial relations; non-agricultural work force by each industry by state and 150 selected cities; national figures since 1919; state, 1930; cities, 1947-50.
2. Monthly report on labor force -- on national. Measurement of civilian labor force by sex, race, occupation, industry, married or not-married; Occupational Outlook Manual: trends on a two-year basis; also Quarterly.-- these are for vocational counselors.

- occupational rage rates by industry; industry-wage statistics, community-wage statistics: both include fringes.
- 100 citiex: union scale (quarterly)
- Monthly: gross weekly, mo., yrly. by city .
- labor turnover.
- consumer-price index "cost of living"
- wholesale-price index.

22222

- accident rates and productivity
- foreign labor conditions.

INFORMATIN OFFICE _ Allgood

III. Office of Information, Publications and Reports.

issued quite a cordial invitation to call on him anytime.

SMITH- Labor Standards.

Started in 1934 under Secty. of Labor Perking(?)

Concerned with working conditions improvement in gen. and specif:

Wage-hour
child labor
discrimination
private employment agencies - some regulation
job safety
workman's comp.
labor legislation
migratory workers
work with International Labor Organization

prepare seminars on labor legislation, usually where more protective labor legis. is needed. offer these to groups.

Tough guy, and hospitable.

McKAIG

Women's Bureau started in WWI. 27M women at work.

Why so many women are working:

life span is greater

early marriage, fewer kids

37% of women work

most women work for the money

motivation of young girls is important - many don't think they will every want to work.

types of jobs - 1/10 of 1 % over $10,000/yr.

equal pay for women - only in interstate commerce industries

state min. wage and equal pay laws: only North Carolina of South. ($1.00). Georgia, 1966 equal pay law.

day care facilities for working mothers' children.

labor legislation, training, etch.

QUESTIONS:

1. statistics on migratory workers from Florida to Carolinas - "East Coast Stream"

   see BLS, also AFSC, Noyes Collinson

   - BLS: new state laws for migratory and other agric. workers
   - public health, special education needs and problems, general welfare.

2 2. Medicare will create more jobs for women -- as practical or licensed nurses - so why is the pay scale in these jobs so uninviting16 low?

SESSION 2. Panel 1.

TAYLOR _ BAT

A. oldest form of training known to man, 2000 B.C. transfer of skill from one hand to another.

BAT- Fitzgerald Act of 1936.

usual a-s perios 3-4 years; BAT standards: 40 hrs/wk on job, 4 hrs more /wk. classroom related to job.

- testing and referral
- age 17-24; h.s. graduates; strong math; moral character; willingness to work; under close supervision; paid wages on journeyman's scale while in training.
- On-the-Job-Training (OJT): MDTA/62 as amended. - BAT with HEW.
  1. Institutional (school)
  2. On the job

33333

BAT reimburses companies for training costs only, keeps in mind the equal opportunities clause of Title VI.

JULIAN COLQUITT, BES:
cooperating outfit
a new program: Wagonner-Carr Act, 1943
MDTA/62, education and department of labor
1. state employment security agencies and D. C. BES determing needs
2. recruit and refer
3. determine eligibility
4. placement
sgates provide training
- farm families
- un and underemployed
- training allowances - preference to heads of house
through July '66: 10% state financing; '67 100% fed fin.
State agencies cooperate in recruiting for NYC and Job Corps, Youth Opportunity Centers.

HARSIS, Neighborhood Youth Centers
- Job Corps - education, vocational training and work experience.
  - resident centers, through OEO.
- College work-study program: part time jobs sponsored by the college and HEW
- NYC: DL: jobs and income for men 16-21; they do work not being done (parks, etc.) to benefit the comminity:
  A. in-school: part time work
  B. Out of School: full time work for drop-outs, remedial education may be included.

cost-reimbursable basis:
146 regional projects, with 17,000
- change in attitude toward education and training
- draftee rejects
- back to school of confirmed drop-outs
- stay in school of potential drop-outs

HARDLEY. State representative, Veterans Employment P.....

44444

- small agency, part of BES.
- provide maximum opportunity to vets of war-time service
- vets assistance act/46 (GI Bill)
- orderly readjustment of 15M vets into civiliam forces
- preferential employment and counseling, placement provided by law in federal operations.

QUESTIONS:

COLEMAN (ULeague): why not preferential employment to Negroes?

1. How do you get information to potential trainees?
   - state employment services carry on "High School Programs"
   - full time counselors in schools; career days
   - counseling and testing programs
2. A-s Information Centers?
   - BAT and BES team efforts in Memphis, New Orleans, Atlanta, Nashville, Houston, and other cities to set these up.
   - funding through BES and STaffed by BES and State Employment Office.

   Suggestion: mobile unit.

   (Atlanta has only 350 apprenticeship opportunities each year)
3. How to improve image of Employment Service to trainee?
4. How has NYC involved other youth-serving organizations? in-school by board of education; out of school: agencies, encourage volunteer groups to take trainees.
5. IN NYC is there a method of publicizing through YM/Wca, etc.
   - recruitment is a big problem
   - recreation agencies, libraries, etc. oriented toward jobs within agencies they are enrolled in.
6. MDTA training agency could design trainee motivation program, and more effective placement - jdon't train for a job, only to have trainee return to domestic work.

The need is toward more individualized treatment. BES trend is in this direction.

SESSION 3. Panel II.

Sara Craig - Weltner's office

Virginia Harbin - MacKays Office

LABOR-MANAGEMENT .....

Landrum Griffin Act - internal union activity; ensures union democracy, equal rights for all unionists(then summarized law).

55555

Welfare pPlan Disclosure Act/58 - summarized.

Public disclosure good cure for crookedness (my work)

More democratic participation in Labor-Management and welfare pension plans - so people can know exactly what they have coming at retirement.

AFL-CIO - organizing no more separate locals in South.

1959: fact gathering arm of DLre: discrimination on the basis of race, color, creed in unions .

MCDONALD: Office of Veterans reemployment rights.

talked forever, not really pertinent to our interests.

HUETTNER: Wage and Hour and Public Contracts

much of poverty comes from cruelly low wages; Fair Labor Standards Act covers 29½M with minimum wages.

Exemptions:

restaurants, hotels, hospitals, retail stores, laundries, others.

proposed amendment would add 7 M more

1. floor - $1.25'
2. Ceiling - 40 hrs/week, other 1½time
3. children working under 16 - health standards, etc.
4. equal pay for equal work

have made 5,000 FLSA investigations in N.C., S.C., Ga., and Fla.

anonimity of complainant is assured

inform inployer and employee of complaints

provide speakers

9 minority investigators in 4 states noted above.

Labor-Management: NLRB, non-LDept.; Taft- Hartley; FMCS also non-LDept.

TRUITT: Solicitor, advisory and litigative services to Dept, not for public consumption.

only relevant question: do apprentices have the right to complain to the Department of inadequate instruction from journeymen? Legal recourse? (esp. when they come out of the program unqualified for a job in the craft) try EEOC or your congressman.

Atlanta, Georgia 30303

Dear Dr. Via:

Just a note to express the appreciation of the Southeast Regional Staff Committee of the U.S. Department of Labor for your cooperation, and that of the Southern Regional Council, in our recent Conference on Expanding Opportunities. We feel that this conference was most successful in establishing improved communications relating to programs for the disadvantaged, and this success is largely attributed to the efforts of our co-sponsors.

Thank you for your assistance at our planning meetings and on the day of the conference. We hope to have an opportunity to work with you on future projects of mutual concern.

We would also like to make note of the special assistance of Al Ulmer who served as recorder of the work shop on enforcement. Al was most helpful in coordinating the information and suggestions during the day.

Most sincerely,

Dianne McKaig

Opening for Reg Lab Dept.

Two problems

1) Training & Sensible employment policies, & legis enforcement for all.

2) Attacking special problem of disc. as related to these —

Both problems raise a third: How do you reach disadvantaged people & especially those of color —

Civil Rights movement has awakened us as slow before as a nation to the fact that people were being left out of our Society — Sally Whitty Olay this line to 4th Nat'l Conference of Plans for Progress.

Labor Dept responsibility in all its Programs —

1) To inform people of what they offer, how to take advantage of it

2) To affirmatively, as in this Conference, to explore the problem of making effective contact with the disadvantaged —

but much more than this Conference is required.

[over]

Citizen & groups

duty is to
to understand current programs

1) Demand services &
a) Training Program
better services b) Law enforcement

2) To suggest remedies
in approaches made

3) To cooperate where
possible — within purview
of own organization —

4) In sum: to recognize
govt's agencies as citizen services
not implementation of our policies

not outside

BAT

Only advisory & technical to JAC's

Mgt - Labor in Atlanta did not see need for center — thought would lessen control —

Hays Howard
Tenn A&I

Response — Everyone a participant — but groups & individuals
Labor Dept Personnel especially —

Appreciation for
effort + time — imagination — initiative

ELECTION OF OFFICERS OF LABOR ORGANIZATIONS

Revision of Regulations

Title 29—Labor

CHAPTER IV—OFFICE OF LABOR-MANAGEMENT AND WELFARE-PENSION REPORTS, DEPARTMENT OF LABOR

SUBCHAPTER A—LABOR-MANAGEMENT REPORTS

PART 452—GENERAL STATEMENT CONCERNING THE ELECTION PROVISIONS OF THE LABOR-MANAGEMENT REPORTING AND DISCLOSURE ACT OF 1959

Title IV of the Labor-Management Reporting and Disclosure Act of 1959 (73 Stat. 532, 534, 29 U.S.C. 481–484) provides standards for the election of officers of labor organizations, and assigns enforcement of the standards to the Secretary of Labor through litigation, after complaint and exhaustion of internal remedies, in the federal courts. Shortly after enactment of the statute the Department promulgated an interpretative regulation (29 CFR Part 452) for the purpose of setting out the Department's interpretations or position with respect to many of the provisions of Title IV.

Since the original publication of the regulation the Department of Labor has litigated innumerable election cases under Title IV and has considered and reacted to many diverse problems in connection with elections of union officers. Accordingly, it is appropriate in the light of this experience to expand, revise and update the interpretative regulation.

Therefore, pursuant to sections 401, 402, 73 Stat. 532, 534, 29 U.S.C. 481, 482, Secretary's Order No. 11–72 (May 12, 1972), Part 452 of Chapter IV of Title 29 of the Code of Federal Regulations is revised to read as follows:

Subpart A—General Considerations

Sec.
452.1 Introductory statement.
452.2 Application of union constitution and bylaws.
452.3 Interpretations of constitution and bylaws.
452.4 Investigatory provision — application.
452.5 Effect of violation on outcome.
452.6 Delegation of enforcement authority.

Subpart B—Other Provisions of the Act Affecting Title IV

452.7 Bill of Rights, Title I.
452.8 Trusteeship provisions, Title III.
452.9 Prohibition against certain persons holding office; Section 504.
452.10 Retaliation for exercising rights.

Subpart C—Coverage of Election Provisions

452.11 Organizations to which election provisions apply.
452.12 Organizations comprised of government employees.
452.13 Extraterritorial application.
452.14 Newly formed or merged labor organizations.
452.15 Effect of trusteeship.
452.16 Offices which must be filled by election.
452.17 Officer.
452.18 Constitutional officers.
452.19 Executive functions.
452.20 Nature of executive functions.
452.21 Members of executive board.
452.22 Delegates to a convention.

Subpart D—Frequency and Kinds of Elections

Sec.
452.23 Frequency of elections.
452.24 Terms of office.
452.25 Vacancies in office.
452.26 Elections in local labor organizations.
452.27 National, international organizations, and intermediate bodies.
452.28 Unopposed candidates.
452.29 Primary elections.
452.30 Run-off elections.
452.31 One candidate for several offices.

Subpart E—Candidacy for Office; Reasonable Qualifications

452.32 Persons who may be candidates and hold office; secret ballot elections.
452.33 Persons who may be candidates and hold office; elections at conventions.
452.34 Application of section 504, LMRDA.
452.35 Qualifications for candidacy.
452.36 Reasonableness of qualifications.
452.37 Types of qualifications.
452.38 Meeting attendance requirements.
452.39 Participation in insurance plan
452.40 Prior office holding.
452.41 Working at the trade.
452.42 Membership in particular branch or segment of the union.
452.43 Representative categories.
452.44 Dual unionism.
452.45 Multiple office holding.
452.46 Characteristics of candidate.
452.47 Employer or supervisor members.
452.48 Employees of union.
452.49 Other union rules.
452.50 Disqualification as a result of disciplinary action.
452.51 Declaration of candidacy.
452.52 Filing fee.
452.53 Application of qualifications for office.
452.54 Retroactive rules.

Subpart F—Nominations for Office

452.55 Statutory provisions concerning nomination.
452.56 Notice.
452.57 Procedures for nomination.
452.58 Self-nomination.
452.59 Presence of nominee.
452.60 Nominations for national, international, or intermediate body office.
452.61 Elimination costs—local unions.
452.62 Disqualifications of candidates; procedural reasons.
452.63 Nominations at conventions.
452.64 Write-in votes.
452.65 Interval between nominations and election.

Subpart G—Campaign Safeguards

452.66 Statutory provisions.
452.67 Distribution of campaign literature.
452.68 Distribution to less than full membership.
452.69 Expenses of campaign literature.
452.70 Contents of literature.
452.71 Inspection of membership lists.
452.72 Period of inspection.
452.73 Use of union funds.
452.74 Expenditures permitted.
452.75 Union newspapers.
452.76 Campaigning by union officers.
452.77 Permissive use of union funds.
452.78 Expenditures by employers.
452.79 Opportunity to campaign.
452.80 Bona fide candidates.
452.81 Rights in intermediate body elections.
452.82 Reprisal for exercising rights.
452.83 Enforcement of campaign safeguards.

Subpart H—Right to Vote

Sec.
452.84 General.
452.85 Reasonable qualifications on right to vote.
452.86 Vote conditioned on payment of dues.
452.87 Dues paid by checkoff.
452.88 Resumption of good standing.
452.89 Apprentices.
452.90 Visiting members.
452.91 Voting by employers, supervisors.
452.92 Unemployed members.
452.93 Retired members.
452.94 Reasonable opportunity to vote.
452.95 Absentee ballots.

Subpart I—Election Procedures; Rights of Members

452.96 General.
452.97 Secret ballot.
452.98 Outside agencies.
452.99 Notice of election.
452.100 Use of union newspaper as notice.
452.101 Sample ballots as notice.
452.102 Notice in mail ballot election.
452.103 Primary elections.
452.104 Proximity of notice to election.
452.105 Interference or reprisal.
452.106 Preservation of records.
452.107 Observers.
452.108 Publication of results.
452.109 Constitution of labor organization.
452.110 Adequate safeguards.
452.111 Campaigning in polling places.
452.112 Form of ballot; slate voting.
452.113 Sectional balloting.
452.114 Write-in votes.
452.115 Distribution of ballots.
452.116 Determining validity of ballots.
452.117 Majority of votes not required for election.
452.118 Local union agents in international elections.
452.119 Indirect elections.
452.120 Officers as delegates.
452.121 Limitations on national or international officers serving as delegates.
452.122 Delegates from intermediate bodies; method of election.
452.123 Elections of intermediate body officers.
452.124 Delegates from units which are not labor organizations.
452.125 Delegates from labor organizations under trusteeship.
452.126 Delegates to conventions which do not elect officers.
452.127 Proportionate representation.
452.128 Under strength representation.
452.129 Non-discrimination.
452.130 Expenses of delegates.
452.131 Casting of ballots; delegate elections.
452.132 Proxy voting.
452.133 Election of delegates not members of the labor organization.
452.134 Preservation of records.

Subpart J—Special Enforcement Provisions

452.135 Complaints of members.
452.136 Investigation of complaint by Director, Office of Labor-Management and Welfare-Pension Reports, and court action by the Secretary.

Subpart K—Dates and Scope of Application

452.137 Effective dates.
452.138 Application of other laws.

AUTHORITY: Secs. 401, 402, 73 Stat. 532, 534, 29 U.S.C. 481, 482, Secretary's Order No. 11–72 (May 12, 1972).

Subpart A—General Considerations

§ 452.1 Introductory statement.

(a) This part discusses the meaning and scope of the provisions of Title IV of the Labor-Management Reporting and Disclosure Act[1] (hereinafter referred to as the Act), which deal with the election of officers of labor organizations. These provisions require periodic election of union officers, and prescribe minimum standards to insure that such elections will be fairly conducted. Specific provisions are included to assure the right of union members to participate in selecting their officers without fear of interference or reprisal, and to protect the right to nominate candidates, run for office, and vote in officer elections. Title IV also sets forth the rights of candidates, provides for secret ballots in appropriate cases, and requires notice of nominations and elections, preservation of election records, and other safeguards to insure fair elections. However, the Act does not prescribe complete, detailed procedures for the nomination and election of union officers.

(b) Interpretations of the Labor-Management Services Administrator with respect to the election provisions of Title IV are set forth in this part to provide those affected by these provisions of the Act with "a practical guide * * * as to how the office representing the public interest in its enforcement will seek to apply it."[2] The correctness of an interpretation can be determined finally and authoritatively only by the courts. It is necessary, however, for the Labor-Management Services Administrator to reach informed conclusions as to the meaning of the law to enable him to carry out his statutory duties of administration and enforcement. The interpretations of the Labor-Management Services Administrator contained in this part, which are issued upon the advice of the Solicitor of Labor, indicate the construction of the law which will guide him in performing his duties unless and until he is directed otherwise by authoritative rulings of the courts or unless and until he subsequently announces that a prior interpretation is incorrect. However, the fact that a particular problem is not discussed in this part, or in interpretations supplementing it, should not be taken to indicate the adoption of any position by the Labor-Management Services Administrator with respect to such problem or to constitute an administrative interpretation or practice.

(c) To the extent that prior opinions and interpretations relating to the election of officers of labor organizations under the Act are inconsistent or in conflict with the principles stated in this part, they are hereby rescinded and withdrawn.

§ 452.2 Application of union constitution and bylaws.

Elections required to be held as provided in the title are to be conducted in accordance with the validly adopted constitution and bylaws of the labor organizations insofar as they are not inconsistent with the provisions of the Act.

§ 452.3 Interpretations of constitution and bylaws.

The interpretation consistently placed on a union's constitution by the responsible union official or governing body will be accepted unless the interpretation is clearly unreasonable.[3]

§ 452.4 Investigatory provision—application.

The provisions of section 601 of the Act provide general investigatory authority to investigate alleged violations of the Act including violations of Title IV. However, section 601 in and of itself provides no remedy, and the section must be read in conjunction with the remedy and statutory scheme of section 402, i.e., exhaustion of internal union remedies and a complaint to the Secretary following completion of the election before suit can be filed. In view of the remedy provided, an investigation prior to completion of an election may have the effect of publicizing the activities or unsubstantiated allegations of one faction to the prejudice of the opposition. To avoid this result, and as a matter of sound statutory construction, the Department will exercise its investigatory authority only in circumstances in which the outcome of the election could not be affected by the investigation.[4] Thus, the Department ordinarily will employ its investigatory authority only where the procedural requirements for a Title IV investigation have been met; but in unusual circumstances or where necessary to collect or preserve evidence an investigation may be conducted after the conclusion of balloting.

§ 452.5 Effect of violation on outcome.

Since the remedy under section 402 is contingent upon a finding by the court, among other things, that the violation "may have affected the outcome of an election"[5] the Secretary as a matter of policy will not file suit to enforce the election provisions unless the violations found are such that the outcome may have been affected.[6]

§ 452.6 Delegation of enforcement authority.

The authority of the Secretary under the Act has been delegated in part to the Labor-Management Services Administrator and to the Director, Office of Labor-Management and Welfare-Pension Reports.

Subpart B—Other Provisions of the Act Affecting Title IV

§ 452.7 Bill of Rights, Title I.

The provisions of Title I, "Bill of Rights of Members of Labor Organizations"[7] (particularly section 101(a)(1) "Equal Rights," section 101(a)(2) "Freedom of Speech and Assembly," and section 101(a)(5) "Safeguards against Improper Disciplinary Action") are related to the rights pertaining to elections. Direct enforcement of Title I rights, as such, is limited to civil suit in a district court of the United States by the person whose rights have been infringed.[8] The exercise of particular rights of members is subject to reasonable rules and regulations in the labor organization's constitution and bylaws.[9]

§ 452.8 Trusteeship provisions, Title III.

Placing a labor organization under trusteeship consistent with Title III, may have the effect of suspending the application of Title IV to the trusteed organization (see § 452.15).

§ 452.9 Prohibition against certain persons holding office; Sec. 504.

Among the safeguards for labor organizations provided in Title V is a prohibition against the holding of office by certain classes of persons.[10] This provision makes it a crime for any person willfully to serve as an officer or employee of a labor organization (other than exclusively as a clerical or custodial employee) within five years after conviction or imprisonment for the commission of specified offenses, including violation of Titles II or III of the Act, or consipiracy to commit such offenses. It is likewise a crime for any labor organization or officer knowingly to permit such a person to serve in such positions. Persons subject to the prohibition applicable to convicted criminals may serve if their citizenship rights have been fully restored after being taken away by reason of the conviction, or if the United States Board of Parole determines that their service would not be contrary to the purposes of the Act.

§ 452.10 Retaliation for exercising rights.

Section 609, which prohibits labor organizations or their officials from disciplining members for exercising their rights under the Act, and section 610, which makes it a crime for any person to use or threaten force or violence for the purpose of interfering with or preventing the exercise of any rights protected under the Act, apply to rights relating to the election of officers under Title IV.

Subpart C—Coverage of Election Provisions

§ 452.11 Organizations to which election provisions apply.

Title IV of the Act contains election provisions applicable to national and international labor organizations, except federations of such organizations, to intermediate bodies such as general committees, conferences, system boards, joint boards, or joint councils, certain districts, district councils and similar organizations and to local labor organizations.[11] The provisions do not apply to State and local central bodies, which are explicitly excluded from the definition of "labor organization.[12] The characterization of a particular organizational unit as a "local," "intermediate," etc., is determined by its functions and purposes rather than the formal title by which it is known or how it classifies itself.

§ 452.12 Organizations comprised of government employees.

An organization composed entirely of government employees (other than employees of the United States Postal Service) is not subject to the election provisions of the Act. Section 3(e) of the Act, defining the term "employer," specifically excludes the United States Government, is wholly owned corporations, and the States and their political subdivisions from the scope of that term, and section 3(f) defines an "employee" as an individual employed by an "employer." Since a "labor organization" is defined in section 3(i) as one in which "employees" participate and which exists in whole or in part for the purpose of "dealing with employers," an organization composed entirely of government employees would not be a "labor organization"[13] as that term is defined in the Act. However, section 1209 of the Postal Reorganization Act provides that organizations of employees of the United States Postal Service shall be subject to the Labor-Management Reporting and Disclosure Act. An international or national labor organization which has some locals of government employees not covered by the Act and other locals which are mixed or are composed entirely of employees covered by the Act would be subject to the election requirements of the Act. Its mixed locals would also be subject to the Act. The requirements would not apply to locals composed entirely of government employees not covered by the Act, except with respect to the election of officers of a parent organization which is subject to those requirements or the election of delegates to a convention of such parent organization, or to an intermediate body to which the requirements apply.

[11] For the scope of the term "labor organization," see Part 451 of this chapter.

[12] See § 451.5 of this chapter for a definition of "State or local central body."

[13] Most labor organizations composed of Federal Government employees are subject to Executive Order 11491 and the Regulations issued pursuant thereto.

§ 452.13 Extraterritorial application.

Although the application of the Act is limited to the activities of persons and organizations within the territorial jurisdiction of the United States,[14] an international, national or intermediate body is not exempted from the requirements of the Act by virtue of the participation of its foreign locals or foreign membership in its elections. For example, votes received from Canadian members in referendum elections held by an international must have been cast under procedures meeting the minimum requirements of the Act, and Canadian delegates participating at conventions of the international at which officers are elected must have been elected by secret ballot.

§ 452.14 Newly formed or merged labor organizations.

The initial selection of officers by newly formed or merged labor organizations is not subject to the requirements of Title IV.[15] Such labor organizations may have temporary or provisional officers serve until a regular election subject to the Act can be scheduled. An election under all the safeguards prescribed in these regulations must be held within a reasonable period after the organization begins to function. What would be a reasonable time for this purpose depends on the circumstances, but after the formation or consolidation of the labor organization, a regular election subject to Title IV may not be deferred longer than the statutory period provided for that type of organization. However, when a pre-existing labor organization changes its affiliation without substantially altering its basic structure or identity the terms of its officers may not be extended beyond the maximum period specified by the Act for the type of labor organization involved.

§ 452.15 Effect of trusteeship.

Establishment of a valid trusteeship may have the effect of suspending the operation of the election provisions of the Act. When the autonomy otherwise available to a subordinate labor organization has been suspended consistent with the provisions of Title III of the Act, officers of the organization under trusteeship may be relieved of their duties and temporary officers appointed by the trustee if necessary to assist him in carrying out the purposes for which the trusteeship was established. However, when a regular election of officers or an election for purposes of terminating the trusteeship is being held during the trusteeship, Title IV would apply.

§ 452.16 Offices which must be filled by election.

Section 401 of the Act identifies the types of labor organizations whose officers must be elected and prescribes minimum standards and procedures for the conduct of such elections. Under that section officers of national or international labor organizations (except federations of such organizations), local labor organizations, and intermediate bodies such as general committees, system boards, joint boards, joint councils, conferences, certain districts, district councils and similar organizations must be elected.[16]

[14] See § 451.6 of this chapter.

[15] However, the other provisions of the Act are applicable immediately upon such formation or merger.

§ 452.17 Officer.

Section 3(n) of the Act defines the word "officer" and it is this definition which must be used as a guide in determining what particular positions in a labor organization are to be filled in the manner prescribed in the Act. For purposes of the Act, "officer" means "any constitutional officer, any person authorized to perform the functions of president, vice president, secretary, treasurer, or other executive functions of a labor organization, and any member of its executive board or similar governing body."

§ 452.18 Constitutional officers.

A constitutional officer refers to a person holding a position identified as an officer by the constitution and bylaws of the labor organization. Thus, for example, a legislative representative of a labor organization who performs no executive functions and whose duties are confined to promoting the interests of members in legislative matters is nevertheless an officer who is required to be elected where the labor organization's constitution identifies the holder of such a position as an officer. On the other hand, legislative representatives who are required to be elected by the constitution and bylaws of a labor organization are not considered to be officers within the meaning of the Act if they are not designated as such by the constitution, are not members of any executive board or similar governing body, and do not perform executive functions. As defined in the Act, however, the term "officer" is not limited to individuals in positions identified as such or provided for in the constitution or other organic law of the labor organization.[17] The post of Honorary President, President Emeritus or Past President that is to be assumed by the retiring chief executive officer of a union would not be an officer position unless it is designated as an officer position by the union's constitution, or the holder of the position performs executive functions or serves on an executive board or similar governing body.

§ 452.19 Executive functions.

The definitional phrase "a person authorized to perform the functions of president, vice president, secretary, treasurer, or other executive functions

[16] See § 452.23 for a discussion of the frequency with which the different types of labor organizations must conduct elections of officers. See Part 451 of this chapter for the scope of the term "labor organization."

[17] Cf. NLRB v. Coca-Cola Bottling Co., 350 U.S. 264 (1956). See also, Daily Cong. Rec. 5867, Sen., Apr. 23, 1959.

of a labor organization" brings within the term "officer" any person who in fact has executive or policy-making authority or responsibility, although he may not occupy a position identified as an officer under the constitution and bylaws of the organization. Authorization to perform such functions need not be contained in any provision of the constitution or bylaws or other document but may be inferred from actual practices or conduct. On the other hand, a person is not an officer merely because he performs ministerial acts for a designated officer who alone has responsibility. The normal functions performed by business agents and shop stewards, such as soliciting memberships, presenting or negotiating employee grievances within the work place, and negotiating contracts are not "other executive functions" as that phrase is used in section 3(n) of the Act. However, a directing business representative or a business manager usually exercises such a degree of executive authority as to be considered an officer and, therefore, must be elected. The duties normally pertaining to membership on a bargaining committee do not come within the phrase "other executive functions." However, persons occupying such non-executive positions may be "officers" if they are ex officio members of the organization's executive board (or similar governing body) or if the constitution or bylaws of the union designate such positions as officers.

§ 452.20 Nature of executive functions.

(a) The functions that will bring a particular position with a title other than president, vice-president, secretary-treasurer, or executive board member within the definition of "officer" cannot be precisely defined. They are the functions typically performed by officers holding these titles in current labor union practice. Decisions in each case will require a practical judgment. As a general rule, a person will be regarded as being authorized to perform the functions of president if he is the chief or principal executive officer of the labor organization. Similarly, he will be regarded as being authorized to perform the functions of treasurer if he has principal responsibility for control and management of the organization's funds and fiscal operation. A member of any group, committee, or board which is vested with broad governing or policymaking authority will be regarded as a member of an "executive board or similar governing body." The name or title that the labor organization assigns to the position is not controlling.

(b) The purpose of the election requirement of the Act is to assure that persons in positions of control in labor organizations will be responsive to the desires of the members.[18] Professional and other staff members of the labor organization who do not determine the organization's policies or carry on its executive functions and who are employed merely to implement policy decisions and managerial directives established by the governing officials of the organization are not officers and are not required to be elected.

§ 452.21 Members of executive board.

The phrase "a member of its executive board or similar governing body" refers to a member of a unit identified as an executive board or a body, whatever its title, which is vested with functions normally performed by an executive board. Members of a committee which is actually the executive board or similar governing body of the union are considered officers within the meaning of section 3 (n) of the Act even if they are not so designated by the union's constitution and bylaws. For example, members of an "Executive-Grievance Committee" which exercises real governing powers are officers under the Act. However, it should be noted that committee membership alone will not ordinarily be regarded as an indication of officer status, unless the committee or its members meet the requirements contained in section 3(n) of the Act.

§ 452.22 Delegates to a convention.

Under certain circumstances, delegates to a convention of a national or international labor organization, or to an intermediate body, must be elected by secret ballot among the members in good standing of the labor organization they represent even though such delegates are not "officers" of the organization. Such election is required by the Act[19] when the delegates are to nominate or elect officers of a national or international labor organization, or of an intermediate body. There is, of course, no requirement that delegates be elected in accordance with the provisions of Title IV if they do not nominate or elect officers, unless delegates are designated as "officers" in the union's constitution and bylaws or unless, by virtue of their position, they serve as members of the executive board or similar governing body of the union.

Subpart D—Frequency and Kinds of Elections

§ 452.23 Frequency of elections.

The Act requires that all national and international labor organizations (other than federations of such labor organizations) elect their officers not less often than every five years. Officers of intermediate bodies, such as general committees, system boards, joint boards, joint councils, conferences, and certain districts, district councils and similar organizations, must be elected at least every four years, and officers of local labor organizations not less often than every three years.

§ 452.24 Terms of office.

The prescribed maximum period of three, four, or five years is measured from the date of the last election.[20] It would not be consistent with these provisions of the Act for officers elected for the maximum terms allowable under the statute to remain in office after the expiration of their terms without a new election. Failure to hold an election for any office after the statutory period has expired constitutes a continuing violation of the Act, which may be brought to the attention of the Secretary in the form of a complaint filed in accordance with the appropriate procedure. Title IV establishes only maximum time intervals between elections for officers. Labor organizations covered by these provisions may hold elections of officers with greater frequency than the specified maximum period. For example, a local labor organization is required to hold an election of officers at least once every three years, but it must hold an election every year if its governing rules so provide. It should be noted, moreover, that the provisions of Title IV apply to all regular elections of officers in labor organizations subject to the Act. Thus, if a labor organization chooses to hold elections of officers more frequently than the statutory maximum intervals, it must observe the minimum standards set forth in Title IV for the conduct of such elections.

§ 452.25 Vacancies in office.

Title IV governs the regular periodic elections of officers in labor organizations subject to the Act. No requirements are imposed with respect to the filling by election or other method of any particular office which may become vacant between such regular elections. If, for example, a vacancy in office occurs in a local labor organization, it may be filled by appointment, by automatic succession, or by a special election which need not conform to the provisions of Title IV. The provisions of section 504 of the Act, which prohibit certain persons from holding office, are applicable to such situations. While the enforcement procedures of section 402 are not available to a member in connection with the filling of an interim vacancy, remedies may be available to an aggrieved member under section 102 of the LMRDA or under any pertinent State or local law.

§ 452.26 Elections in local labor organizations.

Local labor organizations must conduct their regular elections of officers by secret ballot among the members in good standing. All members in good standing of the local labor organization must be given an opportunity to vote directly for candidates to fill the offices that serve them. Indirect election of officers of a local labor organization would violate section 401(b) of the Act. For example, a procedure whereby the local's membership elects an executive board or some similar body by secret ballot which in turn selects (either from among its own membership or from the local's membership at large) the persons to fill specific offices would not comply with the Act.[21]

---

[18] See, for example, S. Rept. 187, 86th Cong., 1st sess., p. 7.

[19] Act, sec. 401(a) and 401(d) (29 U.S.C. 481).

[20] See § 452.14 for a discussion of the selection of officers in a new or newly-merged labor organization.

[21] Wirtz v. Independent Petroleum Workers of America, 75 LRRM 2340, 63 L.C. ¶ 11,190 (N.D. Ind. 1970).

Similarly, the election of a chief steward by the shop stewards would violate the Act if the chief steward, by virtue of that position, aso serves as a member of the executive board, since members of the executive board must be elected directly by secret ballot among the members in good standing.

§ 452.27 National, international organizations, and intermediate bodies.

The officers of a national or international labor organization or of an intermediate body must be elected either directly by secret ballot among the members in good standing or indirectly by persons acting in a representative capacity who have been elected by secret ballot among all members in good standing.[22]

§ 452.28 Unopposed candidates.

An election of officers or delegates that would otherwise be required by the Act to be held by secret ballot need not be held by secret ballot when all candidates are unopposed and the following conditions are met: (1) The union provides a reasonable opportunity for nominations; (2) write-in votes are not permitted, as evidenced by provisions in the constitution and bylaws, by an official interpretation fairly placed on such documents, or by established union practice; and (3) the union complies with all other provisions of Title IV.

§ 452.29 Primary elections.

Where a union holds primary elections or similar procedures for eliminating candidates prior to the final vote in connection with regular elections subject to these provisions, the primary election or other procdeure must be conducted in accordance with the same standards required under the Act for the final election.

§ 452.30 Run-off elections.

A run-off election must meet the standards set forth in Title IV if the original election was subject to the requirements of the Act. For example, if the run-off is to be held at the same meeting as the original election, the original notice of election must have so stated and all records pertaining to the run-off must be retained.

§ 452.31 One candidate for several offices.

Where a union constitution or other validly adopted rule provides that a single elected officer will perform the functions of more than one office, a separate election need not be held for each office.

Subpart E—Candidacy for Office; Reasonable Qualifications

§ 452.32 Persons who may be candidates and hold office; secret ballot elections.

Section 401(e) provides that in any election of officers required by the Act which is held by secret ballot, every member in good standing with the exceptions explained in sections following shall be eligible to be a candidate and to hold office. This provision is applicable not only to the election of officers in local labor organizations, but also to elections of officers in national or international and intermediate labor organizations where those elections are held by secret ballot referedum among the members, and to the election of delegates to conventions at which officers will be elected.

§ 452.33 Persons who may be candidates and hold office; elections at conventions.

Where elections of national or international labor organizations or of intermediate bodies are held at a convention of delegates elected by secret ballot, protection of the right to be a candidate and to hold office is afforded by the requirement in section 401(f) that the convention be conducted in accordance with the constitution and bylaws of the labor organization insofar as they are not inconsistent with the provisions of Title IV. If members in good standing are denied the right to be candidates by the imposition of unreasonable qualifications on eligibility for office such qualifications would be inconsistent with the provisons of Title IV.

§ 452.34 Application of section 504, LMRDA.

The eligibility of members of labor organizations to be candidates and to hold office in such organizations is subject only to the provisions of section 504 (a), which bars certain individuals from holding office in labor organizations[23] and to reasonable qualifications uniformly imposed. A person who is barred from serving in union office by section 504(a) is not eligible to be a candidate. However, a labor organization may permit a person who is barred from holding union office by section 504 (a) to be a candidate for office if the section 504 disability will terminate by the customary date for the installation of officers. A labor organization may within reasonable limits adopt stricter standards than those contained in section 504(a) by extending the period of disability beyond 5 years or by barring from union office persons who have been convicted of crimes other than those specified.

§ 452.35 Qualifications for candidacy.

It is recognized that labor organizations may have a legitimate institutional interest in prescribing minimum standards for candidacy and officeholding in the organization. On the other hand, a dominant purpose of the Act is to ensure the right of members to participate fully in governing their union and to make its officers responsive to the members. A basic assumption underlying the concept of "free and democratic elections," is that voters will exercise common sense and good judgment in casting their ballots. In union elections as in political elections, the good judgment of the members in casting their votes should be the primary determinant of whether a candidate is qualified to hold office. Therefore, restrictions placed on the right of members to be candidates must be closely scrutinized to determine whether they serve union purposes of such importance, in terms of protecting the union as an institution, as to justify subordinating the right of the individual member to seek office and the interest of the membership in a free, democratic choice of leaders.

§ 452.36 Reasonableness of qualifications.

(a) The question of whether a qualification is reasonable is a matter which is not susceptible of precise definition, and will ordinarily turn on the facts in each case. However, court decisions in deciding particular cases have furnished some general guidelines. The Supreme Court in Wirtz v. Hotel, Motel and Club Employees Union, Local 6, 391 U.S. 492 at 499 (1968) held that

> Congress plainly did not intend that the authorization in section 401(e) of 'reasonable qualifications uniformly imposed' should

---

[22] See § 452.119 and following for discussion of indirect elections.

[23] Section 504(a) (29 U.S.C. 504) of the Act reads: "No person who is or has been a member of the Communist Party or has been convicted of, or served any part of a prison term resulting from this conviction of, robbery, bribery, extortion, embezzlement, grand larceny, burglary, arson, violation of narcotics laws, murder, rape, assault with intent to kill, assault which inflicts grievous bodily injury, or a violation of title II or III of this Act, or conspiracy to commit any such crimes, shall serve—

(1) As an officer, director, trustee, member of any executive board or similar governing body, business agent, manager, organizer, or other employee (other than as an employee performing exclusively clerical or custodial duties) of any labor organization, or

(2) As a labor relations consultant to a person engaged in an industry or activity affecting commerce, or as an officer, director, agent, or employee (other than as an employee performing exclusively clerical or custodial duties) of any group or association of employers dealing with any labor organization,

during or for five years after the termination of his membership in the Communist Party, or for five years after such conviction or after the end of such imprisonment, unless prior to the end of such five-year period, in the case of a person so convicted or imprisoned, (A) his citizenship rights, having been revoked as a result of such conviction, have been fully restored, or (B) the Board of Parole of the United States Department of Justice determines that such person's service in any capacity referred to in clause (1) or (2) would not be contrary to the purposes of this Act. Prior to making any such determination the Board shall hold an administrative hearing and shall give notice of such proceeding by certified mail to the State, county, and Federal prosecuting officials in the jurisdiction or jurisdictions in which such person was convicted. The Board's determination in any such proceeding shall be final. No labor organization or officer thereof shall knowingly permit any person to assume or hold any office or paid position in violation of this subsection."

NOTE: The U.S. Supreme Court, on June 7, 1965, held unconstitutional as a bill of attainder the section 504 provision which imposes criminal sanctions on Communist Party members for holding union office; U.S. v. Brown, 381 U.S. 437.

be given a broad reach. The contrary is implicit in the legislative history of the section and in its wording that 'every member in good standing shall be eligible to be a candidate and to hold office * * *.' This conclusion is buttressed by other provisions of the Act which stress freedom of members to nominate candidates for office. Unduly restrictive candidacy qualifications can result in the abuses of entrenched leadership that the LMRDA was expressly enacted to curb. The check of democratic elections as a preventive measure is seriously impaired by candidacy qualifications which substantially deplete the ranks of those who might run in opposition to incumbents.

Union qualifications for office should not be based on assumptions that certain experience or qualifications are necessary. Rather it must be assumed that the labor organization members will exercise common sense and judgment in casting their ballots. "Congress' model of democratic elections was political elections in this country" (Wirtz v. Local 6, 391 U.S. at 502) and a qualification may not be required without a showing that citizens assumed to make discriminating judgments in public elections cannot be relied on to make such judgments when voting as union members.

(b) Some factors to be considered, therefore, in assessing the reasonableness of a qualification for union office are

1. The relationship of the qualification to the legitimate needs and interests of the union;
2. The relationship of the qualification to the demands of union office;
3. The impact of the qualification, in the light of the Congressional purpose of fostering the broadest possible participation in union affairs;
4. A comparison of the particular qualification with the requirements for holding office generally prescribed by other labor organizations; and
5. The degree of difficulty in meeting a qualification by union members.

§ 452.37 Types of qualifications.

Ordinarily the following types of requirements may be considered reasonable, depending on the circumstances in which they are applied and the effect of their application:

(a) *Period of prior membership.* It would ordinarily be reasonable for a local union to require a candidate to have been a member of the organization for a reasonable period of time, not exceeding two years, before the election. However, if a member is involuntarily compelled to transfer from one local to another, such a requirement would not be reasonable if he is not given credit for his prior period of membership.

(b) *Continuity of good standing.* A requirement of continuous good standing based on punctual payment of dues will be considered a reasonable qualification only if (1) it provides a reasonable grade period during which members may make up missed payments without loss of eligibility for office,[24] and (2) the period of time involved is reasonable. What are reasonable periods of time for these purposes will depend upon the circumstances. Section 401(e) of the Act provides that a member whose dues have been withheld by the employer for payment to the labor organization pursuant to his voluntary authorization provided for in a collective bargaining agreement may not be declared ineligible to vote or be a candidate for office by reason of alleged delay or default in the payment of dues. If during the period allowed for payment of dues in order to remain in good standing, a member on a dues checkoff system has no earnings from which dues can be withheld, section 401(e) does not relieve the member of the responsibility of paying his dues in order to remain in good standing.

§ 452.38 Meeting attendance requirements.

(a) It may be reasonable for a labor organization to establish a requirement of attendance at a specified number of its regular meetings during the period immediately preceding an election, in order to insure that candidates have a demonstrated interest in and familiarity with the affairs of the organization. In the past, it was ordinarily considered reasonable to require attendance at no more than 50 percent of the meetings over a period not exceeding two years. Experience has demonstrated that it is not feasible to establish arbitrary guidelines for judging the reasonableness of such a qualification. Its reasonableness must be gauged in the light of all the circumstances of the particular case, including not only the frequency of meetings, the number of meetings which must be attended and the period of time over which the requirement extends, but also such factors as the nature, availability and extent of excuse provisions, whether all or most members have the opportunity to attend meetings, and the impact of the rule, i.e., the number or percentage of members who would be rendered ineligible by its application.[25]

(b) Some guidance is furnished by court decisions which have held particular meeting attendance requirements to be unreasonable under the following circumstances: one meeting during each quarter for the three years preceding nomination, where the effect was to disqualify 99 percent of the membership (Wirtz v. Independent Workers Union of Florida, 65 LRRM 2104, 55 L.C. ¶11,857 (M.D. Fla. 1967)); 75 percent of the meetings held over a two-year period, with absence excused only for work or illness, where over 97 percent of the members were ineligible (Wirtz v. Local 153, Glass Bottle Blowers Ass'n., 244 F.Supp. 745 (W.D. Pa. 1965), order vacating decision as moot, 372 F.2d 86 (C.A. 3 1966), reversed 389 U.S. 463; decision on remand, 405 F.2d 176 (C.A. 3 1968)); Wirtz v. Local 262, Glass Bottle Blowers Ass'n., 290 F.Supp. 965 (N.D. Cal., 1968)); attendance at each of eight meetings in the two months between nomination and election, where the meetings were held at widely scattered locations within the state (Hodgson v. Local Union No. 624 A–B, International Union of Operating Engineers, 80 LRRM 3049, 68 L.C. ¶12,816 (S.D. Miss. Feb. 19, 1972)).

§ 452.39 Participation in insurance plan.

In certain circumstances, in which the duties of a particular office require supervision of an insurance plan in more than the formal sense, a union may require candidates for such office to belong to the plan.

§ 452.40 Prior office holding.

A requirement that candidates for office have some prior service in a lower office is not considered reasonable.[26]

§ 452.41 Working at the trade.

(a) It would ordinarily be reasonable for a union to require candidates to be employed at the trade or even to have been so employed for a reasonable period. In applying such a rule an unemployed member is considered to be working at the trade if he is actively seeking such employment. Such a requirement should

---

[24] In Goldberg v. Amarillo General Drivers, Teamsters Local 577, 214 F. Supp. 74 (N.D. Tex. 1963), the disqualification of five nominees for union office for failure to satisfy a constitutional provision requiring candidates for office to have maintained continuous good standing for two years by paying their dues on or before the first business day of the current month, in advance, was held to be unreasonable. See also Wirtz v. Local Unions No. 9, 9–A and 9–B, International Union of Operating Engineers, 254 F. Supp. 980 (D. Colo. 1965), aff'd. 366 F. 2d 911 (CA 10 1966), vacated as moot 387 U.S. 96 (1967).

[25] Cf. Writz v. Hotel, Motel and Club Employees Union, Local 6, 391 U.S. 492, at 502: "Plainly, given the objective of Title IV, a candidacy limitation which renders 93% of union members ineligible for office can hardly claim to be a 'reasonable qualification.'"

[26] Wirtz v. Hotel, Motel and Club Employees Union, Local 6, 391 U.S. 492 at 504. The Court stated that the union, in applying such a rule, "* * * assumes that rank and file union members are unable to distinguish qualified from unqualified candidates for particular offices without a demonstration of a candidate's performance in other offices. But Congress' model of democratic elections was political elections in this Country, and they are not based on any such assumption. Rather, in those elections the assumption is that voters will exercise common sense and judgment in casting their ballots. Local 6 made no showing that citizens assumed to make discriminating judgments in public elections cannot be relied on to make such judgments when voting as union members * * *."

not be so inflexible as to disqualify those members who are familiar with the trade but who because of illness, economic conditions, or other good reasons are temporarily not working.

(b) It would be unreasonable for a union to prevent a person from continuing his membership rights on the basis of failure to meet a qualification which the union itself arbitrarily prevents the member from satisfying. If a member is willing and able to pay his union dues to maintain his good standing and his right to run for office, it would be unreasonable for the union to refuse to accept such dues merely because the person is temporarily unemployed. Where a union constitution requires applicants for membership to be actively employed in the industry served by the union, a person who becomes a member would not be considered to forfeit his membership in the union or any of the attendant rights of membership merely because he is discharged or laid off.

(c) Ordinarily members working part-time at the trade may not for that reason alone be denied the right to run for office.

(d) A labor organization may postpone the right to run for office of members enrolled in a bona fide apprenticeship program until such members complete their apprenticeship.

§ 452.42 Membership in particular branch or segment of the union.

A labor organization may not limit eligibility for office to particular branches or segments of the union where such restriction has the effect of depriving those members who are not in such branch or segment of the right to become officers of the union.[27]

§ 452.43 Representative categories.

In the case of a position which is representative of a unit defined on a geographic, craft, shift, or similar basis, a labor organization may by its constitution or bylaws limit eligibility for candidacy and for holding office to members of the represented unit. For example, a national or international labor organization may establish regional vice-presidencies and require that each vice-president be a member of his respective region. This kind of limitation would not be considered reasonable, however, if applied to general officers such as the president, vice-president, recording secretary, financial secretary, and treasurer. If eligibility of delegates to a convention which will elect general officers is limited to special categories of members, all such categories within the organization must be represented.

§ 452.44 Dual unionism.

While the Act does not prohibit a person from maintaining membership or holding office in more than one labor organization, it would be considered reasonable for a union to bar from candidacy for office persons who hold membership in a rival labor organization.

§ 452.45 Multiple officeholding.

An officer may hold more than one office in a labor organization so long as this is consistent with the constitution and bylaws of the organization.

§ 452.46 Characteristics of candidate.

Where personal characteristics have a direct bearing on fitness for office, a labor organization may establish certain restrictions on the right to be a candidate. For example, it may require a minimum age for candidacy or it may establish a compulsory retirement age for officers. A union may not, however, establish such rules if they would be inconsistent with any other Federal law. Thus, it ordinarily may not limit eligibility for office to persons of any particular race, color, religion, sex, or national origin since this would be inconsistent with the Civil Rights Act of 1964.[28] A union may not require candidates for office to be registered voters and to have voted in public elections during the year preceding their nomination. Similarly, it cannot require that candidates have voted in the previous union election to be eligible. Such restrictions may not be said to be relevant to the member's fitness for office.

§ 452.47 Employer or supervisor members.

Inasmuch as it is an unfair labor practice under the Labor-Management Relations Act (LMRA) for any employer (including persons acting in that capacity) to dominate or interfere with the administration of any labor organization, it follows that employers, while they may be members, may not be candidates for office or serve as officers. Thus, while it is recognized that in some industries, particularly construction, members who become foremen, supervisors, or contractors traditionally keep their union membership as a form of job security or as a means of retaining union benefits, such persons may not be candidates for or hold office.[29] Whether a restriction on officeholding by members who are group leaders or others performing some supervisory duties is reasonable depends on the particular circumstances. For instance, if such persons might be considered "supervisors"[30] under the LMRA, their right to be candidates under the Act may be limited. Another factor in determining the reasonableness of a ban on such persons is the position (if any) of the NLRB on the status of the particular employees involved. If, for example, the NLRB has determined that certain group leaders are part of the bargaining unit, it might be unreasonable for the union to prohibit them from running for office. An overall consideration in determining whether a member may fairly be denied the right to be a candidate for union office as an employer or supervisor is whether there is a reasonable basis for assuming that the person involved would be subject to a conflict of interest in carrying out his representative duties for employees and rank and file union members.

§ 452.48 Employees of union.

A labor organization may in its Constitution and By-Laws prohibit members who are also its full-time non-elective employees from being candidates for union office, because of the potential conflict of interest arising from the employment relationship which could be detrimental to the union as an institution.

§ 452.49 Other union rules.

(a) Unions may establish such other reasonable rules as are necessary to protect the members against leaders who may have committed serious offenses against the union. For example, a union may, after appropriate proceedings, bar from office persons who have misappropriated union funds, even if such persons were never indicted and convicted in a court of law for their offenses. Of course, the union would have to provide reasonable precautions to insure that no member is made ineligible to hold office on the basis of unsupported allegations and that any rights guaranteed him by the constitution and bylaws are protected. Similarly, a union may require an elected officer to sign an affidavit averring that he is not barred from serving as an officer by the provisions of section 504 of the Act since the union and its officers may not permit a person to serve as an officer if he is so barred (see footnote 24).

(b) It would not violate the Act for a union to prohibit successive terms in office or to limit the number of years an officer may serve. Such rules are intended to encourage as many members as possible to seek positions of leadership in the organization.

§ 452.50 Disqualification as a result of disciplinary action.

Section 401(e) was not intended to limit the right of a labor organization to take disciplinary action against members guilty of misconduct. So long as such action is conducted in accordance with section 101(a)(5), a union may, for example, if its constitution and bylaws so provide, bar from office for a period of time any member who is guilty of specific

---

[28] Shultz v. Local 1291, International Longshoremen's Association, 338 F. Supp. 1204 (E.D. Pa.), aff'd, 461 F.2d 1262 (C.A. 3, July 20, 1972).

[29] See Nassau and Suffolk Contractors' Association, 118 NLRB No. 19 (1957). See also Local 636, Plumbers v. NLRB, 287 F.2d 354 (C.A. D.C. 1961).

[30] Under section 2(11) of the Labor Management Relations Act, supervisors include individuals "having authority, in the interest of the employer, to hire, transfer, suspend, lay off, recall, promote, discharge, assign, reward, or discipline other employees, or responsibly to direct them, or to adjust their grievances, or effectively to recommend such action, if in connection with the foregoing the exercise of such authority is not of a merely routine or clerical nature, but requires the use of independent judgment."

acts, such as strikebreaking, detrimental to the union as an institution. However, if a union has improperly disciplined a member and barred him from candidacy, the Secretary may, in an appropriate case, treat him as a member in good standing entitled to all of the rights of members guaranteed by Title IV.

§ 452.51 Declaration of candidacy.

A union may not adopt rules which in their effect discourage or paralyze any opposition to the incumbent officers. Therefore, it would not be a reasonable qualification to require members to file a declaration of candidacy several months in advance of the nomination meeting since such a requirement would have such effect and "serves no reasonable purpose which cannot otherwise be satisfied without resort to this procedure." [31]

§ 452.52 Filing fee.

It would be unreasonable to require candidates for office to pay a filing fee because a fee limits the right of members to a reasonable opportunity to nominate the candidates of their choice and there is no objective relationship between the requirement and the ability to perform the duties of the office.

§ 452.53 Application of qualifications for office.

Qualifications for office which may seem reasonable on their face may not be proper if they are applied in an unreasonable manner or if they are not applied in a uniform way. An essential element of reasonableness is adequate advance notice to the membership of the precise terms of the requirement. A qualification which is not part of the constitution and bylaws or other duly enacted rules of the organization may not be the basis for denial of the right to run for office, unless required by Federal or State law.[32] Qualifications must be specific and objective. They must contain specific standards of eligibility by which any member can determine in advance whether or not he is qualified to be a candidate. For example, a constitutional provision which states that "a candidate shall not be eligible to run for office who intends to use his office as a cloak to effect purposes inimical to the scope and policies of the union" would not be a reasonable qualification within the meaning of section 401(e) because it is so general as to preclude a candidate from ascertaining whether he is eligible and would permit determinations of eligibility based on subjective judgments. Further, such a requirement is by its nature not capable of being uniformly imposed as required by section 401(e).

[31] Wirtz v. Local 30, IUOE, 242 F. Supp. 631 (S.D. N.Y. 1965) reversed as moot 366 F.2d 438 (C.A. 2, 1966), reh. den. 366 F.2d 438.

[32] Wirtz v. Local Union 559, United Brotherhood of Carpenters and Joiners of America, 61 LRRM 2618, 53 L.C. ¶ 11.044 (W.D. Ky. 1966); Hodgson v. Longshoremen's Local 1655 New Orleans Dray Clerks, 79 LRRM 2893, 67 L.C. ¶ 12,466 (E.D. La. January 5, 1972).

§ 452.54 Retroactive rules.

(a) The reasonableness of applying a newly adopted restriction on candidacy retroactively depends in part upon the nature of the requirement. It would be unreasonable for a labor organization to enforce eligibility requirements which the members had no opportunity to satisfy. For example, it would not be reasonable for a union to apply a newly adopted meeting attendance requirement retroactively since members would have no opportunity to comply with such requirement prior to its effective date.[33] When such a rule is in effect the membership is entitled to advance notice of the requirements of the rule and of the means to be used in verifying attendance. It would not be unreasonable, however, for a union to adopt and enforce a rule disqualifying persons convicted of a felony from being candidates or holding office.

(b) It would not be proper for a labor organization to amend its constitution after an election to make eligible a person who had been elected but who was not eligible at the time of the election.

Subpart F—Nominations for Office

§ 452.55 Statutory provisions concerning nomination.

In elections subject to the provisions of Title IV a reasonable opportunity must be afforded for the nomination of candidates. Although the Act does not prescribe particular forms of nomination procedures, it does require that the procedures employed be reasonable and that they conform to the provisions of the labor organization's constitution and bylaws insofar as they are not inconsistent with the provisions of Title IV.

§ 452.56 Notice.

(a) To meet this requirement, the labor organization must give timely notice reasonably calculated to inform all members of the offices to be filled in the election as well as the time, place, and form for submitting nominations. Such notice should be distinguished from the notice of election, discussed in § 452.99. Notice of nominations need not necessarily be given at least 15 days before nominations are held, nor is it required to be given by mail. In an election which is to be held by secret ballot, accordingly, notice of nominations may be given in any manner reasonably calculated to reach all members in good standing and in sufficient time to permit such members to nominate the candidates of their choice, so long as it is in accordance with the provisions of the labor organization's constitution or bylaws. Mailing such notice to the last known address of each member within a reasonable time prior to the date for making nominations would satisfy this requirement. Likewise, timely publication in the union newspaper with sufficient prominence to be seen by all members would be adequate notice. The method of making nominations, whether by mail, petition, or at meetings, could affect the determination of the timeliness of the notice. The nomination notice may be combined with the election notice if the requirements of both are met. Posting of a nomination notice may satisfy the requirement of a reasonable opportunity for making nominations if such posting is reasonably calculated to inform all members in good standing in sufficient time to permit such members to nominate the candidates of their choice.

(b) The requirement of a reasonable opportunity for the nomination of candidates has been met only when the members of a labor organizations are fully informed of the proper method of making such nominations.

[33] Hodgson v. Longshoremen's Local 1655, New Orleans Dray Clerks, 79 LRRM 2893, 67 L.C. ¶12,466 (E.D. La. January 5, 1972)

§ 452.57 Procedures for nomination.

(a) Since the Act does not prescribe particular procedures for the nomination of candidates, the labor organization is free to employ any method that will provide a reasonable opportunity for making nominations. There are various methods which, if properly and fairly employed, would be considered reasonable under the Act. For example, nominations may be by petition, or from the floor at a nomination meeting.

(b) Whether a particular procedure is sufficient to satisfy the requirements of the Act is a question which will depend upon the particular facts in each case. While a particular procedure may not on its face violate the requirements of the Act, its application in a given instance may make nomination so difficult as to deny the members a reasonable opportunity to nominate.

§ 452.58 Self-nomination.

A system of self-nomination, if this is the only method for making nominations, deprives union members of a reasonable opportunity to nominate candidates and thus is inconsistent with the provisions of Title IV.[34] Self-nomination is permissible only if the members are afforded additional methods whereby they may nominate the candidates of their choice.

§ 452.59 Presence of nominee.

A requirement that members must be present at the nomination meeting in order to be nominated for office might be considered unreasonable in certain circumstances; for example, in the absence of a provision for an alternative method under which a member who is unavoidably absent from the nomination meeting may be nominated, such a restriction might be regarded as inconsistent with the requirement in section 401(e) that there be a reasonable opportunity to nominate and to be a candidate.

§ 452.60 Nominations for national, international or intermediate body office.

(a) When officers of a national or international labor organization or of an

[34] See Wirtz v. National Maritime Union of America, 399 F.2d 544 (C.A. 2 1968).

intermediate body are to be elected by secret ballot among the members of the constituent local unions, it is not unreasonable for the organization to employ a nominating procedure whereby each local may nominate only one candidate for each office. When such a procedure is employed the organization may require that each candidate be nominated by a certain number of locals before his name will appear on the ballot. The reasonableness of the number of local union nominations or endorsements required depends upon the size and dispersion of the organization.

(b) Nominations for national, international or intermediate body office by locals or other subordinate organizations differ from primary elections in that they are not subject to all the technical requirements of secret ballot elections.[26] However, where nominations are made by locals or other subordinate organizations fundamental safeguards must be observed including the right of members to vote for and support the candidates of their choice without improper interference.

§ 452.61 Elimination contests—local unions.

(a) A procedure in a local under which nominees compete in an elimination process to reduce the number of candidates in the final balloting is also part of the election process and must be conducted by secret ballot.

(b) When such an elimination process is used it would be unreasonable for some nominees, such as those selected by a nominating committee, to be exempt from the process since they would thus be given an unfair advantage over other nominees.

§ 452.62 Disqualification of candidates: procedural reasons.

A candidate who is otherwise eligible for office may not be disqualified because of the failure of a union officer to perform his duties which are beyond the candidate's control. For example, the failure of a local recording secretary to perform his duty to complete and forward a candidate's nomination certificate to the district may not be used as the basis for disqualifying the candidate.

§ 452.63 Nominations at conventions.

In elections at conventions at which nominations are also made, delegates who have been elected by secret ballot must be given ample opportunity to nominate candidates on behalf of themselves or the members they represent. A union may adopt a rule limiting access to the convention floor to delegates. However, once the candidates have been nominated, they must be accorded equal opportunity to campaign.[26] Where delegates are instructed by locals to nominate candidates, the constitution of the organization or the convention rules should provide a specific procedure for the implementation of nominating instructions issued by any local to its delegate.

§ 452.64 Write-in votes.

The Act neither requires nor prohibits write-in candidacy or write-in votes. These matters are governed by appropriate provisions of the union's constitution and bylaws, applicable resolutions, or the established practice of the union.

§ 452.65 Interval between nominations and election.

The Act specifies no time interval between nominations and election. Thus, both may be scheduled to be held at the same meeting if, during a reasonable period prior to such nomination-election meeting, every member eligible to hold office who intends to run for office is afforded the protection provided in section 401(c), including sufficient opportunity to campaign for office.

Subpart G—Campaign Safeguards

§ 452.66 Statutory provisions.

The opportunity for members to have a free, fair, and informed expression of their choices among candidates seeking union office is a prime objective of Title IV of the Act. Voters can best be assured opportunity for an informed choice if certain campaign rights are guaranteed to candidates and their supporters. To this end, the statute provides that adequate safeguards to insure a fair election shall be provided, and states certain specific safeguards. These safeguards apply not only to candidates for officer positions as defined in the Act but also to candidates for delegate posts. if the delegates are to nominate or elect officers.

§ 452.67 Distribution of campaign literature.

The Act imposes the duty on the union and its officers to comply with all reasonable requests of any candidate to distribute his campaign literature to the membership at his expense. When the organization or its officers authorize distribution of campaign literature on behalf of any candidate, similar distribution under the same conditions must be made for any other candidate, if he requests it. In order to avoid charges of disparity of treatment among candidates, it is advised that a union inform all candidates in advance of the conditions under which distribution will be made and promptly advise them of any change in those conditions.

§ 452.68 Distribution to less than full membership.

Although section 401(c) specifies distribution to "all members in good standing," a labor organization must also honor requests for distribution of literature to only a portion of the membership if such distribution is practicable. Each candidate may choose his own ways of campaigning for election according to his own ingenuity and resources. For example, some candidates for national or international union office may desire to limit distribution to delegates, but others may want to appeal directly to the membership or parts thereof in an effort to influence particular constituencies to choose delegates favorable to their candidacy.

§ 452.69 Expenses of campaign literature.

Each candidate must be treated equally with respect to the expense of such distribution. Thus, a union and its officers must honor a candidate's request for distribution where the candidate is willing and able to bear the expense of such distribution. However, should the candidate be unable to bear such expense, there is no requirement that the union distribute the literature of the candidate free of charge. In the event the union distributes any candidate's literature without charge, however, all other candidates are entitled to have their literature distributed on the same basis. Since labor organizations have an affirmative duty to comply with all reasonable requests of any candidate to distribute campaign literature (at the candidate's expense), a union rule refusing all such distributions would not be proper, even though applied in a nondiscriminatory fashion. In view of the fact that expenses of distribution are to be borne by the candidate a labor organization may not refuse to distribute campaign literature merely because it may have a small staff which cannot handle such distribution for all candidates. If this is the case, the organization may employ additional temporary staff or contract the job to a professional mailer and charge the expense incurred to the candidates for whom the service is being rendered. The organization may require candidates to tender in advance the estimated costs of distributing their literature, if such requirement is applied uniformly.

§ 452.70 Contents of literature.

The Act does not and unions may not regulate the contents of campaign literature which candidates may wish to have distributed by the union. This is left to the discretion of each candidate. The labor organization may not require that it be permitted to read a copy of the literature before it is sent out, nor may it censor the statements of the candidates in any way, even though the statement may include derogatory remarks about other candidates. Furthermore, a union's contention that mailing of certain campaign literature may constitute libel for which it may be sued has been held not to justify its refusal to distribute the literature, since the union is under a statutory duty to distribute the material.[27]

---

[26] In Hodgson v. United Mine Workers of America, the Court directed that the nomination proceedings within the local unions be conducted by secret ballot and in accordance with the provisions of Title IV. [80 LRRM 3451, 68 L.C. ¶ 12,786 (D.D.C. June 15, 1972)]. This Order indicates that the use of secret ballot nominating procedures may be an appropriate remedial measure in a supervised election.

[26] See § 452.79.

[27] See Philo v. Stellato, (E.D. Mich. Civil No. 21244, May 24, 1961); Ansley v. Fulco, (Calif. Ct. of Appeal, First App. District, Div. Three, 1 Civil No. 29483, May 31, 1972).

§ 452.71 Inspection of membership lists.

(a) Each bona fide candidate for office has a right, once within 30 days prior to any election in which he is a candidate, to inspect a list containing the names and last known addresses of all members of the labor organization who are subject to a collective bargaining agreement requiring membership therein as a condition of employment. The right of inspection does not include the right to copy the list but does include the right to compare it with a personal list of members. It is the intent of the Act that such membership lists be made available for inspection at the candidates' option any time within the 30-day period. The list is not required to be maintained continuously and may be compiled immediately before each election. The form in which the list is to be maintained is not specified by the Act, Thus, a card index system may satisfy the requirements of the Act. The list may be organized alphabetically or geographically, or by local in a national or international labor organization.

(b) It is the duty of the labor organization and its officers to refrain from discrimination in favor of or against any candidate with respect to the use of lists of members. Thus, if a union permits any candidate to use such lists in any way other than the right of inspection granted by the Act, it must inform all candidates of the availability of the list for that purpose and accord the same privilege to all candidates who request it. Such privileges may include permitting inspection of the list where members are not subject to a collective bargaining agreement requiring membership as a condition of employment, inspecting the list more than once, or copying the list.

§ 452.72 Period of inspection.

The Act specifies the maximum period during which the right of inspection of membership lists is to be granted. The opportunity to inspect the lists must be granted once during the 30-day period prior to the casting of ballots in the election. Thus, where a mail ballot system is employed under which ballots are returnable as soon as received by members, the right to inspect must be accorded within the 30-day period prior to the mailing of the ballot to members. It would be an unreasonable restriction to permit inspection of lists only after the ballots have been mailed or the balloting has commenced.

§ 452.73 Use of union funds.

In the interest of fair union elections, section 401(g) of the Act places two limitations upon the use of labor organization funds derived from dues, assessments, or similar levy. These limitations are: (a) No such funds may be contributed or applied to promote the candidacy of any person in an election subject to Title IV, either in an election within the organization expending the funds or in any other labor organization; and (b) no such funds may be used for issuing statements involving candidates in the election. This section is not intended to prohibit a union from assuming the cost of distributing to the membership on an equal basis campaign literature submitted to the union by the candidates pursuant to the rights granted by section 401(c), as previously discussed, nor does it prohibit the expenditure of such funds for notices, factual statements of issues not involving candidates, and other expenses necessary for the holding of the election.

§ 452.74 Expenditures permitted.

The Act does not prohibit impartial publication of election information. Thus, it would not be improper for a union to sponsor a debate at which all candidates for a particular office are afforded equal opportunity to express their views to the membership prior to an election. Similarly, a union may issue information sheets containing biographical data on all candidates so long as all candidates are given equal opportunity to submit such data.

§ 452.75 Union newspapers.

The provisions of section 401(g) prohibit any showing of preference by a labor organization or its officers which is advanced through the use of union funds to criticize or praise any candidate. Thus, a union may neither attack a candidate in a union-financed publication nor urge the nomination or election of a candidate in a union-financed letter to the members. Any such expenditure regardless of the amount, constitutes a violation of section 401(g).[28]

§ 452.76 Campaigning by union officers.

Unless restricted by constitutional provisions to the contrary, union officers and employes retain their rights as members to participate in the affairs of the union, including campaigning activities on behalf of either faction in an election. However, such campaigning must not involve the expenditure of funds in violation of section 401(g). Accordingly, officers and employees may not campaign on time that is paid for by the union, nor use union funds, facilities, equipment, stationery, etc., to assist them in such campaigning. Campaigning incidental to regular union business would not be a violation.

§ 452.77 Permissible use of union funds.

Certain uses of union funds are considered permissible under section 401(g). For example, a court ruled that money of a subordinate union may be contributed to a committee formed to challenge the results of a national union election under Title IV when such contributions are properly authorized by the members in an effort to pursue election remedies both within and outside the union. In holding such activity to be outside the prohibitions of section 401(g), although the committee was formed by defeated candidates and their supporters, the court stated that ". . . It does not promote the candidacy of any person if an election is declared invalid by a court under Title IV's procedure despite the fact that in the rerun election the candidates may be identical. Neither the winner nor the loser of the disputed election gains votes by the setting aside of the election. Such action is not a vote-getting device but merely returns the parties to their pre-election status; it does not place any candidate into office."[29]

§ 452.78 Expenditures by employers.

(a) As an additional safeguard, section 401(g) provides that no money of an employer is to be contributed or applied to promote the candidacy of any person in an election subject to the provisions of Title IV. This includes indirect as well as direct expenditures. Thus, for example, campaigning by union stewards on company time with the approval of the employer would violate section 401(g) unless it can be shown that they are on legitimate work assignments, and that their campaign activities are only incidental to the performance of their assigned task and do not interfere with its performance. This prohibition againt the use of employer money includes any costs incurred by an employer, or anything of value contributed by an employer, in order to support the candidacy of any individual in an election. It would not, however, extend to ordinary business practices which result in conferring a benefit, such as, for example, a discount on the cost of printing campaign literature which is made available on the same terms to other customers.

(b) The prohibition against the use of employer money to support the candidacy of a person in any election subject to the provisions of Title IV is not restricted to employers who employ members of the labor organization in which the election is being conducted, or who have any business or contractual relationship with the labor organization.

§ 452.79 Opportunity to campaign.

There must be a reasonable period prior to the election during which office-seekers and their supporters may engage in the campaigning that the Act contemplates and guarantees. What is a reasonable period of time would depend upon the circumstances, including the method of nomination and the size of the union holding the election, both in terms of the number of members and the geographic area in which it operates. For example, a candidate for office in a local labor organization was improperly disqualified and then appealed to the international union which directed that his name be placed on the ballot. A complaint was considered properly filed alleging election violations because the candidate's name was restored to the

[28] Hodgson v. Liquor Salesmen's Union, Local No. 2, 334 F.Supp. 1369 (S.D. N.Y.) aff'd 449 F.2d 1344 (C.A. 2 1971); Shultz v. Local Union 6799, United Steelworkers, 426 F.2d 969 (C.A. 9 1970).

[29] Retail Clerks Union, Local 648 v. Retail Clerks International Association, 299 F.Supp. 1012, 1024 (D.D.C. 1969).

ballot two days prior to the election so that he was denied an equal opportunity to campaign. Similarly, in a mail ballot election a union's delay in the distribution of campaign literature until after the ballots have been distributed and some have been cast would not satisfy the requirement to distribute such literature in compliance with a reasonable request.[40] Such a delay would deny the candidate a reasonable opportunity to campaign prior to the election and would thus not meet the requirement for adequate safeguards to insure a fair election. Where access to the convention floor is limited exclusively to delegates at a convention at which officers are to be elected, there must, nevertheless, be equal opportunity for all nominees to campaign. Thus, if the privilege of addressing the convention is accorded to any of the nominees, it must be accorded to all nominees who request it, whether they are delegates or not.

§ 452.80 Bona fide candidates.

A person need not be formally nominated in order to be a bona fide candidate entitled to exercise the rights mentioned in § 452.67 and § 452.71.[41] Thus, any qualified member seeking to be nominated and elected at a convention would be table to take advantage of the distribution rights even before the convention meets and thus attempt to influence members to select delegates favorable to his candidacy or to persuade the delegates to support his candidacy. A union may reasonably require that a person be nominated in order to be elected, but many not prevent a member who actively seeks office and is otherwise qualified from taking advantage of the campaign safeguards in the Act in an effort to gain the support necessary to be nominated.

§ 452.81 Rights in intermediate body elections.

While the literal language in section 401(c) relating to distribution of campaign literature and to discrimination with respect to the use of membership lists would seem to apply only to national, international and local labor organizations, two United States District Courts have held that these provisions also apply to intermediate bodies.[42] The Department of Labor considers these rulings to be consistent with the intent of Congress and, therefore, has adopted this position.

§ 452.82 Reprisal for exercising rights.

A member has a right to support the candidate of his choice without being subject to penalty, discipline, or improper interference or reprisal of any kind by the labor organization conducting the election or any member thereof.

[40] Wirtz v. American Guild of Variety Artists, 267 F. Supp. 527 (S.D.N.Y. 1967).

[41] Yablonski v. United Mine Workers, 71 LRRM 2606, 60 L.C. 10,204 (D.D.C 1969).

[42] Antal v. UMW District 5, 64 LRRM 2222, 54 L.C. 11,621 (W.D. Pa. 1966); Schonfeld v. Rarback, 49 L.C. 19,039 (S.D.N.Y. 1964).

§ 452.83 Enforcement of campaign safeguards.

Certain of the safeguards of section 401(c) are enforceable at the suit of any bona fide candidate. This special statutory right to sue is limited to the distribution of campaign literature by the labor organization and the forbearance of such organization from discrimination among candidates with respect to the use of membership lists. Of course, all Title IV safeguards, including those discussed in this paragraph, are subject to enforcement as provided in section 402. It should be noted that the right of a bona fide candidate to sue in the circumstances described herein is limited to the period prior to election. After the election, the only remedy would be through a suit by the Secretary under section 402.

Subpart H—Right to Vote

§ 452.84 General.

Under the provisions of section 401 (e), every member in good standing is entitled to vote in elections required under Title IV which are to be held by secret ballot. The phrase "member in good standing" includes any person who has fulfilled the requirements for membership and who neither has withdrawn from membership nor has been expelled or suspended from membership after appropriate proceedings consistent with lawful provisions of the constitution and bylaws of the organization.[43]

§ 452.85 Reasonable qualifications on right to vote.

The basic right of members to vote in elections of the labor organization may be qualified by reasonable rules and regulations in its constitution and bylaws.[44]

§ 452.86 Vote conditioned on payment of dues.

A labor organization may condition the exercise of the right to vote upon the payment of dues, which is a basic obligation of membership. Such a rule must be applied uniformly. If a member has not paid his dues as required by the labor organization's constitution or bylaws he may not be allowed to vote. Thus, a rule which suspends a member's right to vote in an election of officers while the member is laid off and is not paying dues would not, in ordinary circumstances, be considered unreasonable, so long as it is applied in a nondiscriminatory manner. However, members must be afforded a reasonable opportunity to pay dues, including a grace period during which dues may be paid without any loss of rights. In the case where a member is laid off but desires to maintain his good standing and thus his membership rights by continuing to pay dues, it would be clearly unreasonable for the labor organization to refuse to accept his payment.

§ 452.87 Dues paid by checkoff.

A member in good standing whose dues are checked off by his employer pursuant to his voluntary authorization provided for in a collective bargaining agreement may not be disqualified from voting by reason of alleged delay or default in the payment of dues. For example, the constitution and bylaws of a labor organization call for suspension of members whose dues are three months in arrears. Dues to be paid directly by a member are two months in arrears when the union changes to a checkoff system. The member may not be denied the right to vote merely because the employer is late in submitting the checked off dues for the first month. It would not be inconsistent with the Act, however, for a union to require a new member who executes a checkoff authorization to pay one month's dues in advance on the date he becomes a member in order to be in good standing for the current month.

[43] Act, sec. 3(o).

[44] Act, sec. 101(a)(1).

§ 452.88 Resumption of good standing.

While it is permissible for a labor organization to deny the right to vote to those delinquent in paying their dues (with the exceptions noted) or to those who have been suspended or disciplined in accordance with section 101(a)(5) of the Act, a provision under which such persons are disqualified from voting for unextended period of time after payment of back dues or after reinstatement would not be considered reasonable. After a member has resumed his good-standing status, it would be unreasonable to continue to deprive him of his right to vote for a period longer than that for a new member. A new member may reasonably be required to establish a relationship with the union by remaining in good standing for a continuous period of time, e.g., 6 months or a year, before being permitted to vote in an election of officers. However, while the right to vote may be deferred within reasonable limits, a union may not create special classes of nonvoting members.

§ 452.89 Apprentices.

A labor organization may condition the right to vote upon completion of a bona fide program of apprenticeship training which is designed to produce competent tradesmen in the industry the union serves.

§ 452.90 Visiting members.

A decision about the voting rights of visiting members is properly one for resolution by the union in accordance with the organization's constitution and bylaws or applicable resolutions. For purposes of the Act, a person is ordinarily considered to be a member of the local to which he pays his dues.

§ 452.91 Voting by employers, supervisors.

Voting in union elections by employers, self-employed persons, supervisors or other persons who are considered to be part of management is not precluded by Title IV of the Act even if they are not required to maintain union membership as a condition of employment. However, as mentioned in the discussion of qualifications for candidacy (see § 452.47), such persons may not dominate or inter-

fere with the administration of any labor organization.

§ 452.92 Unemployed members.

Members who are otherwise qualified to vote may not be disqualified from voting merely because they are currently unemployed or are employed on a part-time basis in the industry served by the union, provided, of course, that such members are paying dues.

§ 452.93 Retired members.

The right of retirees to vote may be restricted to the extent provided by the constitution and bylaws of the labor organization.

§ 452.94 Reasonable opportunity to vote.

The statutory protection of the right to vote implies that there must be a reasonable opportunity to vote. Thus, there is an obligation on the labor organization to conduct its periodic election of officers in such a way as to afford all its members a reasonable opportunity to cast ballots. A union may meet this obligation in a variety of ways, depending on factors such as the distance between the members' work site or homes and the polling place, the means of transportation available, the nature of the members' occupations, and their hours of work. A reasonable opportunity to vote may require establishing multiple polling places or the use of a mail ballot referendum when the members are widely dispersed. It would also be reasonable for the time period for voting to be extended to accomodate members who might otherwise be prevented from voting due to conflicting work schedules. Shortening the voting period by a late opening of the polls would not, in itself, be improper unless the intent or practical effect of such action is to deprive members of their right to vote.

§ 452.95 Absentee ballots.

Where the union knows in advance that a substantial number or a particular segment of the members will not be able to exercise their right to vote in person, as, for example, when access to a polling place is impracticable for many members because of shipping assignments, absentee ballots or other means of voting must be made available.[45] In the event absentee ballots are necessary the organization must give its members reasonable notice of the availability of such ballots.[46]

Subpart I—Election Procedures; Rights of Members

§ 452.96 General.

The Act safeguards democratic processes by prescribing, in section 401, minimum standards for the regular periodic election of officers in labor organizations subject to its provisions. It does not, however, prescribe in detail election procedures which must be followed. Labor organizations are free to establish procedures for elections as long as they are fair to all members and are consistent with lawful provisions of the organization's constitution and bylaws and with section 401. The rights granted to members in section 401(e) refer to individuals, not labor organizations. For example, while locals may be members of an intermediate body, they are not entitled to the rights granted "members" in section 401(e).

§ 452.97 Secret ballot.

(a) A prime requisite of elections regulated by Title IV is that they be held by secret ballot among the members or in appropriate cases by representatives who themselves have been elected by secret ballot among the members. A secret ballot under the Act is "the expression by ballot, voting machine, or otherwise, but in no event by proxy, of a choice * * * cast in such a manner that the person expressing such choice cannot be identified with the choice expressed."[47] Secrecy may be assured by the use of voting machines or, if paper ballots are used, by providing voting booths, partitions, or other physical arrangements permitting privacy for the voter while he is marking his ballot. The ballot must not contain any markings which upon examination would enable one to identify it with the voter. Balloting by mail presents special problems in assuring secrecy. Although no particular method of assuring such secrecy is prescribed, secrecy may be assured by the use of a double envelope system for return of the voted ballots with the necessary voter identification appearing only on the outer envelope.

(b) Should any voters be challenged as they are casting their ballots, there should be some means of setting aside the challenged ballots until a decision regarding their validity is reached without compromising the secrecy requirement. For example, each such ballot might be placed in an envelope with the voter's name on the outside. Of course, it would be a violation of the secrecy requirement to open these envelopes and count the ballots one at a time in such a way that each vote could be identified with a voter.

(c) In a mail ballot election, a union may require members to sign the return envelope if the signatures may be used in determining eligibility. However, it would be unreasonable for a union to void an otherwise valid ballot merely because a member printed rather than signed his name if the union does not use the signatures to determine voter eligibility.

§ 452.98 Outside agencies.

There is nothing in the Act to prevent a union from employing an independent organization as its agent to handle the printing, mailing, and counting of ballots in such elections if all the standards of the Act are met.

§ 452.99 Notice of election.

Elections required by Title IV to be held by secret ballot must be preceded by a notice of election mailed to each member at his last known home address not less than fifteen days prior to the election.[48] For purposes of computing the fifteen day period, the day on which the notices are mailed is not counted whereas the day of the election is counted. For example, if the election is to be held on the 20th day of the month, the notices must be mailed no later than the 5th day. The notice must include a specification of the date, time and place of the election and of the offices to be filled, and it must be in such form as to be reasonably calculated to inform the members of the impending election. Specification of the offices to be filled would not be necessary if it is a regular, periodic election of all officers and the notice so indicates. A statement in the union bylaws that an election will be held at a certain time does not constitute the notice required by the statute. Since the Act specifies that the notice must be mailed, other means of transmission such as posting on a bulletin board or hand delivery will not satisfy the requirement. A notice of election must be sent to every member as defined in section 3(o) of the Act, not only to members who are eligible to vote in the election. Where the notice, if mailed to the last known permanent or legal residents of the member, would not be likely to reach him because of a known extended absence from that place, the statutory phrase "last known home address" may reasonably be interpreted to refer to the last known temporary address of definite duration. A single notice for both nominations and election may be used if it meets the requirements of both such notices.[49]

§ 452.100 Use of union newspaper as notice.

A labor organization may comply with the election notice requirement by publishing the notice in the organization's newspaper which is mailed to the last known home address of each member not less than fifteen days prior to the election. Where this procedure is used (a) the notice should be conspicuously placed on the front page of the newspaper, or the front page should have a conspicuous reference to the inside page where the notice appears, so that the inclusion of the election notice in a particular issue is readily apparent to each member; (b) the notice should clearly identify the particular labor organization holding the election; (c) the notice should specify the time and place of the election and the offices to be filled; and (d) a reasonable effort must be made to keep the mailing list of the publication current.

§ 452.101 Sample ballots as notice.

Sample ballots together with information as to the time and place of the

[47] Act, sec. 3(k).

[48] Act, sec. 401(e).

[49] See § 452.56 for a discussion of the requirements for notices of nomination.

election and the offices to be filled, if mailed fifteen days prior to the election, will fulfill the election notice requirements.

§ 452.102 Notice in mail ballot election.

If the election is conducted by mail and no separate notice is mailed to the members, the ballots must be mailed to the members no later than fifteen days prior to the date when they must be mailed back in order to be counted.

§ 452.103 Primary elections.

The fifteen-day election notice provision applies to a "primary election" at which nominees are chosen. Likewise, the fifteen-day election notice requirement applies to any runoff election which may be held after an inconclusive election. However, a separate notice would not be necessary if the election notice for the first election advises the members of the possibility of a runoff election and specifies such details as the time and place of such runoff election as may be necessary.

§ 452.104 Proximity of notice to election.

(a) The statutory requirement for giving fifteen days' notice of election is a minimum standard. There is no objection to giving more notice than is required by law. However, it was clearly the intent of Congress to have members notified at a time which reasonably precedes the date of the election. For example, notice in a union publication which is expected to cover elections to be held six months later would not be considered reasonable.

(b) Should a union change the date of an election from the date originally announced in the mail notice to the members, it must mail a second notice, containing the corrected date, at least fifteen days before the election.

§ 452.105 Interference or reprisal.

Title IV expressly provides for the right of a member to vote for and otherwise support the candidates of his choice without being subject to penalty, discipline, or improper interference or reprisal of any kind by the labor organization conducting the election or any officer or member thereof.[50]

§ 452.106 Preservation of records.

In every secret ballot election which is subject to the Act, the ballots and all other records pertaining to the election must be preserved for one year.[51] The responsibility for preserving the records is that of the election officials designated in the constitution and bylaws of the labor organization or, if none is so designated, its secretary. Since the Act specifies that ballots must be retained, all ballots, marked or unmarked, must be preserved. Independent certification as to the number and kind of ballots destroyed may not be substituted for preservation. In addition, ballots which have been voided, for example, because they were received late or because they were cast for an ineligible candidate, must also be preserved.

§ 452.107 Observers.

(a) Under the provisions of section 401(c), each candidate must be permitted to have an observer (1) at the polls and (2) at the counting of the ballots. This right encompasses every phase and level of the counting and tallying process, including the counting and tallying of the ballots and the totaling, recording, and reporting of tally sheets. If there is more than one polling place, the candidate may have an observer at each location. If ballots are being counted at more than one location or at more than one table at a single location, a candidate is entitled to as many observers as necessary to observe the actual counting of ballots. The observer may note the names of those voting so that the candidates may be able to ascertain whether unauthorized persons voted in the election. The observers should be placed so that they do not compromise, or give the appearance of compromising, the secrecy of the ballot. The observer is not required to be a member of the labor organization unless the union's constitution and bylaws require him to be a member. There is no prohibition on the use of alternate observers, when necessary, or on a candidate serving as his own observer. Observers do not have the right to count the ballots.

(b) The right to have an observer at the polls and at the counting of the ballots extends to all candidates for office in an election subject to Title IV, i.e., this includes elections in intermediate bodies as well as elections in locals and national and international labor organizations.

(c) In any secret ballot election which is conducted by mail, regardless of whether the ballots are returned by members to the labor organization office, to a mail box, or to an independent agency such as a firm of certified public accountants, candidates must be permitted to have an observer present at the preparation and mailing of the ballots, their receipt by the counting agency and at the opening and counting of the ballots.

(d) Paying election observers is the responsibility of the candidate they represent unless the union has a rule providing for the payment of observers. If the union does have such a rule, it must be uniformly applied to all candidates.

§ 452.108 Publication of results.

In any election which is required by the Act to be held by secret ballot, the votes cast by members of each local labor organization must be counted, and the results published, separately.[52] For example, where officers of an intermediate body are elected directly by members, the votes of each local must be tabulated and published separately. The publishing requirement is to assure that the results of the voting in each local are made known to all interested members. Thus, the presentation of the election report at a regular local membership meeting, and the entry of the report in the minutes, would normally accomplish this purpose in a local election. Such minutes would have to be available for inspection by members at reasonable times, unless copies of the report are made available. In an election that encompasses more than one local, publication may be accomplished by posting on appropriate bulletin boards, or in a union newspaper, or by any procedure which allows any member to obtain the information without unusual effort. Of course, the counting and reporting should account for all ballots cast in the election, although only valid votes will be counted in determining the successful candidates.

§ 452.109 Constitution of labor organization.

Elections must be conducted in accordance with the constitution and bylaws of the organization insofar as they are not inconsistent with the provisions of Title IV.[53]

§ 452.110 Adequate safeguards.

(a) In addition to the election safeguards discussed in this Part, the Act contains a general mandate in section 401(c), that adequate safeguards to insure a fair election shall be provided. Such safeguards are not required to be included in the union's constitution and bylaws, but they must be observed. A labor organization's wide range of discretion regarding the conduct of elections is thus circumscribed by a general rule of fairness. For example, if one candidate is permitted to have his nickname appear on the ballot, his opponent should enjoy the same privilege.

(b) A union's failure to provide voters with adequate instructions for properly casting their ballots may violate the requirement of adequate safeguards to insure a fair election.

§ 452.111 Campaigning in polling places.

There must not be any campaigning within a polling place[54] and a union may forbid any campaigning within a specified distance of a polling place.

§ 452.112 Form of ballot, slate voting.

The form of the ballot is not prescribed by the Act. Thus, a union may, if it so

[50] Act, section 401(e). In Wirtz v. Local 1752, ILA. 56 LRRM 2303, 49 L.C. ¶18,998 (S.D. Miss. 1963), the court, under its equitable jurisdiction, granted a preliminary injunction on the motion of the Secretary to enjoin a union from taking disciplinary action against a member. The member had filed a complaint with the Secretary under section 402(a) that resulted in the Secretary filing suit under 402(b).

[51] Act, section 401(e).

[52] Act, sec. 401(e). See also Senate Report 187, 86th Cong. 1st sess., p. 47; Daily Cong. Rec. p. 13682, Aug. 3, 1959, and p. A6573, July 29, 1959.

[53] Act, sec. 401(e). Under 29 CFR 402.10, a labor organization is required to make available to all members a copy of its constitution and bylaws.

[54] See Hodgson v. UMW, 344 F.Supp. 17 (D.D.C. 1972).

desires, include a proposed bylaw change or other similar proposal on a ballot along with the candidates for office so long as this is permissible under the union's constitution and bylaws. A determination as to the position of a candidate's name on the ballot may be made by the union in any reasonable manner permitted by its constitution and bylaws, consistent with the requirement of fairness and the other provisions of the Act. For example, candidates may be listed according to their affiliation with a particular slate. However, while "slate voting" is permissible, the balloting must be consistent with the right of members to vote for the candidates of their choice. Thus, there must be provision for the voter to choose among individual candidates if he does not wish to vote for an entire slate. To avoid any misunderstand in this regard, the voting instructions should specifically inform the voter that he need not vote for an entire slate.

§ 452.113 Sectional balloting.

The ballots may be prepared so that the names of candidates for positions representative of a particular area appear only on the ballots received by members living in that area.

§ 452.114 Write-in votes.

Where write-in votes are permitted in an election subject to Title IV, details of the format of the ballot are left to the discretion of the union. Ordinarily, the Secretary would become involved in such matters only in the context of an election complaint under section 402 and then only if the arrangements for write-in votes were so unreasonable that the outcome of the election may have been affected. Of course, a union may, in accordance with its constitution and bylaws or as a matter of stated policy, refuse to permit write-in votes.

§ 452.115 Distribution of ballots.

So long as secrecy of the ballot is maintained, there is no restriction on how the ballots are distributed to the voters. Any method which actually provides each eligible voter with one blank ballot would be in conformance with the law.

§ 452.116 Determining validity of ballots.

Generally, a labor organization has a right to establish reasonable rules for determining the validity of ballots cast in an election. However, where the union has no published guides for determining the validity of a voted ballot, it must count any ballot voted in such a way as to indicate fairly the intention of the voter. An entire ballot may not be voided because of a mistake made in voting for one of the offices on the ballot.

§ 452.117 Majority of votes not required for election.

A labor organization may by its constitution and bylaws provide for the election of the candidate who receives the greatest number of votes, although he does not have a majority of all the votes cast. Alternatively, it may provide that where no candidate receives a majority of all the votes cast, a run-off election be held between the two candidates having the highest vote. Similarly, a labor organization conducting an election to choose five members of an executive board may designate as elected from among all the nominees the five candidates who receive the highest vote.

§ 452.118 Local unions agents in international elections.

An international union may establish internal rules which require local or intermediate union officials to act as agents of the international in conducting designated aspects of the international referendum election of officers. The consequences of the failure to perform as directed by such officials will, of course, depend on the totality of the circumstances involved.

§ 452.119 Indirect elections.

National or international labor organizations subject to the Act have the option of electing officers either directly by secret ballot among the members in good standing or at a convention of delegates or other representatives who have been elected by secret ballot among the members. Intermediate labor organizations subject to the Act have the option of electing officers either directly by secret ballot among the members in good standing or by labor organization officers or delegates elected by secret ballot vote of the members they represent. Local unions, in contrast, do not have the option of conducting their periodic elections of officers indirectly through representatives.

§ 452.120 Officers as delegates.

Officers of labor organizations who have been elected by secret ballot vote of their respective memberships may, by virtue of their election to office, serve as delegates to conventions at which officers will be elected, if the constitution and bylaws of the labor organization so provide. In such cases it is advisable to have a statement to this effect included on the ballots. Persons who have been appointed to serve unexpired terms of officers who are ex officio delegates to a convention at which officers will be elected may not vote for officers in such election.

§ 452.121 Limitations on national or international officers serving as delegates.

While officers of national or international labor organizations or of intermediate bodies who have been elected by a vote of the delegates to a convention may serve as delegates to conventions of their respective labor organizations if the constitution and bylaws so provide, they may not vote in officer elections at such conventions unless they have also been elected as delegates by a secret ballot vote of the members they are to represent. Of course, such officers may participate in the convention, i.e., they may preside over the convention, be nominated as candidates, or act in other capacities permitted under the organization's constitution and bylaws.

§ 452.122 Delegates from intermediate bodies; method of election.

A delegate from an intermediate body who participates in the election of officers at a national or international convention must have been elected by a secret ballot vote of the individual members of the constituent units of that body. He may not participate if he was elected by the delegates who make up the intermediate body. The secret ballot election required by the Act is an election among the general membership and not an election of delegates by other delegates.

§ 452.123 Elections of intermediate body officers.

Section 401(d) states that officers of intermediate bodies shall be elected either by secret ballot among the members in good standing or by labor organization officers representative of such members who have been elected by secret ballot. The phrase "officers representative of such members" includes delegates who have been elected by secret ballot to represent labor organizations in intermediate bodies. Such delegates may therefore participate in the election of officers of intermediate bodies regardless of whether they are characterized as officers of the labor organization they represent.

§ 452.124 Delegates from units which are not labor organizations.

To the extent that units, such as committees, which do not meet the definition of a labor organization under the Act* participate in the election of officers of a national or international labor organization or an intermediate body, through delegates to the convention or otherwise, the provisions of Title IV are, nevertheless, applicable to the election of such delegates. The following example is typical in organizations of railway employees. The chairman of a local grievance committee, which is not a labor organization under the Act, is not an officer within the meaning of the Act. If such a local chairman is a delegate to the general grievance committee, which is considered to be an intermediate body under the Act, however, he must be elected by secret ballot vote of the members he represents, if he votes for officers of the general grievance committee.

§ 452.125 Delegates from labor organizations under trusteeship.

It would be unlawful under section 303(a)(1) of the Act to count the votes of delegates from a labor organization under trusteeship in any convention or election of officers of the organization imposing the trusteeship unless such delegates were chosen by secret ballot

* Act, sec. 3 (i) and (j) and Part 451 of this chapter.

vote in an election in which all the members in good standing of the subordinate organization were eligible to participate.[54]

§ 452.126 Delegates to conventions which do not elect officers.

Delegates to conventions need not be elected by secret ballot when officers of the organization are elected by a secret ballot vote of the entire membership. However, if the only method of making nominations is by delegates, then the delegates must be elected by secret ballot.

§ 452.127 Proportionate representation.

When officers of a national, international or intermediate labor organization are elected at a convention of delegates who have been chosen by secret ballot, the structure of representation of the membership is a matter for the union to determine in accordance with its constitution and bylaws. There is no indication that Congress intended, in enacting Title IV of the Act, to require representation in delegate bodies of labor organizations to reflect the proportionate number of members in each subordinate labor organization represented in such bodies. Questions of such proportionate representation are determined in accordance with the labor organization's constitution and bylaws insofar as they are not inconsistent with the election provisions of the Act. Congress did not attempt to specify the organizational structure or the system of representation which unions must adopt. However, all members must be represented; the union may not deny representation to locals below a certain size.

§ 452.128 Under-strength representation.

A local union may elect fewer delegates than it is permitted under the union constitution as long as the local is allowed to determine for itself whether or not it will send its full quota of delegates to the union convention. The delegates present from a local may cast the entire vote allotted to that local if this is permitted by the constitution and bylaws.

§ 452.129 Non-discrimination.

Further, distinctions in representational strength among or within locals may not be based on arbitrary and unreasonable factors such as race, sex, or class of membership based on type of employment.

§ 452.130 Expenses of delegates.

A local may elect two groups—one which would receive expenses while the other would be required to pay its own way, provided each member has an equal opportunity to run for the expense-paid as well as the non-expense-paid positions.

[54] Section 303(b) of the LMRDA provides criminal penalties for violation of section 303(a)(1).

§ 452.131 Casting of ballots; delegate elections.

The manner in which the votes of the representatives are cast in the convention is not subject to special limitations. For example, the voting may be by secret ballot, by show of hands, by oral roll call vote, or if only one candidate is nominated for an office, by acclamation or by a motion authorizing the convention chairman to cast a unanimous vote of the delegates present.

§ 452.132 Proxy voting.

There is no prohibition on delegates in a convention voting by proxy, if the constitution and bylaws permit.

§ 452.133 Election of delegates not members of the labor organization.

A labor organization's constitution and bylaws may authorize the election of delegates who are not members of the subordinate labor organization they represent, provided the members of the subordinate organization are also eligible to be candidates.

§ 452.134 Preservation of records.

The credentials of delegates, and all minutes and other records pertaining to the election of officers at conventions, must be preserved for one year by the officials designated in the constitution and bylaws or by the secretary if no other officer is designated. This requirement applies not only to conventions of national or international labor organizations, but also to representative bodies of intermediate labor organizations.

Subpart J—Special Enforcement Provisions

§ 452.135 Complaints of members.

(a) Any member of a labor organization may file a complaint with the Director, Office of Labor-Management and Welfare-Pension Reports, alleging that there have been violations of requirements of the Act concerning the election of officers, delegates, and representatives (including violations of election provisions of the organization's constitution and bylaws that are not inconsistent with the Act).[57] The complaint may not be filed until one of the two following conditions has been met: (1) The member must have exhausted the remedies available to him under the constitution and bylaws of the organization and its parent body, or (2) he must have invoked such remedies without obtaining a final decision within three calendar months after invoking them.

(b) If the member obtains an unfavorable final decision within three calendar months after invoking his available remedies, he must file his complaint within one calendar month after obtaining the decision. If he has not obtained a final decision within three calendar months, he has the option of filing his complaint or of waiting until he has exhausted the available remedies within the organization. In the latter case, if the final decision is ultimately unfavorable, he will have one month in which to file his complaint.

[57] Act, sec. 402(a).

§ 452.136 Investigation of complaint by Director, Office of Labor-Management and Welfare-Pension Reports and court action by the Secretary.

(a) The Director, Office of Labor-Management and Welfare-Pension Reports is required to investigate each complaint of a violation filed in accordance with the requirements of the Act and, if the Secretary finds probable cause to believe that a violation has occurred and has not been remedied, he is directed to bring within 60 days after the complaint has been filed a civil action against the labor organization in a Federal district court. In any such action brought by the Secretary the statute provides that if, upon a preponderance of the evidence after a trial upon the merits, the court finds (1) that an election has not been held within the time prescribed by the election provisions of the Act or (2) that a violation of these provisions "may have affected the outcome of an election", the court shall declare the election, if any, to be void and direct the conduct of an election under the supervision of the Secretary, and, so far as is lawful and practicable, in conformity with the constitution and bylaws of the labor organization.

(b) Violations of the election provisions of the Act which occurred in the conduct of elections held within the prescribed time are not grounds for setting aside an election unless they "may have affected the outcome." The Secretary, therefore, will not institute court proceedings upon the basis of a complaint alleging such violations unless he finds probable cause to believe that they "may have affected the outcome of an election."

(c) Elections challenged by a member are presumed valid pending a final decision. The statute provides that until such time, the affairs of the labor organization shall be conducted by the elected officers or in such other manner as the union constitution and bylaws provide. However, after suit is filed by the Secretary the court has power to take appropriate action to preserve the labor organization's assets.

Subpart K—Dates and Scope of Application

§ 452.137 Effective dates.

(a) Section 404 states when the election provisions of the Act become applicable.[58] In the case of labor organizations whose constitution and bylaws can be lawfully modified or amended by action of the organization's "constitutional officers or governing body," the election provisions become applicable 90 days after the enactment of the statute (December 14, 1959). Where the modification of the constitution and bylaws of a local labor organization requires action by the membership at a general meeting or by referendum, the general membership would be a "governing body" within the meaning of this provision. In the cases

[58] Act, sec. 404.

where any necessary modification of the constitution and bylaws can be made only by a constitutional convention of the labor organization, the election provisions become applicable not later than the next constitutional convention after the enactment of the statute, or one year after the enactment of the statute, whichever is sooner.

(b) The statute does not require the calling of a special constitutional convention to make such modifications. However, if no convention is held within the one-year period, the executive board or similar governing body that has the power to act for the labor organization between conventions is empowered by the statute to make such interim constitutional changes as are necessary to carry out the provisions of Title IV of the Act. Any election held thereafter would have to comply with the requirements of the Act.

§ 452.138 Application of other laws.

(a) Section 403[59] provides that no labor organization shall be required by law to conduct elections of officers with greater frequency or in a different form or manner than is required by its own constitution or bylaws, except as otherwise provided by the election provisions of the Act.

(b) The remedy[60] provided in the Act for challenging an election already conducted is exclusive.[61] However, existing rights and remedies to enforce the constitutions and bylaws of such organizations before an election has been held are unaffected by the election provisions. Section 603[62] which applies to the entire Act, states that except where explicitly provided to the contrary, nothing in the Act shall take away any right or bar any remedy of any union member under other Federal law or law of any State.

This revision shall take effect on July 9, 1973.

Signed at Washington, D.C., this 27th day of June 1973.

PAUL J. FASSER, Jr.,
Assistant Secretary for Labor-Management Relations.

[62] Act, sec. 603.

U.S. Labor Dept

George Pratt Shultz brings the general respect of union chieftains to his new post as Labor Secretary in the incoming Nixon Administration.

LABOR

New Secretary leans to a middle course

Shultz is expected to shun dramatic confrontations and drastic revisions of labor law. A strong stress on job problems of minority groups is likely

Labor policies of the incoming Nixon Administration probably will be "down the middle, with an occasional leaning toward conservatism," according to the AFL-CIO.

The feeling inside labor and elsewhere is that the White House and Cabinet will stay out of big labor disputes more than they do now; that there will be no major revision in labor law—at least for a time; and that the Administration will place considerable emphasis on manpower and minority job problems.

Guided by Dean George Pratt Shultz as Labor Secretary, Administration policies will be low-keyed and generally undramatic. And, according to members of the AFL-CIO executive council, the policies may for a time prevent serious confrontations between unions and President-elect Richard M. Nixon.

Trial balloon. This outlook, which comes out of a conference of the council in Washington this week, is in part a direct result of Nixon's appointments to key jobs in his Administration—including his selection of Shultz, a 48-year-old educator, until now little known outside academic and professional circles.

Nixon sent up a trial balloon by designating Shultz first as chairman of a task force to study manpower, labor-management relations, and wage-price policies. Unions reacted cautiously, by approving Shultz as "a knowledgeable labor economist," with a reputation for fairness. Privately, Nixon aides were told that organized labor could live comfortably with either Shultz or Under Secretary of Labor James J. Reynolds, a Democrat, as Labor Secretary.

Business interests endorsed the same two men. Shultz, who didn't expect any post in the Nixon government, got the appointment. Reynolds was asked to stay on as Under Secretary, the job in which he has served effectively as the government's fireman in the hottest national labor disputes. But Reynolds, 60, appears headed for a top trucking industry job.

'Fair and honest.' Shultz is less known and has much less flair, but like Reynolds, he has the respect of labor and management. The industrial relations vice-president of a major corporation said last week, "Shultz is as acceptable to me as to George Meany. It's one of the few things we can agree on."

Within the AFL-CIO council, P. L. (Roy) Siemiller, president of the International Assn. of Machinists and a federation vice-president, said simply, "Shultz is a fair and honest man." Ralph Helstein, vice-president and general counsel of the Amalgamated Meat Cutters & Butcher Workmen, commented, "Anyone who deals with him comes out with a feeling of real respect for him. He's a man with understanding and a good deal of insight."

'A practical man.' A labor economist described Shultz as "somewhere in between" Dr. Milton Friedman, Barry Goldwater's economic adviser in 1964, and Leon H. Keyserling, former President Truman's economic mentor, and as a "sensible economist—a practical man."

The incoming Secretary of Labor has had a background in federal government as senior staff economist on former President Eisenhower's Council of Economic Advisers in 1955-56 and as an economic adviser to the late Labor Secretary James P. Mitchell in 1959-60.

The late President Kennedy appointed him as a member of his Advisory Committee on Labor-Management Policy in 1961-62, and subsequently he served on manpower and unemployment commissions in Illinois in the early 1960s.

Arbitration role. He is best known to labor as an arbitrator and as co-chairman of the Armour & Co. Automation Fund, set up to study ways of easing the impact of technological change and relocation on workers in the meatpacking industry. Helstein commented this week that while he hasn't always agreed with Shultz' arbitration awards or

PAGINATION INCORRECT

automation views, he has never doubted his integrity.

As Labor Secretary, Shultz probably will get a similar reaction from labor. Unions will seriously disagree with some of his views, while seconding others. But this is not unusual: Organized labor and Democratic Labor Secretary W. Willard Wirtz, though comfortable friends, have had serious differences of opinion at times.

Shultz strongly supports "free and voluntary collective bargaining," and opposes too quick, too certain government intervention in disputes.

Injunction limits. As far as possible, he would bar intervention that would weaken bargaining or undermine mediation. In disputes seriously involving jeopardy to the nation's health, safety, or defense, Shultz would if possible limit strike injunctions to vital operations and let labor and management fight it out, economically, in less-vital areas.

Shultz is not among the "sledgehammer" economists who would be willing to cool down the national economy at a cost of higher unemployment. Other economists say he takes "a labor market approach," however, to many economic problems. He says, for example, "An economy in full gear not only uses resources more fully and yields higher output, but it is also a most effective way to deal with such pressing problems as poverty, discrimination, and teen-age frustration in the labor market."

Orderly growth. He joins Paul W. McCracken, Nixon's chairman of the Council of Economic Advisers, in calling for continued economic expansion and growth—at a faster rate to create needed new jobs for the disadvantaged and the swelling labor force. But, like McCracken, he believes that price and wage advances must be slowed to allow for the orderly growth necessary.

On controls, Shultz says, "The U. S. experience with wage and price stabilization during the Korean conflict was hardly reassuring. The practicality of the controls and the furor and procedural entanglements entailed bring no happy memories."

But he also says, "Rank-and-file union members . . . must be persuaded that their interests are served by taking less money than they can get. Or alternatively their leaders must be persuaded to sell them on the idea that their union is acting responsibly by keeping their wage increases to a moderate level." This suggested approach would be similar to the Johnson Administration's hardly successful "jawbone approach" to bargaining.

Engineers pick IUE

International Union of Electrical Workers' victory at Western Electric plant indicates rising demand among engineers for greater professional recognition

Some 750 engineering employees at the Kearny, N. J., plant of Western Electric Co. chose the International Union of Electrical Workers as their collective bargaining agent last week. This represents the largest number of engineering personnel ever to join an AFL-CIO union as their first choice (although larger units have joined after experimenting with independent status).

Even more important, the Kearny election represents "the first big win in a decade" for IUE's Professional, Technical & Salaried Div., according to Sanford Lenz, its director. Lenz claims that almost every union involved in organizing engineers is experiencing a similar upsurge of interest after years of torpor.

Status drop. IUE won the National Labor Relations Board election at WE, 373 votes to 294 for no union, because—according to one engineer —"the pay is low and the company gives us insufficient professional recognition."

The desire for professional recognition apparently is a key to engineering unionism. The major engineers' unions—AFL-CIO and independent—are concentrated in the Northeast and the West Coast, where the aerospace and electrical industries employ large numbers of engineers.

As a result, Lenz claims, many companies have become careless about providing the amenities that bolster professional status.

"He doesn't have an office; he works out on the floor with a hundred other guys," says Lenz. "He doesn't have a secretary; he takes his clerical work to the typing pool three floors away. And he resents it."

Bigness can create other problems. At Kearny—IUE organizer Archer Cole says—many engineers felt that no one was aware of their individual performance, that management had no basis for awarding merit raises or promotions.

Touchy issue. On the other hand, professional status is a touchy issue for the unions themselves. Whether to include nonprofessional engineers in the bargaining unit divides most AFL-CIO unions from most independents: The former prefer to include them, the latter won't.

Under the Taft-Hartley Act, each group of professional engineers decides for itself whether to participate in a larger unit or to vote on an exclusively professional-engineer basis in selecting a union—or no union. At Kearny, the engineers chose to vote as part of a larger unit. An estimated two out of every three in the unit have college engineering degrees. The third is an "associate engineer"—a technician who qualified by taking engineering courses at night or worked his way up to engineering assignments by experience on the job.

Membership. Because unionized engineers are scattered among at least a half-dozen AFL-CIO unions and a host of independents, there seems to be no reliable estimate of their total number. There's no argument, however, that the largest single engineering union is the independent Scientific, Professional & Engineering Employees Assn., which bargains for 13,500 employees at Boeing Co. in Seattle.

The American Federation of Technical Engineers—which claims the "authentic" AFL-CIO jurisdiction in this field—has an estimated membership of 12,500. IUE claims 9,000 engineering members.

Impact. Employers' alleged neglect of engineers' professional aspirations is one of two major reasons for engineers' new interest in unions, according to IUE's Lenz. Like most other union officials in white-collar fields, he credits the success of the teachers' unions with exerting a powerful pro-union effect on all other professionls.

Clearly, IUE hopes its own victory among the Kearny engineers will have a similar impact.

"We are gratified that men of their professional status have voted for IUE," says District Director William Bywater. "We are confident they will make important gains. We hope —and expect—that others will follow their example." **End**

United States Labor Department – 1969

NEW TEAM of Labor Dept. officials is introduced by Pres.-Elect Nixon and incoming Labor Sec. George P. Shultz at a news conference in New York. From left: James D. Hodgson, who will be Under Sec. of Labor; Shultz; Nixon; Mrs. Elizabeth D. Koontz, designated to head the Women's Bureau; Geoffrey H. Moore, who will be Commissioner of Labor Statistics, and Arnold Weber, named Assistant Sec. of Labor for Manpower.

Pay Gains In Millinery Pact Avert Walkout

New York—A three-year contract giving millinery workers their first cost-of-living escalator clause in more than 50 years was ratified at a packed meeting of some 4,000 union members in the Hotel Diplomat here.

The workers are members of Locals 24, 42, 57 and 90 of the Hatters, Cap & Millinery Workers. By rising vote they accepted contract improvements offered just short of a strike deadline.

Members of two employer associations agreed to intensify efforts to provide more jobs in the industry by a sales promotion campaign stressing "hats for every season," Joint Board Manager Nathaniel Spector and Sec.-Treas. Murray Zuckerman reported.

The employers agreed to raise

Shultz, Nixon Announce Key Labor Dept. Aides

A Lockheed Aircraft Corp. executive will serve as Under Secretary of Labor in the Nixon Administration and a close associate of incoming Labor Sec. George P. Shultz will head the department's high priority Manpower Administration.

Shultz and Nixon announced the designation of James D. Hodgson as under secretary and three other top appointments at a New York news conference.

Hodgson, 52, is a Lockheed vice president who served for six years as the company's industrial relations director and has taught industrial relations at UCLA. He had a major role in Lockheed's training programs for the disadvantaged.

Dr. Arnold R. Weber, 39-year-old industrial relations professor and research director of the University of Chicago's Graduate School of Business, will be Assistant Sec. of Labor for Manpower.

Shultz is dean of the graduate

that Assistant Sec. for Intl. Affairs George L-P Weaver will stay on at least until June, when his term as head of the governing body of the Intl. Labor Organization expires.

Among top posts still to be filled are assistant secretaries for labor standards and for labor-management relations and the department's solicitor.

The appointees are all subject to Senate confirmation but approval was expected to be routine. The designation of Shultz brought widespread praise from people who have worked with him over the years—including outgoing Labor Sec. Willard Wirtz.

Pay Gains In Millinery Pact Avert Walkout

New York—A three-year contract giving millinery workers their first cost-of-living escalator clause in more than 50 years was ratified at a packed meeting of some 4,000 union members in the Hotel Diplomat here.

The workers are members of Locals 24, 42, 57 and 90 of the Hatters, Cap & Millinery Workers. By rising vote they accepted contract improvements offered just short of a strike deadline.

Members of two employer associations agreed to intensify efforts to provide more jobs in the industry by a sales promotion campaign stressing "hats for every season," Joint Board Manager Nathaniel Spector and Sec.-Treas. Murray Zuckerman reported.

The employers agreed to raise wages of piece-workers by 7 percent as of Jan. 1, 1969, plus an additional 6 percent next Jan. 1; and of week-workers by $7 and $6 a week at the same yearly intervals.

Contributions Increased

The employers agreed to raise their contributions to the health and welfare fund by one-half of 1 percent immediately, and to raise their retirement fund contributions by an additional 2 percent this year, plus another 1 percent next Jan. 1.

The cost of living formula provides an automatic increase in wages for all workers, keyed to a rise of from 2 to 4 percent in the Consumer Price Index in 1970.

The parties agreed also that those who work on a legal holiday will get 2.5 days' pay instead of the former 2 days.

Joint board officers said the increase in pension fund contributions will insure the solvency of the fund and make it possible for more than 2,000 retirees to continue receiving monthly benefits.

The union had asked for larger benefits to cushion members against higher living costs but agreed to compromise for the sake of all concerned, Spector said. Employers pay 2 percent of payroll into sales promotion fund sponsored by the Millinery Institute of America but the drive was not effective, due chiefly to the failure of retail store owners, general merchandise managers and sales personnel to cooperate in promoting the sale of women's hats, he said.

Shultz, Nixon Announce Key Labor Dept. Aides

A Lockheed Aircraft Corp. executive will serve as Under Secretary of Labor in the Nixon Administration and a close associate of incoming Labor Sec. George P. Shultz will head the department's high priority Manpower Administration.

Shultz and Nixon announced the designation of James D. Hodgson as under secretary and three other top appointments at a New York news conference.

Hodgson, 52, is a Lockheed vice president who served for six years as the company's industrial relations director and has taught industrial relations at UCLA. He had a major role in Lockheed's training programs for the disadvantaged.

Dr. Arnold R. Weber, 39-year-old industrial relations professor and research director of the University of Chicago's Graduate School of Business, will be Assistant Sec. of Labor for Manpower.

Shultz is dean of the graduate school and the two men have collaborated on books and studies in the manpower and automation field. He was brought to Washington by Shultz to handle the problems of transition to the new Administration.

To serve as Commissioner of Labor Statistics, Shultz turned to Dr. Geoffrey H. Moore, vice president of the National Bureau of Economic Research in New York.

Moore, who will be 55 next month, is the immediate past president of the American Statistical Association. The BLS commissioner does not normally change with each Administration but the post has been vacant since the resignation of Arthur M. Ross some months ago.

The new head of the Women's Bureau will be Mrs. Elizabeth D. Koontz, 49, a Salisbury, N. C. teacher who is serving this year as president of the National Education Association.

Mrs. Koontz, who has served on state and federal advisory councils, was the first Negro named to the Nixon Administration.

Past precedent would indicate that Assistant Sec. for Intl. Affairs George L-P Weaver will stay on at least until June, when his term as head of the governing body of the Intl. Labor Organization expires.

Among top posts still to be filled are assistant secretaries for labor standards and for labor-management relations and the department's solicitor.

The appointees are all subject to Senate confirmation but approval was expected to be routine. The designation of Shultz brought widespread praise from people who have worked with him over the years—including outgoing Labor Sec. Willard Wirtz.

Nixon aides back drive to get jobs for needy

By Ed Townsend

Labor correspondent of The Christian Science Monitor

New York

The incoming administration of President-Elect Richard M. Nixon will have a strong commitment to helping the nation's disadvantaged obtain jobs.

The trend in new appointments to key policymaking positions leaves no doubt of that.

Shortly after he was designated to be secretary of labor in the new government, Dean George P. Shultz of the University of Chicago's Graduate School of Business placed increased employment of Negroes and other minority groups high on his "action program" for the years just ahead.

"How can the large number of black citizens and others who have not shared in the bounty of America be brought more effectively into jobs that are useful to society and that have a potential for personal and economic growth?" he asked.

Manpower specialist

Mr. Shultz is nationally known as an expert on manpower as well as in general labor fields. The President-Elect earlier had named him as a member of a task force on labor and manpower policy. Recently that group submitted its report—prepared after Mr. Shultz left the task force—for the guidance of the new administration.

Its principal recommendation was an echo of Mr. Shultz's position: The Nixon administration should adopt an omnibus program of manpower services for the nation's disadvantaged, to meet the urgent need of jobs for all who are able to work but are unemployed.

Then, within the last few days, Mr. Shultz recommended and Mr. Nixon "enthusiastically appointed" another manpower expert and fellow faculty member, Dr. Arnold R. Weber, as assistant secretary of labor for manpower.

At the same time, the President-Elect designated James D. Hodgson, a Lockheed Aircraft Company vice-president, as undersecretary of labor — placing in the Labor Department's second highest job a business executive with a compelling interest in the problems of minority employment and training programs.

Consolidation urged

Because President-Elect Nixon has instructed members of his new administration not to commit the government to any specific policy before the inauguration Jan. 20, the ideas now being expressed are unofficial—as Mr. Shultz put it, "only personal views now." But they will be important in the months to come.

The task force headed by Dr. John T. Dunlop of Harvard University and made up of 17 university economists, suggested in its 32-page report that now-scattered manpower services should be consolidated into a single comprehensive program.

It cautioned against substituting tax-incentive plans for federally assisted services for the nation's disadvantaged — warning that tax credits to businesses for hiring and training the disadvantaged "must be examined thoroughly before they are adopted," in part because "such plans would obviously reduce tax revenues. . . . Others would have to pay higher taxes or forego tax reductions that might otherwise be possible."

The task force also reported its "strong doubts about the desirability or political feasibility" of relying upon income maintenance as an alternative to training or jobs for people able to perform useful work. It said, "we strongly favor national minimum standards of income maintenance at an adequate level for all those who cannot or should not work. But we believe it is far more worthwhile to provide the able bodied with useful work."

Funds cutbacks opposed

The panel opposed cutbacks in manpower spending in the interests of curbing inflation. (Such a policy would "almost certainly" boost unemployment, particularly among unskilled and uneducated workers.) And it proposed changes in the Selective Service System and called for plans to develop and better utilize skilled and professional workers — including scholarships and loan programs to remove economic barriers to higher education.

Only part of this broad program will likely be picked up by the incoming administration, which will be fitting together pertinent ideas from different, at times divergent, sources including Nixon economists who seem to favor antiinflation steps that could boost unemployment.

Mr. Shultz' top Labor Department aide, Mr. Hodgson, helped devise several innovative education and training programs at Lockheed and also has been active in minority employment programs in California. As undersecretary of labor, he will have other primary responsibilities — but, he said in New York recently, he hopes to be able to continue to work "in every way possible" toward expanded job opportunities for minorities.

Hopes for progress

The assistant secretary of labor for manpower, Dr. Weber, hopes to "move forward with the programs under way now, within the limit of the resources" to be provided by the President and Congress. Currently, there are more than 30 different programs, most in the Labor Department or the Office of Economic Opportunity, costing as much as $2 billion a year.

Although Dr. Weber would not say so officially, it is considered almost certain that many of the programs will be consolidated, in line with task-force recommendations and President-Elect Nixon's own views on more efficient government.

Dr. Weber will say only that "stronger, more effective" programs will be better able to "promote and enhance the employment of people who are presently unemployed or underemployed," with particular emphasis on "the hard-core jobless and ghetto residents," to give them the basic education and training necessary to find and hold jobs.

WASHINGTON POST

JAN 20

Clifford Acts To Provide Jobs in Ghettos

United Press International

Defense Secretary Clark M. Clifford announced yesterday that he had taken five additional steps to improve employment and welfare, and will make further suggestions in a report to be turned over to his successor.

His actions were designed to:

- Increase from $120 million to $165 million a year the total of defense contracts awarded on a preferential basis to employers hiring in ghetto areas.
- Lower from 30 to 25 per cent the ratio of employes hired from the ghetto required to get the preferenital treatment.
- Put experts at defense research centers to work solving "complex problems in such areas as urban redevelopment, mass transportation, and large-scale, low-cost housing."
- Expand a program for allowing as a legitimate cost the expenses of defense contractors who provide special training for unskilled workers in metropolitan areas.
- Assure that men rejected for military service are given job training opportunities and employment assistance.

POST-GRADUATES
(continued)

And there are still other reasons. "You've got a problem of motivation," said Andre Beaumont, managing director of the Collge Placement Service. "About 43 per cent of them (graduates of Negro colleges) are still going into teaching. The bulk of them are either fearful that the wiite world won't accept them or they have been pressured by their parents. This is still the case in the South where there is enormous pressure to go into the safe fields."

The paltry number of black graduate students in the arts and sciences—a fair share do go on for advanced degrees or certificates required for elementary or secondary school teaching—is of concern to university administrators for very practical reasons. A constant theme running through the demands of black students is the desire for more black instructiors and administrators. And there simply do not appear to be enough to go around.

PAGINATION INCORRECT

TECHNOLOGY STUDY
(continued)

which people and institutions rise and fall according to how adept they are at using the "information pools" of the "data-rich" society.

Prof. Karl W. Deutsch of Harvard sees the United States as moving from its present era of "half-technology," in which only some parts of the economy are dominated by the technology of the electronic age, to a coming age of "high technology" that will be distinguished by a much higher level of "intellectualization"—that is, a heavier, richer and more complex flow of information.

In an illustration offered by Dr. Mesthene, the mixed positive and negative aspects of technology can be seen in an aspect of the information revolution: mass communications, which has given "great benefit to education, journalism, commerce and sheer convenience."

"It has also been accomway that the appearance of social unrest, however," he went on, "and may help to explain the singular rebelliousness of a youth that can find out what the world is like from television before home and school have had the time to instill some ethical sense of what it could or should be like."

Technology has a "direct impact on values by virtue of its capacity for creating new opportunities," Dr. Mesthene observed. "By making possible what was not possible before, it offers individuals and society new options to choose from."

'Changes in Values'

The creation of new options in this way "can lead to changes in values in the same way that the appearance of new dishes on the heretofore standard menu of one's favorite restaurant can lead to changes in one's tastes and choices of food," he wrote.

Commenting on investigations by Dr. Harvey G. Cox, the Harvard divinity professor and author of "The Secular City," Dr. Mesthene wrote that technology was largely responsible for "the pluralism of belief systems that is characteristic of the modern world," and that religion must come to terms with this.

"The generation of knowledge and the use of technology are so much a part of the style and self-image of our own society that men begin to experience themselves, their power and their relationships to nature and history in terms of open possibility, hope, action and self-confidence," he continued.

"The symbolism of such traditional religious postures as subservience, fatefulness, destiny and suprarational faith begin then to seem irrelevant to our actual experience. They lose credibility, and their religious function is weakened."

As technology advances, Dr. Mesthene wrote, it usually changes the shape of society through a fairly well-defined sequence:

Medical Loss From Gains

A given technological advance enables society to achieve some previously unattainable goal. If the new opportunity is to be taken advantage of, alterations in social organization are necessary.

As a consequence, the functioning of existing social structures is interfered with. And finally, goals served by the earlier social structure become somewhat neglected.

An example cited by Dr. Mesthene was medical care, in which dramatic new lifesaving treatments and techniques force the medical profession to become more specialized and to concentrate its best efforts in a few major urban centers.

Consequently, the earlier system of general practitioners is weakened. Many persons are thereby deprived of the "medical general manager" and their everyday level of medical care suffers.

Studies by a group headed by Prof. Richard S. Rosenbloom of Harvard's Business School concluded that "existing institutions and traditional approaches are by and large incapable of coming to grips with the new problems of our cities," many of which are caused by technological change, and are "unable to realize the possibilities for resolving them that are also inherent in technology."

Dr. Mesthene offered several examples of this: failure to provice low-cost housing, increasing difficulty in controlling crime, intensified difficulties in education.

He mentioned a soon-to-be-published study by Prof. Anthony Oettinger of Harvard that says that computerized instruction — which is believed by some to make genuinely individualized learning possible for the first time—is likely to be stymied by the "institutional rigidity" of school systems.

"Human fallibility and political reality are still here to keep utopia at bay," Dr. Mesthene wrote, "and neither promises soon to yield to a quick technological fix."

He asserted that private corporations, organized for private profit, were not motivated or geared to deal with social problems, even the ones industry itself helps to create—environmental pollution, for instance.

These difficulties "are with us in large measure because it has not been anybody's explicit business to foresee and anticipate them," Dr. Mesthene wrote, and are a direct consequence of an unrestrained technological individualism much like the unrestrained economic individualism of pre-New Deal days.

The difficulties are traceable much less to "some mystical autonomy" presumed to lie in technology by such thinkers as Lewis Mumford, Jacques Ellul and Herbert Marcuse, Dr. Mesthene wrote, "and much more to the autonomy that our economic and political institutions grant to individual decision-making." He stated flatly:

"The negative effects of technology that we deplore are a measure of what this traditional freedom is beginning to cost us."

O.E.C.D.
(continued)

which probably would produce cost-price stability, would be crucial for an improvement in the American trade performance and the balance of payments.

The report was published a day after President Johnson's farewell Economic Message, in which he promised "a highly prosperous year" in 1969. The annual report of the President's Council of Economic Advisers, accompanying the economic message, forecast that unemployment would remain at less than 4 per cent.

In a 55-page analysis, the O.E.C.D. economists stressed that, despite recent improvements in the balance of payments, uncertainties about future performance dictated cautious policies.

Investment Flows

The largest uncertainty was whether the recent high level of foreign investment in American securities would continue. In their particularly circumspect language, the O.E.C.D. economists wrote: "It seems most prudent to expect that this capital inflow might recede somewhat."

They did see "substantial" improvement, however, in the American trading account, provided there was no early renewal of the pressures of excess demand.

The economists urged, along with many specialists in the United States, that Presidential discretionary powers be given to adjust tax rates.

Many of the troubles of 1968 could have been avoided, they said, had the Johnson Administration been able to get enactment of the 10 per cent tax surcharge in the fall of 1967, instead of the late spring of 1968, when it was finally passed by Congress.

A document recently published by a group of independent experts appointed by the O.E.C.D. recommended that the President be given authority to make temporary variations in personal income tax rates, subject to Congressional veto.

Similar flexibility in adjusting rates has already been granted to executive branches in such countries as Belgium, Italy, Britain, West Germany and France.

Periodic Assessments

The O. E. C. D., based in Paris, provides a forum for economic consultations for 18 European nations and the United States, Canada and Japan. Its staff issues periodic assessments of the economic situations of the members.

Commenting on first-half prospects in the United States, the O. E. C. D. experts saw increased fiscal restraints reducing consumption.

Most of the motive force for the economy, the report said, would come in state and local spending, expected to expand at roughly the rate of recent years, and in residential construction, expected to benefit from "the probable gradual easing in monetary conditions."

The report noted that home-vacancy rates in the United States are lower than they have been since the mid 1950's.

On the other hand, growth in personal disposable income is expected to slip because of greater tax burdens, while business spending will probably be less buoyant than recent surveys have indicated.

The reason for this, the report said, was that periods of slowing in the growth of economic activity usually result in pronounced downward revisions in capital spending plans. Corporate cash flows also are likely to decline in the first half, the expert said, adding that "it appears likely that a moderate fall in inventory accumulation will accentuate the slowdown of final demand."

WASHINGTON POST JAN 20

Va. Official Urges Firms To Push Job Training

RICHMOND, Jan. 19 (AP)—Virginia industries must keep pace in promoting and training workers to fill new jobs if the State's labor needs are to be met, according to the State employment commissioner.

William L. Heartwell Jr. said today the current low rate of unemployment is a major deterrent to the future economic growth of the Commonwealth.

"Private industry must come to the rescue," he said, "By stressing new techniques in job simplification, in personnel counseling and skill improvement."

In his appraisal of the State labor force, Heartwell estimated a labor supply of 178,000 persons will be available to meet the demands of business and industry in Virginia during 1969.

He said enough labor would be available if employers across the State can continue "moving people into jobs at a level for which they qualify and . . . create new jobs at lower skill levels."

Heartwell said about 50,000 workers would enter the Virginia labor market for the first time during 1969. But average unemployment would remain at about 2.8 per cent, he said.

Expanded needs of Virginia industry—which reduced unemployment from 4.3 per cent in 1960—to 2.8 per cent in 1968—would increase the work force in the State by about 3 per cent in 1969, the commissioner estimated.

But the expansion would be offset this year, he said, by an unemployment increase of about 3 per cent.

U.S. Labor Dept - 1969 - Staff & Related

Week of January 20, 1969

NEW SECRETARY OF LABOR NAMES CHIEF LABOR DEPARTMENT OFFICIALS; ONE A NEGRO WOMAN EDUCATOR

WASHINGTON -- At a press conference held in New York on January 10, Secretary of Labor-designate George P. Shultz announced the names of President-elect Nixon's selections for four top Labor Department posts. All were to assume office with the new Labor Secretary when the new Administration takes over on January 20.

The four named included: for Under Secretary of Labor - James D. Hodgson, 52, a corporate vice president of the Lockheed Corporation; for Assistant Labor Secretary for Manpower - Dr. Arnold R. Weber, 39, professor of industrial relations and director of research of the University of Chicago's Graduate School of Business; for Commissioner of Labor Statistics - Dr. Geoffrey H. Moore, 54, Vice President-Research for the National Bureau of Economic Research in New York City; for Director of the Women's Bureau - Mrs. Elizabeth Duncan Koontz, 49, the first Negro president of the National Education Association.

Hodgson, Specialist in Labor-Management Relations

Mr. Hodgson, the new Under Secretary, has gained a reputation for his progressive and innovative contributions in Labor-management relations and in hiring and training the disadvantaged.

He started with the Lockheed Corporation in 1941 as a clerk and shifted to labor relations work in 1946 after serving as an air

(MORE)

combat intelligence officer on carriers with the U.S. Navy during World War II.

For the next 22 years, he held a series of industrial relations positions, including that of corporate director for industrial relations (1962-68) before rising to the firm's vice presidency in 1968.

A native of Dawson, Minn., he is a graduate fo the University of Minnesota, majoring in sociology and economics, and has done graduate work there and at the University of California in Los Angeles.

He has taught industrial relations at UCLA and has published articles on automation, collective bargaining and employing members of minority groups in such publications as the Harvard Business Review and the University of Michigan Quarterly.

Weber, Professor of Industrial Relations

Dr. Weber, the new Assistant Labor Secretary for Manpower, has had extensive experience in dealing with problems of manpower, technological change, and industrial relations.

A native of New York City, he has served as vice chairman of the Federal Task Force on Improving the Employment Service and as a consultant to the President's Advisory Committee on Labor-Management Policy.

Dr. Weber also worked closely with Labor Secretary-des-

(MORE)

ignate George P. Shultz on the Armour Automation Fund Committee in developing and studying the effects of public and private policies and programs on the problems caused by large-scale displacement of workers.

Dr. Weber joined Chicago's Graduate School of Business in 1958 after receiving his Ph.D. in economics from the Massachusetts Institute of Technology that year.

Before moving to Chicago, where he became a professor of industrial relations in 1964, Dr. Weber was an assistant professor of industrial relations and an economics instructor at M.I.T.

Dr. Weber, who holds a B.A. degree in economics and an M.A. degree in industrial relations from the University of Illinois, was chairman of the Research Advisory Committee of the U.S. Employment Service.

Moore, Specialist in Economics

Dr. Moore, the new Commissioner of Labor Statistics, has in recent years concentrated his research activities on measuring and forecasting business cycles.

(MORE)

A Phi Beta Kappa graduate of Rutgers University with a Ph.D. in economics from Harvard University, Dr. Moore began his career as an Instructor of Agricultural economics at Rutgers in 1939. He joined the National Bureau of Economic Research, a private non-profit organization, as a staff research in 1939.

In addition to his work at the National Bureau, he has lectured on economics at both New York University and Columbia University.

The immediate past president of the American Statistical Association, and a member of the American Economics Association, Dr. Moore has published a number of papers and books on the use of statistics in interpreting and projecting short term economic trends.

Mrs. Koontz, a Negro Educator

Mrs. Koontz, named Director of the Women's Bureau, has an extensive background as an educator and has been active in efforts to improve the status of women.

From 1945 to 1968, she taught slow learners and disadvantaged children at Price Junior-Senior High School in her native Salisbury, N.C. She has also taught at Salisbury's Livingstone College and at schools in the North Carolina cities of Dunn, Landis and Winston-Salem.

In 1965-68, she was a member of the President's Advisory Council on Education of Disadvantaged Children.

(MORE)

A member of the board of directors of the Sex Information and Education Council of the U.S., she also served in 1962 as a member of the North Carolina Governor's Commission on the Status of Women.

Mrs. Koontz earned an A.B. degree in English and elementary education from Livingstone College (1938) and an M.A. degree in elementary education from Atlanta University (1941).

U. S. Labor Dept –

Labor

Nixon with Labor Dept. appointees George Shultz (center) and James Hodgson.

What Shultz inherits

New Labor Secretary, George P. Shultz, will have to cope with such unsettled issues as an antidiscrimination case, a higher minimum wage rate, new work safety standards

Labor Secretary George P. Shultz took over the reins of the Labor Dept. this week after the smoothest ride into office of all named to President Nixon's Cabinet. But he found problems waiting that will give him a quick baptism of fire.

Shultz won bipartisan praise in his confirmation hearings before the Senate Labor Committee—"No appointment has received greater acclaim," said the committee's chairman, Ralph Yarborough (D-Tex.). Shultz quickly filled the department's top positions with representatives from management, labor, and the universities, all of whom won an equally favorable response.

However, the tranquility could be short-lived. Departing Labor Secretary W. Willard Wirtz left behind a series of unsettled issues that could test the enthusiastic backing given Shultz:

- He must face a prospect of possibly blacklisting a major government contractor for an alleged violation of federal anti-bias rules. Wirtz set Feb. 10 as the deadline for a voluntary agreement with Allen-Bradley Co. over Labor Dept. orders to institute an "affirmative action" program for hiring minorities. This is the first case to reach such a point.
- The outgoing Labor Secretary recommended a "universal" $2-an-hour minimum wage—a proposal that Wirtz said had "unanimous" support in the Labor Dept. His suggestion brought a prompt endorsement from AFL-CIO chief George Meany, as "correct and courageous," but the Council of Economic Advisers warned that it could curtail "employment opportunities."

Shultz made no comment on the Wirtz proposal, but the U. S. Chamber of Commerce noted that Shultz told a meeting several years ago that "minimum wage laws tend to decrease employment opportunities for marginal workers." The issue could cause difficulties between Shultz and federation leaders.

- Other administrative moves by Wirtz, which also fell on Shultz' desk, included a final order for new work safety standards on government contracts under the Walsh-Healey Act—a move that met strong resistance among some employer groups. This order would go into effect in mid-February.

All Specialists. Shultz has assembled a cross-section of labor-relations specialists as aides.

James D. Hodgson, Under Secretary of Labor, has been a corporate vice-president of Lockheed Aircraft Corp. and the company's chief industrial relations specialist. In that post, he has been the company's contract negotiator and an innovator in policies dealing with hiring and training of minorities.

W. J. Usery, Assistant Secretary for Labor-Management Services, has been an official of the International Assn. of Machinists, based most recently at Cape Kennedy. Usery is the AFL-CIO's top representative in the Labor Dept.

Dr. Arnold Weber, new Assistant Secretary for Manpower, served with Shultz as professor of industrial relations in the University of Chicago's Graduate School of Business. He takes over the department's fastest-growing division in a field that Shultz identifies as his major area of interest.

Mrs. Elizabeth Duncan Koontz, director of the Women's Bureau, is the former president of the National Education Assn. She was the first Negro president of the association.

Dr. Geoffrey H. Moore, Commissioner of Labor Statistics, takes over the top statistical post in the Labor Dept. He has been a vice-president of the National Bureau of Economic Research.

Guidance. While Shultz was left some problems by his Democratic predecessor, he also got some guidance in the form of extensive "transition" papers from Wirtz—detailing the activities of the Labor Dept. and its internal administration, policy, and relations with the Administration and White House. Wirtz noted, among other things, that the department "was not a full partner in policy formulation."

Shultz clearly has much the same general philosophy and interests that Wirtz had—particularly in the fields of manpower and civil rights. But there are also differences.

In testifying, Shultz was asked about the problem of fighting inflation through measures likely to mean greater unemployment. He said his emphasis would be to "try to keep unemployment going down, to get it as low as we can." But he also said that he is "fully cognizant of the inflation problem . . . and the importance of bringing that down."

Wirtz said in his final report: "This country is playing today with the dynamite notion that it will risk a little increased unemployment in order to cure inflation."

Under questioning, Shultz said he opposes intervention in disputes and would be "very careful about recommending any legislation" in dealing with strikes for fear of damaging collective bargaining. **End**

J. NICHOLAS PEET OF OREGON
NAMED MANPOWER ADMINISTRATOR

WASHINGTON -- Secretary of Labor George P. Shultz has named the Commissioner of the Oregon Department of Employment as the U.S. Manpower Administrator.

J. Nicholas Peet, 43, of Salem, Ore., will direct the U. S. Department of Labor's policies, programs and operations involving the planning, preparation, training, placement, unemployment insurance, research, testing, and budgeting of the Federal manpower efforts.

In his new post, Mr. Peet will be the principal operating administrator for the full range of manpower programs, which include the various activities authorized by the Manpower Development and Training Act, the Federal-State system of public employment offices, apprenticeship, Neighborhood Youth Corps, Operation Mainstream, New Careers, the Work Incentive Program, Job Opportunities in the Business Sector, and other activities designed to help recruit, train, and place unemployed and underemployed workers.

Mr. Peet will report to Arnold Weber, the newly appointed Assistant Secretary of Labor for Manpower.

Born 43 years ago in Madison, Wis., Mr. Peet served in the U. S. Navy during World War II and was graduated from the State University of Iowa in 1949. Following graduate study at Portland State College, he embarked upon a career with the State of Oregon, serving in various administrative capacities until 1960, when he became Executive Secretary of the Board of Control, which supervises 11 health and correctional State institutions.

In 1965 Mr. Peet was appointed Commissioner, Oregon Department of Employment, which operates the State unemployment compensation and tax programs; 30 local public employment offices; and various Federal-State programs, such as those authorized under the Manpower Development and Training Act.

SECRETARY SHULTZ STREAMLINES MANPOWER ORGANIZATIONS TO IMPROVE SERVICES

~~So now you know!~~

WASHINGTON -- Secretary of Labor George P. Shultz has announced a new organization for the Manpower Administration to improve the delivery of manpower services to the Nation.

The announcement came six weeks after the Secretary ordered a review of the organization and structure of the Manpower Administration with a view to establishing sound and effective management.

Shultz said "the study showed that a number of major changes were necessary to enhance and strengthen the total activity.

"I have approved this reorganization after consultation with various groups vitally interested in the development of effective manpower programs."

"The new organizational structure should promote more effective management, improve communications, and provide better service to the various client groups with whom we deal," he said.

The changes will become effective on March 17, in the national office and March 24 in the field.

The reorganization separates the Office of the Assistant Secretary of Labor for Manpower from the Office of the Manpower Administrator. The Manpower Administrator will have responsibility for operational management of ongoing programs, reporting to the Assistant Secretary.

The new organization will establish a single direct line of authority from the Manpower Administrator to the eight regional offices and the Office of the Manpower Administrator for the

(MORE)

District of Columbia. The Regional Manpower Administrators and the D.C. Manpower Administrator will be responsible for administering the full range of manpower services, including the development and execution of training contracts, to meet the needs of the States, local communities and other client groups.

They will direct a consolidated staff which has been part of the field offices of the Bureau of Employment Security and the Bureau of Work-Training Programs. This decentralization of functions will improve the delivery of services in the field.

A single new component, the U.S. Training and Employment Service (USTES), will handle all employment, work-experience and training programs that are the responsibility of the Labor Department. USTES combines the major program activities of the present United States Employment Service and the Bureau of Work-Training Programs.

Secretary Shultz said that the status and the effectiveness of the U.S. Employment Service organization is enhanced by moving responsibility for this program to a higher position in the Manpower Administration.

Besides the recruitment, counseling, testing, and placement services of the USES, the new component will also administer such programs as on-the-job training under the Manpower Development and Training Act; New Careers, Operation Mainstream, Neighborhood Youth Corps, Work Incentive Programs, Apprenticeship Outreach, Concentrated Employment Programs, and Job Opportunities in the Business Sector (JOBS) with the National Alliance of Businessmen.

(MORE)

The public employment service offices and the people they serve in more than 2,000 locations will be the beneficiaries of improved management of the Manpower Administration.

The Veterans Employment Service and the Farm Labor Service both will have their functions transferred to the U.S. Training and Employment Service but will maintain their current identities. The Farm Labor Service will be given expanded functions and will be called the Farm Labor and Rural Manpower Service.

The Unemployment Insurance Service is also retained intact and is elevated to a direct reporting relationship to the Manpower Administrator.

The Bureau of Apprenticeship and Training is retained without modification. Its reporting responsibilities, structure, function and relationship to the field remain intact.

The entire Manpower Administration at the national level will have the support of consolidated staff units.

The plan has been discussed with Congressional leaders, the Conference of Governors, the Interstate Conference of Employment Security Agencies, Unemployment Benefit Advisors, Inc.; Advisory Commission on Intergovernmental Affairs, the Bureau of the Budget, various veterans' groups, labor organizations, employer groups and other interested groups.

AFL-CIO News 4-5-69

Five Agencies Ordered To Reshuffle Field Units

Pres. Nixon has directed five government agencies, including the Labor Dept., to set up regional field offices in the same cities as a means of coordinating government programs dealing with urban and poverty problems.

Also covered by the presidential directive are the Dept. of Health, Education & Welfare, the Dept. of Housing & Urban Development, the Office of Economic Opportunity and the Small Business Administration.

The directive applies to all bureaus within the agencies and departments and calls for establishment of common regional boundaries.

An 18-month period has been allowed for the transition. Some of the regions match existing boundaries and headquarters; others will involve moving of offices and changes of jurisdiction.

When the moves are completed, the regions and their headquarters will be as follows:

Region 1, Boston — Connecticut, Maine, Massachusetts, New Hampshir.. Rhode Island and Vermont.

Region 2, New York City—New York, New Jersey, Puerto Rico and the Virgin Islands.

Region 3, Philadelphia — Delaware, District of Columbia, Kentucky, Maryland, North Carolina, Pennsylvania, Virginia and West Virginia.

Region 4, Atlanta — Alabama, Florida, Georgia, Mississippi, South Carolina and Tennessee.

Region 5, Chicago—Illinois, Indiana, Minnesota, Michigan, Ohio and Wisconsin.

Region 6, Dallas-Fort Worth—Arkansas, Louisiana, New Mexico, Oklahoma and Texas.

Region 7, Denver — Colorado, Idaho, Iowa, Kansas, Missouri, Montana, Nebraska, North Dakota, South Dakota, Utah and Wyoming.

Region 8, San Francisco—Alaska, Arizona, California, Guam, Hawaii, Nevada, Oregon and Washington.

Smaller sub-offices are expected to be maintained in the cities which will lose regional offices as a result of the reorganization.

The reshuffling, for example will affect the Labor Dept.'s Bureau of Apprenticeship & Training which now has 10 regional offices — in Atlanta, Boston, Philadelphia, New York, Chicago, Cleveland, Dallas, Kansas City, San Francisco and Seattle.

The Kansas City regional office, which not long ago moved from Denver, will move back to Denver. The Cleveland office's jurisdiction will be switched to the Chicago regional office, and Seattle's to San Francisco.

Other Labor Dept. bureaus will face comparable problems. Thus the wage-hour regional office in Birmingham will come under the Atlanta office and the Nashville region will have its jurisdiction split between two other regional headquarters.

Nixon said the reorganization is needed because "the organization of federal services has often grown up piecemeal — creating gaps in some areas, duplications in others, and general inefficiencies across the country."

He noted that two federal employes working for different agencies on poverty problems in the same neighborhood might be in different administrative regions with headquarters in widely separated cities.

Laird's team: Old faces and new

The team that Defense Secretary Melvin R. Laird and Deputy Secretary David Packard picked to help run the Pentagon is neatly balanced between new faces and carryover government specialists. The old pros predominate in the toughest jobs, however.

Foster

To oversee the disbursement of $40-billion worth of contracts in 11-million separate purchasing actions annually, the Navy's procurement chief, Barry J. Shillito, was promoted to the same job at the Defense Dept. level. Shillito, one-time sales director of Hughes Aircraft Co. and executive vice-president of Houston Fearless Corp., moved into the Navy slot a year ago from the presidency of the Logistics Management Institute.

Dr. John S. Foster, Jr., remains as director of the $8-billion annual Defense Research & Engineering effort. A nuclear specialist and former director of the Lawrence Radiation Laboratory at Livermore, Calif., Foster has held the Pentagon post since 1965. Also retained in a crucial post—that of comptroller—is Robert C. Moot, one of the government's most distinguished career employees. A longtime civil servant in the Defense Dept., Moot was elevated to administrator of the Small Business Administration under President Johnson and returned to the Pentagon as comptroller last August.

Shillito

Aside from supervising preparation of the defense budget, Moot controls the management systems that the Pentagon imposes on its contractors, as well as the cost reporting and performance measurement systems they must adhere to.

Among the remaining principal assistant secretaries, three are new to government and two are from the world of business.

Robert F. Froehlke, a former insurance executive who is the new assistant secretary for administration, is a life-long friend of Laird and chief fund-raiser for his Congressional campaigns.

In addition to his administrative control duties, Froehlke interviews all applicants for top Pentagon jobs. He is also conducting a special study of communications and intelligence operations.

Roger T. Kelley, a former vice-president of Caterpillar Tractor Co., was recruited by Packard to be assistant secretary for manpower. His most immediate projects: Legislation to reform the draft and shift it to a lottery selection system, modernizing and improving military pay, helping to draw up plans for a post-Vietnam all-volunteer Army.

Moot

The only Laird appointment that has caused any controversy is that of Dr. G. Warren Nutter, former director of the University of Virginia's Thomas Jefferson Center for Studies in Political Economy, as assistant secretary for international security affairs.

Because he was a brain-truster and speech writer for Senator Barry Goldwater's 1964 Republican presidential campaign, Nutter's appointment has caused tremors in liberal circles.

Nutter's office acts as Laird's principal adviser on all Pentagon matters to go before the National Security Council, such as arms control, Vietnam, and overseas military base negotiations. It also negotiates U. S. foreign arms sales.

Nutter, an expert on the Soviet economy, says he has always favored "meaningful negotiations" between the U. S. and Russia where there is an "understanding that there will be a quid pro quo response and a reciprocal shift in policies."

continuing to deploy the SS-9, a weapon of up to 25 megatons, with three warheads on it.

"The capability is there in the SS-9 to destroy our retaliatory force. I'm not trying to frighten people. I don't know what the Russians' intentions are. I'm talking about their capabilities. And there's a difference."

Laird expressed his concern directly to Marshal Vasili Ivanovich Chuikov, when the Soviet Defense Ministry official was in Washington for President Eisenhower's funeral. "They still won't tell me why they're going ahead with the SS-9," Laird reports. "We're not going ahead with any kind of weapon system like that."

Economic priority. As Laird tightens his command over the Pentagon, his other major concerns are becoming more evident, and cost overruns are getting priority attention. He has identified $1.8-billion in overruns so far, with the Navy's shipbuilding program—dogged by inflation and delays—accounting for about one-third of unanticipated costs.

Other major programs hit by overruns have been Lockheed's C-5A transport plane and its Cheyenne AH-56 armed helicopter, the Boeing short-range attack missile (SRAM), and the General Motors main battle tank (MBT).

Fixing blame. The overruns Laird inherits persist despite the management and contracting innovations introduced by McNamara. Generally, they are running under 100%, rather than the 300% to 700% increases experienced in the pre-McNamara days of widespread cost-plus contracting. But in dollar terms, the overruns are still huge, and Laird chiefly blames unrealistic bidding by contractors.

"Many companies are so interested in getting a bid, they don't pay much attention to price," he says. "They realize they can come in later with so many change orders they can make up deficiencies in the original bid. We've got to reduce this change business."

Laird also feels there has been too much haste in pushing weapons into production before development has been complete. "We have to spend more time on test and evaluation."

Overconfidence. Says Assistant Secretary Barry J. Shillito, the Pentagon's procurement chief: "Maybe one of our biggest problems is overoptimism. Companies compete so vigorously for contract awards they tend to be too optimistic, both technically and as regards cost. At the same time, the mili-

COLLECTIVE BARGAINING URGED TO EASE COLLEGE CAMPUS DISPUTES

COLLECTIVE BARGaining

WASHINGTON—Students and college administrators should use the techniques of collective bargaining to bring about needed change on the campus, AFL-CIO Education Director Walter E. Davis suggested.

Davis told a conference of student government leaders and college presidents that union members have been "turned off" by the "irrational and destructive" tactics of campus extremists.

"The fight for change" must be made "within the democratic process," Davis said at a conference sponsored by the Association of Student Governments.

He stressed that the labor movement will continue to press for improvements in higher education—both in terms of making colleges more responsive to a fast-changing society and in the expansion of higher education to make it available to all who have the capacity to absorb it without regard to ability to pay.

"Just as the system of collective bargaining has worked in the labor-management field, I think it can work when disputes arise between students and college administrators," Davis said.

A necessary first step, Davis emphasized, is to strengthen representative student organizations, such as student governments, "both in status on campus and in membership" so that the majority viewpoint on campus will be represented.

Many union members have a direct interest in what is happening in the colleges, Davis noted, because they have sacrificed and struggled to help their children get a college education. "They did not contemplate training tomorrow's revolutionaries."

Labor is also concerned, Davis said, because the "backlash" from disruption on and off the campus "has moved this country to the right" and threatens the interests of workers and the poor.

Isolation of the "hard-core revolutionaries" doesn't mean a placid campus, Davis stressed. It "does not preclude peaceful demonstrations and it won't halt all campus disruptions." But maximum use of the democratic and political process "can achieve real change faster than burning down the ghetto or closing down the university."

The AFL-CIO, he noted, favors lowering the voting age to 18 "so that young people can share in the shaping of public policy."

Davis spoke to the conference about "black studies" programs with the insight of a black trade union educator as well as an AFL-CIO spokesman.

The key, he said, is whether black studies is viewed as "an educational program or a forum for ideological indoctrination."

He asked: "Is it a means to achieve psychological identity and strength, or is it intended to provide a false and sheltered sense of security, the fragility of which would be revealed by even the slightest exposure to reality? And finally, does it offer the possibility for better racial understanding, or is it a regression to racial separatism?"

Davis urged an understanding of the "pains and pressures experienced by the black college student" including feelings of guilt over breaking away from a ghetto environment, frustration in dealing with white people and institutions, the "brutal academic competition" with students who were given a better preparation for it, all added to "the turmoil of a period of life that is trying under the best circumstances."

He told the conference that black studies programs are desirable "so long as they are not viewed as a substitute for a college career which will prepare the student for the real world—a world that offers great challenges and great opportunities."

As for the AFL-CIO, he said, it will continue to battle for greater educational opportunities for all Americans and an increased federal investment in the schooling of the American people—including higher education.

Mr. Sidney H. Kasper, Director
Office of Information
United States Labor Department
14th and Constitution Avenue, N. W.
Washington, D. C. 20210

Dear Mr. Kasper:

I have received your notice that the Daily Manpower Reporter has been temporarily discontinued. I am, indeed, sorry to hear this. I have found it to be a useful service and have been impressed with both its coverage and its general sense of balance.

I hope it will be possible for the Reporter to resume publication and that it will continue a high standard of objectivity in its selection of items to be included.

Sincerely,

Emory F. Via, Director
Resources Development Center

GERALD L. PALEY APPOINTED
ASSOCIATE SOLICITOR OF LABOR

WASHINGTON -- The appointment of Gerald L. Paley as Associate Solicitor for Labor Relations and Civil Rights was recently announced by Solicitor of Labor Peter G. Nash.

As head of the Labor Relations and Civil Rights Division of the Office of the Solicitor, Mr. Paley, 31, will be responsible for the Department of Labor's legal functions in these areas.

His labor-management relations responsibilities cover a broad range of Federal statutes, programs, and activities designed to preserve industrial peace and to promote effective labor-management relations.

In the area of civil rights, he will be responsible for the Department of Labor's legal activities relating to three non-discrimination directives covering: employment by Government contractors and employment in Federally-assisted construction contracts; Title VI of the Civil Rights Act concerning Federally-assisted programs; and apprenticeship and training programs registered with the Bureau of Apprenticeship and Training.

Since joining the Department in April 1970, Mr. Paley had been counsel for labor relations in the division he now heads.

From 1964 until April 1970, he was an associate with the Rochester, New York, law firm of Nixon, Hargrave, Devans and Doyle.

Active in the area of labor relations, Mr. Paley has been a member of the National Panel of Arbitrators of The American Arbitration Association since 1966. He is also a member of the American Bar Association and the New York State Bar Association.

A native of Albany, New York, Mr. Paley received his B.A. in history from Union College in Schnectady, New York in 1961, and his J.D. with distinction from Cornell University Law School in 1964.

While residing in Rochester, New York, he was a member of the Board of Directors of the Rochester Civic Music Association and was Assistant Treasurer for the Home Care Association.

GRUNEWALD NAMED TO POST FORMERLY HELD
BY ARTHUR FLETCHER

WASHINGTON -- Assistant Secretary of Labor Richard J. Grunewald has been reassigned as Assistant Secretary for Employment Standards by Labor Secretary J. D. Hodgson. Mr. Grunewald has been Assistant Secretary for Policy, Evaluation and Research since October.

The Employment Standards post was formerly held by Arthur A. Fletcher, who resigned last September after more than two years in the position to become an alternate U.S. delegate to the United Nations.

In his new capacity, Mr. Grunewald will administer laws and regulations involving labor standards, the Federal minimum wage, equal pay, age discrimination in employment, wage garnishment, equal employment opportunity, job opportunities for women, workmen's compensation for Federal workers and longshoremen and harbor workers, and child labor.

Grunewald, 51, was vice president for administration with the Winchester Group of the Olin Corporation in New Haven, Conn., for more than six years before joining the Labor Department. He previously held several major posts with the company.

Secretary Hodgson also announced that Deputy Under Secretary Michael H. Moskow will assume Mr. Grunewald's duties as head of the Office of Policy, Evaluation and Research.

###

Young Workers

The look at Lordstown

THE WORLD'S MOST MODERN auto plant at Lordstown, Ohio, has a workforce whose average age is 24 years old. They make the General Motors Vega line.

WEEKEND WRAPUP

TWO LITTLE LINES tell what's happening to the U.S. economy these days. "Payrolls in the durables sector were unchanged" during the last month. That's money in the pocket for factory workers in metal—no change on the upward size. The next line? "Dividend payments advanced $1.5 billion"—or read that as profits, way up. It's all found tucked away in the forbidding charts issued last week by the Department of Commerce's Bureau of Economic Analysis. Meanwhile the U.S. Treasury Department is reported perplexed at why certain groups are languishing in unemployment. The game plan just isn't working. The stock market perks up periodically. But millions are out of work. Life magazine last week tells about "the new poor"—a bright-faced Seattle engineer living off food stamps. Meanwhile our cities are snarled with traffic, suffocating with pollution—and Nixon is off to China to take our minds off the mess we live in. A UAW member in Orlando laments that he must earn his bread while making bombs that cut people off at the knees, while across the aisle a fellow worker is making monorail trains for Disneyland. Why, he asks, can't we all make monorails?

WE WISH HIM WELL—Mr. Nixon, that is. The China trip has a lot of Hollywood in it. Mrs. Nixon takes her hairdresser. But the juvenile hostilities between 800 million Chinese and ourselves seem about to end. Maybe Mr. Nixon is the only conservative who could pull this off, but let's not forget his kind back in the 50's got us into this entanglement. Pearl Buck, who knows China well, says the Chinese are practical and intelligent. They are, indeed. Americans have had a love/hate relationship to China; we tend to be faddish about world events. Loathing communism with a passion in one decade, softening our views in another.

JUDGE BOLDT is one of those folksy characters who seem to be engulfed by the hardnosed, calculating types who dominate so much of Washington. The Wall Street Journal told it all last week in a front page story. How Judge Boldt, the Seattle federal judge who is chairman of the Pay Board (presumably the ranking "public" member), spent a night at the New York opera with Virgil Day, the leading disciple of a rigid 5.5 percent pay standard, who is also an executive of General Electric. There was much sputtering about this all week, but to tired and cynical observers in Washington it was but the latest of oh-so-many pratfalls. UAW President Leonard Woodcock, during his National Press Club

(Continued on page 4)

PAGINATION INCORRECT

WEEKEND WRAPUP

(Continued from page 3)

speech several weeks ago, hit on a point about the Pay Board few reporters have picked up. Woodcock told how many qualified experts in collective bargaining turned down White House offers to serve as public members of the Pay Board. What Woodcock was saying is that the blame for the Pay Board's ills lies with the qualified public-types who turned down the offers to serve.

DISSENT is a chunky magazine, now issued four times a year, which sides with working people. A new issue called "The World of the Blue Collar Worker" contains 304 pages of facts about, tribulations of, and pleas for the working man and woman—done up with scholarly tidiness, but very readable. There's lots about the UAW in the magazine, which sells for $1.50, 509 Fifth Avenue, New York 10017. There's the equivalent of a $25 book in this document alone, and it covers information on wages, working conditions, life style, politics, union loyalties, and outlook of working people far too long neglected by scholars. Nice thing about it, it's easy reading.

DON ELLINGER was one of those invisible toilers in the union vineyard who don't get much notice, but who give the labor movement a sense of mission. He came to Washington in those exciting days when John F. Kennedy was adding lustre to national politics. He came from the same yeasty Texas life that produced Ronnie Dugger, Willie Morris, Larry King, Bob Eckhardt, and host of others. He chose to live in Washington in a racially-integrated neighborhood and his kids all went to the public schools. If enough Ellingers had been around, Washington wouldn't seem so much like South Africa as it does. Last week Don Ellinger, the political director of the International Association of Machinists, dropped dead—and working people in this land lost a believer and a doer. It was no accident that Ethel Kennedy and Ralph Yarborough came to the funeral; those nine kids of his have a right to be proud.

THE NEW DEMOCRAT is a fascinating publication put out by some young left-leaning Democrats. A recent article on the tax bill says the final result "went a long way toward gutting the corporate income tax. . . . The bill results in a major shift from taxes on profits to taxes on wages. The 'peace dividend'—and much more—is handed over to the corporations." It's written by Paul Offner, legislative aide to Sen. Gaylord Nelson, who gamely tried to hold the corporations at bay. Now we're getting a "value added tax"—the national sales tax, to make up for the tax take given away to the corporations.

A FIVE PERCENT "value-added tax"—notes the AFL-CIO, would cost the average American family of four about $200 per year. Such a tax would be the same as cutting the personal exemption from $750 down to $500 per person—or a net family loss of $1,000 in personal exemptions. It's what you can do with mirrors in Washington. Give a few pennies here, take back a lot of dollars out of the back pockets when nobody is looking.

IF YOU WANT to dig into the legislative history of the job safety and health law, the UAW's basic book "Occupational Safety and Health Act of 1970—Law and Explanation" is a real bargain for $2.50 a copy from the UAW Supply Department, 800 E. Jefferson Avenue, Detroit, Michigan 48214. Besides the full text of the law, the booklet contains important sections from House, Senate, and conference reports which explain the meaning and purpose of the law. Also the UAW's administrative letter, detailing the union policy on implementation of the law is inserted. A paste-in with the law's worker bill of rights referring to pages in the book is available.

THAT BOOK by Dr. Alice Hamilton called "Exploring the Dangerous Trades" is out of print, but a new edition is in the works. This remarkable woman died at the age of 101 only a few weeks before the federal safety and health act was approved. She was the founder of the occupational health movement in this country, was born in Fort Wayne, went to medical school in Ann Arbor, and got her start in life working with Jane Addams at Hull House in Chicago. She was a socialist and a pacifist. Dr. Harriet Hardy at Massachusetts Institute of Technology—the nation's leading expert of berrillym—was one of Dr. Hamilton's students and is attempting to have the Hamilton book updated.

FANTASTIC POSTSCRIPT—Another publication has hit the dust, and behind it lies a story which tells a lot. One of Washington's biggest reference services put out a $5,000 a year study on occupational safety and health—at the urging of industrial medicine, read "company doctors." But when the enforcement of the law started to fizzle and stumble along half-heartedly, the whole thing was called off. Many business types thought the law was going to amount to something and they were girding for a confrontation—but as the year rolled along, the law has turned out to be a paper tiger.

Week of March 6, 1972

GEORGE L. HOLLAND NAMED TO MAJOR
LABOR DEPARTMENT EEO POST

Resigned in June
See M.I.S.

WASHINGTON -- George L. Holland, a long-time Federal career official has been named by Secretary of Labor J. D. Hodgson to be a Deputy Assistant Secretary and Director of the Department's Office of Federal Contract Compliance.

Mr. Holland replaces John L. Wilks, who has been named by Secretary Hodgson to be Coordinator for Minority Affairs. In his new position, Mr. Wilks will have primary responsibility for liaison with the White House on all anti-discrimination efforts and minority affairs.

Wilks

In his new position, Mr. Holland will be responsible to Assistant Secretary Grunewald for carrying out provisions of Executive Order 11246. This Presidential directive prohibits discrimination in Federally-involved contract work on the basis of race, color, religion, sex and national origin and requires contractors to take affirmative action to insure equal opportunity.

In announcing the appointment, Secretary Hodgson said that Mr. Holland "brings to this important task an exceptional background of experience and expertise in administering government anti-discrimination programs. He has a proven ability to deal successfully with persons and groups of diverse views in making these programs work. I am pleased that he has agreed to help us in this vital undertaking."

Mr. Holland began his government career in the Veteran's Administration in 1945 after serving two years in the U.S. Army as an infantry officer. He served in positions of increasing responsibility with VA until 1955 when he left his position as Assistant to the Administrator for Racial Relations to accept an appointment with the International Cooperation Administration as a program advisor in Taipei, Taiwan.

He returned to the Veteran's Administration in 1956 and held several administrative positions before being appointed director of VA's Washington, D.C. regional office in 1963.

In 1965, Mr. Holland was named Director of Compliance for the newly created Equal Employment Opportunity Commission, where he gained extensive experience as EEOC's principal compliance advisor. In 1966, he returned to VA and was appointed Director

(MORE)

of the VA Compliance Service in 1969, with responsibility for VA Contract Compliance activities under Executive Order 11246. He also served at the same time as civil rights advisor to the VA Administrator. He continued in this position until 1971 when he left the Federal service to work as a business consultant.

Mr. Holland was honored twice by the VA with Exceptional Service Awards, once in 1965 and in 1971. Also, in 1971 the VA presented him with its Distinguished Career Award.

He is a member of the NAACP and the Urban League, and served as a member of the Boards of the St. Paul, Minn., branches of both organizations while he was Assistant Manager of the VA center in that city during the late 1950's and early 60's.

Currently a resident of New Orleans, La., Mr. Holland and his wife, the former Cora Kaufman of New Orleans, plan to relocate to the Washington area.

MANAGEMENT TAKES OVER

List of Labor Department Policymakers Reads Like 'Who's Who in Business'

By HARRY CONN

The U.S. Department of Labor, created in 1913 to protect the interests of working people, has rarely been under as much fire for being pro-business and pro-management as it is today.

A survey of the key policymakers of the Department provides a logical explanation: it reads like a "Who's Who in Business."

Almost all of the top Department officials come from Big Business, only a handful are career government officials and those with trade union background are almost singular exceptions.

Sec. of Labor **James Day Hodgson** came to Washington to join the Nixon Administration with a background of 28 years as an executive of the Lockheed Corp. He was vice-president in charge of industrial relations at the time he was named Undersecretary of Labor by President Nixon.

Hodgson reached right into Lockheed for one of his top assistants. Prior to joining the Department in 1970, **William H. Schmidt, Jr.,** served as corporate information director for Lockheed.

E. Carl Uehlein, executive assistant to Hodgson, was with a Massachusetts law firm where he specialized in labor law, largely with management clients.

The Special Assistant to the Secretary for Legislative Affairs, **Frederick L. Webber,** held a legislative liaison post with the National Forest Products Assn., the trade organization of the lumber industry.

Under-secretary of Labor **Laurence H. Silberman** practiced law in Honolulu, specializing in labor law. He won his corporate credentials since his practice was heavily weighted toward management and business.

Silberman's executive assistant, **Richard J. Wise,** was assistant director of industrial relations for the John Hancock Life Insurance Co. with offices in Boston.

The line-up of Assistant Secretaries of Labor could reasonably be expected to hold posts with the Department of Commerce. But Labor? The only exception is **W. J. Usery, Jr.,** Assistant Secretary for Labor-Management Relations, who was Grand Lodge Representative of the International Association of Machinists.

Frank G. Zarb, Assistant Secretary for Administration, has a background of investment banking houses including CBWL-Hayden, Stone, Inc., where he was executive vice-president; Cogan, Berlind, Weill & Levitt, Inc., as senior vice-president, and with Goodbody & Co. For five years he was with the industrial relations department of Cities Service Oil Co.

Assistant Secretary for Occupational Safety and Health George C. Guenther was president of the John H. Guenther Hosiery Co., in Reading, Pa., where he was successful in keeping the American Federation of Hosiery Workers from organizing his employees.

Malcolm Lovell, Assistant Secretary for Manpower, lists among his credentials 12 years in management capacities with the Ford Motor Co., and manager of employee services for American Motors Corp.

Hodgson recently re-assigned Assistant Secretary **Richard J. Grunewald** to head Employment Standards. He served from 1956 to 1971 with the Olin Corp. in New Haven, Conn., the last six years as vice-president for administration.

Former Assistant Secretary **Jerome M. Rosow** was with Standard Oil of New Jersey for 16 years prior to being named to head policy, evaluation and research. He recently returned to Standard Oil.

One of the most important posts in the Department is that of Solicitor. It is currently being filled by **Richard F. Schubert.** He joined Bethlehem Steel Corp., in 1961, was promoted to assistant manager of labor relations in 1966, where he served until he joined the Nixon Administration.

Donald M. Irwin, who was Deputy Under-secretary for International Affairs until his recent appointment as Chicago regional director for the Department, held top offices with Chrysler, Deere & Co., and Hawaiian Airlines.

John Wilks, director of the Office of Contract Compliance, operated his own public relations firm in the San Francisco-Oakland area where he had such clients as Standard Oil of California, Chrysler, Safeway Stores and F. W. Woolworth.

John L. Blake, director of the Job Corps, came to the Department from his post as assistant secretary for the Marine Midland Trust Company of Rochester, N.Y.

In addition to Usery, only two other higher Labor Department officials have trade union backgrounds: Deputy Assistant Secretary of Labor for Manpower **Paul J. Fasser, Jr.,** from the Steelworkers, and Assistant Manpower Administrator **Robert J. Brown,** who held posts with the United Auto Workers and the Minnesota CIO in 1952-53.

These are the men who determine policy for the Department of Labor, which was created "to advance the public interest by promoting the welfare of the wage earners of the United States, improving their working conditions, and advancing their opportunities for profitable employment."

If the Labor Department officials view this function from the management side of the bargaining table, it's understandable.

U.S. DEPARTMENT OF LABOR
MANPOWER ADMINISTRATION
WASHINGTON, D.C. 20210

OCT 26

October 17, 1972

In accordance with the request of Mr. Don Slaiman, Director of the Civil Rights Staff of the American Federation of Labor and Congress of Industrial Organizations, to Dr. Howard Rosen, Director of the Office of Research and Development, Manpower Administration, Department of Labor, the enclosed copy - "The Pre-Retirement Years, Volume 3" - is being sent to you.

This Report is unique in that we have been following the same persons for three years. When the survey was started in 1966, these men were 45 to 59 years old. New information on pension coverage, collective bargaining and health conditions has surfaced in this volume, the third of a series on the results of a longitudinal survey of the labor market experience of these men. The study shows:

1. More of the black than white men (48 versus 38 percent) were in jobs covered by collective bargaining agreements - blacks were concentrated in blue-collar jobs where unions predominate. The organized workers benefited more by almost every measure - tenure, pay, pension coverage - than the unorganized, especially the black men. Among nonunionized operatives, whites earned 27 percent more an hour than blacks, whereas among unionized operatives, the differential was only 11 percent.

2. In respect to voluntarily changing jobs, the rate of black and white men were similar (10 percent black - 11 percent white). However, among those with less than five years service in a company in 1966, the rate of job changing was more than double the overall average. For those in this group who had pension rights, the blacks were far less likely to change employers than whites. The whites seemed to get "locked-in" later than blacks - after 10 years' service rather than five years service.

3. Not many had left the labor force between 1966 and 1969 (5 percent), but 3/4ths of the whites and 9/10ths of the blacks, who no longer looked for work nor were working, reported health conditions limited or prevented them from working.

Similar studies are being conducted for young men, 14-24 in 1966; young women, 14-24 in 1966; and mature women, 35-44 in 1966. The data are collected by the Census Bureau and are analyzed and reported on by Professor Herbert Parnes of Ohio State University. If you are interested in receiving copies when these are completed, this office will be happy to send them to you.

Enclosure

Dear Howard:
Thanks for sending at Don Slaiman's suggestion "The Pre-Retirement Years - Vol. 3. I would like to see the subsequent studies of younger men and women.
Thanks, BV

Dear Dr. Via:

I am enclosing ten announcements on a Seminar on Protective Labor Legislation. This seminar will be held on the campus of Troy State University, Troy, Alabama, on Wednesday, March 5, 1969. I hope your schedule will permit you to attend.

Since the topics to be discussed at the seminar should be of interest to many individuals with whom you have contact, perhaps by word of mouth or through the use of weekly newsletters (if your organization has one) you can help us to reach these people and enable us to make this seminar a big success.

I am looking forward to seeing you at the seminar.

If you wish additional announcements, please contact Dr. Tom Eason, Troy State University, Troy, Alabama.

Sincerely yours,

Harold L. Smith

FOR RELEASE: 10:00 A.M.
Wednesday, June 11, 1969

NEW LINE SET AGAINST JOB DISCRIMINATION IN FEDERAL CONTRACT WORK

A new line of attack for guaranteeing equal employment opportunity in Federal contract work was outlined today by Assistant Secretary of Labor Arthur Fletcher.

Adressing contract compliance officers from some 26 Federal agencies, he said the compliance program must be streamlined and the Office of Federal Contract Compliance expanded.

Mr. Fletcher cited the importance of Federal rules and regulations requiring equal job opportunity on Government contract work at this "critical time" in the Nation.

It is "absolutely essential," he said, that Executive Order 11246 be made as effective a tool as possible "to assure dignity in the job situation."

This executive order requires that Federal contractors and subcontractors institute programs of affirmative action to achieve equal opportunity at the work place.

Mr. Fletcher, Assistant Secretary for Wage and Labor Standards, listed two planned actions for improving enforcement procedures under the executive order:

-- Issuance of an order for Secretary of Labor George P. Shultz to agency heads defining their responsibilities and citing cases where the agency has failed to meet its responsibilities.

-- Establishment of a high-level interagency committee to review the entire procurement procedure and to recommend more effective ways to implement the regulation.

In addition, Assistant Secretary Fletcher announced that:

-- OFCC will be expanded and reorganized to increase its effectiveness in the field of contract compliance.

-- The number of agencies having administrative responsibilities for the order will be reduced from 26 to 13 within the next 30 to 45 days.

-- A statistical printout ranking contractors by minority utilization on an area basis will be made available to agencies within the next 60 to 90 days.

EXCERPTS FROM REMARKS OF
ASSISTANT SECRETARY FLETCHER
BEFORE
MEETING OF AGENCY CONTRACT (EEO) COMPLIANCE OFFICERS
U.S. DEPARTMENT OF LABOR
JUNE 11, 1969

I appreciate your attending this meeting today because of the importance and the nature of the problems that we must collectively solve. As the contract compliance officers for some 26 agencies, you have the primary and foremost responsibility in administering the Executive Order. Secretary Shultz assigned the Office of Federal Contract Compliance to my jurisdiction on May 19, and as you know, upgraded the job of Director of OFCC to a Deputy Assistant Secretary. I expect in the immediate future to designate that Director.

However, because of the critical nature of the problems that we are dealing with, I felt it advisable to ask you to meet and consult with me today in order that I might give you my judgment as to the direction that is necessary for this program to take, and to spell out some of the more specific things that are ongoing at this time.

For the past three months, there has been a hard, critical program evaluation and analysis made of the operations of the Office of Federal Contract Compliance. First, it is apparent that the Executive Order, which is a part of the Government contract, is not being adequately enforced in accordance with the procedures in the rules and regulations. As you know, these rules and

regulations are very specific about the responsibilities of the head of the agency, your office, and the contracting officer who awards contracts. There are problems of administration in numerous agencies because adequate agency procedures have not been developed in accordance with the OFCC rules and regulations. There are also problems of interagency coordination regarding Government contract awards.

In this regard, two immediate steps are being taken. It is now planned that Secretary Shultz will issue an order shortly to the heads of agencies calling attention to the agency responsibilities and citing circumstances where if those responsibilities are not carried out, the Office of Federal Contract Compliance will, of necessity, assume jurisdiction, and take appropriate action which could include notice of contract cancellation, termination or debarment.

Secondly, we are establishing a high-level interagency committee of procurement specialists to review the entire procurement procedure to determine how they can be made more effective in the implementation of the Executive Order. I just pointed out that the Executive Order has the contract clause, and it is of necessity that the clause be administered in the procurement system. There are many other procurement-type remedies, in addition to contract cancellation that can and should be utilized in the enforcement of the Executive Order. These will all be analyzed to determine whether and how they should be used to implement the Executive Order.

Thirdly, I expect to issue shortly a revised Philadelphia Construction Plan that will serve the needs of our program and also meet the concerns of the Comptroller General. We expect that the Philadelphia Plan will be instituted in other cities in the immediate future. You will also be happy to

know that we have completed the transfer of all Area Coordinators to the Department of Labor. This, of course, will make the Area Coordinator program much more effective and easy to administer.

That leads me to the problem of reorganization in general. As a part of the critical analysis that has been undertaken, it is concluded that the compliance program must be streamlined, and the Office of Federal Contract Compliance must be expanded. One technique for streamlining the administration of the Executive Order will be the reduction of the number of agencies having administrative responsibility for the Order, and the assigning of contract compliance responsibility on an industry and geographical basis. This will be accomplished within the next 30 to 45 days, and will reduce the number of agencies from 26 to 13. It will also necessitate the development of administrative skills within the agency to deal with specific industry compliance problems, and to deal with specific regional or geographical problems. Secondly, in streamlining the administration of the Executive Order, the Office of Federal Contract Compliance will be expanded and reorganized. The real purpose of OFCC is, of course, to furnish guidance, coordination, program review, and to assume the ultimate responsibility if any agency fails to carry out its administrative duties.

It seems to us that the major thrust OFCC must undertake at this time is to give more specific guidance and direction in the establishment of Government priorities; setting out more specific standards of compliance, and assisting in the development of better coordination with EEOC and Justice.

Going first to the question of assisting in the development of priorities, we are preparing a statistical printout from EEO-1 data that will be made

available to the agencies within the next 60 to 90 days. Contractors will be ranked by minority utilization by the Government contractor by SIC's in SMSA's. SMSA's and SIC's will also be ranked without establishments. This will provide a tool for the agency to establish compliance priority.

Concerning coordination between the agencies, it is clear that we must establish very specific Government-wide guidelines that will resolve the problem of multi-and dual investigations; that will utilize and coordinate the legal remedies under Title VII and the economic remedies under the Executive Order to the fullest extent.

A series of discussions have already begun at administrative and staff levels geared to resolving this problem. For instance, it is expected that OFCC and the contracting and administering agencies will be free from complaint handling and will concentrate solely on compliance reviews. It is also anticipated that clear cut procedures will be spelled out that will solve numerous problems that can occur when several agencies are involved. These are complicated questions, but we are determined to find the answers.

There will also be a major program to improve the skills of investigators. There will be a Government-wide coordinated training program probably handled through the Civil Service Commission that will also involve State investigators. This should relieve the problem of duplication both for our own investigators and for Government contractors or other employers.

In closing, let me state one basic objective very clearly. In this critical time in our country, it is absolutely essential that the Executive Order be made as effective a tool to assure human dignity in the job situation as it is possible to do. The areas where we have been falling down must be

and will be immediately corrected. The systems and techniques for improving implementation will be constantly under evaluation and review, with the sole objective to make the Executive Order more effective.

Your responsibility in this area, as I stated at the outset, is of primary importance. I think it is critical that as we move forward you undertake the same type of constant analysis review and evaluation to make sure that you are carrying out to the fullest extent possible the responsibilities delegated by the President to your office.

I look forward to our cooperation together. I plan to meet with you individually during the next month in order to discuss in more detail the specific administrative problems and proposed remedies within your specific agency. Again, please accept my appreciation for taking your time to discuss with me this critical matter.

EMPLOYMENT IN TEXTILES AND APPAREL RANK HIGH IN SOUTH

Regional Growth Outstrips National Trend

The textile and apparel industries combined account for a high proportion of all manufacturing jobs in the South, according to Brunswick A. Bagdon, Southeastern Regional Director of the U.S. Department of Labor's Bureau of Labor Statistics.

For example, in South Carolina last year, 58.3 percent of manufacturing employment was found in the two industries and in North Carolina 49.8 percent. In other Southeastern states, employment in the two industries accounted for 40.4 percent of manufacturing employment in Georgia, 27.0 percent in Alabama, and 23.3 percent in Tennessee. Apparel employment in Mississippi comprised 21.9 percent of the total - textile employment in the State is not significant.

Last year nearly 70 percent of the total national textile labor force was employed in the South and the remainder was found largely in the Northeast. Three southeastern states accounted for more than half of all textile employment: North Carolina (27.8 percent); South Carolina (15.0 percent); and Georgia (11.7 percent).

The apparel industry is somewhat less concentrated regionally than the textile industry. The South accounted for 36.4 percent of apparel workers in 1968. Employment in the industry in none of the Southern states, however,

comprised as much as five percent of the total. About 46 percent of apparel employment in 1968 was in the Northeast, about 11 percent in the North Central States, and the remainder in the West.

These data and much additional information concerning labor and economic conditions in the two industries, such as the following, are summarized in a new Bureau of Labor Statistics report, Labor in the Textile and Apparel Industries.

National employment trends in the two industries differed significantly during the postwar period. Between 1947 and 1968, employment in textiles fell by 24 percent, while employment in apparel increased almost 23 percent and in manufacturing as a whole 27 percent. As indicated in the table below, employment trends in textiles, apparel, and all manufacturing combined in most Southeastern States varied from national trends. In a majority of the Southeastern States, during the 1947-1968 period, textile employment increased; apparel employment grew phenomenally; and growth in manufacturing employment far exceeded the national average.

State	Textile Employment (in thousands) 1947	1968	Percent Change	Apparel Employment (in thousands) 1947	1968	Percent Change	Manufacturing Employment (in thousands) 1947	1968	Percent Change
Alabama	54.2	41.4	- 23.6	7.5	44.8	497.3	224.2	305.9	36.4
Florida	NA	NA	NA	2.4	20.4	750.0	95.7	308.2	222.0
Georgia	106.0	116.4	9.8	26.6	68.0	155.6	275.5	449.2	63.0
Mississippi	5.7	6.5	14.0	11.5	38.6	235.7	91.9	174.7	90.1
North Carolina	226.6	278.7	23.0	10.8	69.2	540.7	411.8	686.3	66.7
South Carolina	131.3	148.0	12.7	8.9	41.2	362.9	203.0	323.8	59.5
Tennessee	38.0	32.8	- 13.7	20.0	69.8	249.0	255.5	455.4	78.2
Virginia	40.2	42.8	6.5	13.4	35.6	165.7	236.8	362.2	53.0

The unemployment rate in textiles generally has been somewhat higher than the manufacturing rate in recent years, and the rate in the apparel industry has been significantly higher. In 1968, average unemployment rates in textiles were 3.5; apparel 5.9; and manufacturing 3.2.

Both the textile and apparel industries have unusually high proportions of semi-skilled employees (operatives and kindred workers) - about 67 percent in textiles and 78 percent in apparel compared to 44 percent in manufacturing generally. Skilled workers account for approximately 12 percent of the employed labor force in textiles, 5 percent in apparel, and almost 19 percent in manufacturing as a whole.

Based on latest data available, the educational attainment of workers in both industries, on the average, is below the level in manufacturing generally. The median years of schooling completed by textile workers was slightly less than 8.0; by apparel workers 9.7; and by workers in manufacturing as a whole 11.0.

The employment of women in both industries is relatively much greater than in manufacturing as a whole. Women constitute about 45 percent of the labor force in textiles, compared with approximately 27 percent in all manufacturing. The proportion of women employees in apparel is extraordinarily high - almost 80 percent.

The complete report, Labor in the Textile and Apparel Industries, BLS Bulletin No. 1635, is available for purchase - price $1.00 - from the Regional Administrative Office, U.S. Department of Labor, Room 110, 1371 Peachtree Street, N.E., Atlanta, Georgia 30309.

After the pixie dust settled

Disney World, Fla.

It's exciting at first, working beneath castles and monorails and beside life-sized chipmunks and mice.

"That lasts for about two days," said a 19-year-old custodial worker at Disney World. "Now it's really getting to be a routine job."

The pay has been low, work has been grueling, and the Disney management has been unsympathetic and worse.

That's why more than 1,300 employees of Walt Disney World soon will be represented by SEIU.

Formation of the union, authorized in an affiliation-card count, is being delayed by a legal challenge to management brought by the Teamsters. But the cards are signed and counted. The bargaining table is ready.

FOR VISITORS, Disney World is out of this world. It's a dazzling, lavish, lollipop world where grownups become children far removed from the pollution and problems and drudgery of day-to-day living, and children are left breathless. It's an escape for adults and a festival for kids.

It's neither for the employees.

Robert Pickin, 19, who begins work at midnight long after the gates are closed to visitors, said he was "pretty excited" at first to be working in the tinsel world.

"I figured they'd bend to go out of their way to help," he said of management.

HE FOUND OUT differently: "They're constantly trying to push you to get done," making employees work grinding [illegible] with bad equipment—"brass nozzles on hoses that constantly cut you, for example."

Raymond Finlaw, 21, who works the same graveyard shift, also complained about the bad equipment, low pay and harassment.

"They tell us we have a ten-minute break," he said. "Then they come around and tell us we don't have to have it."

Their job includes hosing the streets of Disney World so they'll be clean for the next day. Once, Finlaw said, they had to hose them during a rain storm.

Management pays the employees for the time it takes them to take their uniforms off at day's end . . . but not for when they're dressing at the start of their shift.

"THE SUPERVISION leaves much to be desired," said Jerry Frizzell, a custodial worker at the swank Polynesian Hotel.

"They (management) know we have no way of protecting ourselves," he said. "A contract can straighten them out to the point where they know we have just as much going for us as they think they have going for them."

Local 399 Vice-Pres. Max Richardson, who spearheaded the six-month organizing drive, is helping the employees' negotiating committee draw up that contract.

Richardson's local represents workers at Disneyland in California, so he knows the employees' problems.

The employees will join hands not only with the California workers but with some 3,000 other Disney World workers who will be represented by other AFL-CIO unions—the retail clerks, railway and airline clerks, theater and stage employees, and the hotel, motel and restaurant workers.

JANITORIAL workers, ticket takers and ticket sellers make up the SEIU local.

The long organizing drive by the five-union council was hampered not only by management confining organizers to employee parking lots—not all workers park there—but by the huge employee turnover rate. Many employees who quit had signed union cards, and couldn't be counted in the final tally.

Richardson and his wife Chella began organizing last July, long before the $400 million amusement complex formally opened its doors to tourists.

International organizer Tiny Groeteke aided the drive, as did International organizers Pat Henning, Joe Buckley and Gloria Andersen and Local 6 organizer Jill Severn of Seattle, Wash.

THE EMPLOYEES—Disney management calls them "members of the cast"—are young and old, some with families to support, others living with parents and trying to make enough money to go to college next year or the year after.

Many are native Floridians from nearby Orlando or Lake Buena Vista. Some are Cuban immigrants.

One young man's head was seen emerging from the back seat of a car parked in the employees' lot early one morning in the middle of the campaign.

A closer look revealed the car was packed with clothes, kitchen utensils, toilet gear, just about everything he owned. Where was he from?

"Chicago," he said. "I heard about Disney World opening and decided it would be fun to work here for awhile."

HE IS HAVING "fun," but he looks to the day he has enough cash to afford an apartment. His hopes are with the union. Yes, he said, he had signed the affiliation card, and he wished the SEIU organizer "good luck" as he passed through the gate to work.

He isn't the only employee who traveled great distances to share the Disney adventure. License plates vary from state to state as much in the employees' lot as in the guests'.

Like the young man from Chicago, most employees are in need of the wage increases and more job security, Richardson said.

Those are part of the contract proposal the five unions have put together to present to management after the Teamster challenge subsides.

EARLY IN the organizing campaign, many of the young men were angry at being forced by management to wear their hair short. The policy dictated near-GI hair styles. That issue has been resolved even before contract talk.

"We put so much heat on them (management) that they modified it," Richardson said.

Labor strength is just beginning to make itself known in Florida; most Disney employees are learning union benefits quickly. Richardson is convinced the new local will be exciting and powerful.

"Once the people find out the strength they have by pulling together," he said, "there will be some progress."

The influx of new union members in the state also could hurry the day Florida scraps its right-to-work law—"once all these people become union-oriented," Richardson said.

DISNEY WORLD is in the middle of a nowhere that is fast becoming a somewhere, with hotels and motels and restaurants and all types of business popping up all around. Orlando, Fla., about 20 miles away, now harvests tourism that could quickly make it a boom town.

Two hotels already have opened on the Disney property and two more will open before next season. Another is planned soon after.

There's room for more. Disney World property totals 47 square miles—enough for two Manhattans—in central Florida.

The Magic Kingdom itself accounts for less than a tenth of the area. It is Disneyland West (California) and then some.

An 18-story castle dwarfs not only its California likeness but all else in the storybook world below.

International Organizer Joe Buckley shakes the hand of "Dale Chipmunk," one of many Disney characters who mingle with the crowds of tourists at Disney World.

$1,200,000 back pay for LA county employees

Los Angeles, Calif.

SEIU Locals 660 (LACEA) and 434 won nearly $1,200,000 in retroactive pay and step increases for some 10,000 Los Angeles County employees caught in the Phase 1 pay freeze.

The County Board of Supervisors Feb. 8 adopted a unanimous recommendation by top County officials granting the retroactive pay. An estimated $637,000 in withheld pay increases will go to 2,800 employees. Some 7,100 others will receive $507,000 in withheld step increases.

County officials credited Local 660 and 434 with the employees' victory. Joint action by the locals included intensive pressure on the County and direct action at the federal level—LACEA bombarded Congress and the White House with letters and telegrams appealing for relief from the pay freeze.

"We are pleased that County Management has responded to our urgent request. . . . The County is the first major California jurisdiction to take such action," noted LACEA Gen. Mgr. Vic Hochee.

Canada nursing campaign gains

Toronto, Ont.

SEIU's Canadian nursing home drive continues in high gear as Local 204 signed up St. Catherines Extendicare and won a Feb. 15 representation election 23-to-1. That makes six Extendicare nursing homes and some 350 new SEIU members in the past few months, reports SEIU Vice Pres. Albert Hearn.

Nursing assistants, dietary, custodial and maintenance workers are employed at two Extendicares in Ottawa, one in London, Oakville, Scarborough and St. Catherines.

Organizing efforts are expected to bring in two more Extendicares in the near future, "and that'll mean some 200 new members will be protected by a union contract," Hearn said.

PAGINATION INCORRECT

Labor – Civil Rights

Human rights

Unfinished business

Discrimination and civil rights long have been synonymous with the struggle of black Americans to win equality in our society.

But, it's not only blacks who feel the sting of prejudice. Other minority groups share the same problems, the same concerns.

As the civil rights movement has grown, it has broadened to become a human rights movement. *Spanish-speaking Americans, women, Indians and members of many ethnic and religious groups belong to it. A family living in poverty, an uneducated man—anyone who does not conform to the "American dream" image—has a stake in it.*

In fact, we all have a stake in the fight for civil rights and economic opportunity. For the family held in poverty in the ghetto or the man chained to a life of menial jobs because of his lack of education cannot contribute his full measure to the general welfare or to the progress of the kind of nation we want to be.

"Now I know all of the words. I know all of the gimmicks and the phrases that would win the applause of black audiences and professional civil rights leaders. I am not going to use them. I am interested in deeds. I am interested in closing a performance gap . . . when I finish office I would rather be measured by my deeds than all of the fancy speeches I may have made."

Richard Nixon
Press Conference
January 30, 1970

Next November Mr. Nixon will be measured by his deeds. On civil rights as on so many other crucial domestic issues.

In this area, the fact seems to be that all of the human rights issues that gained momentum during the 1960's—civil rights, school desegregation, equal housing, voting rights and equal employment opportunities have been sidetracked, slowed down, even abandoned.

The urgency of domestic needs is ignored; Administration civil rights policies have been cut to conform to the design of his political strategy.

Match Nixon's words with his deeds.

In equal housing, these were his words two and one half years after he took office: ". . . continuing, often covert housing discrimination is thwarting or discouraging the efforts of many minority citizens to find better housing in better neighborhoods. This is wrong, constitutionally indefensible. . . ."

The deeds: for two and one half years, none. After the President's statement, the Leadership Conference on Civil Rights declared that he had "diagnosed a cancer and prescribed aspirin as the remedy."

The U.S. Civil Rights Commission had even stro criticism: it accused the ministration of retrea from the goal of prom racially open communitie

The Nixon Administr did not neglect voting ri rather it attempted to tage the six-year registr effort by civil rights gr in the South.

The words: "The laws caught up with our consci What remains is to give to what is in the law."

Nixon's deeds: In M sippi, a discriminatory law permitted 26 counti submit new procedures re-registering voters. The tice Dept. failed to exerci power under the 1965 V Rights Act and allowed happen. In those countie registration rolls were clean.

Later a Federal Cou Mississippi reviewed the

Acti

SEIU locals across the try are fighting discrimin —all kinds of discrimin in all kinds of ways.

They share a common pose and a common ban the International union's lutions on civil rights, ad at the 1968 convention.

Their efforts range small steps to large one still larger ones—from d sion to job complaints, litical action. Combined other small steps throu SEIU's network of local u and the entire labor move it's something more: it's at the grassroots level, dividual's level.

SEIU's 1968 resolution

The questions they ask

Before the surge of the civil rights movement in the 1960s, the questions black Americans asked were whether they could sit at lunch counters, vote like everyone else, or ride in the front of the bus.

Things have changed. Some basic issues remain, but the questions have shifted. Vernon Jordan, Urban League executive director, says blacks now are asking whether they can afford to eat in a restaurant, be elected to public office, or ever hope to own and run a bus company.

Joe's a Vietnam veteran just out of the army. He's looking for a job and has a wife and child to support.

Bill is also a veteran, newly discharged after a tour in Vietnam. He's married with one child and jobless.

Neither Joe nor Bill completed high school, though the army taught them some skills. Education and skillwise, they're the same. But, on the job market, they're not.

Joe is white. Bill is black. Bill's chances of going without a job are about twice as great as Joe's. If they both manage to find jobs, statistics show that Bill's income will be only two-thirds as much as Joe's.

Joe and Bill are mythical. But the situation is not. Despite economic and social gains, black Americans still lag behind in employment, income, education and living standards.

BLACK LEADERS admit there clearly has been progress. The problem, they say, is that whites and blacks use different yardsticks to measure it. Whites look at the distance the blacks have moved from where they were ten years ago. But black Americans measure their position in relation to whites.

A good example: some black families now are earning as much as some white families in comparable positions. But, that parity exists only when both the husband and the wife in a black family work compared to the white family where only the husband works. Vernon Jordan says, ". . . now we are told what blacks knew all along, that black wives have to work if a black family is to earn as much as a white family."

Blacks comprise about 11 percent of the nation's total population, but 18 percent of the nation's unemployed and 27 percent of those working part-time involuntarily. They're 30 percent of the nation's poor.

A black worker makes 61 percent of the income of his white counterpart. The gap between the median black family income and the median white family income actually widened between 1960 and 1970—from $2,600 to $3,800. The percentage of white families making over $10,000 is double that of black families. And, on the average it takes three workers in a black family to earn as much as one worker in the average white family.

MORE BLACKS attend school now, but blacks of every educational level continue to earn less than whites. A black college graduate, on the average, makes less than a white high school graduate with no college.

With more education, blacks have moved up the job ladder to better-paying jobs. Still blacks continue to hold a disproportionate amount of lower-paying jobs. About 37 percent of all black men work in service, labor and farm occupations compared to 17 percent of all white men. In nine industries with relatively high wages, blacks hold only 8 percent of the jobs and just one percent of the higher-paying ones.

The value of a union card has long been known to black workers, who comprise 13 percent of all labor unionists. In fact, a higher proportion of black workers are organized than white workers. Wages of black craftsman in unions are 40 percent higher than black craftsmen who are not organized.

The economic gap between whites and blacks is reflected in the gap between their living conditions. The percentage of blacks living in segregated neighborhoods actually increased between 1960 and 1970. One quarter of all black households are forced to live in housing that is either dilapidated or lacks basic plumbing facilities compared to one-sixteenth of white families.

and threw it out. The Court criticized Attorney General John Mitchell for his inaction. A Congressional committee declared the Justice Dept. had not properly enforced the 1965 law and accused the Nixon Administration of inviting "irresponsible people" to disregard laws.

Nixon dragged his heels as school desegregation progressed in the South. Administration attitudes and tactics forced Leon Panetta, head of HEW's Civil Rights Division to resign.

On this issue, Nixon used lots of words: ". . . I intend to use the leadership resources of the executive branch of government in every way possible . . . desegregation is vital to quality education . . . racial isolation ordinarily has an adverse effect on education."

The deeds contradicted the words. Despite a 1969 Supreme Court directive to desegregate schools right away, the Administration's policy was relaxed. It even went to court to postpone the deadline for school districts. For the first time since 1954, the Government went into court to oppose desegregation.

The High Court's answer was no delay, neighborhood schools must go if they maintained segregation. Nixon replied to the Court's decision with an attack on a busing plan formulated by one of his own executive agencies, HEW.

In 1968, President Nixon said, "The thrust of my programs is to provide incentives to move capital into the ghetto . . ."

The words—his only civil rights proposal during the 1968 campaign. The deeds—only one: to create an Office of Minority Business Enterprise in the Commerce Department. But it has no authority to make loans or to fund or supervise programs. The Small Business Administration also got left out in the cold. After Nixon refused to back SBA's request for $200 million for direct loans, a black official quit. He said that on black economic problems the President was capable only of "rhetoric, rhetoric, rhetoric."

On the campaign trail in 1968, Candidate Nixon offered a solution to the nation's racial problems: "more black ownership, black pride, black jobs, black opportunity . . ."

The words were empty. When given the chance to do something, the Administration's deeds fell short again.

After investigating the Equal Employment Opportunity Commission, the U.S. Civil Rights Commission recommended the EEOC be given "cease and desist" powers to enforce anti-discrimination laws. Organized labor, women and civil rights groups strongly backed the bill in Congress that would do just that. The Nixon Administration did not.

• The fact that the EEOC had been able to enforce action in less than half of the more than 30,000 cases of job bias found by the agency didn't seem to impress the President. Nor the fact that the number of complaints received by the EEOC is soaring—1970 charges were up 62 percent over the previous year.

President Nixon said he was interested in closing the "performance gap" in civil rights.

But his deeds add up to a "less than adequate" rating, according to the U.S. Civil Rights Commission.

Furthermore, the Commission's latest report accused President Nixon of failing to instill "a sense of urgency over the need to end discrimination." The Government as a whole gets only a "marginal" rating from the Commission, an independent, bipartisan agency established by Congress in 1957.

The record not only shows a "performance gap" between "deeds" and "fancy speeches," but a gap which, under the Nixon Administration, was widened considerably.

ion-in all kinds of ways

on all members and local unions to join the fight. It declared support for legislative programs to fight poverty, to provide jobs and adequate housing for all citizens and urged increased support for educational expenditures.

It commended local unions on their continuing efforts to negotiate non-discrimination clauses in their contracts. Finally, the International urged each member to make the civil rights movement his own personal battle.

Here's what that fight looks like at the local union level:

A NURSE'S AIDE at Kaiser Hospital in Los Angeles was fired—the hospital said she had been continually tardy. Her record showed that she had been warned and counseled before she was terminated. Local 399 stepped in to take a look and the hospital's claim seemed reasonable.

But wait a minute: the aide claimed she had been discriminated against because she was black. The local took another look. Its Civil Rights Committee turned up other employees who had been late to work, too—later and more often than the fired nurse's aide—but they were white. The committee gathered the facts and went to the hospital administrators with the case. The aide got her job back with pay for the time she lost.

Local 399 also worries about discrimination against women. Like other SEIU unions, they fight hard for equal pay scales for women employees in their contracts. That would seem to be an obvious thing, but women aren't always protected by the equal pay law, not from unscrupulous employers who try to disguise different wage scales with terms like "light housework" and "heavy housework."

LOCAL 399 knows that the ballot box is often the key to the fight for equal rights. Voter registration comes under the COPE committee but the two committees work together. All organizers and business reps in the local are trained registrars. They carry their registration books with them to sign up voters on the spot.

Any hospital agreement Local 399 signs has a clause providing a career ladder program for job training and upgrading.

Local 144 in New York City knows all about job training programs. It just received the largest single federal grant of its kind to train disadvantaged and jobless workers for careers in health care services.

The $1.7 million JOBS grant will enable the local to convert its old four-story headquarters to an educational center with classrooms and equipment and to turn out 700 graduates this first year. (See page 2)

ANOTHER SEIU local union, School Employees Local 118 in St. Louis, fights the frustration of inadequate job opportunities with a program to help members upgrade their present jobs. It means losing members to another union, but Local 118 thinks helping workers to improve the quality of their life is more important than membership figures.

The local cooperates with the University of St. Louis in administering the course. Graduation for a custodian, ground crewman or storeroom attendant means moving up to jobs as maintenance men without having to pass additional exams. It means better positions, more responsibility, more money.

Members of Local 82 in Washington, D.C., think voting is one of the best ways a man can fight for his civil rights. So they devote a lot of time and energy to the voter registration program of the D.C. Chapter of the A. Philip Randolph Institute. The Institute, founded in 1964, has a three-fold purpose—to serve the cause of civil rights, to strengthen black ties with other political activist groups and to work for economic and social progress. Chapters around the nation provide active voter education and voter registration programs.

Many SEIU locals fight discrimination through strong, established organizations like the Institute. Local 372 members in Chicago are active in the Urban League, the NAACP, and others—they participate in fund raising, give their time and efforts to voter registration drives.

Local 347 in Los Angeles protects its members from subtle forms of discrimination—like civil service tests. Walter Backstrom, business agent for the local, points out that by and large, the tests are written by white, middle class, college graduates.

The local created enough static about the tests that the union now is allowed to review the tests and protest against wording that discriminates against a minority worker—or any worker experienced enough to do the job, but not educated in the way of civil service tests.

Job dignity. That's another Local 347 concern. "Vocational education is a dirty word," Backstrom asserts. "No matter what your job is, you've got to feel some kind of professionalism." The local helps members find that feeling with educational classes to teach job pride.

DISCRIMINATION, inadequate educational and job opportunities, and poor living conditions—they all create a contempt for our society. Local 47 in Cleveland attacked poor living conditions for disadvantaged families in the inner city.

Along with another union, the local sponsored a low and moderate income housing project. Community for Better Living, Inc., was the first rent supplement apartment complex in the country. It was also the first new housing in the Hough area of Cleveland in 50 years.

Local 47 and the Meatcutters union pledged $100,000 in union funds to get the project off the ground. Federal financing helped out with the rest.

It stands today, eight buildings with 94 units plus a unique day care center for working parents in the project.

ACTION, not words. That's what the civil rights movement is to SEIU local unions. Better jobs, better housing, better education—a better life for all members.

BLACKS ARE more likely than whites to be victims of serious crimes and crimes of violence. Despite drops in overall infant and maternal mortality rates, the mortality rate for black mothers is about three times that of white mothers. Black infant mortality rates are higher also. The life expectancy of blacks is about ten percent lower than whites in all age groups from 25 to 55 years of age.

The proportion of black voters has almost caught up with white voters. Six out of every ten blacks voted in the 1968 Presidential election, compared with seven out of every ten whites. But, blacks hold only .3 percent of the elective offices in the country.

The figures don't lie. Blacks made impressive gains during the 1960s, but still lag far behind the rest of the American society. The civil rights questions of the sixties have been answered, the new economic rights questions must be dealt with.

Quality counts

The AFL-CIO Executive Council adopted the following statement at its winter meeting:

"The AFL-CIO has consistently supported both quality education and integrated education. We have just as staunchly supported mass investment of federal funds to improve substandard schools. We have fought for legislation to achieve open housing as the most effective way to achieve integrated education.

"The AFL-CIO Executive Council categorically reiterates these positions and adds:

"1. We wholeheartedly support busing of children when it will improve the educational opportunities of the children.

"2. We deplore the actions of those individuals or groups who are creating a divisive political issue out of America's vital need for quality, integrated education.

"3. We will oppose the constitutional amendment approach because it will do a disservice to the quality, integrated education which we support."

Policemen link with SEIU

A national police union, affiliated with the Service Employees International Union, has been announced by Gen. Pres. George Hardy.

The National Union of Police Officers (NUPO) will be established in SEIU as a separate and autonomous division. It will provide a vehicle for grouping SEIU police locals into a cohesive unit devoted exclusively to the special problems of law enforcement officers.

Since last May, SEIU has organized nearly 2,500 police officers in three Southern states, Alabama, Louisiana and Mississippi. The Patrolman's Association of New Orleans, Local 641 was the first group organized. After that the drive snowballed with ten more locals receiving charters.

". . . THE HIGHLY complex problems which unions of police officers face require the establishment of a strong national union to coordinate their activities and to provide organizing information, research and legislative assistance," Pres. Hardy said in his announcement of the creation of NUPO.

"Police officers are the only large group of public employees who don't have an AFL-CIO union to speak for them and to represent their interests nationally. . . ."

Hardy also announced the appointment of John Cassese as president of the new union. Cassese has been a police union leader for over 20 years. He headed the 30,000-member New York City Policeman's Benevolent Association for 11 years and is a past president of the International Conference of Police Associations.

NUPO's national headquarters will be located in the SEIU offices in Washington, D.C.

AFL-CIO blasts Nixon, sounds call for November

Bal Harbour, Fla.

Labor leaders have sounded an urgent call for political activity to help liberal candidates win "the most important election of the century."

The AFL-CIO executive council called for "the total mobilization of the labor movement at every level for a commitment by all members and all union officials to join in the COPE program to the fullest extent."

Meeting in its mid-winter session, the council sharply criticized the Nixon Administration and declared "a massive effort" is needed "to register every union member and voting age member of his or her family . . ."

"At every level of government there is a clear and pressing need to elect progressive, liberal men and women, committed to moving this country forward again," the council said.

"MANY of the candidates for national and state office are proven friends of workers, consumers and ordinary citizens. They deserve re-election and they merit our support."

Other office-holders who are "proven allies of big business . . . deserve defeat and they merit our opposition," the resolution said.

Success in the November election "means an all-out effort to collect $2 for COPE from every member to help narrow the funding gap that always exists between labor's political friends and its political foes," the council said.

The council blasted the Nixon Administration for giving us "the highest unemployment in ten years" with little hope for improvement.

"UNDER present administration policies," the council declared, "unemployment will not go down appreciably, if at all."

Under Nixon, unemployment rose while productivity went up—"the increase in unit labor costs was cut in half. But the rise in the price level continued, with only little abatement, and the lion's share of the productivity gain went to profits . . . and other business income."

"The administration's remedy for this prolonged economic mess is optimistic rhetoric, combined with trickle-down policies of increasing government subsidies for big business," the council said.

IN OTHER resolutions, the council declared:

- "Flagrant favoritism" toward business and against workers and the poor "is rapidly destroying public support" for the Nixon wage-price control program.
- Special federal money is needed to meet a third of the total cost of social security benefits to provide a decent standard of living for the elderly without a sharp rise in taxes.
- Congress should pass a national voter registration-by-mail law that would remove artificial barriers that discourage and disqualify people from registering.
- It warned political candidates against making the busing problem a "divisive, political issue," and opposed a constitutional amendment that would forbid it. Labor is for "quality, integrated education."

THE COUNCIL also awarded the Murray-Green Award for outstanding humanitarian service to one of its own members—A. Philip Randolph, president-emeritus of the Sleeping Car Porters and a leading civil rights figure.

Executives run Labor Dept.

The U.S. Labor Dept. was set up in 1913 to protect the interest of American workers. Under the Nixon administration, its roster of top officials looks like a "Who's Who" of big business.

These are the officials—and their backgrounds—who determine policy for the Labor Dept. which was created to "advance the public interest by promoting the welfare of the workers of the United States, improving their working conditions, and advancing their opportunities for profitable employment."

Starting at the top, Labor Sec. James Hodgson was a Lockheed Corp. vice president. His top assistants include:

William Schmidt—Lockheed Corp. information director.

Carl Uehlein—lawyer, worked with management clients on labor law.

Frederick Webber—lobbyist for lumber industry trade group.

Laurence Silberman—lawyer, specialized in labor law for management and business clients.

Richard Wise—John Hancock Life Insurance industrial relations executive.

Frank Zarb—investment banking and oil company executive.

George Guenther—John H. Guenther Hosiery Co. president.

Malcolm Lovell—Ford Motor Co. and American Motors executive.

Richard Gruenwald—Olin Corp. vice president.

Richard Schubert—Bethlehem Steel Corp. labor relations executive.

Donald Irwin—executive with Chrysler, John Deere and Hawaiian Airlines.

John Blake—Marine Midland Trust Co. executive.

John Wilks—headed public relations firm with Standard Oil, Chrysler and F. W. Woolworth Co. as clients.

Oh yes, there are three (out of 17) officials with labor backgrounds. Bill Usery, IAM, Paul Fasser, Steelworkers and Robert Brown from the UAW.

Canadians get hikes

Canadian trade unionists got pay hikes averaging 7.8 percent in 1971. The majority of the agreements were for two years, reports the Canada Labour Dept.

Of 333 agreements signed in 1971, 172 were for two years, 111 for three years and there were 50 one-year contracts.

Pay increases averaged 9.6 percent in the first year, 6.6 percent in the second of the two-year contracts. Three-year contract gains averaged 9.4, 6.8 and 5.6 percent. The one-year pacts gained an average 8.5 percent increase.

Campaign spending law approved, now ignored

Don't expect the new campaign spending law to reduce the influence of corporations and the wealthy on the election process.

Nobody in the Justice Department has been given the responsibility for enforcing the law. Oversight? Hardly. Nixon's campaign manager in 1968 was John Mitchell. Attorney General Mitchell since then has completely dismantled the enforcement operation.

So a new law hailed by the press as "the first major reform in campaign election laws in 46 years" is almost certain to go unenforced.

While Congress was closing loopholes in the Corrupt Practices Act of 1925, Mitchell quietly got rid of the enforcing operation.

When the Nixon team took office, the task of enforcing campaign spending laws was assigned to two veteran Justice Department attorneys and several young lawyers. One of Mitchell's first actions was to overburden them with work in other fields.

The two experienced lawyers have now taken jobs elsewhere and Mitchell hasn't replaced them. The only attorney left in the office is a young lawyer who will also leave shortly.

Result: the new law is likely to be just as useless as the old one.

Backpay for Local 183

Belleville, Ont.

Seventeen SEIU Local 183 members are sharing $2,678 for benefits denied them by Belleville General Hospital when they worked over 24 hours a week.

The employer wasn't living up to a union contract which provided contract protection and benefits to part-time workers when they worked more than 24 hours a week.

The local informed SEIU Vice Pres. Albert Hearn and International Rep. James Hughes of the violation. Hearn and Hughes demanded compliance and set a deadline for correction of the abuses.

The hospital settled. The $2,678 paid the 17 covers overtime, pay increases, holiday premiums, and other benefits the hospital had denied them.

Mechanics win back pay of $6 million in lockout

Miami, Fla.

Six million dollars in back pay will be paid to nearly 1,000 IAM mechanics and ground service workers illegally locked out for over a year by National Airlines.

The International Association of Machinists settlement is the largest back pay award in U.S. labor history.

IAM Vice Pres. William W. Winpisinger said union members will receive checks ranging from $500 to nearly $10,000 each for a 53-week period that began in January, 1969. The average will be over $6,000.

The Fifth U.S. Court of Appeals ruled National Airlines violated the law when it arbitrarily changed work rules during contract negotiations, then fired union members when they struck in protest.

The Supreme Court refused to consider an appeal by National Airlines. Negotiations for a settlement have been going on for nearly a year.

"This is a $6 million reminder to the airline industry that, under the law, an airline cannot arbitrarily change working conditions," Winpisinger said.

IN REPLY REFER TO

U.S. DEPARTMENT OF LABOR
BUREAU OF EMPLOYMENT SECURITY
WASHINGTON, D.C. 20210

UNITED STATES EMPLOYMENT SERVICE

UNEMPLOYMENT INSURANCE SERVICE

JAN 7 1966

Miss Joan C. Browning
Secretary, Labor Program
Southern Regional Council, Inc.
5 Forsyth Street, N. W.
Atlanta, Georgia 30303

Dear Miss Browning:

The Secretary of Labor has asked me to reply to your recent letter requesting information about the minority group specialists who will be appointed to the staffs of State employment security agencies.

Appropriations for the improvement of the public employment service for fiscal year 1966 included funds for 50 full-time minority groups representative positions in State and metropolitan area administrative offices. These positions are now being allocated among State agencies on the basis of the agencies' requests for these positions and the resources available.

Since the allocation of the positions is not yet final, we are unable to provide you with a list of the States and cities in which the specialists will be stationed. We shall be pleased to furnish this information to you when it is available.

Thank you for your interest in this matter.

Sincerely yours,

Louis Levine

Dear Mr. Smith:

I was pleased to see the announcement of the seminar on protective labor legislation to be held at Florida A. & M. University. I regret that my schedule is such that I will be unable to participate in the seminar.

Perhaps you could do two things for me: one, keep me on the list for any announcements of future programs of this sort in the Southern states; two, send me any reports or copies of papers used at the seminar in Tallahassee.

I hope the seminar will be a great success.

Sincerely,

Emory F. Via
Director

Company or Organization

FLORIDA A. & M. UNIVERSITY

Tallahassee, Florida

announces a

Seminar on
Protective Labor Legislation

MONDAY, JUNE 27, 1966

Co-sponsored by the U. S. Department of Labor

Sponsor

This Seminar will be sponsored by the Vocational-Technical Institute, the Department of Economics, the Department of Business, and the Office for Continuing Education of Florida A. and M. University in cooperation with the Bureau of Labor Standards, U. S. Department of Labor.

Purpose

A one-day Seminar designed to provide opportunity for an analysis and discussion of some of the critical labor problems involved in Florida's rapidly expanding economy. It is planned that those attending will gain a better understanding of the many issues and needs related to protective labor legislation and the developing concepts in this area.

The major topics to be discussed are:

The Philosophy Underlying Protective Labor Legislation

The Need for a State Minimum Wage Law

The Need for Extended Coverage of Labor Laws to Agricultural Workers

The Need for Improving Consumer Information and Protection

A Look at Florida and the Changing Employment Situation

Participants

This Seminar is primarily designed for industrial, labor, agricultural and educational leaders together with businessmen and others interested in the manpower development of Florida.

Seminar Location

The Seminar will be held on the campus of Florida A. and M. University in the new air-conditioned Grand Ballroom of the Student Union.

Guest Speakers and Consultants

An outstanding and impressive roster of speakers and consultants has been scheduled including leaders in business, state and national government.

Registration

Registration is planned for 8:00-9:00 Monday morning in the lobby of the Grand Ballroom. Those registering in advance will save time at the registration booth.

Food and Lodging

A fee of two (2) dollars will be charged those planning to attend the luncheon meeting. This is payable at the time of registration. Those wishing lodging arrangements should contact the hotels or motels directly. Information about convenient facilities will be provided upon request.

A ONE DAY Seminar to provide you the information that you should know about:

- Minimum Wage-Hour Legislation
- Extended Coverage of Labor Laws to Agricultural Workers
- Consumer Information and Protection
- Changing Manpower Needs in Florida

Dear Emory,

I am enclosing a copy of the report on the Men and Religion Forward Movement that I did for the Christian Council. As I mentioned on the phone I emphasized the ecumenical aspect of the movement for the Christian Council. But you can get a little of the flavor of their involvement in the Fulton Bag and Cotton Mill strike. The story is much more detailed than what I have in the report, and I will elaborate it some more in the report I am doing for SRC. In terms of the labor history of Ga. it is a story that I think is worth reconstructing. It ought to be recounted in full sometime.

Sincerely,

Harry

THE MEN AND RELIGION FORWARD MOVEMENT IN ATLANTA

a case study in ecumenism and social justice

Harry G. Lefever

In the years preceeding World War I a movement swept through the American Protestant churches known as the Men and Religion Forward Movement. It originated in 1911 in New York, but quickly spread to ninety cities across the country with the objective of finding 3,000,000 men missing in participation in church life and of doubling the enrollment of men's Bible classes. It was motivated by a Social Gospel theology as evidenced by the seven volumes of published speeches of the 1912 Men and Religion Forward ~~conference~~ congress, which carries such names as Walter Rauschenbusch, Washington Gladden, ~~and~~ Frank Mason North, and Henry Sloane Coffin. Two other well-known persons who spoke at the congress were George Palmer and Booker T. Washington. ~~and Booker T. Washington~~. The slogan of the movement was "enlistment of men in the program of Jesus as the world program of daily affairs."

Atlanta was one of the ninety cities selected for the organization of the Movement. The first Atlanta meeting was held April 17, 1911 in the Atlanta YMCA, with ex-Governor William J. Northen presiding. At the meeting John J. Eagan was elected president and Marion M. Jackson vice-president. Although laymen, both of these men were active in the Evangelical Ministers' Association and both were associated with the YMCA. Mr. Jackson at the time was president of the YMCA, a post he held from 1908-1916. Several ministers who served on the first executive committee and board of directors of the Movement were Rev. W. C. Schaeffer, pastor, English Luther Church; Rev. John E. White, pastor, Second Baptist Church; Rev. C. B. Wilmer, rector, St. Luke's Episcopal Church; Rev. M.J. Cofer (church unknown).

The Movement was highly organized. For example, the following commit-

tees were operating in Atlanta by late 1911: Business and Finance, Publicity, Eight-Day Campaign and Special Events, Auxiliary Cities, Boy's Work, Bible Study, Evangelism, Community Extension, Social Service, and Missions. By 1913 their budget called for $30,000, raised largely from Atlanta's churches.

The men who represented the Movement worked closely with the Atlanta Evangelical Ministers' Association. Many of the men who served as chairmen of the Movement's committees were also members of the Ministers' Association. (The Association evidently accepted both ministers and non-ministers. At least the meetings were attended by both). The Association at its December 4, 1911 meeting passed the following resolution:

> Whereas the Program of Work of the Man and Religion Forward Movement is the program of the practical activities of the Christian Church,
>
> Be it Resolved, First, that we heartily endorse the Movement and pledge it our cordial and loyal support, and
>
> Secondly, that during the coming year, regular provision be made for the consideration during the executive session of our monthly meetings of those matters that are the common interest of this Association and the Forward Movement.

The Movement was deeply concerned about the social evils of Atlanta and expended its energy toward the elimination of them. One of the first undertakings was to clear up the prostitution houses in the "red light district" of Atlanta. Those in the Movement worked closely with Police Chief Beavers on this project. Along with the closing of the prostitution houses they were involved in opening up Martha's House for unwed mothers. Some of the other social causes they took up over the following years were prison reform, prohibition, support of child labor legislation, and labor justice. Their concern for the later is well illustrated in the action of the Movement in response to two strikes in Atlanta in 1914 -- one at the

Index Publishing Company, and the other at the Fulton Bag and Cotton Mills. They decided that there was little they could do about the strike at the Index Publishing Company, but they went on record in favor of the workers' right to organize. The Evangelical Ministers' Association passed the following resolution on February 2, 1914:

> As pertaining to the controversy between the Atlanta Typographical Union and the Index Publishing Co., we recognize the matter to be outside the province of the Evangelical Ministers' Association; and that this committee representing the Association has no more authority in this particular instance than with regard to any other business concern.
>
> But be it resolved that we express the deepest sympathy with the efforts of laboring men to better their conditions and recognize their wisdom and right in organizing to this end.

In contrast to this stance of non-involvement with the strike at the Index Publishing Co., the Ministers' Association and the Men and Religion Forward Movement were deeply involved with the strike at Fulton Bag and Cotton Mills. The strike at the Mills lasted for more than three months, from late May to early September, 1914. On July 6, 1914, the following resolution was passed by the Association:

> That this association of Evangelical Ministers commend to both parties in the controversy at the Fulton Bag and Cotton Mills the duty of arbitrating their difficulties and tender to this and the good offices of this association in any way which may be deemed useful.

Rev. C. B. Wilmer, rector of St. Luke's Episcopal Church, and a member of the Ministers' Association declared that the Men and Religion Committee and Mr. Marion Jackson, president of the YMCA "were proving the strongest influence in the city for keeping order during the strike." One of the ways they exerted their influence during the strike was to devote many of their three-column bulletins, which appeared weekly (sometimes twice weekly) in the Atlanta <u>Constitution</u>, to the subject of the strike. They began

publishing these bulletins in June, 1912 to keep the readers informed about social conditions in Atlanta. When the strike at Fulton Bag and Cotton Mills came in 1914 they had a ready mouthpiece and used it effectively. In fact, they were so effective in calling the public's attention to the social conditions of Atlanta that public pressure was put on the Constitution to stop publishing the bulletins, because they were giving Atlanta a bad image and were distracting the interests of the industrialists who were looking toward Atlanta. The Constitution gave in to public pressure and after September, 1914 they refused to accept any more bulletins from the Men and Religion Forward Movement. But by this time they had published 140 bulletins.

In addition to the bulletins the men in the Movement helped to organize public meetings to discuss the conditions at the Fulton Bag and Cotton Mills and the circumstances surrounding the strike. A mass meeting held at the Grand Opera house on June 28, 1914, was attended by 2000 people. The speakers at the meeting included three key men from the Movement, namely, Rev. C. B. Wilmer, Rev. John E. White, and Marion M. Jackson. Rev. Wilmer spoke on "Industrial Democracy" and Rev. White on "Mediation." But the speech that received the greatest attention on the front page of the June 29 Constitution was Marion Jackson's, entitled, "The Coming of the Kingdom of God."

In spite of all these efforts the strike accomplished no permanent improvement for the workers. By September the strikers' energies were dissipated. Those involved in the strike were fired by the Mill, and as far as the management was concerned things were soon back to normal operation.

During the period of the next couple of years the Men and Religion Forward Movement continued its program of social justice in Atlanta with modest success. In the meantime many of the other chapters of the Movement

in other cities had died out. Rather than have this happen in Atlanta, the executive committee of the Movement recommended to the Ministers' Association in October, 1916 that a Committee on Church Co-operation be appointed to take over and continue the work of the executive committee of the Men and Religion Forward Movement. The recommendation was accepted by the Ministers' Association and a Committee on Church Co-operation was forthwith appointed. The committee was composed of both clergy and laymen from a cross-section of Atlanta's church life. A perusal of the persons involved indicates the wide representation on the committee: Dr. Charles W. Daniel, pastor, First Baptist Church; Dr. Charles O. Jones, pastor, Trinity Methodist Church; Mr. John A. Manget; Mr. John J. Eagan; Dr. C. S. Wilmer, rector, St. Luke's Episcopal; Mr. Jacob W. Paterson; Dr. J. H. Elder, pastor, Ponce de Leon Ave. Methodist Episcopal; Mr. H. A. Etheridge; Mr. J. V. Wellborn; Mr. J.p. Jackson; Dr. R. O. Flinn, pastor, North Ave. Presbyterian; Dr. L. O. Bricker, pastor, First Christian; Rev. W. C. Schaeffer, pastor, Church of the Redeemer (Lutheran); Dr. Thomas H. Johnson, dean St. Phillips Cathedral (Episcopal); Prof. Floyd Field; Dr. Dunbar H. Ogden, pastor Central Presbyterian; Mr. M. M. Jackson; Mr. John W. Crenshaw; Dr. J. F. Purser, pastor West End Baptist Church; Mr. Walker Dunson; and ex-officio Dr. J. S. Lyons, president of the Evangelical Ministers' Association.

The appointment of the Committee on Church Co-operation meant that formally the Men and Religion Forward Movement in Atlanta was dissolved. However, the spirit of the Movement in the form of concern for ecumenism and social justice lived on in the Committee of Church Co-operation.

Emory Via
Southern Regional Council
5 Forsyth St.
Atlanta,

Dear Emory,

Listed below are the names of the persons from Mennonite House who helped with my study with their addresses and the number of interviews completed. In our conversation on Monday you had mentioned the figure of between $.75 and $1.00 per interview as a realistic possibility.

14 - Tina Buechele, Mennonite House, 540 Houston St. N.E., Atlanta 30312
12 - Paul Buechele, " "
2 - Beverly Hillman, " "
5 - Paul Quiring, 3031 E. Platt, Apt. G., Fresno, Calif. 93701
4 - Cornelia Brown, Box 8371, Stanford, Calif., 94305
7 - Curt Boylls, 329 Richard Rd., Naperville, Ill., 60540

I mentioned yesterday that Will Campbell will be coming to Cabbagetown this Friday night. I'm sorry to say, he now has a conflict and will be unable to come.

Your mention of Harry Sharp rang a familar note with me. I have several of his articles. His address (which you prebably already know) is: Survey Research Lab., 905 Un. Ave., Madison, Wisc. 53715. I don't know his telephone #. If you have opportunity to contact him or anyone else who could answer some of the research questions we discussed I would appreciate learning about it.

I'm returning a corrected copy of my report. Starting on p. 4 you will note "start" and"Stop" in the margin. This was a quick attempt to cut out all the portions that might be offensive to Cabbagetown readers. This is a fast way to get a 25-30 page summary (more if appendix is included). Would that at all be the type of summary you had in mind? After you have time to look it over I will talk with you about it.

Sincerely,

Harry

Fila: Harry Lefever

THE INVOLVEMENT OF THE MEN AND RELIGION FORWARD MOVEMENT IN A 1914 LABOR STRIKE IN ATLANTA, GEORGIA

Harry G. Lefever

In the years preceeding World War I a movement swept through American Protestantism known as the Men and Religion Forward Movement. It originated in New York City, but quickly spread to ninety cities across the country. Among the objectives of the Movement were "to find 3,000,000 men missing in participation in church life" and to double the enrollment of all men's Bible classes. "Enlistment of men in the program of Jesus as the world program of daily affairs" was their slogan.

Initiated by a group of businessmen, who believed that religion could be sold, the Movement early exhibited the business principles of brisk efficiency, detailed organization, and the use of sales techniques. On the premise that "the army of the Lord moves on its stomach," dinner meetings were held from coast to coast. In each city in which a chapter was launched, a flood of publicity was released, followed by an intensive eight-day campaign. Speakers and specialists were present to explain the objectives of the Movement and to discuss the details of local social conditions that needed correcting.

The Movement was motivated by the "social gospel," a theological emphasis of the liberal Protestant churches which attempted to apply Christian principles to social issues during the turn-of-the-century decades. According to Charles Hopkins,

> the acceptance of the social gospel by the churches was most obviously demonstrated in the "Men and Religion Forward Movement," which was the most comprehensive evangelistic effort ever undertaken in the United States. Although it had not been planned to stress social messages disproportionately, the popularity of this phase of its program virtually converted the Movement into a social-gospel campaign, so that [Walter] Rauschenbusch could well say that it had "probably done more than any other single

> agency to lodge the social gospel in the common mind of the Church," and that it had "made Social Christianity orthodox."[1]

The social gospel emphasis is clearly evident throughout the seven volumes of published speeches of the Men and Religion Forward Congress, held in New York in 1912. Among those who spoke at the Congress, were the following prominent social gospel leaders: Walter Rauschenbusch, Washington Gladden, Frank Mason North, and Henry Sloan Coffin. Appearing at the Congress along with these recognized social gospel promoters were two other well-known persons, Jane Adams and Booker T. Washington, names perhaps not usually associated with the social gospel movement, but persons, nevertheless, who along with the social gospelers, were concerned to improve the social conditions of America.

* * *

Atlanta, Georgia, was one of the ninety cities selected for the organization of the Men and Religion Forward Movement. The first Atlanta meeting was held April 14, 1911 in the Atlanta YMCA, with ex-Governor William J. Northen presiding.[2] At the meeting John J. Eagan was elected president, Marion M. Jackson, vice-president, and Rev. W. C. Schaeffer, secretary. Mr. Eagan, an industrialist (founder of the American Cast Iron Company of Birmingham), was active in philanthropic and civic endeavors. He was an elder of the Central Presbyterian Church in Atlanta and served as the superintendent of the Central Presbyterian Sunday School for more than twenty years. Mr. Jackson was president of the Atlanta YMCA, a post he held from 1908-1916. Rev. Schaeffer was pastor of the English Lutheran Church.

---

1. The Rise of the Social Gospel in American Protestantism, 1865-1915 (New Haven: Yale University Press, 1967), p. 296
2. The Men and Religion Forward Movement in Atlanta (Atlanta, n.d. A 15-page pamphlet published by the Executive Committee of the Movement)

The men who represented the Movement worked closely with the Atlanta Evangelical Ministers' Association. Many of the men (both laymen and ministers) who served as chairmen of the Movement's committees were also members of the Ministers' Association. The Association formally endorsed the Atlanta chapter of the Men and Religious Forward Movement at its December 4, 1911 meeting with the passage of the following resolution:

> Whereas the Program of Work of the Men and Religion Forward Movement is the program of the practical activities of the Christian Church,
>
> Be it Resolved, First, that we heartily endorse the Movement and pledge it our cordial and loyal support, and,
>
> Secondly, that during the coming year, regular provision be made for the consideration during the executive session of our monthly meetings of those matters that are the common interest of this Association and the Forward Movement

Of common interest to both the Association and the Movement was the task of eradicating the "social evils" that existed in Atlanta. Their first combined undertaking in 1912 was to work with Atlanta Police Chief James Beavers in an effort to clear ~~up~~ out the prostitution houses in the "red light district" of the city. Other projects and causes they took up over the following years were to open a house for unwed mothers, prison reform, prohibition, support of child labor legislation, and labor justice.

An opportunity to support the cause of labor justice came in the summer of 1914, when a strike took place at the Fulton Bag and Cotton Mills in Cabbagetown, a poor white community in southeast Atlanta. For six months prior to the beginning of the strike, from December, 1913, until May, 1914, workers had tirelessly presented their grievances to the owners of the mill. In order to better express their concerns the workers formed a union. The mill owners, in learning of this action, immediately fired 78 workers.

By late spring the president of the Georgia Federation of Labor, S. B. Marks, was involved in the dispute. He wrote a letter to the mill owners asking for an audience with them, and demanded that the discharge of employees for joining the union stop. No reply was ever received. So on May 20 a strike was called.

An open air mass meeting to discuss the grievances of the strikers was held at Grant Park on Sunday afternoon, May 31. The list of complaints to the more than 1000 present included the high brick walls topped with broken glass which surrounded the mills, the written passes required of the operatives when they left the mill, and the docking system which fined workers for inferior work or coming late to work.

Speakers at the mass meeting were Charles A. Miles, AFL organizer from New York; S.B. Marks, President, Georgia Federation of Labor; and Mrs. E. B. Marks, an Atlanta labor leader. (Three weeks after this meeting Mrs. Marks was appointed by AFL president, Samuel Gompers, to take local charge of the strike). These speakers claimed that 435 operatives were out on strike at the Fulton Bag and Cotton Mills. They also declared that 5,000 workingmen of Atlanta had agreed to share their salaries with the Fulton operatives during the strike, and that 2,000,000 other workers in the country were back of the strike financially. Also they informed the audience that the National Textile Workers' Association had camped in Atlanta and would be here, if necessary, "until Gabriel blows his trumpet, if the Fulton mill owners were that long in agreeing to right the prevailing industrial conditions."[3]

---

3. Atlanta Constitution, June 2, 1914, p. 2

A week later the strikers took their protest to the streets. On the afternoon of June 3, more than 200 striking workers paraded through the streets of downtown Atlanta. The Constitution reported that "the line created a unique spectacle, as the men and women - paried off in couples - marched silently over the streets."[4]

On the same day that the strikers marched, the Constitution carried a three-column article, paid for by the management of the Fulton Bag and Cotton Mills. They felt that the publicity surrounding the strike had presented views that were factually incorrect. So in order to present their side of the story they took out an advertisement in which was printed the following:

> Statements have appeared in the news columns during the past few days so unwarranted in fact that we deem it proper to state the following:
>
> The average number of persons employed by us regularly is 1,400.
> We now have in our employ 1,360.
> The number of employees who went out on strike are 78, about five per cent of the total.
> The people now in our employ desire to work.
> Those on strike, 78, aided by strangers, are endeavoring to prevent, by usual methods, the 1,360 who wish to work.
> Our weekly payroll amounts to the sum of $11,500 per week; the average wages are $8.50 per week, per person.
> The fines per week do not exceed the sum of $10.00 out of a payroll of $11,500 per week. It costs this Company more to audit the fines than the amount so received, but it is at times necessary to impose slight fines to insure proper performance of duties.
> This company has always anticipated legislation as to hours of labor, and age of employment.
> Since 1881, during panic as well as prosperity, it has run without cessation.
> It has no commissary, and has always paid its employees in cash.

---

4. ibid., June 4, 1914, p. 5

The striking employees, we think, are misled by persons who are not employees, and some of these strangers have never been in our employment, and are not citizens of this State.

We have in our employ 14 minors between the ages of 12 and 14, and 50 minors between the age of 14 and 16, all of whom have strictly complied with the law covering the employment of minors.

We do not believe this community can be benefited by having mis-statements spread broadcast, hence we furnish the facts.

(Signed) FULTON BAG & COTTON MILLS[5]

In response to this statement, several other statements appeared in the Atlanta Constitution representing the labor side of the strike. The one was published by the Atlanta Federation of Trades; the others by the executive committee of the Men and Religion Forward Movement. The Federation of Trades statement appeared on June 7 and read as follows:

The public should be made aware of the real reason for the strike, and have a truthful statement of the number involved and of other facts surrounding the situation. The organization of the textile union was the outgrowth of a strike in the Fulton Bag and Cotton Mills several months ago, when the operatives protested against the nefarious docking system and prison rules imposed upon them.

The management at that time agreed to certain terms and the employees returned to work, but during the existence of the strike a union was formed. Several of those in active formation of the union were discharged. It was only a short time later that conditions became worse than formerly, and members of the union were discharged as fast as it was ascertained by cotton mill officials.

About 385, and not only 78, walked out at the signal of the committee, while about 100 or more did not return to work when the whistle blew for the return from dinner. A commissary has been opened to supply provisions for the strikers, who have been out since Wednesday, May 20.

Employees are compelled to sign a contract before going to work in the mill that places them in almost slavery; they are docked unmercifully for frivolous offenses, and the wages of the

---

5. ibid., June 3, 1914, p. 3

grown men and women are horribly low, the home surroundings of the operatives are insanitary, and it is the hope of the mill officials to starve the strikers into submission.

(Signed) ATLANTA FEDERATION OF TRADES,

J.B. Hewitt, President
J.F. Bradfield, Secretary
William Van Houten, Secretary and Treasurer[6]
L.P. Marquardt, Chariman, Board of Trustees

The Men and Religion Forward Movement statements appeared in the weekly (occasionally twice-weekly) bulletins which they published in the Constitution. The practice of publishing bulletins in the Constitution was initiated in June, 1912 by the executive committee of the Men and Religion Forward Movement, with the purpose of stating their views and registering their concern regarding social issues. When the strike at the Fulton Bag and Cotton Mills began in 1914, they devoted a number of their bulletins to that issue. Bulletins 119, 121 and 123 are representative of the position they took with regard to the strike.

Men and Religion Bulletin No. 119

LET US HAVE JUSTICE

"I hate, I despise your feasts --- "Take thou away from me the noise of thy songs; for I will not hear the melody of thy viols. "But let justice roll down as waters, and righteousness as a mighty stream." (Amos 5:21-23-24)

...This quiet crowd moving through our city's streets is ... in search of happiness. Policemen are at the column's head, where walks a man bearing the American flag. They are strikers.

Look to the East! There on the city's edge, three smokestacks tower above massive buildings; a great wall surrounds them; glass and barbed wire run along its top. Above it one sees a gaunt black bridge; over it goes a group of children as the warning whistle blows; a little girl not over twelve, her pink dress fluttering against the grime, runs through a forbidding door to work.

SHE AND THEY SHOULD BE AT PLAY.

---

6. ibid., June 7, 1914, p. 5B

Just over the way are those who neither work no play; they sleep in Cakland Cemetery.

Graves of the living are between it and the mill - dreary, drab, monotonously the same, row after row of houses.

Behind them, sanitary conditions which are a menace to the city's health.

Laborers live here.

They have a grievance; underlying it are many complaints.

They struck.

They say, "The Fulton Bag and Cotton Mill discharged 78 of us for joining the Union."

This the mill owners deny. But why do they refuse to have an impartial board investigate and dispose of these complaints?

The strikers are willing.

YESTERDAY, MARSHALS OF OUR COURTS WERE PUTTING HOUSEHOLD GOODS INTO THE STREETS: THE STRIKERS MUST MOVE ON: THE MILLS MUST HAVE THEIR HOUSES. GOD PITY AND PROTECT THEM AND THEIR KIND!

... Our age calls for justice to all.

UNITED STATES GOVERNMENT REPORT upon conditions in cotton mills states that a man, having a wife and three children of 10 to 4, must earn $600.74 a year to maintain a fair standard of living. This standard does not allow savings to meet the contingency of any unusual event, such as lack of employment, or an accident to the father. It makes no provision for old age.

The report states that the minimum for such a family is $408.26. Below this for such a family is actual suffering.

Think of these figures! WHAT DOES YOUR FAMILY REQUIRE?

The Fulton Bag & Cotton Mill states that its average wage is $8.00 per week. If this be true, among 1,400 employees, what of those who receive less than the average, which, providing the worker loses not a week of the 52 must amount to $416.00 per annum, providing that it is not reduced by any fines or penalties?

Mark you - the Government's figures are for a family consisting of a father and mother and three little children of 4 to 10. As these grow their demands must increase.

Think! And you will see that the presence of children, who should be in school and at play, working their lives away in mills, is not wholly due to shiftless fathers who will not work, but to the grave necessity for supporting the family life - THE LACK OF A LIVING WAGE.

THERE ARE NO PROBLEMS IN THE GRAVEYARD OVER WHICH THE THREE STACKS BELCH THEIR SMOKE, BUT THERE ARE QUESTIONS BENEATH THEIR MOVING SHADOWS WHICH GOD WILL HAVE YOU ANSWER. ...

The spirit of God is abroad in the world.

And men are crying for justice.

In the end they will have it.

EXECUTIVE COMMITTEE OF THE MEN AND RELIGION FORWARD MOVEMENT[7]

---

7. ibid., June 6, 1914, p. 7

Men and Religion Bulletin No. 121

... At present a strike is on in one of our largest mills. The strikers claim that between seven and nine hundred workers are out because of unbearable conditions in the Fulton Bag and Cotton Mills. The mill owners claim that only about seventy-eight are out, and that conditions in their mills are better than in any others, and are constantly being improved.

But all who have looked know that sanitary conditions are unspeakable in the mill settlement. And all who know ought of charity in Atlanta are aware that thousands of dollars go to relieve the needs of mill workers.

No harm can come of an impartial investigation of conditions in this mill. Much good may be accomplished by it.

IF AN INJUSTICE HAS BEEN DONE THE MILL OWNERS, IMPARTIAL MEN CAN RIGHT IT. IF CONDITIONS ARE CAUSING WOMEN AND CHILDREN TO SUFFER, THEY CAN BE -- THEY WILL BE CORRECTED.

The owners of the Fulton Bag and Cotton Mills want no money from the starved lives of women and children.

The workers do not want to ruin or harm the mill upon the success of which their welfare must depend.

Both want only their right. And the public asks that both do justice. Let the truth be known.

EXECUTIVE COMMITTEE OF THE MEN AND RELIGION FORWARD MOVEMENT[8]

Men and Religion Bulletin No. 123

ATLANTA WANTS PEACE

"The rich and the poor meet together: the Lord is the maker of them all." Proverbs 22:2

On the one hand, laborers representing several thousand souls.

On the other hand, the officers of a corporation, the Fulton Bag and Cotton Mills, representing its few stockholders.

The rich and the poor have met. And a great cry for justice goes up to God.

Hundreds of laborers have struck, risking privation and want for themselves and their loved ones.

The corporation's officers say, "They have no cause."

THE STRIKERS URGE, "INVESTIGATE."

They write to this Committee -

"Reference has been made in your recent bulletins to the conflicting statements made by both interested parties in the Fulton Bag and Cotton Mills strike.

"Realizing that your Movement, representing, as it does, the spirit of the Churches of the City, and aiming to apply the teachings of

---

8. ibid., June 17, 1914 p. 5

Christianity to the practical affairs of life, we are willing to permit you to be our judge and jury.

"WE ARE WILLING TO SUBMIT THE WHOLE MATTER AT ISSUE TO A COMMITTEE APPOINTED BY YOU, WITH THE UNDERSTANDING THAT BOTH SIDES MAY PRESENT THEIR EVIDENCE TO THE COMMITTEE, WHO SHALL ARBITRATE THEIR DIFFERENCES: THEIR FINDINGS SHALL BE HANDED DOWN IN WRITING, AND BE FINAL AND BINDING UPON BOTH PARTIES DIRECTLY CONCERNED IN THE STRIKE."

The Church of the living God, with no other purpose than to serve our Maker by serving men, calls you to think of these things.

Should the few refuse to permit a fair and impartial investigation of the claims made by these hundreds of workers?

Did you see their procession Saturday afternoon?

They marched through the city's streets.

Heat radiated from the pavement.

It beat upon the little children and women, walking with husbands and fathers.

Their silence hurt.

IT SPOKE OF GRAY, COLORLESS LIVES, LIVED APART FROM THE JOY AND LIFE OF THOSE WHO MOTOR OVER COOL COUNTRY ROADS OR PLAY GOLF THESE WEARILY HOT SUMMER AFTERNOONS, WHEN LITTLE CHILDREN WORK IN MILLS.

These people want no war. They seek peace.

They are bone of our bone, flesh of our flesh.

What shall we do?

God has given to our business men a great opportunity.

Shall we travel together solving these problems which bear alike upon both capital and labor? Or, shall we wait and hesitate, until endless wrangling and fighting has wrought in Georgia the shame and spread abroad a stain of blood like that which has disgraced West Virginia, New England, Wisconsin and Colorado?

TODAY, WE CAN CONTROL WITH LOVE.

TOMORROW, HELL, WITH ALL OF ITS IMPS OF HATE, MAY BE IN THE SADDLE.

Atlanta and Georgia want industrial peace.

City and State watch and wait.

This coming Sunday, in the afternoon, at the Grand Opera House, will be a mass meeting to hear and consider the bearing of the teachings of Jesus Christ upon these questions which we must answer.

Keep the afternoon open for this.

Sunday morning, go to your church and pray God's guidance upon our people.

Then, come and meet with us.

EXECUTIVE COMMITTEE OF THE MEN AND RELIGION FORWARD MOVEMENT[9]

The bulletins had their effect. In fact, they were so effective in calling the public's attention to the social conditions of Atlanta that public pressure was put on the Constitution to stop publishing the

?

---

9. Ibid., June 24, 1914, p. 9

bulletins, because they said they were giving Atlanta a bad image and were distracting the interests of the industrialists who were looking toward Atlanta. The Constitution gave in to public pressure and after September, 1914 they refused to accept any more bulletins from the Men and Religion Forward Movement. Their last bulletin published was No. 140.

In addition to the bulletins the men in the Movement helped to organize public meetings to discuss the conditions at the mill and the circumstances surrounding the strike. A mass meeting held at the Grand Opera House on Sunday, June 28, 1914, was attended by 2000 people. The speakers at the meeting included three key men from the Movement, namely, Rev. C.B. Wilmer, rector, St. Luke's Episcopal Church; Rev. John E. White, pastor, Second Baptist Church; and Marion M. Jackson, president, Atlanta YMCA.

The meeting received front-page coverage in Monday morning's Constitution. The speech that was accorded the greatest attention in the article was Marion Jackson's entitled, "The Coming of the Kingdom of God." The first part of Jackson's speech was devoted to a recounting of the history of the Jews and the constant struggles for freedom and justice they experienced. He cited Moses as the leader of the first strike - that of the Israelites against slavery to Pharaoh in the brick yards of Egypt. Jackson then went on to appeal to the Jewish owners of the Fulton Bag and Cotton Mills to be true to their tradition. "The Jews in Atlanta may not hold to the same religious beliefs that I hold to, but they recognize the principles of right and justice on which that religion is founded."

Included in his speech were attacks on a contract drawn up by an attorney for the Mills. He made reference to a statement in the contract which declared that the mill is to pay the employee only for such services as are rendered and is not to pay for loss of time arising from accidents,

disability or any other cause. He also called attention to the fact that the contract allowed the company to discharge an employee whenever it shall become unwilling to retain him. The latter clause, Jackson pointed out, gave the mill owners authority to discharge any employee if he joined the union.

He went on to say that "there are people who have no patience with labor unions, and say there should be none. But out at those mills there are now, or were only a short time ago, insanitary conditions such as threaten not only the lives of the people who live and work there, but also the health of the entire city. Now, there comes a strike to have these conditions remedied. If these conditions cannot be remedied in any other way, is it right that we should say that there should be no such thing as an organization to fight against such conditions?"

At the close of his speech, Mr. Jackson submitted a resolution for the audience to consider. After some discussion it was subsequently adopted. The resolution read as follows:

> Whereas, the strikers at the Fulton Bag and Cotton Mill have signified their willingness to have the differences between them and the mill arbitrated; and
>
> Whereas, for the protection of women and children and the health of the community, the public is very vitally interested in the solving of the points of the truth or the difference between both the strikers and the mill owners; be it
>
> Resolved, that we, citizens of Atlanta and Fulton county, in mass meeting assembled, do urge upon the Fulton Bag and Cotton Mill the necessity for meeting this offer in the same spirit of fairness and that an arbitration be had between the strikers and the mill in a manner and form to be determined by them.[10]

The day following the mass meeting, the mill management, represented by vice president Oscar Elsas, replied to the resolution with a one-sentence statement.

---

10. ibid., June 29, 1914, p. 1

> After carefully considering the suggestion that we arbitrate our business affairs, we have decided, in view of the fact that we have at the present time about 1,200 satisfied employees at work, and less than 85 now out, there is nothing to arbitrate.[11]

Prior to the June 28 mass meeting the strikers had suggested that the Men and Religion Forward Movement and the ministers of Atlanta select a mediation board. This was discussed at the meeting and it was decided that it would be better for the employees and the mill owners to select their own board. This, of course, never happened, because the mill owners claimed that there was nothing to arbitrate.

The Evangelical Ministers' Association, nevertheless, let it be known that they were ready to help in any way they could. At their July 6 meeting they passed a resolution to that effect.

> That this association of Evangelical Ministers commend to both parties in the controversy at the Fulton Bag and Cotton Mills the duty of arbitrating their difficulties and tender to this and the good offices of this association in any way which may be deemed useful.[12]

Although the Men and Religion Forward Movement and the Ministers' Association never had an opportunity to formally arbitrate in the dispute, Rev. C. B. Wilmer, rector of St. Luke's Episcopal Church and a member of the Ministers' Association, was of the opinion that the Men and Religion Committee and Mr. Marion Jackson, president of the YMCA "were proving the strongest influence in the city for keeping order during the strike."[13]

On July 12 another mass meeting was held at the Baptist Tabernacle to discuss the issues of the strike and the problems of Capital and Labor in general. Eight hundred were present at the three-hour meeting. John Eagan,

---

11. ibid., June 30, 1914, p. 1
12. Minutes, Evangelical Ministers' Association, July 6, 1914
13. ibid.

president of the Men and Religion Forward Movement spoke on the need to apply Christianity to labor problems. After his speech a laborer rose from his seat in the gallery and shouted, "We have been waiting for nineteen hundred years for Christ to solve our problems and they are yet unsolved; it is time for us to get busy ourselves!"[14]

Perhaps it was this urgent plea from the gallery that inspired the Rev. John E. White, pastor of the Second Baptist Church and a member of the executive committee of the Men and Religion Forward Movement, to offer the opinion at the meeting that he did. He declared publicly that he thought the Atlanta papers were not giving the labor problems a fair deal.[15]

The following week, July 19, another mass meeting sponsored by the Men and Religion Forward Movement was held with 2000 reportedly present. Rev. J. Sprole Lyons, pastor of the First Presbyterian Church spoke. It was declared by those representing the strikers that over 300 were now out on strike. It was also reported by the Men and Religion Forward Movement that two U.S. Representatives, Mesrs. Robinson and Husband, were in Atlanta to "try to adjust differences" at the Fulton Bag and Cotton Mills.

The strike, which by mid-summer had reached a stalemate, dragged on through August. During all this time the strikers were cared for by a group from the National Textile Workers' Association. They had arrived in Atlanta a few days after the strike began and set up a tent colony in Cabbagetown which served as a commissary and sleeping quarters for 247 families who had been evicted from mill housing. The tent colony, disparaged by those who opposed the strike as the work of outside agitators,

---

14. Atlanta Constitution, July 13, 1914, p. 1
15. This opinion of Rev. White is substantiated by the fact that during the entire three-month duration of the strike the Atlanta Constitution never once editorialized about the dispute.

became the focus of some wild gossip. For example, a 77-year-old resident of Cabbagetown, now retired but who was working at the mill at the time of the strike, recounted the "immoral sleeping arrangement" of the strikers' tents. He said that the result of the experience was that many families, formerly stable and reputable, were broken. He added that it was reported that nine months later Grady Hospital was crowded with unmarried teenage girls from the strikers' families who had gone there to have their babies delivered.

By September the strikers' energies were dissipated. With a large supply of new labor available the mill owners could afford to ignore the strikers' efforts. The strike gradually petered out as the jobless workers sought other work before winter came. As far as the management of the mill was concerned things were soon back to normal operation.

As for the Men and Religion Forward Movement and the others who represented the workers' point of view, it seems that nothing was accomplished. And yet George Mitchell reports that the strike lent moral support to the workers' cause. In his book, Textile Unionism and the South, he writes that the strike "gave the union good talking points in an appeal for funds, and it aired to the full its views of Southern conditions ... Defeat did not injure the union's propaganda; from Atlanta the sense of grievance spread."[16]

During the period of the next couple of years the Men and Religion Forward Movement continued its program of social justice in Atlanta with modest success. In the meantime many of the other chapters of the Movement

---

16. Textile Unionism and the South (Chapel Hill: The University of North Carolina Press, 1931), p. 34f.

in other cities had died out. Rather than have this happen in Atlanta, the executive committee of the Movement recommended to the Ministers' Association in October, 1916, that a Committee on Church Co-operation be appointed to take over and continue the work of the executive committee of the Men and Religion Forward Movement. The recommendation was accepted by the Ministers' Association and a Committee, composed of both clergy and laymen, was forthwith appointed.

The appointment of the Committee on Church Co-operation meant that formally the Men and Religion Forward Movement in Atlanta was dissolved. However, the spirit of the Movement in the form of a concern for social justice lived on in the Committee of Church Co-operation.

* * *

The involvement of the Men and Religion Forward Movement in the 1914 strike at the Fulton Bag and Cotton Mills stands out in contrasting fashion to Southern Protestantism's more usual conservative role in economic matters. Many writers have characterized southern religion as basically individualistic and fundamentalistic, and as disassociated from causes of social justice. These same writers have pointed out that in the instances when the Southern Protestant churches have become involved in social issues they have done so on the side of the status quo.

For example, C. Vann Woodward states that in the decades surrounding the turn of the century, "the current in the South ran counter" to socialized religion.[17] In a similar vein, Samuel S. Hill, Jr. declares that "the southern church has never devoted its energies to the redemption of the social

---

17. Origins of the New South (Baton Rouge: Louisiana State University Press, 1951), p. 450

structures, and certainly warrants no identification with the 'social gospel' tradition ..."[18] Also representative of this view is the interpretation Liston Pope gives to his findings in his classic study of the role of the churches in the 1929 Gastonia, North Carolina, strike. He summarized his findings with the following words:

> In the cultural ~~cirisi~~ crisis of 1929 Gastonia ministers revealed that their economic ethicways were products of the economic system in which they lived, with no serious modification by any transcendent economic or religious standard. They were willing to allow the power of religious institutions to be used against those who challenged this economic system, and themselves assisted in such use. At no important point did they stand in opposition to the prevailing economic arrangements or to drastic methods employed for their preservation. In no significant respect was their role productive of change in economic life. By and large, they contributed unqualified and effective sanction to their economic culture, insofar as their words and deeds make it possible to judge.[19]

Perhaps the interpretation of Woodward, Hill, and Pope is generally valid for the southern region as a whole. It is an interpretation, however, that is not without exception. The 1914 involvement of the Men and Religion Forward Movement in Atlanta on the side of labor is just such an exception. This incident seems to lend credence to the argument of Kenneth K. Bailey who points out that "although the social gospel movement was much weaker in the South than in the North, yet social concern was more manifest among southern religious leaders than has been generally recognized."[20] The role of the Men and Religion Forward Movement in the 1914 Atlanta strike provides a concrete example to substantiate Bailey's general description of the moderately progressive stance that developed in the

southern churches during the first fifteen years of the twentieth century.

> Between the turn of the century and World War I, the three major southern white Protestant groups /Baptist, Methodist, Presbyterian/ underwent significant changes in program and outlook. Absorbed at the turn of the century in evangelism and little mindful of social needs beyond blue laws and prohibition, they emerged during the next fifteen years as advocates of social justice, proclaiming the Christian obligation to fashion Christ's kingdom on earth.[21]

Discussion Work Sheet--Administration of the Branch

The first NALC Training and Education Handbook points out that "Branch officers are now faced with something entirely new . . . . They will soon be required to actually negotiate a contract . . . which will govern working conditions for a stated period in that office."

Should administrative procedures of the Branch be changed in order that Branches will be better prepared to handle, this new duty of negotiating an agreement and if so, how? A discussion of some of the following questions may be helpful in highlighting the different problems to be solved.

Qualifications?

1. How should the negotiating Committee be selected, how big should it be and who should serve on it? 1) STATION Representatives. 2) "Supervision"

2. What power should the Branch delegate to the negotiating committee? What should be the relationship of this negotiating committee to the existing structure? written agreement — ratification — only bargain what previously agreed to (exact form?)

3. Should reports by the negotiating committee be made at each branch meeting? Should these reports be oral or written?

4. Should the negotiating committee be dissolved upon successfully completing negotiation of a local agreement?

5. Will the Branch have to create some type of committee to administer the agreement after it has been negotiated? If so, how should the activities of this committee be coordinated with other Branch activities? what did grievance discussion show?

6. Should Branch by-laws be revised to reflect the structure created to handle the negotiation of a local agreement and the administration of this agreement after completion of negotiations?

Stewards Separate

7. In what other ways will Branch activities be changed by the addition of this new type of duties?

Other questions from groups — that have already arisen that relate to

Mang. must confer with ~~ex~~ rep.

(1) How do you institutionalize the new function — build it into structure — for 1) understandability
2) responsibility (assigned)
3) continuity & effectiveness —

(3) What is the Committee Structure now
Press? Ed.? Recreat. [Required: 1) ON organization
2) Billet Claims Referrals]

* How has "Bargaining" function been handled in past
How gear bargaining functions with other Committees

Not policy-making, but discussion of potential policy —

How avoid becoming just a "sounding board" as compared to a negotiating agent
[Important because of nature of employment & Ex. Order]
e.g. Attention to individuals; detailed regulations remove most areas of bargaining [Watch systematically]
When handle Union affairs — not on govt. time —

* Is it desireable to make clean break with new Ex. Order —

Agency facilities for Assoc. Affairs [Sect 7(?) Part IV "Employee-Management Coop" — Civil Service]
1) May have meetings on govt property (May not admitted to)
2) Lunch periods for business 3) Bulletin Bds 4) Perhaps Intra-Agency Communications
5) Notices in "House Organs" 6) Office Space (Special Conditions)

Emery

By Laws of Branch 507 Oc

Article 1. Name & Number

Section 1. This subordinate Branch shall be known as "Fo City" Branch 507 of the National Association of Letter Carriers

Article 2. Meetings

Section 1. Regular meetings of this Branch shall be held on 2nd Tuesday of each month, at such time and place as designated by Branch; except that in case of emergency, it shall be the duty of t ident and executive officers of Branch 507 to provide a place and da for the meeting.

Section 2. The numbers of members to be inserted in the Space provided in Article 3, Section 2, of the Constitution for the Governmen of Subordinate Branches of the N.A.L.C. shall be seven(7). This refers to the number of signers required to call special meetings.

Article 3. Nominations and Elections.

Section 1. Nominations for Branch officers shall be made at the October meeting and the elections will be held in November.

Section 2. Nominations of delegates to the Nat'l Association of Letter Carriers convention, shall be made at the October meeting prior to each National Convention. ~~Delegates nominated for the Wisconsin State convention shall be held in October meeting prior to each State Convention.~~ Elections of delegates shall take place at the November meeting preceeding the dates of such conventions. The number of delegates which the branch desires to send shall be elected by a plurality. Those who receive the most votes shall be declared elected delegates, and the next equal number shall be declared alternates. ~~At the January meeting, any member who desires to attend either convention, paying his own expenses, and to be accredited delegate, shall be automatically nominated as such delegates. All such candidates shall be voted on by the branch at this meeti . The number of members, equal to the number of remaining credentials, receiving the most votes declared elected.~~

Section 3. Nomination for Branch Officers and delegates to the convention shall be made by the nominating committee, consisting of three(3) members of the branch who shall be appointed by the President, and shall serve for the ensuing year.

Apply + Begin?

Section 4. Immediately after the report of the nomination committee is read, additional nominations may be made from the floor. All candidates for office, or delegates must be present at the time of nomination, or shall have signified their willingness to serve if elected, and shall also be in good standing on the books of the branch. All candidates for office must have attended at least five(5) of the last ten(10) meetings. All candidates for delegate must have attended at least ten(10) of the last twenty(20) meetings.

Article 4. Quorum

Section 1. 15 members of the Branch in good standing shall constitute a quorum.

Article 5. Fees.

Section 1. The initiation fee shall be one(1) dollar, payable in advance, provided that this fee may be suspended by action of the branch.

Section 2. The dues of regular and Sub-carriers shall be one dollar and a half($1.50) per month, payable in advance, provided that

that any member fully paid up to date may pay fifteen(15.00) for the next twelve months or seven-fifty($7.50) for the next six months.

Section 3. Retired and members who have voluntarily separated from the service may remain as members on payment of eight($8.00) dollars a year, payable in advance.

Section 4. A grace period of twenty(20) days is granted for payment of dues in advance.

Article 6. Salaries

Section 1. The President, Vice-President, Financial Secretary, and Treasurer shall have his dues paid during his term of office.

Section 2. The recording Secretary shall have his dues paid during his term of office and $7.50 per month.

Section 3. If there is no officer elected from any of the stations the president will appoint a station representative who shall have his dues paid for the year.

Article 7. Funds.

Section 1. The funds of the Branch shall be deposited in the name of Four Lakes City Branch 507, N.A.L.C. in a reputable financial institution in the City of Madison, or invested in Government bonds, provided that a reasonable amount be kept on hand in a checking account, to defray current expenses.

Article 8. Appointment of Committee

Section 1. The President shall by the January meeting appoint the following committees. Organization or resolutions committee of three members, membership, sick, press, and entertainment committees The term of office for all standing committees shall be for one year, or until their successors are appointed.

Section 2. The duties of the membership committee of this branch shall be to endeavor to secure new members, to counsel and advise with delinquent and suspended members with the view to securing their reinstatement, to assist in promoting attendance at meetings and to report to the branch anything coming under observation that might be either helpful or harmful to the membership as a whole.

Section 3. The duties of the sick committee shall be; to visit the sick members of the branch, to report their condition to the branch at the meetings, to have charge in the matter of floral tributes or other remembrances in the event of the death of a member or of a members family. $7.50 shall be allowed for floral tributes for members and their immediate family, which shall consist of wife, children or parents of members. It shall aid the family of the deceased, in the event of death, in making of funeral arrangements if such aid is desired by the family. The clerk of the N.S.B.A. shall be ex-officio a member of this committee.

Section 4. The duties of the press committee shall be ; to give publicity to the press or other medium of such matters as will be of benefit to letter carriers, to this branch, and the N.A.L.C. and which will assist in obtaining the things that this branch and the N.A.L.C. are working for. The Secretary whall be Ex-officio a member of this committee. No publicity whall be released without endorsement of the branch president.

Section 5. The duties of the entertainment committee whall be ; to furnish the entertainment and arrange for and have charge of the social functions of this branch. The vice-president shall be chairman of this committee.

Article 9. Rules of Order.

Section 1. "Roberts Rules of Order, Revised shall govern in all

matters not provided for in these By-Laws. These By-Laws may be suspended by unanimous consent of the members present at a branch meeting.

Article 10. Amendments of By-Laws.

Section 1. These By-Laws may be amended at any meeting of the Branch by a two-thirds(2/3) vote of all members present and voting, provided that the amendment has been submitted in writing, signed by three(3) members in good standing, and read at a previous regular meeting before adoption and published in one monthly bulletin. These By-Laws shall be effective upon approval by the National Board of Laws.

THE WHITE HOUSE

EXECUTIVE ORDER

10988

EMPLOYEE-MANAGEMENT COOPERATION IN THE FEDERAL SERVICE

WHEREAS participation of employees in the formulation and implementation of personnel policies affecting them contributes to effective conduct of public business; and

WHEREAS the efficient administration of the Government and the well-being of employees require that orderly and constructive relationships be maintained between employee organizations and management officials; and

for difficulties resulting from legalistic interpretation

WHEREAS subject to law and the paramount requirements of the public service, employee-management relations within the Federal service should be improved by providing employees an opportunity for greater participation in the formulation and implementation of policies and procedures affecting the conditions of their employment; and

WHEREAS effective employee-management cooperation in the public service requires a clear statement of the respective rights and obligations of employee organizations and agency management:

This countered by the effect of "let's do things differently" from the top "new" attitude may prevent legalism

NOW, THEREFORE, by virtue of the authority vested in me by the Constitution of the United States, by section 1753 of the Revised Statutes (5 U.S.C. 631), and as President of the United States, I hereby direct that the following policies shall govern officers and agencies of the executive branch of the Government in all dealings with Federal employees and organizations representing such employees.

Section 1. (a) Employees of the Federal Government shall have, and shall be protected in the exercise of, the right, freely and without fear of penalty or reprisal, to form, join and assist any employee organization or to refrain from any such activity. Except as hereinafter expressly provided, the freedom of such employees to assist any employee organization shall be recognized as extending to participation in the management of the organization and acting for the organization in the capacity of an organization representative, including presentation of its views to officials of the executive branch, the Congress or other appropriate authority. The head of each executive department and agency (hereinafter referred to as "agency") shall take such action, consistent with law, as may be required in order to assure that employees in the agency are apprised of the rights described in this section, and that no interference, restraint, coercion or discrimination is practiced within such agency to encourage or discourage membership in any employee organization.

(b) The rights described in this section do not extend to participation in the management of an employee organization, or acting as a representative of any such organization, where such participation or activity would result in a conflict of interest or otherwise be incompatible with law or with the official duties of an employee.

Section 2. When used in this order, the term "employee organization" means any lawful association, labor organization, federation, council, or brotherhood having as a primary purpose the improvement of working conditions among Federal employees, or any craft, trade or industrial union whose membership includes both Federal employees and employees of private organizations; but such term shall not include any organization (1) which asserts the right to strike against the Government of the United States or any agency thereof, or to assist or participate in any such strike, or which imposes a duty or obligation to conduct, assist or participate in any such strike, or (2) which advocates the overthrow of the constitutional form of Government in the United States, or (3) which discriminates with regard to the terms or conditions of membership because of race, color, creed or national origin.

Section 3. (a) Agencies shall accord informal, formal or exclusive recognition to employee organizations which requests such recognition in conformity with the requirements specified in sections 4, 5 and 6 of this order, except that no recognition shall be accorded to any employee organization which the head of the agency considers to be so subject to corrupt influences or influences opposed to basic democratic principles that recognition would be inconsistent with the objectives of this order.

(b) Recognition of an employee organization shall continue so long as such organization satisfies the criteria of this order applicable to such recognition; but nothing in this section shall require any agency to determine whether an organization should become or continue to be recognized as exclusive representative of the employees in any unit within 12 months after a prior determination of exclusive status with respect to such unit has been made pursuant to the provisions of this order.

(c) Recognition, in whatever form accorded, shall not --

Unions will have to police its members -

(1) preclude any employee, regardless of employee organization membership, from bringing matters of personal concern to the attention of appropriate officials in accordance with applicable law, rule, regulation, or established agency policy, or from choosing his own representative in a grievance or appellate action; or

(2) preclude or restrict consultations and dealings between an agency and any veterans organization with respect to matters of particular interest to employees with veterans preference; or

(3) preclude an agency from consulting or dealing with any religious, social, fraternal or other lawful association, not qualified as an employee organization, with respect to matters or policies which involve individual members of the association or are of particular applicability to it or its

members, when such consultations or dealings are duly limited so as not to assume the character of formal consultation on matters of general employee-management policy or to extend to areas where recognition of the interests of one employee group may result in discrimination against or injury to the interests of other employees.

Section 4. (a) An agency shall accord an employee organization, which does not qualify for exclusive or formal recognition, informal recognition as representative of its member employees without regard to whether any other employee organization has been accorded formal or exclusive recognition as representative of some or all employees in any unit.

(b) When an employee organization has been informally recognized, it shall, to the extent consistent with the efficient and orderly conduct of the public business, be permitted to present to appropriate officials its views on matters of concern to its members. The agency need not, however, consult with an employee organization so recognized in the formulation of personnel or other policies with respect to such matters.

Section 5. (a) An agency shall accord an employee organization formal recognition as the representative of its members in a unit as defined by the agency when (1) no other employee organization is qualified for exclusive recognition as representative of employees in the unit, (2) it is determined by the agency that the employee organization has a substantial and stable membership of no less than 10 per centum of the employees in the unit, and (3) the employee organization has submitted to the agency a roster of its officers and representatives, a copy of its constitution and by-laws, and a statement of objectives. When, in the opinion of the head of an agency, an employee organization has a sufficient number of local organizations or a sufficient total membership within such agency, such organization may be accorded formal recognition at the national level, but such recognition shall not preclude the agency from dealing at the national level with any other employee organization on matters affecting its members.

(b) When an employee organization has been formally recognized, the agency, through appropriate officials, shall consult with such organization from time to time in the formulation and implementation of personnel policies and practices, and matters affecting working conditions that are of concern to its members. Any such organization shall be entitled from time to time to raise such matters for discussion with appropriate officials and at all times to present its views thereon in writing. In no case, however, shall an agency be required to consult with an employee organization which has been formally recognized with respect to any matter which, if the employee organization were one entitled to exclusive recognition, would not be included within the obligation to meet and confer, as described in section 6(b) of this order.

Section 6. (a) An agency shall recognize an employee organization as the exclusive representative of the employees in an appropriate unit when such organization is eligible for formal recognition pursuant to section 5 of this order, and has been designated or selected by a majority of the employees of such unit as the representative of such employees in

such unit. Units may be established on any plant or installation, craft, functional or other basis which will ensure a clear and identifiable community of interest among the employees concerned, but no unit shall be established solely on the basis of the extent to which employees in the proposed unit have organized. Except where otherwise required by established practice, prior agreement, or special circumstances, no unit shall be established for purposes of exclusive recognition which includes (1) any managerial executive, (2) any employee engaged in Federal personnel work in other than a purely clerical capacity, (3) both supervisors who officially evaluate the performance of employees and the employees whom they supervise, or (4) both professional employees and nonprofessional employees unless a majority of such professional employees vote for inclusion in such unit.

Excluded from Unit

(b) When an employee organization has been recognized as the exclusive representative of employees of an appropriate unit it shall be entitled to act for and to negotiate agreements covering all employees in the unit and shall be responsible for representing the interests of all such employees without discrimination and without regard to employee organization membership. Such employee organization shall be given the opportunity to be represented at discussions between management and employees or employee representatives concerning grievances, personnel policies and practices, or other matters affecting general working conditions of employees in the unit. The agency and such employee organization, through appropriate officials and representatives, shall meet at reasonable times and confer with respect to personnel policy and practices and matters affecting working conditions, so far as may be appropriate subject to law and policy requirements. This extends to the negotiation of an agreement, or any question arising thereunder, the determination of appropriate techniques, consistent with the terms and purposes of this order, to assist in such negotiation, and the execution of a written memorandum of agreement or understanding incorporating any agreement reached by the parties. In exercising authority to make rules and regulations relating to personnel policies and practices and working conditions, agencies shall have due regard for the obligation imposed by this section, but such obligation shall not be construed to extend to such areas of discretion and policy as the mission of an agency, its budget, its organization and the assignment of its personnel, or the technology of performing its work.

Time off for Sessions Regular meetings

Limitations

?

Section 7. Any basic or initial agreement entered into with an employee organization as the exclusive representative of employees in a unit must be approved by the head of the agency or any official designated by him. All agreements with such employee organizations shall also be subject to the following requirements, which shall be expressly stated in the initial or basic agreement and shall be applicable to all supplemental, implementing, subsidiary or informal agreements between the agency and the organization:

Does this mean "entered into" by a Subordinate body, then approval by head — Top-Many veto?

(1) In the administration of all matters covered by the agreement officials and employees are governed by the provisions of any existing or future laws and regulations, including policies set forth in the Federal Personnel Manual and agency regulations, which may be applicable, and the agreement shall at all times be applied subject to such laws, regulations and policies;

(2) Management officials of the agency retain the right, in accordance with applicable laws and regulations, (a) to direct employees of the agency, (b) to hire, promote, transfer, assign, and retain employees in positions within the agency, and to suspend, demote, discharge, or take other disciplinary action against employees, (c) to relieve employees from duties because of lack of work or for other legitimate reasons, (d) to maintain the efficiency of the Government operations entrusted to them, (e) to determine the methods, means and personnel by which such operations are to be conducted; and (f) to take whatever actions may be necessary to carry out the mission of the agency in situations of emergency.

Does this reduce "organized" activity to little more than a Security board

Section 8. (a) Agreements entered into or negotiated in accordance with this order with an employee organization which is the exclusive representative of employees in an appropriate unit may contain provisions, applicable only to employees in the unit, concerning procedures for consideration of grievances. Such procedures (1) shall conform to standards issued by the Civil Service Commission, and (2) may not in any manner diminish or impair any rights which would otherwise be available to any employee in the absence of an agreement providing for such procedures.

(b) Procedures established by an agreement which are otherwise in conformity with this section may include provisions for the arbitration of grievances. Such arbitration (1) shall be advisory in nature with any decisions or recommendations subject to the approval of the agency head; (2) shall extend only to the interpretation or application of agreements or agency policy and not to changes in or proposed changes in agreements or agency policy; and (3) shall be invoked only with the approval of the individual employee or employees concerned.

Advisory Arbitration

Internal union matters on off-duty time —

Section 9. Solicitation of memberships, dues, or other internal employee organization business shall be conducted during the non-duty hours of the employees concerned. Officially requested or approved consultations and meetings between management officials and representatives of recognized employee organizations shall, whenever practicable, be conducted on official time, but any agency may require that negotiations with an employee organization which has been accorded exclusive recognition be conducted during the non-duty hours of the employee organization representatives involved in such negotiations.

if union requests & mang. approves

?

Section 10. No later than July 1, 1962, the head of each agency shall issue appropriate policies, rules and regulations for the implementation of this order, including: A clear statement of the rights of its employees under the order; policies and procedures with respect to recognition of employee organizations; procedures for determining appropriate employee units; policies and practices regarding consultation with representatives of employee organizations, other organizations and individual employees; and policies with respect to the use of agency facilities by employee organizations. Insofar as may be practicable and appropriate, agencies shall consult with representatives of employee organizations in the formulation of these policies, rules and regulations.

where are they — isn't this the gist of the Union Admin angle of the bill

How this happens — on local level?

Section 11. Each agency shall be responsible for determining in accordance with this order whether a unit is appropriate for purposes of exclusive recognition and, by an election or other appropriate means, whether an employee organization represents a majority of the employees in such a unit so as to be entitled to such recognition. Upon the request

of any agency, or of any employee organization which is seeking exclusive recognition and which qualifies for or has been accorded formal recognition, the Secretary of Labor, subject to such necessary rules as he may prescribe, shall nominate from the National Panel of Arbitrators maintained by the Federal Mediation and Conciliation Service one or more qualified aribitrators who will be available for employment by the agency concerned for either or both of the following purposes, as may be required: (1) to investigate the facts and issue an advisory decision as to the appropriateness of a unit for purposes of exclusive recognition and as to related issues submitted for consideration; (2) to conduct or supervise an election or otherwise determine by such means as may be appropriate, and on an advisory basis, whether an employee organization represents the majority of the employees in a unit. Consonant with law, the Secretary of Labor shall render such assistance as may be appropriate in connection with advisory decisions or determinations under this section, but the necessary costs of such assistance shall be paid by the agency to which it relates. In the event questions as to the appropriateness of a unit or the majority status of an employee organization shall arise in the Department of Labor, the duties described in this section which would otherwise be the responsibility of the Secretary of Labor shall be performed by the Civil Service Commission.

Section 12. The Civil Service Commission shall establish and maintain a program to assist in carrying out the objectives of this order. The Commission shall develop a program for the guidance of agencies in employee-management relations in the Federal service; provide technical advice to the agencies on employee-management programs; assist in the development of programs for training agency personnel in the principles and procedures of consultation, negotiation and the settlement of disputes in the Federal service, and for the training of management officials in the discharge of their employee-management relations responsibilities in the public interest; provide for continuous study and review of the Federal employee-management relations program and, from time to time, make recommendations to the President for its improvement.

Section 13. (a) The Civil Service Commission and the Department of Labor shall jointly prepare (1) proposed standards of conduct for employee organizations and (2) a proposed code of fair labor practices in employee-management relations in the Federal service appropriate to assist in securing the uniform and effective implementation of the policies, rights and responsibilities described in this order.

Has this been done also — Union Admin. Ofs.

(b) There is hereby established the President's Temporary Committee on the Implementation of the Federal Employee-Management Relations Program. The Committee shall consist of the Secretary of Labor, who shall be chairman of the Committee, the Secretary of Defense, the Postmaster General, and the Chairman of the Civil Service Commission. In addition to such other matters relating to the implementation of this order as may be referred to it by the President, the Committee shall advise the President with respect to any problems arising out of completion of agreements pursuant to sections 6 and 7, and shall receive the proposed standards of conduct for employee organizations and proposed code of fair labor practices in the Federal service, as described in this section, and report thereon to the President with such recommendations or amendments as it may deem appropriate. Consonant with law, the departments and agencies represented on the Committee shall, as may be necessary for the effectuation of this section, furnish assistance to the Committee in

accordance with section 214 of the Act of May 3, 1945, 59 Stat. 134 (31 U.S.C. 691). Unless otherwise directed by the President, the Committee shall cease to exist 30 days after the date on which it submits its report to the President pursuant to this section.

Section 14. The head of each agency, in accordance with the provisions of this order and regulations prescribed by the Civil Service Commission, shall extend to all employees in the competitive civil service rights identical in adverse action cases to those provided preference eligibles under section 14 of the Veterans' Preference Act of 1944, as amended. Each employee in the competitive service shall have the right to appeal to the Civil Service Commission from an adverse decision of the administrative officer so acting, such appeal to be processed in an identical manner to that provided for appeals under section 14 of the Veterans' Preference Act. Any recommendation by the Civil Service Commission submitted to the head of an agency on the basis of an appeal by an employee in the competitive service shall be complied with by the head of the agency. This section shall become effective as to all adverse actions commenced by issuance of a notification of proposed action on or after July 1, 1962.

Ex. 11 this be the most important section in effect — and yet this deals necessarily with individual rights.

Section 15. Nothing in this order shall be construed to annul or modify, or to preclude the renewal or continuation of, any lawful agreement heretofore entered into between any agency and any representative of its employees. Nor shall this order preclude any agency from continuing to consult or deal with any representative of its employees or other organization prior to the time that the status and representation rights of such representative or organization are determined in conformity with this order.

Section 16. This order (except section 14) shall not apply to the Federal Bureau of Investigation, the Central Intelligence Agency, or any other agency, or to any office, bureau or entity within an agency, primarily performing intelligence, investigative, or security functions if the head of the agency determines that the provisions of this order cannot be applied in a manner consistent with national security requirements and considerations. When he deems it necessary in the national interest, and subject to such conditions as he may prescribe, the head of any agency may suspend any provision of this order (except section 14) with respect to any agency installation or activity which is located outside of the United States.

JOHN F. KENNEDY

THE WHITE HOUSE,

January 17, 1962.

# # # # #

Will this become the false hope of collective bargaining in the federal service — what practices will change? which unions will change their relations to depts? will it be because of provisions of exec. order or just the shot in the arm effect

may lead to formalization by union of assistance given to members in handling grievances, solution of local irritants on a local level,

Emory

NEUTRALITY AND COOPERATION
(Concurrent policies for Management)

The concepts of the program for employee management cooperation require management to hold two basic attitudes: one, toward the relationship of individual employees to employee organizations, and the other, toward the employee organizations themselves. It is important to distinguish clearly between these attitudes for a proper understanding of the program.

A. Neutrality on the issue of joining or not joining organizations

Agencies must maintain a posture of neutrality toward their employees' *joining* or *not joining* employee organizations regardless of the degree of recognition an organization may achieve. This is a basic policy extending back to the Lloyd-LaFollette Act. Further, a closed shop or a union shop is not appropriate to our system of public employment.[1]

The Executive Order on Employee-Management Cooperation Section 1(a), states: "It is the policy of the Federal Government that its employees have, and shall be protected in the exercise of the right, freely and without fear of penalty or reprisal, to form, join and assist any employee organization or to refrain from any such activity. * * * The head of each * * * (agency) shall take such action, consistent with law, as may be required in order to assure that employees in the agency are apprised of the rights described in this section and that *no interference, restraint, coercion or discrimination is practiced within such agency to encourage or discourage membership in any employee organization.*" (Emphasis supplied). The initiative to form or join employee organizations must come from the employees themselves.

[1] The terms "closed shop" and "union shop" can be defined simply as follows: "Union shop"—an agreement requiring that all employees become union members within a specified time after hiring (or after the agreement) and remain members as a condition of employment. "Closed shop"—an agreement under which only union members may be hired and only union members in good standing retained.

B. Affirmative willingness to deal with employee organizations

This attitude of neutrality toward the actions of individuals should not be confused with the nature of the relationship between the agency and employee organizations. When an organization has only a few members, management has no special obligation to deal with it but, in the words of the Task Force, "Wherever any considerable number of employees have organized for the purpose of collective dealing the attitude of the Government should be that of an affirmative willingness to enter such relations." These relations may be more or less formal depending on the degree of recognition to which the organization is entitled, but the basic willingness to deal with the *organization* is highly important.

Dealings With Individuals

The program for employee-management cooperation is, of course, mainly concerned with group relations. This does not mean that relationships between individual employees and management are no longer of interest or that the concept of neutrality extends generally to relations with employees. The introduction of the program should in no sense be viewed as an effort to deemphasize the importance of the individual or to dilute existing programs designed to meet his needs and protect his rights. It would hardly be desirable or practicable to do this in any event given the requirements of the merit system and the continuation of the policy of strict neutrality with respect to the decision of employees to join or not join an organization. Two-thirds of Federal employees (five-sixths outside the Post Office) do not belong to employee organizations and there is no intent to force them to do so. In some agencies there is little likelihood that employee organizations will play a significant role in employee-management relations.

Concern for the rights of individual employees is evident throughout Executive Order 10988 and the Task Force Report. In the Executive Order, for example, section 1(a) protects the right of employees *not* to join a union and section 6(b) requires that where a union is given exclusive recognition it must represent *all* the employees of the unit *including nonmembers*, without discrimination. Section 3c(1) points out that nothing in the order precludes an individual from bringing matters of personal concern to the attention of the agency officials and there is nothing to prevent his free choice of a representative in appellate actions. Where there is exclusive recognition, a representative of the employee organization has a right to be *present* when an action has reached the formal stage (as distinguished from discussion of personal matters with a supervisor) but the employee organization representative still may not supplant the employee's own representative if he has chosen one. Further, section 8(a) protects the rights of the individual to any procedural benefits he would have in the absence of an exclusive recognition agreement and section 8(b) also specifies that arbitration procedures can be invoked only with the consent of the aggrieved employee.

Questions

1. Should an agency prohibit supervisors and other management officials from joining an employee organization which includes rank and file employees?

   Answer: No. Section 1(a) makes it clear that all employees have a right to join an employee organization without any restraint whatsoever by management.

2. Should lists of names and home addresses be furnished to unions for solicitation purposes?

   Answer: No, that would not be in keeping with the posture of neutrality which management must maintain. It would be assisting the organization directly.

3. A department's policy now includes a statement *encouraging* employees to organize and join employee groups. Should this be continued?

   Answer: No.

REQUIREMENTS FOR RECOGNITION

There are several basic tests an organization must meet before management may consider it an employee organization for the purposes of the program for employee-management cooperation.

A. Positive Requirements

An organization must:

1. be a lawful organization
2. have as a primary purpose the improvement of working conditions among Federal employees
3. be formed voluntarily by employees (not by management)

Whether or not the organization is called a union, association, or by some other name is not in itself significant. However, the basic purpose of the organization is important and organizations whose primary purpose is social, fraternal, religious, and so on, may not be recognized under this program although the views of such groups may be considered in matters of interest to their members. The term employee organization also includes groups of organizations, e.g., a "council" composed of several local craft unions.

However, "council" does *not* include management sponsored "employee councils." Such groups do not meet the conditions for recognition. They are generally established by management, often have management representatives as members, and can be changed or abolished by management action. Thus while some agencies have found employee councils of this type a valuable source of employee views (and may continue them if they determine it is in the interest of employee-management cooperation to do so) they do not fall within the scope of this program and may not be given recognition under Executive Order 10988.

B. Prohibited Practices

An organization must not:

1. assert the right to strike
2. advocate the overthrow of the Government
3. discriminate in the terms or conditions of membership because of race, color, creed, national origin
4. be subject to corrupt influences or to the influence of any party movement or other group opposed to basic democratic principles.

Employee organizations are, in the great majority of cases, responsible, law abiding groups which should, of course, be presumed innocent of engaging in prohibited practices unless it can be shown they have done so.

Among the things an organization must not do, the first two are simply a reflection of long standing policy. Established employee organizations in the Federal service do not assert the right to strike and, it hardly needs to be said, they do not advocate change in our system of Government by unlawful means.

Discrimination, the third disqualifying practice serving to exclude an organization from recognition, is a significant item involving new policy for the Government as applied to organizations of its own employees. Until recently agencies have not necessarily looked into the membership requirements of employee groups with which they have dealt. However, the President in his memorandum of June 22, 1961, establishing the Task Force on Employee-Management Cooperation specifically mentioned nondiscrimination as one of three basic conditions for dealing with employee groups (the other two were no strikes, no advocacy of overthrow). One of the first public acts of the Task Force was to issue a letter to the heads of Federal agencies and the heads of national labor organizations informing them that the President's policy was in effect, pointing out that dealings with organizations which practice discrimination were prohibited, and asking agencies to report on the steps taken to implement the policy.

Thus, the Executive order incorporates a policy already put into effect throughout the Government. It is consistent with the position of the Federal government in related fields as,

for example, in contracts for Government work.

As one illustration of discriminatory practices there have been instances, when more than one racial group is represented in the work force, in which two locals of the same employee organization have been chartered for the same Government "unit" or installation with the result that each has only members of one race. These are known as "dual locals." The weight of past experience indicates that dual locals create a situation of de facto segregation, and therefore of discrimination. (The overriding consideration is actual practice, whether or not the charters of the organizations contain specific racial restrictions.)

Management may not maintain relations with any employee organization established in this manner which has not undertaken in good faith to discontinue the practice. Refusal to deal with such organizations is not only in line with Federal policy on discrimination but is also a recognition of the manifest impossibility of dealing with an organization purporting to represent the employees of a unit when in fact it excludes some employees of the unit from membership. Dealing with such organizations would not be proper even in the extreme instance where dual locals together claimed to represent every employee of the unit. (Two organizations could not, in any case, be given exclusive recognition in the same unit, and units established on racial lines would not, of course, be appropriate.)

The agency dealing with an employee organization is responsible for determining whether there is reason to believe that the organization is discriminating in its membership either nationally or in one or more of its subordinate locals and for insisting upon elimination of discriminatory practices if they are found to exist.

If corrective measures are not taken in good faith, the agency is required to withdraw recognition. Normally, consultation with union officials, including when necessary the head of the national organization involved, should result in affirmative measures being taken by the union to correct the discriminatory practices.

When a firm commitment to initiate corrective measures is obtained, the agency is free to decide to continue relations with the employee organization pending completion of the corrective action. Where recognition is withdrawn from the local unit of a national organization, it may be withdrawn from the particular unit involved without disturbing the national recognition given to the union or to other locals of the union.

Dual local situations may be resolved by merger of the two organizations, or by dissolution of one organization and continuance of the remaining local without discriminatory practices.

Discrimination problems, of course, are not confined to dual locals, and policies or practices of discrimination in membership where only one local exists also are disqualifying.

The fourth disqualifying condition is a finding that an employee organization is subject to corrupt influence or to the influence of any party, movement or other group opposed to basic democratic principles. The determination that this condition exists is entirely up to the head of the agency in which the organization is seeking recognition. This is a complex and difficult area. The Civil Service Commission and the Department of Labor are drafting standards of conduct bearing on this issue which will be submitted to the Temporary Committee on Implementation of the President's Task Force on Employee-Management Cooperation. That Committee will in turn submit recommendations to the President but the form, content, and manner in which guidance to agency heads may be forthcoming is not yet known.

C. Relationships with other organizations and special groups

The program for employee-management cooperation does not affect the right of employees to form or join lawful groups which do not meet the conditions for recognition or to present the views of these groups to management. There are many social, religious, and other groups with Federal chapters and management is free to deal with these groups in areas of interest to them, but such dealings may not extend to matters outside the special concerns of

these groups. They may not be given recognition under Executive Order 10988.

The recognition of employee organizations should not affect the special relationship of veterans organizations with Government agencies. Congress has granted special rights and privileges to Government employees who are veterans, and, over the years, veterans organizations have been active on behalf of their members in exercising these rights and privileges. The development of more formal employee-management relations should not be permitted to inhibit, restrict, or impair these services to veterans organizations, but as in the case of other special groups, consultation with veterans organizations should be confined to matters of particular concern to their membership.

FORMS OF RECOGNITION

There are three degrees of recognition: informal, formal, and exclusive. They reflect a significant difference between Government and the practice in private industry. In the private sector of the economy, management is not obliged to deal with employee organizations which do not represent a majority of the employees of the bargaining unit. In Government, however, the varied development of employee management relations among agencies and within agencies, the inherent limitations on collective bargaining in the public service, and established Federal policies and practices in employee consultation combine to make differentiation in levels of dealing desirable.

A. Informal Recognition

Informal recognition gives an organization the right to be heard on matters of interest to its members but management is under no obligation to seek the views of the organization. It is simply an extension of the long established practice of receiving employee views, and is limited to such consideration as management believes can reasonably and conveniently be given. Informal recognition will be granted to any organization seeking it (unless the organization engages in certain prohibited practices) regardless of what degrees of recognition are accorded to other organizations.

It is an "all other" category encompassing dealings with any organization not entitled to more formal recognition. Informal recognition should not for this reason be dismissed lightly any more than the needs and views of individual employees should be ignored. Moreover, circumstances change and an organization with only a small membership in one year may grow in the next, or, conversely, an organization with a substantial number of members may lose its right to formal recognition (perhaps without losing any members) if another organization gains exclusive recognition.

B. Formal Recognition

The principal requirement for formal recognition (beyond the basic conditions all organizations must meet) is that an organization have a stable membership of 10 percent or more of the employees of the unit. (Under this requirement, agencies need not grant formal recognition to an organization whose membership frequently drops below 10 percent.) Where the facts are well known there is no need for elaborate procedures. If, for example, it is generally conceded that the membership figure is, say, one in four, or five, or six employees, it is not necessary for management to be able to say that membership is exactly 16⅔ percent or whatever the precise proportion might be. In borderline cases, however, management may have to obtain rather exact membership figures for the organization requesting recognition. (One way to obtain these figures is through an independent audit conducted by a Certified Public Accountant or other impartial source.)

At the national level an organization may be granted formal recognition when it has, in the judgment of the agency, a sufficient number of members or of locals to warrant recognition. This point might be more or less than 10 percent.

Formal recognition gives an organization *the right to be consulted* on matters of interest to its members (but it may not speak for nonmembers). At this state of recognition, management must seek the views of the organization although it is not obliged to try to reach agreement. Since to achieve formal recognition an organization should have 10 percent or more of the employees of the unit as members, management is likely to want to consider its views quite apart from any requirement to do so. In any event, management has a *positive obligation* to seek the views of such organization from time to time. Formal recognition is the stage of recognition where an attitude of "affirmative willingness" to deal with employee organizations must come fully into play. The extent of the

relationship with such organizations is not as great as when an organization achieves exclusive recognition. Nevertheless, management's basic attitude toward the organization should be the same at both levels of recognition.

If one organization has attained exclusive recognition in a unit, no other organization can be granted formal recognition, no matter how many members it enrolls in the unit; it reverts to the informal recognition state.

C. Exclusive Recognition

> "An employee organization which is eligible for formal recognition * * * and which has been designated or selected by a majority of the employees of an appropriate unit as the representative of such employees, shall be recognized as the exclusive representative of the employees in such unit * * *"
>
> "When an employee organization has been recognized as the exclusive representative of employees of an appropriate unit it shall be entitled to act for and to negotiate agreements covering all employees in the unit and shall be responsible for representing the interests of all such employees without discrimination and without regard to employee organization membership * * *"
>
> (Executive Order 10988, Section 6(a))

At this point, recognition practices in private industry and the Federal program for employee-management cooperation are most nearly alike. The principle of majority rule applies. The employee organization speaks for *all* the employees of the unit and is the source to which management turns when seeking the views of employees on matters of general personnel policy and practice. This does not mean that management must cut itself off from all contact with other employee groups or from relationships with individual employees. It does mean, however, that management must confer with the representatives of the employee organization, and must in good faith attempt to reach agreements and resolve questions arising under existing agreements. It means further that the organization has a stake in various aspects of employee-management relations which it is entitled to protect. For example, although an employee has the right to choose his own representative in a grievance, the organization with exclusive representation also has the right to have a representative present if the employee chooses to be represented by someone other than an organization representative. Also, the organization has the right to be represented at discussions between management and other employee groups in the unit.

To gain the right to speak for all employees in the unit the organization must be eligible for formal recognition and more than 50 percent of the employees of the unit must indicate their desire to be represented by the organization.

There are a number of ways of finding out how much support an employee organization has. Presumably, agencies will use the simplest method that gives a valid result. This might mean obtaining evidence that a majority of the unit's employees are members of the organization, or receiving written authorization by a majority of the employees of the unit, or holding an election at the request of the organization to determine whether it can obtain the support of the employees of the unit. It is clear that when the majority determination is made by other means than an election, management must assure itself that a majority of all the employees of the unit wish to be represented by the employee organization.

Elections need not be undertaken oftener than once in any twelve months. The object of this limit on frequency of elections, is, of course, to avoid having to hold one every time an organization thinks it might have a chance to win. There are similar restrictions under NLRB procedures. Not only are unions in the private sphere limited as to the frequency with which they may participate in bargaining unit elections, but NLRB will also not hold an election unless 30 percent of the employees of the unit are in favor of doing so. Similarly, it will not hold an election to "decertify" a union as a bargaining agent unless 30 percent of the employees of the unit indicate they want a chance to express themselves on this point.

When it seems advisable to have outside help in these matters, an agency (or an employee

organization seeking exclusive recognition) may request the Secretary of Labor to nominate an arbitrator or arbitrators from the National Panel of Arbitrators maintained by the Federal Mediation and Conciliation Service to conduct an election, or supervise an election, or by any other appropriate means advise on whether an employee organization represents the majority of employees in a unit.

The following table presents a brief comparison of employee organization rights according to type of recognition.

Employee Organization Rights According to Type of Recognition

	Type of Recognition		
	Informal	*Formal*	*Exclusive*
Membership required in appropriate unit	None specified.	10%	10% [2]
Right to be heard on personnel policy	Yes [1]	Yes [1]	Yes
Right to be consulted on personnel policy	No	Yes [1]	Yes
Right to negotiate written agreement	No	No	Yes
Right to represent employee in grievances and appeals (if he wishes)	Yes [3]	Yes [3]	Yes [3]
Right to negotiate for advisory arbitration of grievances and appeals	No	No	Yes
Eligible for voluntary dues withholding (if lawful)	No	Yes	Yes
Department-wide or agency-wide relationships	Yes	Yes [4]	Yes [5]

[1] More than one organization within the same unit may be granted formal recognition. However, when an organization within a unit is granted Exclusive recognition, all grants of Formal recognition are withdrawn; other organizations concerned revert to Informal recognition status.

[2] But the organization must have majority support whether determined by membership, votes, or other evidence.

[3] When an employee organization is accorded exclusive recognition then that organization shall have the right to be present and be consulted in these situations whether or not the employee has designated another organization or person to represent him.

[4] Formal recognition and its rights may be granted at national level for the whole department when an organization is deemed to have a sufficient number of locals or of total membership within the department. The 10% rule does not necessarily apply as either a minimum or maximum.

[5] The emphasis of the program is on the development of *local* employee management relations. Exclusive recognition on an agency-wide basis should be avoided and should not be granted unless management is unable to carry on meaningful negotiations on a smaller unit basis.

Questions

1. Must an organization seeking informal recognition in an establishment of a Federal agency have members who are employees in that establishment?

   Answer: Yes. Recognition is granted on a members-only basis. Accordingly, the organization should be required to show that it represents some employees in the establishment.

2. May an agency require an employee organization seeking informal recognition to present a copy of its constitution, a list of its local officers, etc.?

   Answer: Yes, the agency may require a reasonable showing that the organization is a bona fide employee organization.

3. If an employee organization does not agree with the agency's decision for granting formal recognition at the national level, does the Order provide an avenue for seeking redress?

   Answer: No. The agency head has complete discretion on the granting of formal recognition at the national level.

4. If a union just barely showed ten percent, how soon can management ask for a re-verification of this?

   Answer: Nothing limits management from asking for re-verification at any time if it wishes; however, the organization should not be arbitrarily or capriciously asked to demonstrate that it meets the requirement.

5. In an election to determine majority status for exclusive recognition purposes, should the winner obtain a majority of eligible employees (an absolute majority) or simply a majority of those who actually vote?

   Answer: The President's Temporary Committee on the Implementation of the Federal Employee-Management Relations Program believes that a consistent rule should be applied by all agency heads on this point. It advises that:

   (a) Exclusive recognition should be granted to the organization chosen by a majority of those voting, provided that there is a representative vote. Generally, a "representative

vote" should mean a minimum of 60 percent of those in the unit eligible to vote. In particular situations, an agency might determine that a percentage slightly less than 60 percent is representative.

(b) When an absolute majority of employees in the unit votes for one organization the 60 percent rule would not apply. For example, if only 52 percent voted of those eligible to vote, the agency still should grant exclusive recognition if 51 percent voted for one union.

MANAGEMENT PARTICIPATION IN EMPLOYEE ORGANIZATION ACTIVITIES

The President's Task Force on Employee-Management Relations concluded that "One of the principal needs of the Federal service today is the development of a more emphatic concept of management responsibility on the part of Government officials who have functions similar to those of managers in the private sphere." The Task Force expected that a significant result of the adoption of its recommendations would be to make the role of management clearer and better defined. A central factor in the accomplishment of this end is the identification of who properly belongs to "management." This term has not before required rigorous definition, at least as to the distinction in employee relations matters between "management" and "employee."

The image of the public servant (with all that this implies in terms of subordinating personal views to the public interest), the concepts of the merit system, the impact of various personnel laws, and the separation of powers have led to the development of employee management relations in the Federal service along lines which have left the distinction between management and employees less sharply drawn than in the private sphere. The successful operation of a formal program for group relationships between employees and management within the Executive branch now requires that this distinction be brought more clearly into focus in Government. The need for clear definition stems immediately from possible conflicts of interest, or the appearance of conflict, between the responsibilities of managers to management and the activities managers might engage in as members of employee organizations. As the Task Force indicated, "it is equally important to carry over the policy laid down by Congress that in the private sphere employers may not 'dominate or interfere with the formation or administration of any labor organization or contribute financial or other support to it * * *' "

Section 1(a) of Executive Order 10988 affirms the right of Federal employees to join and assist employee organizations and defines assistance to include management of the organization and acting as its representative. However, there are limits to the assistance Federal employees may give, and those are stated in section 1(b) as follows:

> "The rights described in this section do not extend to participation in the management of an employee organization, or acting as a representative of any such organization, where such participation or activity would result in a conflict of interest or otherwise be incompatible with law or with the official duties of an employee."

Although the terms of this section do not restrict the possibility of conflicting interests to any particular types of employees, the most likely groups to be affected are those identifiable as part of management. As the Task Force stated, "A minimal requirement is that no management official and no personnel officer should hold office in an employee organization."

There is no fixed definition of management in the Executive Order and circumstances within individual agencies may lead to somewhat varying conclusions. The Civil Service Commission considers the following to be a general guide on what constitutes management for this purpose: *Persons who make or recommend management policies or who direct, control, or supervise Government operations or personnel, and those associated with or assisting in such direction or control generally carry responsibilities incompatible with leadership in an organization of rank and file employees.* This general guide does not apply, of course, when an agency is satisfied that no conflict of interest would arise for persons in designated specific positions or classes of positions.

Under this guide the conflict of interest provision of the Order could well apply to the following groups of employees:

(1) employees who have responsibility for directing and controlling the program operations of the agency.

(2) those supervisors who have significant managerial responsibilities.

(3) employees serving in support activities whose principal duties involve

advising or assisting management on program administration and/or manpower utilization.

(4) employees directly engaged in personnel work in other than a clerical capacity.

(5) employees whose assigned duties require that they represent the interests of the agency or activity in consultations or negotiations with representatives of employee organizations.

Examples of nonsupervisory persons whose management support activities *might involve a conflict of interest* are budget analysts, manpower planners, management analysts, and internal investigators and auditors.

Examples of non-supervisory persons who are associated with or assist management but who *would not likely have a conflict of interest* are librarians, statisticians, and accounting technicians who maintain records of allotments of funds.

As indicated previously, when an agency is satisfied that no actual or potential conflict of interest exists, the above general guide will not be applicable.

Agencies may not go so far in placing restrictions on participation in the affairs of employee organizations as to prevent membership. The right to join employee organizations is basic and extends to all Federal employees whether or not they have management responsibilities. The right is protected under the Executive order.

It can be assumed that anyone who is eligible to be a member of an employee organization can also vote, attend meetings, sign petitions, and engage in similar activities which clearly do not involve a role of leadership or influence. Participation in the management of an employee organization, however, is another matter. Here the conflict of interest provision would apply.

Participation clearly includes holding office and serving as a representative of an employee organization; either of these functions would be incompatible with the duties of persons identified as part of agency management. However, there are many other activities to consider. Whether or not writing articles for union publications would be appropriate could depend on the content. If the article were an explanation of agency policy this might be regarded differently from an article advocating an employee organization stand directly opposed to agency personnel policy. A committee for some social event or to improve safety practices might be viewed differently from a committee to draft convention resolutions. It will be important to distinguish between ordinary membership activities and activities associated with leading, organizing, policy making, and representing employee groups.

Organizations of Supervisors

In discussing both the definition of management and the extent to which members of management might participate in employee organization affairs, organizations of supervisors have not been singled out for special treatment. This is because supervisors who join together to advance their own interests are in this respect in the same position as employees generally and may deal with higher management in matters of concern to supervisors under the same conditions as do organizations of nonsupervisors. Of course, where exclusive recognition is involved, supervisors who evaluate the performance of other supervisors could not appropriately be included in the same unit as those they supervise. (Subsection 6(a) Executive Order 10988).

Questions

1. Can an agency require that all supervisors refrain from running for, holding office in, or acting as a representative of an employee organization?

   Answer: Yes (except for organizations of supervisors) if at every level the agency's supervisors possess significant managerial responsibilities and are in fact part of the management group. In this event, their official duties would result in conflicts of interest.

2. Should holding office in or acting as a representative of a national organization be regarded differently from holding office or acting for a local where the employee works?

Answer: No.

3. What is the relationship of conflicts of interest and membership in unions?

Answer: The two things are separate. The right to *join* a lawful union extends to all employees, whether or not engaged in managerial, personnel, or similar duties, and many not be restricted by agencies. But if management and certain other officials were to *take an active role* in union affairs (by serving as an officer or representative, etc.) these activities would be incompatible with official duties and therefore represent conflict of interest.

4. Must a supervisor or management official who is an officer of a rank-and-file union be required to vacate his union office by July 1, 1962?

Answer: No, agencies should allow the official such reasonable time as the union needs to arrange for his replacement. For example, if the official's term of office were due to expire within a few months following July 1, he might be authorized to continue until the expiration of his term.

5. Does the degree of recognition an employee organization has achieved bear any relationship to the question of conflict of interest?

Answer: It might, depending on the individual agency situation. As was pointed out above in connection with the general guide, an agency might satisfy itself that no conflict of interest would arise for persons in specific positions or classes of positions associated with management. In arriving at this conclusion one avenue of approach (along with others) could be to explore whether, given the nature of the relationship between the agency and the organization, any actual conflict is likely to arise. Thus in some informal or formal recognition situations an agency might find that there would be no such conflict.

UNITS OF RECOGNITION

Determination of Appropriate Units[1]

There is no simple definition and no easy-to-apply rules can be formulated which will remove all uncertainty from the process of deciding what is an "appropriate unit." Each determination must be made on its own facts, on a case-to-case basis. The process requires evaluation and analysis of facts, and reason and common sense must be applied. "Guidelines" in this area can do no more than suggest a few basic principles and approaches which, if applied to individual cases, should produce a rational unit structure.

Community of interest is the essential ingredient in every appropriate unit. Any unit should include individuals who share certain things, such as skills, working conditions, common supervision, physical location, or function, to such a degree that it makes sense for them to deal collectively with management through a single voice. Conversely, no unit can be appropriate if its members are so divided by different interests arising from their work, skills, location or function that it is unreasonable to assume that they can speak with a single voice.

Some of these factors indicate "community of interest" very clearly. Craft status, for instance, has traditionally bound individuals together and made the single craft unit a common part of the industrial scene. This identification starts with the apprenticeship process and is strengthened through the continuing discipline of true craft work. All pipefitters share certain skills and techniques, master certain tools, know certain things about hydraulics or pressures—and they do not share any of these things with carpenters, who have an entirely different set of skills, techniques and knowledge. Electricians have a third set of these factors, and bricklayers a fourth. These are traditional craft groups, and a detailed, factual study of each group usually leads to the conclusion that each may constitute an appropriate unit.

Even this generalization has its exceptions, however. A group of craftsmen may perform a maintenance function or operate a powerhouse in an arsenal. Many crafts may be represented, and the differences in skills and knowledge may be well marked. Nevertheless, such a group may constitute a single appropriate unit, despite the diversity of crafts, because the interests and working conditions that derive from their status as a maintenance or powerhouse group override the differences caused by their crafts.

What are some of the factors that may come from function? First, all of these men probably work from a single shop, with a common locker and related facilities unlike the separate sheds or trailers so common in the construction industry. Second, they probably share common supervision by the maintenance or powerhouse foreman, instead of having separate craft foremen. Third, the jurisdictional lines observed by many craftsmen may be blurred, and the machinist may touch up the paint on the machine he has repaired, or the pipefitter may help erect a scaffold before he starts to weld. Fourth, the maintenance shop may run a second or a third shift, or the powerhouse may be on round-the-clock, continuous operations, so that all employees in the functional group share the problem of changing work times and night or weekend work.

Many other things may be examined in the search for that "community of interest" which leads to an appropriate unit finding. In the Federal service, as in private industry, one of the most important is organizational structure.

Good employee relations in a collective dealing context require that the employee representative be brought face-to-face with management representatives who are able to deal authoritatively with the problems to be discussed. The identification of such management representatives will not necessarily be easy and uncomplicated, for authority over some things may reside at one level, and authority over others may repose at higher or lower levels. Nevertheless, appropriate units should lie within some ascertainable organizational boundary, within which the management rep-

[1] This discussion of appropriate units is principally the contribution of the Department of Labor.

resentative can make authoritative decisions on a significant range of probable topics of discussion.

In some cases, of course, complex agency functions are reflected in organizational arrangements. At a large installation, for example, operations, maintenance, and other functions may be physically intermixed but organizationally separate. Management has two options where such plural lines of authority exist. Each segment of management can deal separately with the employee organization or organizations, for employees within its authority. This would produce fairly clearcut relationships and responsibilities, but it might also produce an undesirable subdivision of the workforce into small units, each competing with others for greater benefits or more lenient interpretations of policy, and could produce a whipsawing process that would be troublesome to management.

If such effects can reasonably be expected to result from efforts to have simple unit structures related to clearcut management responsibility, other approaches may be preferred. Management may prefer a larger unit including numerous administrative subdivisions with delegated negotiating responsibility centered in one management representative, or a management team of negotiators.

Before it is decided to combine functions into a single unit for the sake of administrative simplicity, the agency should consider the general principle that good employee relations start at the lowest levels of supervision. The management responsibility should be located at a level where employee problems are understood. However, this choice should result from a realistic appraisal of actual facts.

If the agency has to choose between a local unit and a broader one, the local unit should not be ruled appropriate simply to satisfy a rule that local responsibility is best if, in fact, the local manager has little or no authority to make decisions on things which will be the subject of dealing. Furthermore, one manager, or one source of authority, may deal with more than one appropriate unit. When considering the pyramid of authority that converges in a given manager's office, it is not necessary to include all the structures within the pyramid in a single unit.

For example, a hospital administrator may be a manager with the kind of authority which requires that negotiations, to be meaningful, must take place with him or his immediate agency. An appropriate unit, however, need not include *all* hospital personnel. Two or more units may be appropriate, each dealing with the same management official. Housekeeping personnel may be in one unit, food service workers in another, and clerical employees in still a third. In each case, the choice should be dictated by those factors of working conditions, interests, skills, location, etc., that lead to a conclusion that a community of interest ties the group together.

Where more than one unit seems appropriate, management should be careful not to subdivide its operations to such an extent that its efficiency will be impeded. No manager should be expected to spend an unreasonable amount of his time in negotiations. A manager, for instance, might find that if he follows a principle of separate craft units he will have a dozen or more appropriate units to deal with. If he concludes that a single blue collar unit is appropriate, one way this may be worked out is through a trades council, or joint council, in which each craft is represented.

Joint councils exist at such places as TVA and Bonneville Power Administration, with excellent results in terms of time saved, minimized competition for benefits, and comprehensiveness and consistency in treatment of like groups. Of course, if the employee organizations involved cannot establish satisfactory working relationships with each other, attempts to conduct joint dealings may not be as successful.

No consideration of an appropriate unit can be complete if a history of past relationships between organizations and management is not included. If a practice of consultation for a well-defined group of employees began long before the Executive order, this fact may show better than anything else that a strong community of interests has existed for the represented group, and it may suggest the nature and extent of an appropriate unit.

Situations of this sort should be approached with some care, however, for they create implications with respect to the Executive order's ban against making extent of organization a controlling factor in a unit decision.

The Executive order does not completely prohibit any consideration of extent of organization, which may reveal otherwise hidden or intangible facts about community of interest. The order does prohibit unit determinations in which extent of organization is controlling and is used to justify one unit instead of another which might otherwise make more sense.

An illustration of this would be a case in which a district includes nine homogenous offices in a reasonably compact geographical area. An organization seeks a unit comprised of six of the nine offices, and supports its claim only by asserting that it has organized, and represents, the employees in the six offices. If the other facts relevant to the problem support a district-wide unit, extent of organization may not interfere with the determination that the district unit is appropriate.

On the other hand, suppose that the six organized offices in the district are all located in a well-defined urban region, such as Los Angeles, which has unique problems, and the three unorganized offices are in Hawaii. Clearly, a six office unit might well be appropriate. The employees might frequently be interchanged among the offices, or they might be called together for periodic staff meetings. All of these things would indicate a community of interest that could not be shared by employees in the Hawaiian office.

In such a situation a six-out-of-nine unit should not be defeated merely because it coincides with the area of union representation. Extent of organization would simply confirm the other evidence supporting the six-office unit, and it could and should be considered for this purpose.

Professional Employees

The special interests of professional employees are protected under Executive Order 10988 by the requirement that professionals need not be included in exclusive representation units unless they wish to. This is simply a recognition of the commonly accepted view that the needs and goals of professional employees may be sufficiently different from those of other employees to warrant separate consideration. The distinction exists in private industry also.

In most cases, the question of who is a professional should not be difficult to resolve for employees covered by the Classification Act. A determination as to whether or not an occupation involves professional duties is basic to the definition of occupational series under the Classification Act. More than 160 series definitions in the Handbook of Occupational Groups and Series of Classes state that the duties of positions in those series are to "advise on, administer, supervise, or perform professional work," or in similar language indicate that the series is professional. Persons properly classified in these series would be considered professional employees for the purposes of defining exclusive units under Executive Order 10988. (Some might also meet the definition of managerial executive or supervisor and would be treated accordingly.)

There are substantial numbers of persons in occupations outside the Classification Act, of course, but for the most part their status as professionals should also not be difficult to determine, as for example, physicians, dentists and nurses in the Department of Medicine and Surgery of the Veterans Administration, engineers in AEC or TVA and so on. Obviously, any position paid under the Wage Board system at prevailing rates is by definition *not* professional.

In doubtful cases outside the Classification Act agencies will frequently be able to make comparisons with similar positions under the Classification Act. If such comparisons are not feasible, agencies may find the basic definition of professional employees contained in the Taft Hartley Act useful. That act defines a professional employee as:

(a) any employee engaged in work
  (i) predominantly intellectual and varied in character as opposed to routine mental, manual, mechanical, or physical work;

(ii) involving the consistent exercise of discretion and judgment in its performance;

(iii) of such a character that the output produced or the result accomplished cannot be standardized in relation to a given period of time;

(iv) requiring knowledge of an advanced type in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction and study in an institution of higher learning or a hospital, as distinguished from a general academic education or from an apprenticeship or from training in the performance of routine mental, manual, or physical processes; or

(b) any employee, who

(i) has completed the courses of specialized intellectual instruction and study described in clause (iv) of paragraph (a), and (ii) is performing related work under the supervision of a professional person to qualify himself to become a professional employee as defined in paragraph (a).

In making these determinations agencies should not lose sight of the fact that professionals are not *necessarily* excluded from units of recognition by virtue of their occupation. If it seems otherwise desirable to define a unit of exclusive recognition so as to include professional employees, they need only be given the opportunity to choose whether or not the organization seeking exclusive recognition is acceptable as their representative. Professional employees may, of course, form or join organizations of their own in which case they may be granted one of the three forms of recognition that may be accorded any bona fide employee organization.

Identification of "Supervisors"

A guide that may be used in determining who is a "supervisor" for the purposes of determining exclusive units of recognition under sec. 6(a) of Executive Order 10988 is given below. This list is in accord with criteria outlined in the Supervisory Grade Evaluation Guide published by the Commission in the first volume of Position Classification Standards. Where an employee performs a preponderance of the following duties, he should be considered a supervisor for purposes of this program:

- Assigns and schedules work for employees reporting to him.
- Initiates requests for filling vacancies.
- Selects or participates in the selection of employees.
- Recommends promotions, reassignments, other status changes, or recognition of outstanding performance of assigned personnel.
- Initiates classification actions.
- Checks attendance and approves leave, including all ordinary sick and annual leave and vacation schedules.
- Receives complaints and grievances.
- Holds corrective interviews and proposes disciplinary action to higher authority.
- Conducts informal training; broadens employee training and provides back-up skills by cross training; recommends more formalized training where needed.
- Keeps subordinates informed on important features of management's personnel and employee relations programs.
- Sets or participates in setting performance standards and prepares formal evaluations of employee performance.

Questions

1. What effect does past practice have on inclusion of executives, supervisors, and personnel people in exclusive units of recognition?

   Answer: While section 6(a) of Executive Order 10988 permits exemptions, it is not a general escape clause. It is a savings clause only, and is directed at a handful of situations where there is a well-established practice of collective bragaining by employee organizations on behalf of any or all of these special categories of employees. A history, even a long history, of consultation of the type generally existing in the Government up to now is not enough in itself to invoke the past practice clause.

2. Could units of recognition differ in extent or occupational coverage from establishment to establishment within an agency?

   Answer: Yes, the program allows flexibility to meet local problems.

3. Is there a minimum *number* of employees a unit may contain?

   Answer: No, but as a practical matter very small units should be avoided in the interest of efficiency and convenience in dealing with employees. If there is a tendency to create many small units at one establishment, it may be that there is over-emphasis on occupational differences or narrow orzanizational lines to the exclusion of broader common factors.

4. May a personnel officer or other management official be a member of a union local which is the exclusive representative for a unit, although he is not included in that unit?

   Answer: Yes. The membership of a local of a union need not be confined to a unit for which it is the exclusive representative. A management official may be a member of a lodge or local of a union, without being eligible for inclusion in an exclusive unit represented by that lodge or local.

5. Is it possible for a supervisor who cannot be included in the same unit with his subordinates (under 6(a) of the order) to participate in the management of the union (under 1(a))?

   Answer: Yes, if in the judgment of his agency his supervisory duties do not involve sufficiently significant management responsibilities to lead to a conflict of interest between his role in the union and his role as a supervisor.

6. In an agency one employee organization represents most of the rank and file, and another represents the professional employees. Each requests exclusive recognition for its part of the employee group and each has a majority in a unit so defined, but there are a few employees left over—for example, the boilermakers or other crafts which are not identified with either group. In defining units, are agencies under an obligation to make certain that all employees are included?

   Answer: The fact that there are some employees who will be left out or not represented is not necessarily material unless, of course, they were being left out because of discrimination. Eventually, it may result that this residual group has an appropriateness of its own, the community of interest being that they are all among a peripheral group that is left outside looking in at the represented groups. That gives them a homogeneous interest, even if they might have lacked some of the other interests, such as common supervision or common hours of employment. Thus, when recognizing units, agencies need not worry about the fact that there would be an unrepresented residual group.

SCOPE OF CONSULTATION OR NEGOTIATION

After an employee organization has been granted formal recognition, agency officials will consult with representatives of that organization from time to time on the formulation and implementation of personnel policies that are of concern to the members of the organization. After an employee organization has been granted exclusive recognition, agency officials will negotiate with representatives of that organization with the objective of reaching agreement on personnel policies or practices affecting all the employees in the unit of recognition.

Once recognition has been given, what are the subjects for consultation or negotiation? In general, these are personnel policies and practices and matters affecting working conditions which are within the administrative discretion of the agency officials concerned. The key word here is "policy." Once policies are established, *management officials need not seek the views of representatives of employee organizations on each individual application of a policy.* Consultation provides the framework for action; the taking of personnel action is a management responsibility. If the employee organization believes that a particular policy is not being properly applied or implemented, then it may ask for a meeting with management officials; or the employees concerned may seek correction of the situation through discussions with their supervisors, or, failing this, through use of established agency grievance machinery.

Certain matters are reserved for management decision. Section 7 of Executive Order 10988 states:

"Management officials of the agency retain the right, in accordance with applicable laws and regulations, (a) to direct employees of the agency, (b) to hire, promote, transfer, assign, and retain employees in positions within the agency, and to suspend, demote, discharge, or take other disciplinary action against employees, (c) to relieve employees from duties because of lack of work or for other legitimate reasons, (d) to maintain the efficiency of the Government operations entrusted to them, (e) to determine the methods, means and personnel by which such operations are to be conducted; and (f) to take whatever actions may be necessary to carry out the mission of the agency in situations of emergency."

Also, section 6(b), in discussing matters appropriate for negotiation under conditions of exclusive recognition, states:

"In exercising authority to make rules and regulations relating to personnel policies and practices and working conditions, agencies shall have due regard for the obligation imposed by this section, but such obligation shall not be construed to extend to such areas of discretion and policy as the mission of an agency, its budget, its organization and the assignment of its personnel, or the technology of performing its work."

On a hasty reading of these provisions, it might seem that there was little of significance left to talk about. It would be a mistake to assume so. Typical clauses in private union management contracts also reserve important powers to management, for example:

"The management and the operation of the works and plants of the company, including the direction and disposition of the working force, the right to hire, rehire, transfer, discipline, suspend or discharge for proper cause, employees of the company, and the right to relieve employees from duty because of lack of work or for other legitimate reasons, are vested exclusively in the management of the company."

Despite language of this sort there are obviously many matters employers and employee representatives in private industry find to discuss concerning working conditions, and personnel matters generally, as well as wages.

There is an additional limitation on consultation between management and employees in Government which is recognized in section 7 of the Executive order in these words [concerning the extent of exclusive agreements]:

"In the administration of all matters covered by the agreement, officials and employees are governed by the provisions of any existing or future laws and regulations, including policies set forth in the Federal Personnel Manual and agency regulations, which may be applicable, and the agreement shall at all times be applied subject to such laws, regulations and policies."

This does not mean, however, that employee organizations may not have their views considered in the formulation of such laws, rules, and regulations. Employee organizations can,

of course, present their views to Congress, the President, the Civil Service Commission, and agencies on any matter.

Nevertheless, an agency should not establish such detailed national regulations on personnel policy practices, or matters affecting working conditions that there is no room and no need for dealings with employee organizations at the local level. It is true that Section 7 makes all agreements subject to agency regulations; however, over-restrictive agency-wide regulations which would prevent cooperative dealings at subordinate echelons would clearly be contrary to the intent and spirit of this program.

Clearly, matters that may be appropriate for consultation will vary according to the extent to which personnel authorities are delegated in the agencies.

An example is promotion policies in the competitive service. Fundamental merit principles are not subject to consultation under this program, e.g., basic Civil Service Commission qualifications standards and the principle of selection on merit from among the best qualified condidates wherever they are found. However, consultation may be appropriate on such matters as coverage of promotion plans, the techniques for locating and screening qualified candidates, etc., depending on management's discretion to change these things at the level of dealing concerned.

For purposes of illustration, the following list presents matters that might in given circumstances be appropriate subjects for consultation. It should be clearly understood that not all of the items listed are necessarily subjects for dealing in every unit of recognition of every agency, or that all possible items are included.

1. *Policy on Grievances and Internal Agency Appeals*

Development and operation of grievance and appeals systems.

2. *Policy on the Work Environment*

Light, heat, ventilation, cleanliness and sanitation, and safety practices and equipment.

3. *Policy on Design and Scheduling of Work*

Assignment of work is a management prerogative, but this does not preclude consultation on: tours of duty, rotation assignments, joint employee-management cooperation committees, meal periods, and vacation scheduling.

4. *Policy on Career Policies and Procedures*

Promotion plans (coverage, methods, etc.), opportunities for career mobility (reassignment, detail procedures, etc.), opportunities for training, apprenticeship, reduction-in-force procedures, and disciplinary practices and procedures.

5. *Policy on Employee Benefits and Services*

Lunch rooms, snack bars, coffee breaks, banking, check-cashing services, provision or use of recreation facilities, and transportation and parking arrangements.

6. *Policy on Pay*

Where law permits, the *implementation* of pay policies may be subject to consultation. For example, the prevailing rate wage policy is a matter of law, but such matters as participation in periodic wage surveys are not necessarily fixed. Similarly, *implementation* of other types of pay policy may be discussed, such as overtime, call back, and differential pay, particularly with respect to how opportunities to earn such special types of pay are granted.

7. *Policy on Services to Employee Organizations*

Bulletin boards, use of intra-office distribution system, official newspapers, and on-site meeting facilities.

Fundamentals of Negotiation

Where an employee organization has been granted exclusive recognition how should negotiations be approached on matters such as those given above? The art of negotiation is best learned through practice. Nevertheless it will be important to keep certain fundamentals in mind. Consider the following (far from exhaustive) list:

1. The basic objective of negotiation is to reach agreement. This requires a willingness to listen and to compromise. Adoption of a "take it or leave it" attitude is not a suitable basis for negotiation, since, in effect, it serves notice that there is really nothing to negotiate about. Often the best way to facilitate general agreement is to deal first with an issue on which there is a

very good chance that there will be agreement.

2. There is no requirement that agreement must be reached every time or on all issues. Each side may find that some or perhaps all of the other's demands are unreasonable or impossible to put into effect. However, persistent failure to reach agreement is a symptom of something wrong on one or both sides of the table. On the other hand, overeagerness on the part of management to agree or to "do something" for the union is not the intent of the program.
3. Real success in cooperative efforts requires that each side believe the other will act in good faith and is not out to destroy the basic authority or position of the other.
4. As in any kind of bargaining each side is likely to ask for more or offer less initially than it is willing to settle for. This is the simplest, oldest, and most commonly used tactic in negotiation whether the field is commerce, diplomacy, union-management relations, or whatever. It gives both sides the opportunity to gain something and give up something, and in the process one side may perhaps get more or give up less than would otherwise be the case.
5. As in most relationships, more factors may be involved in reaching agreement than resolution of the specific issues in question. There are matters of "face," traditional attitudes, "expected" behavior, personal ambitions, disputes within organizations, personality clashes, and so on, which may affect negotiations.

The Executive order deliberately does not provide for any compulsory settling of disputes. (*Advisory* arbitration in grievances, appeals, or in establishing exclusive recognition is another matter). The two parties to the dispute must settle it for themselves or leave it unsettled, although mediation, conciliation, referral within the agency, and similar measures might be agreed to.

PROVISION OF AGENCY FACILITIES TO EMPLOYEE ORGANIZATIONS

Section 9 of Executive Order 10988 specifically prohibits the use of official duty time for solicitation of membership, dues, and the conduct of internal employee organization business. Other than this, management has substantial leeway in deciding what official facilities will be made available. As in all of the matters already discussed, however, there should be careful consideration of the consequences before action is taken. Privileges, once given, form a precedent for future action. This means, of course, they should not be given lightly.

In considering requests for the use of facilities, management will want to satisfy itself on three basic points: (1) that the facilities requested are really necessary to the organization; (2) that other organizations in similar circumstances are given similar treatment; (3) that reasonable conditions for the use of the facilities are established and that these are specific enough to permit withdrawal of such use if it should be abused.

Questions

1. May an organization be permitted to have meetings on Government property?
   Answer: This is not prohibited by the order. This privilege, however, should not be loosely granted.
2. May employees attend such meetings on Government time?
   Answer: No.
3. May employees collect or pay dues on Government time.
   Answer: No.
4. May an agency permit union representatives to solicit members during the lunch period?
   Answer: Yes.
5. May agencies permit employee organizations to use agency bulletin boards?
   Answer: Yes.
6. Is it desirable for an agency to authorize use of its intra-office messenger system for distribution of union publications?
   Answer: Generally, this may be viewed as undesirable. If authorization for the use of intra-office messenger systems is granted, there should be a clear understanding in advance as to the kinds and classes of materials to be distributed.
7. Is it permissible to allow unions to place notices of meetings or other notices in agency "house organs"?
   Answer: Yes.
8. May employee organizations be granted free office space on Government premises?
   Answer: While not prohibited by the order, this is generally not good practice; however, it would be permitted under unusual conditions such as in a remote place (e.g., where other facilities are not reasonably available).

Gentlemen:

I just received a copy of the pamphlet, "More Money For You, Your Rights Under the Minimum Wage Law". It's an excellent job written in a way that the people who need it most can understand. Would there be any chance that my office and yours could cooperate in a second edition in Spanish? There is a real need for such a pamphlet to be distributed throughout Texas and other parts of the Southwest.

If you care to cooperate in such a venture, this office would handle the translation and assist in subsidizing the reprints. I assume, however, that those who are distributing them pay something towards the cost of printing.

If there is no income from distribution and the cost is too high, would we be able to get the Labor Department or the United States Civil Rights Commission to handle the printing?

Sincerely,

Rev. John McCarthy

International Bldg.
Room 401
San Antonio, Texas 78205

Dear Father McCarthy:

I am greatly pleased that you liked our pamphlet, "More Money for You?", and that you would like to see it translated into Spanish. We will be happy to cooperate with you in every way that we can to see that a Spanish edition is produced. However, there will be a serious limit on how much further money I can put into this minimum wage effort. But let's discuss some of the facts and then we can see what they mean for each of us later.

Our original run was for 10,000 pamphlets. The cost, including Georgia sales tax, was $880. If the run had been for only 5,000 the cost would have been approximately $580; and if it had been 2,500 it would have cost approximately $430. Our printer here indicates that he could do a Spanish edition for the same price. It would be understood that someone else would have to take care of translation and proof reading.

It could well be that you could have the job handled there more cheaply and with less confusion regarding translation and proof reading. The only complication would be getting the plates for the art work to your printer and returned to ours. Mechanically, our printer feels it is easier to set the type here to the plates than to have the plates sent to you for type setting.

We would, of course, want the work done in a union shop with a union label. I think that we could put in $200 from my program here towards defraying the cost of the Spanish edition. Several things further. There is an error by implication on one page which should be corrected in any reprint. The pamphlet as it now stands is good for 1967 only and it should be updated by a chart or other convenient means to indicate the minimum wage for subsequent years. I am enclosing a copy of our Minimum Wage Campaign Kit which includes the pamphlet. You will see that the kit itself pushes the idea of local groups organizing to assist in the enforcement of the law and provides some guidelines as to how to proceed. The pamphlet was intended for popular distribution by those groups undertaking such a campaign.

The complete kit sells for $1.00 (60¢ in quantity). I lose a little on each kit at the quantity price. The pamphlet sells in quantity at 8¢, and again I lose a little.

You should think through what your potential audience is and what quantities would be required. I would suggest, also, that you give some thought to the means of distribution- which agencies and organizations will really undertake such a campaign. We have had our best response to date from the two groups we primarily sought to reach- State Councils on Human Relations and Labor Unions.

I do not believe that the Labor Department would be interested in directly subsidizing the reprinting of the pamphlet. I say this because our materials, the pamphlet included, are somewhat less formal and technical than they feel they can properly do. However, we have had a good response from the Wage and Hour Division within the region and nationaly to our materials. The Regional office was good enough to check each of our own materials for general technically accuracy.

I hope that this information is of assistance to you and that I will hear from you soon regarding your further interest.

Sincerely,

Emory F. Via, Director

Atlanta, Georgia 30303

Dear Mr. Via:

Many thanks for your letter of July 24th. When you informed me in May that you would be pleased to see a Spanish edition of "More Money for You?" I turned the project over to Mr. Ernest Cortes who was in our office at that time. In late May he was hired by the United States Civil Rights Commission and has not as yet been replaced. I haven't been able to give any time to this.

Since Mr. Alcocer is also interested in the possibilities of a Spanish edition I will take this up with him at the first opportunity, and will also send a copy of the pamphlet to the Social Action Director of the Diocese of Brownsville to see if there is any chance of getting some financial support from that Diocese.

Many thanks for your patience and I hope something comes from your efforts.

Sincerely,

John McCarthy

SECOND REPORT ON THE NATIONAL NUTRITION SURVEY

Mr. Chairman and members of the Committee, I welcome the opportunity to appear once again before this Committee and to present a second progress report on the National Nutrition Survey.

Rather than reiterate the background information presented last year, I would like to submit for the record a summary of the development and progress of the Survey (Attachment I). However, I will briefly summarize the current status.

The data collection has been completed in nine states and New York City and will be finished in the tenth state (Massachusetts) very shortly. The most complete analyses available are from Texas and Louisiana and these data will be the subject of today's report. We are completing the analysis of the data from New York State, Michigan, and Kentucky. Data have been received from New York (City), South Carolina, California, West Virginia, and Washington and are being processed for analysis.

Last year, we reported that our preliminary data clearly indicated the presence of malnutrition in an unexpectedly large proportion of the sample population. We found a high prevalence of signs associated with inadequate nutrition, including growth retardation. Anemia, and unacceptable levels of serum albumin, vitamin A, vitamin C, and urinary riboflavin were very common. These findings demonstrated the seriousness and the magnitude of the problem. The completed data from Texas and Louisiana support those preliminary findings.

Analyses of data from other states are not sufficiently advanced to state whether the same degree of prevalence of malnutrition exists in those areas.

Today, we would like to present expanded information for Louisiana and Texas which will indicate some of the underlying or contributing factors to the problem of malnutrition. We will also present a more detailed description of the population surveyed.

Sample Characteristics

The National Nutrition Survey is weighted in favor of low-income areas since it was felt that the prevalence of malnutrition would be highest in the segment of the population with the lowest income. The sample was drawn from the lower quartile of income areas. The actual sample procedure used was described in detail in our last testimony. We emphasize that caution must be used in the interpretation of our data. Since our sample is not a random sample of the total United States population, the findings cannot be projected for the total United States. When the data analysis is completed on our total sample, some general projections can be made for populations having characteristics similar to those in our sample.

Within Louisiana and Texas we studied a population of 13,373 individuals. The sample included 7,351 Negro Americans, 2,247 white Americans, and 3,775 Spanish-speaking Americans. The latter group were all from Texas (Table I).

Over half of the survey population was under twenty years of age. (Table II) Average household size was between four and five persons, but there were a number of one and two member households, particularly among the older population.

A most important characteristic of our population is the income status. Because adequate income is basic to the provision of adequate nutrition, we have looked at income in relation to a number of the various parameters used to assess nutritional status. Since the dollar value is influenced by such factors as geographic area, family size, sex, and age of head of household, we have used a Poverty Index Ratio rather than an absolute dollar figure for such correlations. This Poverty Index Ratio (attachment II) does not equalize all factors but does correct for family size, farm and nonfarm household, and for sex of head of household. Where appropriate, we will present the remainder of this report in the context of its relation to Poverty Index.

On the basis of the Poverty Index, in Texas 66 percent of the households were below poverty level while in Louisiana 53 percent had incomes below the poverty level.

As an example of the environmental situation, within Texas 12 percent of the households had no public water supply and 17 percent reported inadequate cooking facilities.

As to be expected, the major portion of the sample in the National Nutrition Survey had low income, in many instances below the poverty level, with a large segment from minority groups. Formal schooling was very limited and home conditions frequently substandard.

How do such limiting characteristics affect the daily living patterns? Are there more than the usual number of health problems? Do families utilize resources available to them? Are there adequate resources?

In both Louisiana and Texas a variety of public health resources are available without charge in addition to medical and dental care from the private sector. Although these services are not necessarily available in all areas, it is interesting to note the immunization record from Texas: less than one-half of all children in the Texas sample who were under six years of age had received the recommended immunizations. Fifty-three percent had completed the diphtheria, pertussis, and tetanus series; 57 percent polio; 44 percent smallpox, and 39 percent measles.

The dental examinations in both states repeatedly revealed poor or a complete lack of dental care. Many times this was due to lack of availability of a dentist as well as to lack of knowledge of the importance of such care or to lack of money. Of 3,500 persons examined by the dentist in the Texas survey, one-half had never seen a dentist. Of persons over five years of age, 92 percent needed either fillings or extractions.

It is of interest to note that in Texas there are a number of areas where the naturally occurring fluoride in water approaches or even exceeds that recommended for the prevention of dental decay. Within these areas, 30 percent fewer dental problems were observed than in other geographic areas.

Resources for welfare and food distribution are of major importance to a population such as we have described. Mere availability does not assure that the needy will or can participate. For example, at the time of the survey in Texas, 19 of the 26 counties surveyed had food commodity programs; 3 of the 26 had food stamp programs; all but one county had school lunch programs. Yet less than 10 percent of the households participated in either food distribution plan. Of a total of 699 children attending school in the Texas sample, 639 attended school where a lunch program was available. Approximately 27 percent of these did not participate in the program. Of those who did participate 74 percent were from homes below the poverty level. There was only a small difference between the children from homes above and below the poverty level with regard to the number of times per week they participated. Approximately 19 percent ate school lunch less than 3 times per week. (Table III.)

Full advantage is not being taken of existing programs by many individuals. Lack of transportation to source, lack of understanding of programs, and eligibility regulations all exerted an influence on participation. For example, at the time of the survey in Louisiana, a person with a monthly income of $100 would have been eligible for $40 stamps. Although this would have carried a bonus of $21, it is frequently impossible for persons on such incomes to have the entire $40 available at the necessary time.

DISCUSSION OF SURVEY RESULTS

At the time of our first report to your Committee in January 1969, we discussed in some detail clinical findings, including problems relating to growth, dental health, and biochemical findings. No dietary data were available. At this time, we would like to review major findings briefly and expand on data presented in the first report. In addition, we will delineate relationships between nutrition problems identified and possible causative factors to permit identification of those individuals or families requiring nutritional assistance.

All of the previously mentioned factors, i.e., low income, poor housing, etc., undoubtedly contribute to the various nutrition problems identified in the survey. It is difficult, and often impossible, to determine the contribution of each of these factors, since they are interrelated to the problems observed. Whenever possible, we will relate clinical, biochemical, dietary, socioeconomic, and other data. In our discussion, certain standards are referred to; for example, the guidelines used for defining acceptable biochemical levels are listed in attachment III and for dietary in attachment IV.

Dietary data were collected by securing a review of the previous day's food consumption. Information was obtained from 497 households in Texas and 670 households in Louisiana and from individuals of selected vulnerable groups. The average calculated intake of certain essential nutrients is shown for each category in Table IV. The calculated 24-hour intakes for each nutrient were expressed as percent of the reference

standard for each category (see Attachment IV). The mean percent adequacy is given in Table V for each age group and for households. It should be stressed that averages of adequacy for intakes of individuals do not reveal the proportion of those individuals who consume low and high amounts so the usefulness of such data is limited in delineating the problems of malnutrition. Group means may meet or exceed the mean reference standard considered to be adequate, while significant proportions of the group may be consuming diets falling considerably below the reference standard. With this in mind, it is cause for concern that several of the group means actually fell below the reference standard. This was especially true for iron intakes, where every group mean in Louisiana and those for 0-3 year old children, 10-16 year olds, and pregnant/lactating women in the Texas sample failed to meet the reference standard. An average of only 50 and 73 percent of the reference standard for iron was consumed by 0-3 year old children in Texas and Louisiana, respectively. This most widespread occurrence of inadequate dietary intakes is consistent with the biochemical findings in all age groups.

In addition to the low iron intakes in Louisiana, pregnant/lactating women and persons 60 years of age and over had intakes of protein which for the entire group averaged below the reference standard.

Recognizing that group means can and usually do mask the problems of certain sub-groups within the mean, the data were combined for all enumeration districts within a county and summarized on that basis (Table VI). Population segments by county would be expected to be more homogenous than on a total state basis. The average for each category of individuals or

households in each county were expressed as percent of reference standards. Table VI shows the percent of counties in each state, by nutrient, which had average intakes for each age group (except for pregnant/lactating women) or households that failed to meet the reference standard. The large percentage of counties with group means below these standards support the evidence for dietary deficiencies of iron among all age groups and for protein in those persons 60 years of age and over. In addition, there is evidence for low intakes of vitamin A and thiamine in all age groups and for vitamin C in infants in several counties.

It is well known that one day's food intake cannot be used to appraise the adequacy of an individual diet, since any particular day may not be representative of the usual food intake. Nevertheless, when daily food consumption of a large proportion of any population group fails to meet the standards required for adequacy, it is almost certain that many individuals within the group will consume poor diets regularly. Tables VII through XII show the percent of people in the sample in both Texas and Louisiana that consumed diets on the day prior to the survey that supplied less than 70 percent, from 70 to 100 percent or over 100 percent of the reference standards for iron, vitamin A, vitamin C, thiamine, riboflavin, and protein. These same data are presented graphically in Attachment V. These data reveal that 30 to 81 percent of all daily diets were low in iron, 26 to 63 percent low in vitamin A, and 27 to 56 percent low in vitamin C. Low daily thiamine, riboflavin, and protein intakes were found in up to 44, 32 and 54 percent, respectively, in certain age groups (pregnant/lactating women and persons over 60 years).

More than three-fourths of children under age 3 in Texas and Louisiana ate diets providing less than 70 percent of the standard for iron. In Louisiana 81 percent of pregnant women reported diets that provided less than 70 percent of the standard for this nutrient. Forty-two percent of Louisiana and 30 percent of Texas households reported food intakes inadequate in iron.

Dietary intakes of vitamin A are low in most age groups, and markedly so in those ages 10-16, and pregnant women. Among both groups, more than half consumed diets which provided less than 70 percent of the standard for vitamin A.

Between one-fourth and one-third of children unage age 3 in Texas and Louisiana and up to 60 percent of the other age groups were eating foods that provided less than 70 percent of their vitamin A standard. Food intake information indicates that more than one-fourth of the family groups were eating foods providing less than 70 percent of the recommended standard for vitamin C.

Reported food intakes show that 27 percent and 32 percent of the adolescent and aged groups in Texas, respectively, were consuming less than 70 percent of the standard for riboflavin.

Thiamine did not meet 70 percent of the standard in diets of up to 37 percent of adolescents and 44 percent of aged in Louisiana.

With regard to protein, dietary intakes of over half the pregnant women and 46 percent of the aged in Louisiana failed to provide 70 percent of their protein needs.

Data for Louisiana show that more persons from families below poverty

than above poverty reported diets which supplied less than 50 percent of the reference standards for vitamin A. This was true for protein, thiamine, riboflavin, and vitamins A and C for persons over 60 years of age.

Multiple Biochemical Abnormailities

In attempting to summarize the biochemical findings, the number of persons with multiple unacceptable values has been determined. Using the six basic determinations, hemoglobin, serum albumin, serum vitamin A, and vitamin C, and urinary riboflavin and thiamine, over one-third (35 percent) of the survey population in Texas were observed to have two or more of these six biochemical levels in the unacceptable range (Table XIII). The picture becomes clearer as to where the problems are when one separates the population on the basis of poverty levels.

Persons living in households with a Poverty Income Ratio of less than 0.50 had considerably higher rates (44.7 percent) of two or more unacceptably low biochemical levels than other poverty groups and over twice the rate (21.1 percent) of persons from households with a Poverty Income Ratio of 2.0 and over. Persons living in households with a Poverty Income Ratio of less than 0.50 had a rate (16.3 percent) of three or more unacceptably low biochemical levels more than five times greater than the rate (2.8 percent) of persons from households with a Poverty Income Ratio of 2.0 and over. The Negro population in Texas has the highest rate of persons with multiple unacceptable values.

The highest rates of multiple biochemical abnormalities were found in the thirteen to sixteen year old group, where over one-half of the

individuals had two or more unacceptable values. Males over sixty years of age also had a high prevalence of more than two unacceptable values of the six basic values (37 percent) while only 18 percent of the women over sixty had two or more unacceptable values (Table XIV).

Anemia

Anemia is one of the major problems encountered in the National Nutrition Survey. The hemoglobin level in the blood is a commonly used test to diagnose anemia. Low hemoglobin levels indicating anemia were found to be major nutritional problems in both Louisiana and Texas (Table XV).

Anemia was a problem at all income levels in both states. No differences in the prevalence of anemia was observed between ethnic or racial groups in Louisiana. In Texas, Spanish-speaking and Negro groups, both male and female, had a prevalence of unacceptable hemoglobin levels approximately twice that of the white groups.

All age groups in both states had high prevalence rates of unacceptable hemoglobin levels. A trend was observed for individuals in our sample who lived in households where the housewife had a higher level of education to have fewer unacceptable hemoglobin levels. This trend, however, was evident only in households whose income placed them in a Poverty Income Ratio of 1.50 and over. In this income group in Texas, unacceptable hemoglobin levels were found in about 29 percent of individuals where the housewife had less than a fourth grade education and 9 percent where the housewife had education beyond the 12th grade.

The dietary data indicate that iron intake was inadequate for a

very high proportion of families and individuals in the survey.

In Texas 30 percent and in Louisiana 42 percent of the households studied consumed less than 70 percent of the recommended intake of iron (Attachment V). In both Louisiana and Texas, except for the aged, iron intakes were not materially affected by poverty.

The sub-group whose diets appeared to be most inadequate were infants. Seventy-five percent in Texas and 78 percent in Louisiana consumed diets which contained less than 70 percent of the recommended intake.

The anemia problem is probably complicated by a high prevalence of pica in certain sub-groups. Pica has been implicated as a possible contributing factor to anemia.

Vitamin A Deficiency

Texas reported that 41 percent of the individuals surveyed had unacceptable levels of serum vitamin A while the Louisiana survey had 15 percent (Table XVI). The most striking findings were in children and adolescents. In Texas over 60 percent of these age groups had unacceptable levels. The prevalence of unacceptable levels was much lower for adults.

The prevalence of unacceptable levels of serum vitamin A decreased as income increased. For example, in Texas the prevalence of unacceptable levels in individuals living in households with a Poverty Income Ratio (PIR) less than 0.75 was 45 percent while for those with PIR of 1.50 and over it was 26 percent.

There is a trend for individuals who live in households where the housewife has a higher education level to have a lower prevalence of

unacceptable serum vitamin A levels.

Dietary intake of vitamin A was low for a large percent of households and for all subgroups in both states (Table VIII). For example, in Texas 52 percent of the adolescents and in Louisiana 53 percent of the same group consumed less than 70 percent of the standard. The prevalence of low vitamin A intake was greater in all of the groups below poverty.

Vitamin C

Twelve percent of the total population surveyed in Texas and 14 percent in Louisiana had unacceptable serum levels of vitamin C (Table XVII). In Texas no income influence was observed, while in Louisiana the prevalence of unacceptable values was higher in the above poverty groups. No age pattern was apparent except in Louisiana where males over 16 years of age had a rate approximately twice that of males under 16 of age. No education pattern was apparent. There seems to be a slightly lower prevalence of unacceptable vitamin C levels in the Spanish-speaking group.

Food intake information indicates that vitamin C is consumed in less than adequate amounts by a large percent of all groups (Table IX). This is most evident in children 36 months and younger where 53 percent in Louisiana and 56 percent in Texas consumed less than 70 percent of the standard.

Thiamine

The urinary excretion levels of thiamine were unacceptable in ten percent of the population in both Louisiana and Texas. The rates for

males and females were similar. There was no consistent relationship to income. The highest prevalence is clustered in the individuals 10 to 16 years of age (Table XVIII). Twenty-five percent of the households in Texas and 29 percent in Louisiana consumed diets with less than 70 percent of the standard (Table XI). A large percent of all individual groups on whom 24-hour intakes were recorded consumed diets providing less than the standard, with the aging in both states having the greatest percent of individuals consuming less than 70 percent of the standard.

Riboflavin

The urinary excretion levels for riboflavin were unacceptable in 21 percent of the population in Texas and 16 percent in Louisiana. No consistent pattern related to sex distribution was apparent in Texas but males had a slightly higher rate in Louisiana (Table XIX). The racial difference observed in Texas, where the Negro rate of unacceptable riboflavin levels was higher than whites, was reversed in Louisiana. In Texas there are slightly higher rates of unacceptable riboflavin levels in the population below poverty.

The highest percent of subjects consuming diets containing less than 70 percent of the standard were individuals 60 years of age and over with adolescents having the next highest prevalence rate. (Table X)

Serum Protein

The groups having the highest rates of unacceptable values for serum protein were males 50 years of age and over and females 60 years of age and over, although some unacceptable values were reported for all age groups (Table XX). The dietary patterns indicate that protein intake

was most limited in pregnant and lactating women with the next most limited groups being individuals sixty years of age and over. (Table XII)

In summary, data have not been analyzed to determine the significance of observed relationships between dietary intake and pertinent biochemical observations. However, consistent trends appear. Comparisons between the intakes of several nutrients with the percent of the appropriate biochemical values which fall in the unacceptable range are given in Tables XXI through XXVI by age groups and for households. These comparisons show that a substantial percentage of the people may consume diets which do not meet even 60 percent of the reference intake standards, although the mean intake for the total group may be considerably above the reference standard level. The occurence of low biochemical levels support the premise that many of the individuals in our sample fail to meet their nutrient needs day after day. More direct evidence for low nutrient intakes must await the appropriate combination of specific subgroups.

Tables XXVII and XXVIII present the dietary data relating to iron intakes and the percent of hemoglobin, hematocrit, and transferrin saturation values which fell in the unacceptable range for 0-3 year old children and 10-16 year olds, respectively. These data show excellent agreement and provide strong support for the need to increase iron intakes.

Clinical

Clinical lesions appear only after prolonged periods of poor food intake or after a shorter period of extremely limited food intake.

Therefore, as was expected, the prevalence of abnormal clinical findings in Texas and Louisiana was low.

Approximately forty different lesions were looked for in the medical examination. Most of the individual lesions were present in only one or two percent of the population. In Louisiana approximately one in three adults and one in ten children under the age of six had one or more clinical lesions. In Texas the Spanish-speaking and Negro populations had a slightly higher prevalence of individuals with one or more clinical lesions than did the white population.

A part of the pediatric examination was a series of body measurements and a hand-wrist x-ray to determine growth and development.

Heights of Texas and Louisiana children between 6 and 71 months of age were compared with heights of a similar age group of Iowa children. The average height of the children in our sample was less than that for the Iowa children of similar age. For example, in Texas 41 percent of the males and 40 percent of the females were shorter by more than one standard deviation below the Iowa mean. If growth of these children had been comparable to the Iowa children, one would have expected this percentage to be 16. There appears to be an ethnic and racial variation in growth with the Spanish-speaking and Negro accounting for the largest percent of those deviating from the mean.

The trend of growth retardation as reflected in the height data was also observed in the bone growth as determined from the hand-wrist x-ray.

DENTAL

No changes have been noted from the dental data reported in our last testimony. Poor dental hygiene, a high prevalence of dental caries, and peridontal disease continue to be major problems.

The preceding data confirm earlier impressions that have been reported to the committee. The Department is at the present reviewing to the recommendations of the White House Conference on Food, Nutrition, and Health in light of these and other findings. The Nutrition Program is utilizing these findings in developing demonstrations to improve the health status of persons with evidence of malnutrition. The National Health Survey is adapting the methodology to a nation-wide monitoring program so that we will have a continuing measure of the nutritional status of the country. But more important, action programs at state and local level are developing as a result to the surveys. I would like to recount what is happening in Louisiana and Texas.

In Louisiana, the Advisory Committee to the Louisiana Nutrition Survey recommended the organization of task forces geared toward meeting nutritional needs; strengthening the state's supplemental food program; reviewing critically the nutrition components in the curricula of schools and colleges; expanding school breakfast and lunch programs by increasing student participation; establishing a committee to review current legislation regarding food enrichment laws and practices; considering the critical need of the health department to increase research efforts in nutrition.

The Louisiana Health Department has begun to implement these recommendations. Statewide planning sessions have been held, an organizational meeting of the Louisiana Nutrition Council has taken place and the Board of Health has authorized the establishment of a Division of Dental Health in the Health Department. The Louisiana State Dental Association is playing a major role in recommending and participating in the development

of programs designed to upgrade the nutritional health of the people through the overall improvement of dental health care.

The Texas Health Department has completed planning for regionalizing its health program into ten sections, which includes the provision for a nutrition consultant as a member of its health team in each of the regions. Funding has been requested for implementing the first phase of the regionalization program in three regions in the Dallas, East Texas, and Valley areas. Selection of these areas has reflected tri-cultural, bilingual, and rural characteristics. Funding for nutritional activities has been approved by the Board of Health and the State Legislative Budget Committee at the level of approximately $500,000. Nutrition planning for the future has been placed in the comprehensive health section at the Governor's level. A private state nutrition foundation is in the planning stage. The number of counties without a food distribution program has been significantly reduced through the efforts of the state welfare and agricultural agencies.

Following the state survey, the State Department of Education completed a comprehensive school health curriculum study. Emphasis was on nutrition health education and services in grades kindergarten through twelve. A new Health Education Curriculum Guide for teachers is now being distributed throughout the state. Prior to the final development of this guide, a statewide school health conference, cosponsored by the Texas Education Agency, the Texas Medical Association, and the Nutrition Program, HSMHA, was held in San Antonio last July. Representatives from school and community health teams from the state's twenty regional education service centers participated in the conference. As a result of

this conference and of follow-up sessions held in each of the twenty regions, the Education Service Center in Austin has proposed a model nutrition program in a school setting from kindergarten through the twelfth grade.

In summary, as a result of findings by the National Nutrition Survey in Louisiana and Texas concrete steps have been taken by these states toward action to eliminate the facets of malnutrition found. There are indications that the survey in the other eight states will stimulate similar action programs.

- Current Progress Status - By States
- Specific Analyses Being Used

April, 1970

THE NATIONAL NUTRITION SURVEY
(Reference Summary)

Table of Contents

I. HOW THE SURVEY WAS DEVELOPED

1. Authorization and Objectives 1
2. Implementation 1
3. Selecting the states..... 1
4. Number of households and individuals contacted 2
5. Funding the survey 2
6. Coordinating and conducting state surveys 2
7. Methodologies, procedures, and standards 2
8. The sample design 3
9. Organizational components of a survey team 3

II. STATUS OF THE SURVEY'S PROGRESS

1. State by state description 4

III. SPECIFIC ANALYSES USED IN THE SURVEY TO ASSESS NUTRITIONAL STATUS

1. Components of the survey in examining family households 5
2. Interpreting the data 5

I. DEVELOPMENT OF THE SURVEY

1. WHAT IS THE AUTHORIZATION FOR A NATIONAL NUTRITION SURVEY, AND WHAT ARE THE SURVEY'S OBJECTIVES?

A mandate from the Congress under the Partnership for Health Amendments of 1967, directed the Secretary of Health, Education, and Welfare, in consultation and cooperation with other officials of the Federal Government and of the States, to conduct a comprehensive survey of the incidence and location of serious hunger and malnutrition and health problems incident thereto in the United States.

2. HOW WAS THE SURVEY IMPLEMENTED?

The Nutrition Program of the Public Health Service, in turn, was designated by the Secretary to plan, develop, and carry out the mandate. An advisory committee composed of representatives from the U. S. Department of Agriculture, Office of Economic Opportunity, Children's Bureau, Office of Education, Public Health Service, and the Office of the Secretary of HEW assisted the Nutrition Program in developing overall objectives, selecting participating states, and in establishing other general guidelines. The HEW Regional Office personnel initiated contact with the respective states and have assisted the Nutrition Program in implementing the surveys.

Specific methodologies were developed by the Nutrition Program staff in cooperation with a number of professional Ad Hoc committees. Dr. Arnold E. Schaefer, Chief of the Nutrition Program, and many of the Ad Hoc committee members have participated in 33 international nutrition surveys since 1956. These surveys were conducted under the auspices of the Interdepartmental Committee on Nutrition for National Defense, which is now the Nutrition Program.

3. HOW WERE STATES SELECTED FOR PARTICIPATION IN THE SURVEY?

Criteria used to select the states included geographical representation (with both urban and rural representation) and diversity of economic, ethnic, and socio-cultural composition of the states. Additional specific considerations were such factors as concentration of migrant labor, infant, and maternal mortality rates higher than the national averages, and variations in types of food distribution and welfare programs. The findings from the first phase of the survey can be extended to groups having similar characteristics.

Within each state sample, subsamples of groups more vulnerable to nutritional stress were selected for more detailed study. These subsamples include infants, pregnant and lactating females, adolescents, and the aging.

The 10 states selected were Texas, Louisiana, New York, Kentucky, Michigan, California, Washington, South Carolina, West Virginia, and Massachusetts. Concurrent with the National Nutrition Survey, a pilot study of the Navajo Indian population at Greasewood, Arizona was conducted to collect baseline data for initiating a food distribution program for that specific Indian population.

4. AT THE CONCLUSION OF THE NATIONAL NUTRITION SURVEY, APPROXIMATELY HOW MANY HOUSEHOLDS AND INDIVIDUALS WILL HAVE BEEN CONTACTED IN THE TEN STATES AND NEW YORK CITY?

Approximate number of households: 24,000
Approximate number of individuals: 96,000

5. HOW WAS THE SURVEY FUNDED?

Re-programmed funds for conducting the nutrition surveys in Texas, Louisiana, New York, Kentucky, Michigan, and New York City, and for basic staff and supporting expenses, was made available by the U. S. Office of Education ($225,000), Social Rehabilitation Services ($225,000), U. S. Department of Agriculture ($100,000), Office of Economic Opportunity ($275,000), and the Public Health Service ($900,000).

To complete the state surveys in California, Washington, West Virginia, Massachusetts, and South Carolina funds were re-programmed in FY 1969 from the Public Health Service ($1.5 million), and the U. S. Office of Education and the Administration on Aging ($500,000).

6. HOW WERE THE SURVEYS COORDINATED AND CONDUCTED IN THE STATES?

The surveys within the states were conducted on a contract basis under the statewide coordination of their health departments. Coordinated leadership, supportive planning and development, professional assistance, and contractual funding emanates from the Nutrition Program Office.

Additional assistance has been available to the states from the Food and Drug Administration, U. S. Army Medical Research and Nutrition Laboratory and the Office of Economic Opportunity.

In New York, Kentucky, Michigan, West Virginia, California, South Carolina, and Massachusetts the respective State Health Departments were the contracting agents in conducting the surveys. In Texas, Louisiana, and Washington the respective State Health Departments designated medical schools within their states as the contracting agents.

7. WHAT ARE THE METHODOLOGIES, PROCEDURES, AND STANDARDS USED IN CARRYING-OUT THE SURVEYS?

The methodologies, procedures, and standards published in the Manual for Nutrition Surveys were used as guidelines in developing and carrying out the survey, and in interpreting data collected. The Manual was published by the Interdepartmental Committee on Nutrition for National Defense in 1957, with a second edition being printed in 1963. This committee was composed of representatives from the (U.S.) Agency for International Development, the (U.S.) Departments of State, Health, Education and Welfare, Defense, Army, Navy, Air Force, Agriculture, Interior, and the Atomic Energy Commission.

The Manual was designed to (a) establish uniformity in methods, techniques, procedures, and guidelines for conducting surveys, (b) outline and define responsibilities and duties of survey team members, (c) provide a guide to

interpretation of dietary, biochemical, and clinical data collected, (d) serve as a working reference of major facts essential to proprer appraisal of nutritional status, and to aid in interpreting findings in order to draft practical, effective recommendations to alleviate nutritional problems discovered, and to (e) assist in training personnel in nutritional appraisal techniques and to stimulate continued nutritional efforts. Where indicated, procedures were modified to conform with domestic requirements.

8. WHAT METHOD WAS USED FOR SELECTING THE SAMPLES TO BE SURVEYED?

The sample design for the nutrition surveys in each state was developed by the Nutrition Program in cooperation with the National Center for Health Statistics, Department of Health, Education and Welfare, based upon tested procedures of the Bureau of the Census in its sample surveys. Priority efforts in the survey were directed at low income economic areas. The sample was randomly selected from the census enumeration districts reported in the 1960 Census to account for the lowest one-fourth income group. Within each enumeration district a segment with an average of about 60 housing units was randomly selected. Finally on the basis of a random start, an average of about 20 households in each enumeration district were chosen to be invited to participate in the survey.

9. WHAT ARE THE COMPONENTS OF A STATE NUTRITION SURVEY TEAM?

The state nutrition survey team is made up of the following four components:

(1) Administrative Unit - is responsible for all of the administrative details as assigned, such as payroll, personnel, shipping of samples, and maintaining official contact with the contract officer for the survey.

(2) Advance Team - establishes contact in the areas where a sample has been identified, assists in the enlistment and coordination of local support of the survey in the areas, carries out the mapping of the area as described in the Guidelines for the Nutrition Survey, and completes the home interviews as directed in the Guidelines. In addition, the director of the advance team, working under the survey team director and in cooperation with the clinical team director, identifies suitable sites for clinic activities, and coordinates initial scheduling procedures in transporting families to the clinic.

(3) Field Clinic Team - is responsible for transporting families to the clinic site when necessary, collecting the basic information on the health status of the sample population, and maintaining correctness of the coding. An average-sized clinic team is comprised of 25-30 members, including physicians, dentists, nutritionists, field laboratory personnel, anthropometrists, X-ray technicians, registrars, code clerks, and drivers.

(4) Biochemical Laboratory - is responsible for completing the necessary biochemical determinations of the samples. The laboratory director is also responsible for maintaining quality control both in the laboratory and in the field, and for shipping samples to other laboratories for special analysis and for coding of the laboratory forms.

SURVEY PROGRESS STATUS -BY STATES

NOTE: In states where the contracting agent listed is other than the state's health department, the contracting agent had been designated by the state health department for contracting purposes.

STATE	CONTRACTING AGENT	FIELD DIRECTOR	NO. E.D.	FIELD ACTIVITIES COMPLETED	STATUS OF DATA
TEXAS	Univ. of Texas Medical Branch Galveston	Dr. William J. McGanity	102	November, 1968	Primary analysis completed
LOUISIANA	Tulane Univ. School of Medicine, New Orleans	Dr. Walter G. Unglaub	97	January, 1969	Primary analysis completed.
NEW YORK STATE	Health Research Inst. State Dept. of Health	Dr. Donald M. Watkin	103	June, 1969	Data has been edited Analysis in process
KENTUCKY	State Dept. of Health	Dr. Dudley Nelson	62	June, 1969	Data has been edited Analysis in process
MICHIGAN	State Dept. of Public Health	Mrs. Alice Smith	99	June, 1969	Data has been edited Analysis in process
WEST VIRGINIA	State Dept. of Health	Dr. Harry Ridgely	48	September, 1969	All data received Analysis in process
WASHINGTON	Univ. of Washington School of Medicine	Dr. Nathan Smith	98	January, 1970	Data being compiled for analysis
CALIFORNIA	State Dept. of Public Health	Dr. Beatrice Nold	200	February, 1970	Data being compiled for analysis
SOUTH CAROLINA	State Board of Health	Dr. Harry Ridgely	98	March, 1970	Data being compiled for analysis
MASSACHUSETTS	Health Research Institute State Dept. of Public Health	Dr. Joseph C. Edozien	103	May, 1970	Data being compiled for analysis
NEW YORK CITY	State Dept. of Health N.Y. City Health Dept.	Dr. Robert Newman	96	March, 1970	Data being compiled for analysis

Navajo Indian Pilot Study - Greasewood, Arizona, grazing area (Approximately 100 square miles), Population - 1200. Study was completed in February, 1969. All data was delivered to the U. S. Department of Agriculture, the funding agency.

II. SPECIFIC ANALYSES USED IN THE SURVEYTO ASSESS NUTRITIONAL STATUS

1. WHAT ARE THE COMPONENTS OF THE SURVEY IN THE EXAMINATION OF FAMILY HOUSEHOLDS?

CLINICAL - Participants undergo a specialized clinical examination. This includes a medical history, physical examination, anthropometric measurements, hand skeleton x-rays (for an objective assessment of physical growth and development) and a dental examination. The clinical examination places primary emphasis on the presence or absence of key lesions associated with nutrient deficiencies.

Additional tests are incorporated at the discretion of the states. To date these have included parasitology, hearing and sight testing, screening for diabetes, and tests for cardiovascular abnormalities.

BIOCHEMICAL - Biochemical analyses are carried out on blood and urine specimens obtained from survey participants to identify the levels of nutrients. This data will be compared to standards to determine the prevalence of the population at risk of health impairment due to specific nutrient deficiencies.

DIETARY - Dietary data was analyzed to assess the nutritional quality of the diets consumed. These data will assist in the interpretation of the clinical and biochemical results and be of value for planning follow-up programs.

Data has been collected on actual food consumed, frequencey of use of selected food groups, and general information on dietary patterns, food sources, food preparation facilities and related pertinent data.

SOCIO-ECONOMIC - Socio-economic factors related to health are recorded for each household. These factors include the size of the dwelling, family size, water, sanitary and cooking facilities, principal wage earners, income, ethnic group identification, educational level of the occupants and other related factors.

2. HOW ARE THE DATA BEING INTERPRETED?

Data collected are being compared with guidelines adapted from those published by the Interdepartmental Committee on Nutrition for National Defense, the World Health Organization, and the Food and Nutrition Board, National Research Council. In addition, expert advisory groups are represented by the American Academy of Pediatrics Committee on Nutrition, the Food and Nutrition Board of the National Academy of Science, and the Food and Nutrition Council of the American Medical Association to review and interpret the data collected.

ATTACHMENT II

Poverty Ratio Index
Computed from

Weighted Average of Poverty Criteria for Families of Different Composition, by Household Size, Sex of Head, and Farm or Nonfarm Residence, March 1967

Number of Family Members	Weighted Average of Incomes at Poverty Level			
	Nonfarm		Farm	
	Male Head	Female Head	Male Head	Female Head
1 Member	$1,710	$1,595	$1,180	$1,110
Head under age 65	1,760	1,625	1,230	1,140
Head age 65 +	1,580	1,560	1,105	1,090
2 Members	2,130	2,055	1,480	1,400
Head under age 65	2,200	2,105	1,540	1,465
Head age 65 +	1,975	1,955	1,380	1,370
3 Members	2,610	2,515	1,820	1,725
4 Members	3,335	3,320	2,345	2,320
5 Members	3,930	3,895	2,755	2,775
6 Members	4,410	4,395	3,090	3,075
7 or more Members	5,440	5,310	3,795	3,760

Source: Orshansky, M.: The Shape of Poverty in 1966. Social Security Bulletin, March 1968.

Example: Poverty Index Ratio (PIR): Family of four, non-farm
Yearly Income $3335, PIR = 1.0
Yearly Income $4998, PIR = 1.5

National Nutrition Survey
blood data
urine data

Guidelines for Classification and Interpretation of Group Blood and Urine Data Collected as Part of the National Nutrition Survey

R. M. O'Neal, O. C. Johnson and A. E. Schaefer

United States Department of Health, Education and Welfare, Health Services and Mental Health Administration, Regional Medical Programs Service, Nutrition Program, Bethesda, Maryland, USA

During the past few months interest in the nutritional health status of United States populations has increased by several magnitudes. This interest has resulted in a number of studies designed to objectively ascertain the current status of nutritional health in this country. One portion of such objective evaluations usually consists of a number of biochemical determinations on blood and urine that are related to intake, excretion or storage, or both, of specific nutrients. To relate data obtained from such biochemical measurements to nutritional health status, they must be compared with biochemical values deemed to reflect various degrees of nutritional health status. Such a set of values has been developed to interpret the data currently being collected as part of the National Nutrition Survey (NNS). Since it is a national survey and the results obtained will be used by numerous groups concerned with nutritional health and for comparison with other nutritional health studies, the guidelines developed for classification and interpretation of group blood and urine data collected as part of the NNS should be made available to interested groups.

Prior to the beginning of the NNS, considerable amounts of information were available relating biochemical measurements to dietary and clinical nutrition status, but a current set of comprehensive guidelines suitable for interpretation of the biochemical data generated by the NNS was not available. The guidelines that had been suggested for interpretation

Table II. Methodology used to obtain National Nutrition Survey laboratory data

Determination	Method
Hemoglobin	Cyanmethemoglobin[1]
Hematocrit	Micromethod[2]
Serum iron	Giovanniello[3]
Serum iron-binding capacity	Caraway[4]
Blood folacin	*Lactobacillus casei*[5]
Total serum protein	Biuret[6]
Serum albumin	2-(4′-hydroxyazobenzene) benzoic acid (HABA)[6]
Serum vitamin C	Macro dinitrophenylhydrazine[1]
Plasma carotene and vitamin A	Macro Carr-Price (trifluoroacetic acid chromogen)[1]
Urinary creatinine	Picrate[6]
Urinary thiamine	Thiochrome[1]
Urinary riboflavin	Modified Slater-Morell[1]
Urinary iodine	Modified Zak[1]

[1] Excessively high levels may indicate abnormal clinical status or toxicity.
[2] May indicate unusual diet or malabsorption.

of biochemical data by the Interdepartmental Committee on Nutrition for National Defense (ICNND) [2] were selected as a starting point and revised and expanded to accommodate the scope of data collected from the NNS. The Committee on Nutrition of the American Academy of Pediatrics reviewed the ICNND guidelines for interpretation of blood data, and revised them when necessary, based on current information [1]. The Committee expanded them to accommodate the significant physiological differences in children due to sex and age through 16 years of age, as well as providing guidelines for additional determinations performed in the NNS.

The Nutrition Program Advisory Committee reviewed the ICNND guidelines for interpretation of blood and urine data for adults and revised them where current information required revision. This committee expanded these guidelines to include standards for interpretation of additional determinations performed in the NNS.

The comprehensive guidelines for classification and interpretation of group blood and urine data collected as part of the NNS are shown in table I and are for laboratory data obtained by the methods referenced in table II.

STANDARDS FOR EVALUATION OF NUTRIENT INTAKE

The standards for evaluation of nutrient intake were developed by an ad hoc committee utilizing standards from the World Health Organization ICNND Manual and the recommended allowances from the National Research Council. Where allowances are based on weight of a subject, the actual weight recorded at the time of the clinical examination will be used. If for some reason a weight measurement was not obtained, the weights indicated on the standards will be used.

ATTACHMENT VI

PILOT NUTRITION SURVEY ON NAVAJO RESERVATION

A pilot nutrition survey was carried out in one area of the Navajo Reservation at Lower Greasewood, Arizona. The entire population of the area, approximately 1200 persons, was included in the survey. The same procedures used in t a National Nutrition Survey were employed in the Navajo Survey.

Characteristics of the Population

45% of the population lived in a one room house

35% had no special sanitory conditions

All one room houses had no indoor plumbing

18% had full-time employment

Majority of adults had 4 or less years of schooling

Trading post sold no fresh vegetables or fruits and no whole milk

50% of families received food commodities

Per capita expenditure decreased as family size increased

3, 4, 5 member homes reported weekly food expenditure per capita at rate of $6.10, $5.50 and $4.90, respectively

7 or more member homes spent from $2.10 to $2.70 per person

Children often given soft drinks and coffee rather than milk

Gastroenteritis, diarrhea and dysentery accounted for 22% of infant deaths in the 0 to 11 month groups

Average family size was 5.5 members

Median age for males was 12 years and for females 14 years

Discussion of Survey Results

The only population groups with high rates of unacceptabl e serum

levels were adults, particularly those over forty years of age. Low hemoglobin levels were present in about twenty percent of the forty and older population. Unacceptable serum vitamin C levels were found in about 18 percent of the same age group. School age children (289) in this area had essentially no unacceptable levels for the blood and urine determinations which were employed in the survey. The good nutritional picture in this age group, as contrasted to findings from the state surveys, may be the result of the school feeding program at the boarding school in Lower Greasewood where many of the children lived and consumed all of their meals.

The only indication of poor nutritional status in the preschool children was a short stature and retarded bone ossification. The mean height was ver ymuch below the mean of the Iowa growth curve, with over sixty percent of the children having heights less than the twenty-fifth percentile of the Iowa growth standard. Head circumference was also smaller, particularly under two years of age where seventeen of twenty-five children had head circumference less than the tenth percentile of the Harvard Standard. Bone development was delayed about twenty percent in females and fourteen percent in males. This is probably related to problems of infectious disease as well as to food, since health records indicate that most young children enter the hospital several times in the first year of life with infections.

Children beyond 5 years of age do not "catch up," but some improvement is evident in bone growth and height with increasing age. The provision of a good diet and medical care are obviously responsible for the good nutritional status of children in the boarding school.

(1) What is most important now to to those of us who are concerned about the effects of hunger and malnutrition on our society is an understanding of the measurable effects of these conditions, not only in terms of human misery, but also in terms of how they affect the strength and vitality of our children and ultimately the strength and vitality of our society.

It is the infants and young children of the poor who suffer the most severe effects of malnutrition. On one level, these children are the victims of the cycle of poverty; the poor child is usually less well educated, therefore less employable, less able to earn an adequate income, and more likely to be poor as an adult.

The poor child is also more susceptible to the cycle of malnutrition and disease. A poorly nourished child will be more likely to become ill than throw off an infection. He will be sicker for a longer time, and his body will be so exhausted from one illness that he will be even less resistant to the next disease to which he is exposed. Many will die. In the 300 Counties where, according to Hunger, U.S.A.,[11] hunger is most critical, the infant mortality is more than twice the national average. The infant who is malnourished is denied the essentials for normal healthy development and therefore faces biological handicaps alien to well fed middle America. His poverty condemns him on one level while his malnourished ~~physical~~ condition prevents him from reaching his physical and mental potential on another level.

[11] Hunger, U.S.A. Washington, D.C. New Community Press, 1968.

(2) Attention was focused until recently mainly on the high mortality of infants and small children with little attention to the retarded growth and performance of those who ~~lived~~ survived. As early as the 1920's experiments with rats began to show that nutritional deficiencies not only retarded growth but affected the central nervous system as well. In recent years, early malnutrition sufficient to impair growth in experimental animals has repeatedly and conclusively demonstrated its effect on their subsequent learning, memory,
12 and adaptive behavior.[12] This has led to the stunning implication that infants and young children whose physical growth is stunted by malnutrition may also be prevented from obtaining their full mental capacity and social development.

The impact of the poverty - hunger cycle on its victims is explored in detail in a new book Disadvantaged Children: Health Nutrition and School Failure,
13 by Birch and Gussow (13). The authors contend, that, altho cultural and social disadvantages can produce both mental and emotional impairment in infants and children, too little emphasis has been placed on biological deprivations. Certain biological hazards are characteristic of poverty and the potential for physical and mental damage ~~begin~~ may begin as early as conception and continue through early childhood: "poor children are not merely born into poverty they are born of poverty and are thus at risk of defective development even before birth".

12 Scrimshaw, Nevin S., Sci. Review of Lit., Mar 16, 1968

13. Birch, Herbert and Gussow, Joan, Disadvantaged Children: Health, Nutrition, School Failure New York, Harcourt, Brace and World 1970

A number of factors increase the potential for biologic insult to the infant in the poverty population. Maternal mortality rates are excessively high in this group. Prematurity rates, which may turn out to be as significant ~~as mortality~~ a barometer of poverty-related malnutrition as mortality rates, are higher among the poor as previously documented. Scientist agree that prematurity can affect the development of a child's intellectual capacity, although the degree of impairment is still open to questions. Birch and Gussow note that "premature children are not only impaired intellectually — whether grossly or subtly; they have also been found by virtually all investigators to be more subject to personality disturbances than children of higher birthweight, a fact not without significance for performance."

They further note: "It is clear that the impact of premature birth on the future ~~of~~ prospects of infants is not limited to the risk of gross defect or to a small reduction in I.Q. scores, but is expressed rather in a constellation of small and large defects, the impact of which is difficult to assess except in terms of society's ultimate goals for these children. If these goals include acceptable levels of achievement at school age, then we must be concerned not only with the small proportion of premature children considered severely handicapped or brain-damaged but with all those children who, vulnerable as a result of circumstances attendant upon their births — come to suffer minor disorders of perception and cognition, an increase in impulsivity or distractability, a delay in the mastery of certain body functions, or any of the handicaps associated with physical impairment."

The authors document those reproductive characteristics which are common within poverty groups and which relate directly to premature births. They list "childbearing begun too early, ~~and~~ repeated ~~to~~ rapidly, and continued to a relatively advanced age". Also they include small size and poor nutritional status of the mother, increased exposure to infection, and little or no prenatal medical care as factors which compromise the infant's potential for normal development.

Yet despite the tremendous potential for biological harm during the formative ~~years~~ and reproductive processes, the infant born into poverty has only begun the battle for a normal healthy development. The environment into which he is thrust poses the greatest threat to his well being. Poor housing, poor sanitation, inferior educational opportunity -- all play a part in sabotaging his growth and achievement. But his most damaging foe is hunger. Again, quoting from Birch and Gussow, -- "...of the factors in a child's postnatal environment which affect his resistance to disease ~~and~~ as well as his growth and functioning the most important is probably nutrition."

What does a lack of proper food do to an infant's brain and mind? The fact that a great many children who fail in school have been exposed to poverty situations and to malnutrition has prompted recent research. An increasing body of evidence points to the relationship between nutrition and the formation of the central nervous system. We know that the human brain reaches almost its full growth before age four years. If the child's protein intake during that period is deficient, it is quite likely that the brain never develops properly. Several qualified

investigators believe that small brain size demonstrated in malnourished children, as well as an increased frequency of abnormal electroencephalograms and impaired visual perception, indicate organic brain damage.[14] Birch and Gussow note that "taken all together these data increase our suspicions that children who have been acutely or chronically malnourished, are retarded in their mental development compared with children who have not experienced malnutrition."

Unfortunately, very few long-term field studies in human learning and behavior have been completed and most have failed to separate adequately the effects of malnutrition from those of other environmental factors. We know that in both experimental animals and in humans, infants which are well fed and genetically normal, but deprived of affection and stimulation may show marked mental impairment. Many kinds of social and psychological deprivation common among malnourished children can exert a direct effect on intellectual performance. Unstimulating home environment, poor educational facilities, isolation resulting from illness, absence of recreational opportunities, and lack of incentive due to repeated discouragement - are examples.

~~A few critical studies have been~~

A few critical studies have been carried out which attempt to separate these various factors from ~~the one~~ that of malnutrition. Dr Joaquin Cravioto[15] and his associates working in Mexico and Guatemala have made the pioneering effort in this field and have been largely responsible for attracting attention to the relationship of nutritional retardation of growth and

14 Scrimshaw, W.S. and Gordon, J.E. (eds) Malnutrition, Cambridge, MIT Press, 1968 pp. 278-289.

15

development with performance on tests of learning and behavior. Dr. Fernando Mönckeberg[16] of the University of Chile reported another similarly critical study. Retardation in physical growth and development in the children they studied was found to depend upon dietary intake and upon the occurrence of infectious disease. It was not related to other factors in the environmental situation which were much the same for all children studied. In their studies they established the fact that short stature and low body weight were directly related to malnutrition at an early age. Repeatedly, in several widely separate population groups, they demonstrated that retardation in height for age relative to the other children in the villages was accompanied by poorer performance on psychological tests which were based on development of interrelation of the separate senses.

16 Scrimshaw & Gordon above

A growing body of evidence indicates that primary learning and the development of adaptive capacity is based on the development of interrelation among the separate senses (intersensory integration). Each of the types of intersensory relationship improve with the age of the child. In Mexico and in Guatemala this was true for both children in the study villages and in middle and upper income families but children in the poor villages clearly lagged in the development of intersensory competence when compared with urban children. Even more significantly, the relationship between poor test performance and smaller size in the rural village did not apply to well nourished urban children. Clearly, where the child is more nearly able to realize his genetic potential for growth, differences in size lose their nutritional and social significance.

There are other circumstances in which the effects of early malnutrition on mental development are firmly established. Certain hereditary diseases induce nutritional

M

deficiency through an inborn error of metabolism. The resulting impairment of brain development is so disasterous that it should dispel any doubt that nutritional deficiency, if early and severe, can have profound and permanently detrimental effects on learning and behavior in children.

We have considered in this discussion two ways in which malnutrition can impair learning and performance. The first is by a direct inhibition of the development and growth of the central nervous system during gestation and in the early months and years of life. The second is by the harm which can be done to the brain by the increased susceptibility to disease, especially infections. The two ways are intimately related.

Child's

There is a third way, perhaps less shocking to the sensibilities but equally relevant. Underfeeding produces hunger, physical discomfort, often lower energy levels, apathy, and irritability. Ability to concentrate may be impaired. Behavior problems as well as failure in school may result. Dr. Robert Coles, child psychiatrist, describes what happens to a child who does not get enough to eat in infancy: "A child learns to trust the mother who feeds him. If a child does not get fed when he is hungry, if he does not get alleviation of his pain when he suffers, he may develop a basic mistrust of adults which in later life is very difficult to correct."[17]

R 17

The implications of that statement are profound: By not feeding children adequately, we may be negating our efforts to educate them and we may be creating problems for the future. Many of these children may grow up distrusting society and in

[17] Coles, Robert, Testimony Before U.S. Senate Subcommittee on Employment, Manpower, and Poverty, Washington D.C. 1967

Conflict with it. They may become psychological cripples. How we feed our youngsters, then, may have a direct bearing on their capacities for social adjustment, on the potential of our society for crime and social disorder, and on the perpetuation of the effects of malnutrition from one generation to the next.

Dr. Milton Senn of Yale University commented on the number of adults we saw in Texas who complained of backache, headache, general aches and pains, and lassitude. He noted that many talked about being chronically depressed and discouraged and interpreted these symptoms as psychosomatic illnesses, directly ascribable to the living ~~conditions~~ and working conditions of the patients. "I conclude" writes Dr. Senn, "that malnutrition and other conditions of health represent intergenerational problems. The degree to which a child is at risk in health and in psychological development must be considered not only in terms of contemporary circumstances ~~but~~ and the details of his own history but also in the context of his parents physical status and their developmental and psychological histories. The relationship is cyclical and intergenerational.

"There is a contagion of the spirit of anxiety and hopelessness from parent to child, as well as a contagion of infectious disease. Malnutrition is not a crisis phenomenon. It is a condition of life; stable, persistant, pervasive, ever endangering the health of scores of people. What we must develop are ~~means of~~ remedial and preventive measures which will affect all facets of health across the generations, in order to assure subsequent generations of being free of the serious ills now overpowering present day members of our society." [18]

[18] Senn, Milton J.E., Yale University, testimony before U.S. Senate Subcommittee on Migratory Labor, July 20, 1970

18

(9.)

19 Recently, Dr. Carlos Krumdiek,[19] from the University of Alabama Medical Center, has added, from a different perspective, substantiation to what Dr. Senn has concluded. He has assembled impressive data to support the hypothesis that malnutrition in rural areas plays a key, causative role in the world wide phenomenon of urban migration and slum formation. According to him, malnutrition is the only factor common to all situations of rural to urban migration and therefore must be considered a major contributor to all of the problems of the urban ghetto as well as of the rural slum. ////////////////

Summation

All of the data we have reviewed here consistently reinforce the refrain that ~~[illegible]~~ children born of and into poverty are malnourished, are more frequently ill from infectious disease, and often develop ~~[illegible]~~ irreparable damage to the central nervous system. ~~And~~, As a result, they are, as adults, slow learners who wind up living lives of poverty and producing children who grow up in a vicious cycle which condemns them to ~~a~~ lifetimes of marginal function. Their lives are characterized by high rates of failure in school[20] ~~followed by~~ accompanied by behavioral disturbances and physical disability, and followed by low levels of employability.

20 The case against poverty and malnutrition and their effects on learning and performance seems clearly established. Although further investigation and final documentation are desirable, the priority of remedial and preventive action can no longer be in dispute. The Bureau of the

19 Krumdiek, Carlos L., The Rural-to-Urban Malnutrition Gradient. J. Amer. Med. Assoc. 215: 1652-1654 Mar 8, 1971.

20 Zacharias, Panel on Educational Research and Development, 1964 quoted in Birch & Gussow

Budget has already estimated that for every dollar we save by failing to eliminate hunger and malnutrition, it costs our nation $3.30 in lost income and productivity by people who are sick or incapable of performing a job adequately (21) If compassion and the desire to restore blighted lives is not enough to move us, perhaps the prospect of a 330% return on our investment should make it easier for our government to decide it can afford to spend some of our tax dollars to end hunger and poverty in America.

There is much that can and should be done immediately. The one most important thing that we can do to lengthen and strengthen the lives of our people, to increase their productivity, to reduce the amount of sickness and death, to remove the hostility and despair which possess so many — is to feed adequately those who do not have enough to eat. None of the existing food programs has proved sufficient to deal with the problem of hunger. There are people who do not have sufficient food or the money to buy it. We need to develop a system to deliver it and I know of no proposal short of an adequate guaranteed income to every person in our country that will accomplish such an objective.

Secondly, we need an effective national health policy for the United States, created perhaps by a Congressional Joint Committee on Health Policy which might piece together the public and private functions now provided or not provided by the fragmented, overlapping, and inadequate "non-system"

21 Reported by U.S. Senate Select Committee on Nutrition and Human Needs.

health care which exists today. We tend to forget that health is a broad social concept, encompassing not only illness but complex interrelationships of genetic, psychological, social, environmental, and pathological factors that affect the individual's ability to perform his life tasks effectively.

The existing medical complex, no matter how it is restructured or paid for, may be irrelevant to the central ~~issue of~~ health issue. The doctor is helpless before ailments that account for most of the sickness and death in America — heart, kidney, blood vessel disease, much cancer, alcohol and drug abuse, accidents, and the ravages of poverty and malnutrition.

In the modern world housing, nutrition, accident prevention, sanitation — clean water, food, streets, and homes — have ~~produced~~ improved health conditions more ~~health~~ than all the hospitals ~~or~~ and doctors combined. Health indices seem much more related to poverty levels within states than to numbers of doctors. A program of national health insurance seems desirable but it may serve to increase the demand and therefore the cost of medical care while doing little to improve either mortality or morbidity statistics — unless we are willing to put more effort into the areas of adequate nutrition, housing, and sanitation, especially among the poor.

Most ~~of~~ existing health programs today do not reach those whose need is greatest, just as the food programs do not feed those who are hungriest. There is one exception — the program of the neighborhood health centers funded by the Office of Health Affairs of the O.E.O. This is the one program designed to deal with health and environment as it must be dealt with. Ways must be

found to strengthen this program, extend it not only to the urban poor but to the rural areas where its kind of approach to health problems is so desperately needed.

Then we can begin immediately to improve the health of children, deliver comprehensive health services, improve the conditions ~~under~~ in which women have children, and offer assistance to women in the limiting of family size. This kind of program deserves the enthusiastic political and financial support of the entire country.

Perhaps we ought to stop studying and talking about the problems of hunger and health and poverty and turn the educational process around — direct it at ourselves, at our society. We need to find out why we do not have the capacity to respond quickly and adequately to hungry children. We need to find out, how, for instance, it was possible for the school board in Linden, Ala.* to make the decision, in August 1970 to announce that low income

* ? Ref.

continued on typed page 13

parents who wanted their children to have free lunches, dental care, medical screening and optical care and to participate in other free federal services must enroll their children at an-all black elementary school. We need to ask how the manager of the Neshoba County hospital in Philadelphia, Mississippi last year could institute a policy of charging black medicare patients a $250 deposit because, as he put it, " the majority of white Medicare patients are able to pay the part of their expenses which Medicare disallows."

I do not mean that we need to investigate the legality of such things. That, I hope, has been done. I mean that we need to look into our hearts. Americans don't really like poor people and have convinced themselves that if a man is poor, it is by his own doing and all that is needed is a little initiative on his part to take advantage of the opportunities and assistance available to him. It is past time to put aside such punitive, moralistic attitudes. Where we have failed to cure a man's ills or to provide him with a marketable skill, society has failed him. We have an obligation to provide him with an adequate subsistence that will permit his children a decent chance in our society. We must make certain that no child in this land will ever again know the pain, the denigration, the loss of opportunity that is the heritage of the poor and the hungry.

The French novelist Camus put it this way: "We cannot prevent this world from being a world in which children suffer, but we can reduce the number of suffering children."

a slight embarrassment, at least in a group, and where I had to make rather calculated efforts to speak with the minister. I was told that there are 5,000 Protestants in Canton, and 105 "church workers" of various kinds, including staff secretaries of the YMCA and YWCA, 34 of them ordained ministers. There are a smaller number of Catholics gathered in five parishes.

As in Peking, it was not possible to obtain any literature published by the churches. "You must go to Shanghai to get that," I was told in both cities. But the YMCA in China has 26 city associations and over 100 staff secretaries – six of them in the Canton association, which has 130 members – and the YWCA is of similar strength. Like all other organizations, the churches and the "Y's" enjoy their niche in the society only on condition that they declare a basic, general loyalty to the Socialist revolution.

Although one quarter of the housing floor space in Canton has been built since 1949, there is still an acute shortage. In the alleyways which we inspected, eight and 10 people were living in single rooms above – sometimes precariously above – their little sidewalk enterprises. All of the enterprises, I was told, are either state-owned or run by cooperatives. I had checked on this a number of times, so when we passed a small boy portioning out tiny piles of peanuts for sale at next to nothing, my interpreter smilingly volunteered the opinion that this was the one capitalist shop we had seen in Canton: "How could we nationalize him? He is here today but he may be gone tomorrow."

These alleyways were veritable theaters of Chinese life, and different from alleyways I had ever seen before, even in Hong Kong and Singapore. They are crowded and they are poor, yet no one is in rags, no one is sitting or lying around in that state of hopeless-looking poverty so familiar in India and some other parts of Asia. The clothing is standardized to an extreme degree, but it is neat and adequate. Everyone seems to have a task – this is one of the most striking things – and consequently no one comes running after you in an ingratiating way to beg something, or even to *sell* something. You are a visitor and you are respected, but you are not besieged and you are not regarded as any special kind of mortal. As I saw it and felt it, the thing that was different was that in the midst of poverty there was nevertheless dignity.

This is the last of four reports.

Apprenticeship Back

The Meritocracy of Labor

by Murray Kempton

The most public life Ernest Green is ever likely to know is now not quite seven years back in his past. He is only 23 now. Ernest Green was the first Negro to be graduated from Central High School in Little Rock, Arkansas. He was for awhile a subject for all the news photos, a thin child with glasses walking through the crowds in the fall of 1957, and then still a thin child in a black robe with his classmates in the spring of 1958, a graduate, thanks to the protection of federal troops.

He was one of 601 seniors at Central High School. Just 14 of them wrote their good wishes in his class yearbook.

"I really admire you, Ernest," the secretary of Central High's student government wrote under her picture. "I doubt if I could have done half so much if our positions were reversed. May you achieve all your goals and they be the best."

The fifties focused on the special Negro, and his story was always inspiriting. Now the sixties are confronted with the ordinary Negro and he has almost no story at all.

Ernest Green departed the South to complete his education at Michigan State University; and few of the strangers who saw him in his singular high school year can have thought much about him since. The other day I went to Brooklyn, from some small curiosity about the ordinary Negro, and came upon Ernest Green.

He has found his goal in the Bedford-Stuyvesant area, which is Brooklyn's Harlem. He spends his days trying to find jobs for young Negroes as plumbers, electricians and carpenters.

It would be too much to say that it is as hard for an ordinary young Negro in New York to be taken on as an apprentice in a skilled trade as it is for an extra-

ordinary young Negro to be admitted to a Southern university. But it would not be a great deal too much to say.

In 1958, the year of Ernest Green's high school graduation, the New York State Commission Against Discrimination made an ethnic survey of the apprentices in the state's construction industry. Apprentice training is the only means of entry into those building crafts which have always been the best general opportunity for comfort and pride available to the young whose education ends with high school. In 1958, the State Commission Against Discrimination estimated that perhaps two percent of New York's 15,000 construction apprentices-in-training were Negroes.

That estimate may have been generous. We have lived since through seven years of numberless protest demonstrations by Negroes and hardly more computable responses in plea and intervention by government. The State Commission Against Discrimination has become the State Commission for Human Rights. For all that has been said, no responsible agency will assert yet that more than two percent of the construction apprentices now in training are Negroes.

The skilled-job market has, of course, always been controlled by a company of trade unions which have been the only medieval institutions in the city, being hierarchic, feudal and frequently consanguine. Apprentices, more often than not, have been connected by blood or friendship with full members of these guilds. The tradition of the job as property to be bequeathed or given away has done as much to bar the Negro as any lively prejudice against his color. There were 3,000 union plumbers in Brooklyn a year ago last August; nine of them were Negroes, none of whom held the "A" membership card and earned the $4.10-an-hour wage which are the rewards for survivors of the apprenticeship stage.

Last spring the State Commission for Human Rights found Local Union 28 of the Sheet Metal Workers Union guilty of discriminating against Negro applicants. Local 28 had and has 3,300 members, none of whom was or is a Negro. Some 26 of the 30 applicants accepted for the local's apprenticeship program in July, 1963, were related to union members. A journeyman fitting the standards of this guild earns up to $6.15 an hour. Under pressure of court orders, Local 28 has agreed to give up selecting its apprentices by family bond and to subject all applicants to an aptitude test supervised by New York University next month.

A chance in the construction crafts is coming then to depend less on favor and more on objective standards. Last year, the Taconic Foundation made a grant to the Workers Defense League to seek out young Negroes to take these tests. The League set up its apprenticeship program headquarters in the most impressive building on its shabby block on Fulton Street. Ray Murphy, holder of the master's degree in clinical psychology, which is so much easier for a Negro than a plumbers union work permit, is its director and Ernest Green is his assistant.

What Poor Schooling Can Do

They have perhaps 150 young Negroes on their rolls as prospective applicants to any apprenticeship class a union opens up. None of them went to schools remotely as good as Central High in Little Rock. They had no chance against the barriers of custom; and now they do not have a greatly improved chance under the test of merit.

Their common problem can be embodied in the case of Arthur Harris, 19, a graduate of Thomas Edison Vocational High School in Queens, where he was selected above all his fellow seniors as laureate in the plumbing award of the ladies auxiliary of the Master Plumbers Association. In April, 1964, Arthur Harris tried to follow the bent indicated for the best plumber in his class by enrolling in the apprenticeship class sponsored by Brooklyn Plumbers Local Number One. Local One did not answer his letter; Ray Murphy intervened and in October the education committee of Local One agreed to let Arthur Harris take its aptitude examination.

The new merit system for neophyte plumbers administered by New York University is not one of rigid intellectual standards. An applicant, to be eligible for apprentice training, need only show himself above the level of the bottom quarter of the average American high school senior class. Arthur Harris could, then, have passed with a score of 100 out of a possible 400. He scored a 63; and, at that, may have done no worse than a majority of the other applicants, all of them white graduates of New York City schools. No more than 20 of the 60 testees seem to have achieved what in essence is a 25 percent passing grade.

Arthur Harris scored *five* out of a possible 100 in the category of "mental alertness"; *seven* out of a possible 100 in mechanical reasoning and *five* out of a possible 100 in numerical ability.

Ray Murphy guesses that a young man who had mastered the elements of the ninth grade would achieve the passing mark on this test. There can be no sensible quarrel with the honesty of the academicians who conducted it. We can only conclude then that the best prospective plumber in a New York City vocational school had been equipped by his teachers to rank less than a point above the *lowest five percent of American high school graduates* in alertness, mechanical capacity and skill with numbers.

Arthur Harris has dropped from sight since this

disaster; Ernest Green is afraid that he has given up. Most of the young Negroes who sit in Bedford Stuyvesant are like Arthur Harris and other graduates of vocational high schools, which means that they belong to a category of persons trained for no vocation at all.

We can assume, however, that if the Taconic Foundation and Ray Murphy and Ernest Green are patient enough, the building trades unions will have to yield their privileges and accept their apprentices on objective merit. But even that surrender is by no means imminent; most of Ray Murphy's day is spent in the continual interventions necessary to persuade or press union officials to give his charges a chance just to take their tests.

There is the case of Emmett Washington, a member of the maintenance division of Local Three of the International Brotherhood of Electrical Workers. In June of 1964, Local Three sent out letters to its members asking if they had any sons who might like to be apprentices to its construction division. Emmett Washington wrote back that he had no son but that he himself was a member of the union still young enough to be an apprentice. He got no answer; Murphy inquired for him and was told that the local had decided not to hold a class this year.

Barricade

"I took one kid down to Local Two of the plumbers union to see a man named Kearns who is secretary of their joint apprenticeship committee," Murphy said. "When we got there Kearns came out and said that Kearns wasn't in. We had to go back again before he'd give him an application. I'm still not sure when he will take a test.

"I took two kids to Local 40 of the iron workers last October and they told us they weren't interviewing applicants unless they were accompanied by two sponsors who were union members. They had promised two years ago that they would no longer require sponsors. I got in touch with the secretary-treasurer and reminded him of some of these things and he called back to say that it had all been a mistake and we should apply again.

"We went back down and while we were waiting, one of the white applicants said we could go in first because his *sponsors* hadn't gotten there yet. Anyway, we were finally able to make an application 10 days ago."

Same as in the South

Still, the tests are coming; the problems that cannot be righted by any pressure at Murphy's command is the condition of the tested. When we think of the ordinary Negro, we recognize that the New York school system has settled into a mold as segregated in class as anything we have deplored in European education. The South, of course, traditionally drew the distinction of race; the academic public high school was for white children; the industrial or vocational school was for Negroes. New York has come unconsciously to a system which, in essentials, ends with the same result.

A child's pattern is set when he is 13 and ready to enter the complex of city high schools. He may, if he can pass its tests, enter an academic high school and hope to go on to a municipal college, where the tuition is still free and open to any high school graduate with an average of 85 in his academic subjects. Short of that, he can try for a technical high school, where the academic standards are also exclusive and where he can learn a trade. Failing all tests, there is no place for him except the vocational school where he learns almost nothing and serves no purpose beyond the requirements of the compulsory school education.

On the bulletin board in Ernest Green's office, there is a clipping from *The New York Times* telling the story of Michael Stewart, the first Negro apprentice to be accepted by Local 40 of the iron workers union. "'His father, Malcolm Stewart, writes technical manuals for Sperry Rand'," Ernest Green read from the *Times*. "Now there's a working class background."

Sheet Metal Workers Local 28 sent out word last week that on February 13, it would conduct its objective test for apprentice applicants as prescribed by court order. Murphy and Green think they might have as many as 60 candidates; Dr. Kenneth Clark has agreed to hold classes for them at the Northside Center for Child Development and do, in the little time remaining, whatever private tutoring can to repair the damage which has been done by public education.

"You know, five of our kids did pass the electricians' apprenticeship tests on Long Island," Ernest Green said. "Of course, three of them were college students. They were over-qualified. Maybe I'll take the sheet metal test myself."

He is the graduate of a Southern high school and a Midwestern university. It does not seem that attainments significantly less impressive will soon give a Negro a chance to work at a skilled trade in New York.

LBJ's School Program

A Revolution in American Education?

by Christopher Jencks

It is too early to be sure, but conversation on Capitol Hill suggests that the Administration's education bills are likely to be enacted with only minor amendments. If so, the result could be a revolution in American education. The proposals for elementary and secondary education are the most far-reaching and radical ever to come from the White House. Instead of simply asking Congress to give the educational establishment more money to continue doing the same things it has done for years, the proposed legislation would attempt to change the ways of that establishment by broadening its political, social and intellectual base. The old feudal pattern of local sovereignty and state regulation, which worked to the disadvantage of the Catholics, the poor and the intellectuals, is at long last to be assaulted. And the assault, instead of being led by political outsiders, will have the fiscal and administrative backing of the federal government.

Like all Johnson proposals, the Elementary and Secondary Education Act of 1965 is being promoted with a highly traditional rhetoric. The authors have even written a provision forbidding federal "direction, supervision or control" over any aspect of education. Nevertheless, anyone who looks carefully at the bill will see that it represents a major indictment of the educational system as managed by state and local boards of education and school superintendents, and that it proposes to remedy many of their failures by substituting the political judgments and academic priorities of the Congress and the US Commissioner of Education.

So far as the President is concerned, the most important failure of the state and local authorities seems to be the combination of incompetence and indifference which has excluded the poor from many of the benefits of public education. This failure is beginning to have serious political consequences. The Democratic Party has since 1929 had the overwhelming support of the blue collar classes. The party's ability to retain this support, and to contain the nascent extremism and violence in this group, has depended in good part on providing schooling which led to jobs and a chance for at least a few to move up in the world. Today the schools are not doing that job, and the explosive consequences are increasingly obvious – especially in the Negro ghettoes. Unemployment and violence threaten to undermine the coalition of ethnic minorities which has been one of the primary sources of Democratic voting strength.

The basic reasons for the school's failure to do what needs to be done for the poor are clear. Education has become largely a competitive sport, valued by the public because it can set their children apart from others and ensure them a larger share of wealth and power. There are only a limited number of places in the "top" colleges and professional schools, and only

Manpower - Apprenticeship - "Outreach"

Week of August 26, 1968

530 APPRENTICE AND JOURNEYMAN PAINTERS
TO BE TRAINED ON THE JOB

WASHINGTON -- Over 300 disadvantaged or jobless youth will train as painter-decorators and paperhangers under a $500,000 on-the-job training contract, Secretary of Labor Willard Wirtz has announced.

A total of 530 persons will be trained -- 320 youths selected mainly from apprenticeship preparation projects, and 210 journeymen who need skills upgrading to forestall layoffs.

The contract was signed with a labor and management committee called the National Joint Painting and Decorating Apprenticeship and Training Committee representing programs in 22 States and the District of Columbia.

The 320 from Apprenticeship Outreach programs, funded by the U.S. Department of Labor in 36 cities, will be given six weeks of pre-job training before beginning 20 weeks of training on the job.

Outreach programs are the cooperative efforts of the Building and Construction Trades Councils, AFL-CIO, and minority civil rights organizations.

The contract will help combat critical skill shortages in the painting and decorating industry. It will provide unemployed and disadvantaged persons a chance to gain skills through apprenticeship. It will also develop and carry out journeyman training programs necessary to offset skill obsolescence in 80-hour courses.

The total Labor Department investment is $496,521. Of this amount, $164,175 is for the cost of on-the-job training, $232,422 is for supplementary classroom instruction, and $99,924 is for training allowances for the apprentices.

The contractor will plan, develop and promote subcontracts with local joint apprenticeship and training committees, local unions and district councils of the Brotherhood of Painters, Decorators and Paperhangers of America. It

(MORE)

will assist these subcontractors in developing training guides, plans and schedules to assure thorough training.

The subcontractor will receive a flat fee of $100 for each trainee who successfully completes the 20 weeks of on-the-job training. On finishing this on-the-job training, the trainee will continue his apprenticeship for an additional 2-1/2 years.

William Duval, director of education for the Brotherhood of Painters, Decorators and Paperhangers of American, AFL-CIO, and Glen Craven, executive director of the Painting and Decorating Contractors of America, will supervise the administrative staff and serve as liaison between the contractor and the Department of Labor.

EMPLOYMENT SERIES

* RECENT DEVELOPMENTS IN APPRENTICESHIP TRAINING

experience report 107

COMMUNITY RELATIONS SERVICE
U. S. CONFERENCE OF MAYORS

INFORMATION CONCERNING A

Career in Carpentry

Sponsored By The

ATLANTA CARPENTERS JOINT APPRENTICESHIP and TRAINING COMMITTEE

1969

18

This is written for those students who will soon be high school graduates but are not planning to attend college and who are looking for an opportunity in the building trades.

I. Basic qualifications for entrance in the Atlanta Carpenters' Joint Apprenticeship and Training Program.

A. Age—17 through 27—if veteran, 32.

B. High school graduate or equivalent. High value is placed on mathematics, shop, the sciences, and the ability to read, spell, write, and speak intelligently. It must be understood that apprenticeship is actually a form of higher education.

C. Successful completion of aptitude test for carpentry.

D. Willingness to work, study, and attend classes.

E. The desire and the ability to maintain proper conduct.

F. Good health and physically fit for the trade.

G. Acceptance by the Joint Committee, composed of three members representing labor and three members representing management.

II. Basic understanding prior to interview.

When young men choose their life's work, it is very important that they make the proper selection. If more than $30,000 in wages during a four year period, is worth serious thought, then consider what actually takes place when an applicant for apprenticeship meets with a good apprenticeship committee.

The applicant is actually saying, "You can see that I am a capable and determined young man. I no longer want to be dependent upon others. I do not know how to earn a good, honest living for myself. I want to make a start where there is a possibility for advancement. I want to learn, and if I am not given guidance from men like you who have experience and understanding, I might never learn to earn a good living for my family.

This matter is serious for the young applicant, for the employers who must pay wages, and the journeymen who must teach him. This understanding is never treated lightly or brushed aside.

The next concern would be the applicant's possibility of acceptance into the apprenticeship program and what should be understood before he signs his apprenticeship agreement.

He may ask, "If I am accepted and secure employment, will journeymen teach me?"

His next question is more impressive since it pertains to money. It could be as follows:

"Will employers pay me $30,000 in wages while I am learning the trade?"

As provided in the apprenticeship agreement, the answer to both questions is "yes".

The applicant may want to know about assurances for gaining proficiency in the craft.

He is assured by the Joint Apprenticeship Committee of fair and just treatment at all times. The committee also emphasizes the fact that classroom attendance, under competent instructors, is required.

Every young man should know that this is a fine opportunity. He cannot become a "delinquent" or a "drop-out". The carpentry industry is in need of good men. The carpentry industry is making ambitious young men good offers and can demand and get the best. Contractors cannot build a sound business or be a part of a respectable community with anyone less than the best. The earlier these facts are made known, the sooner the carpentry industry will be blessed with better applicants for apprenticeship.

III. Everyone considers income

Average annual income for 50 (40 hour) weeks of employment for journeyman carpenters in U. S. Building Trades is $9,800. (1968 Report of Bureau of Labor Statistics, U. S. Department of Labor)

Because of weather conditions, some employment is lost; some time may be lost from the completion of a job to the starting of another job. Some lost time is made up in overtime work during rush seasons.

In the Atlanta area the average yearly income for the apprentice carpenter is approximately $6,000.00.

Apprentice wages for 6 Months Intervals

1st period	$2.93 per hour	Total	$2,930.00
2nd period	$3.21 per hour	Total	$3,210.00
3rd period	$3.41 per hour	Total	$3,410.00
4th period	$3.65 per hour	Total	$3,650.00
5th period	$3.89 per hour	Total	$3,890.00
6th period	$4.13 per hour	Total	$4,130.00
7th period	$4.37 per hour	Total	$4,370.00
8th period	$4.61 per hour	Total	$4,610.00
Full Time Total Income for four year period			$30,200.00

IV. A family consideration

There has never been a time in our history when greater emphasis was placed on college education. Too often, college education is emphasized to the point of belief that anything less is second rate. This attitude is wrong. No one is opposed to any student going to college, but not everyone can become a good doctor, lawyer, engineer, scientist, artist, teacher, preacher, or professional person. NOT EVERYBODY CAN BECOME A SUCCESSFUL BUILDING TRADESMAN, EITHER.

As shown in the actual wage rates in this paper, it is possible for the apprentice carpenter to earn in excess of $30,000 during his four years' term of apprenticeship. During this same period of time, without apprenticeship, a student may spend about $10,000 going to college. This combined earnings and savings add up to more than $40,000 in a four-year period.

Forty-thousand dollars for a period of four years for one member of the family is a sum of money that must be given serious consideration by the average family.

V. How far can an apprentice carpenter go?

A. He can continue working as a journeyman carpenter at an average annual income of $9,800.00, which is an honorable and respectable income.

B. With experience and study, he can become a foreman, estimator, supervisor, or superintendent.

C. He may become an employer, having his own business. Many employers started their careers as apprentices.

D. A man who knows tools, machines, materials, methods, and men can become a good salesman.

E. He may qualify for special work with city, county, state and federal governments.

F. He may specialize in labor-management relations.

G, He may advance to positions of responsibility in his union. There is a great need for excellent union leadership. Union leadership is earned through study, hard work, long hours, experience, service, and a sincere respect for others.

H. Apprenticeship, the carpentry trade, is not a "blind alley" occupation. The apprentice's ability and ambition are the only limiting factors.

VI. There is a proud heritage with apprenticeship.

Apprenticeship is one of the finest opportunities offered to young people. The Atlanta Carpenters' Joint Apprenticeship and Training Program offers you the best possible training.

After you have read and given this consideration, consult your High School counselor.

An apprentice president makes the grade

William Weisz locks in on Motorola's No. 3 spot after 17 months of grooming

"I'm a great believer that in the first months of a job you keep your eyes and ears open and your mouth shut," says Weisz, an expert in communications equipment.

Seventeen months ago, Bill Weisz picked up the phone in his Fort Lauderdale (Fla.) hotel room and got the word that he was to become the next president of Motorola, Inc. The boyish but balding executive recalls with a grin that he "went out and celebrated with a chocolate ice cream soda." The Piper Heidsieck, he adds hastily, came later.

This week, Chicago-based Motorola was breaking out the ice buckets again. After an uncommon apprenticeship of nearly a year and a half, 43-year old William J. Weisz was confirmed as president by Motorola's board. On Oct. 5, he finally assumes the post, under Elmer H. Wavering, 63, the veteran chief operating officer, vice-chairman, and previous president, and Robert W. Galvin, 47, chairman, chief executive, and son of the founder.

Weisz's rung-climbing is not finished. According to the published schedule, he will become the chief operating officer in 1972, when Wavering retires. However, he has already gradually assumed a number of the duties that go with this post. During his on-the-job training as executive vice-president and assistant chief operating officer, he has chaired at least one of Motorola's companywide executive meetings, dealt with regulatory agencies, spoken to the press on the entire spectrum of corporate activities, and taken part in budgetary decisions.

An education. "I'm 100% immersed right now in operational responsibilities," says Weisz. "While my past 17 months was a training and learning period, it was not an 'I-just-wander-around-and-talk-to-everybody' thing."

Weisz did have to do a great deal of homework, because of his relatively narrow business experience. After he was graduated as an electrical engineer from Massachusetts Institute of Technology in 1948, he spent the next 20 years within Motorola's communications group, three years as its general manager and vice-president. This division accounts for roughly a quarter of the company's sales ($873-million in all in 1969) and is the largest maker of two-way radios and allied equipment. The remaining 75% of Motorola's volume, about which Weisz admittedly knew little, comes from semiconductors, consumer electronics, government contracts, computer controls, and automotive products.

As Weisz explains in his clean-cut, brisk manner, "I'm a great believer that in the first months of a job you keep your eyes and ears open and your mouth shut. So I had 15 dinner sessions with all of our key managers to indicate that I didn't know a goddamn thing about their businesses."

He also sat in on decisions at divisional levels and devoured gobs of reports. Having speed-reading ability, and an engineer's thoroughness helped.

Commenting on Weisz's move, Chairman Galvin observes: "I don't consider that the issue was one of having him wait for the presidency. I'd rather say that what we wanted to do was give him an early opportunity to assume the third position in the company. The titles are comparatively incidental."

Still, his advance promotion was a very unusual move that stirred questions in the industry. "I've never seen an announcement that everything would be so cut and dried that far in advance," says an electronics analyst.

Some speculate that the prolonged notice and the salary hike (from $80,000 in 1968 to $137,000 in 1969) were meant to keep Weisz from being tempted by rival job offers. Company memories still rankle over the 1968 defection of executive vice-president and semiconductor chief C. Lester Hogan and a cadre of managers referred to scornfully as "Hogan's Heroes." They all jumped to Fairchild Camera & Instrument Co., Hogan for a pay package that made him a millionaire.

Weisz disputes the contention that he was being "protected" in the aftermath of the Hogan affair, although he concedes, "It probably made us look more closely at our entire management backup." One direct result, he says, was the creation of a president's office, consisting of Galvin, Wavering, Weisz, and Daniel E. Noble, former vice-chairman and chief technical officer, who now heads its science advisory board.

'A natural.' In any case, when they looked around for bright young men, Weisz was at the head of the line. His background was in keeping with the company's pronounced shift from a consumer-products orientation to widely diversified electronics. The old guard at the company, typified by the late founder, Paul V. Galvin, were essentially tinkerers who grew up with crystal sets and instinctively knew how to sell.

John Welty, vice-president and assistant general manager of the semiconductor division, says: "It seems to me that the new president had to come from either semiconductors or communications, because they are now the two largest and fastest-growing divisions. And Bill had more seniority than the current group of managers on the semiconductor side."

He had also proved he was a go-getter; as a divisional manager, Weisz tightened the armlock that Motorola has on the two-way radio business. He spends half his time traveling now, but

when he is at the Franklin Park (Ill.) offices, he is usually behind his desk by 8 a.m. And he mixes well, too—important in a company that is still run very much on a family basis. Wavering, for example, traditionally takes his executive team on fishing trips. Maintaining the same paternal interest in the mass of employees through ample benefits policies, Motorola has remained one of the largest nonunionized companies.

Weisz's interest in the issue of law and order is another quality that appeals to Galvin, an ardent supporter of Barry Goldwater who is active in such conservative groups as the American

Chairman Galvin likes Weisz's interest in law and order, as well as his technical prowess.

Security Council and Americans for Winning the Peace. Under Weisz, the communications group initiated Community Radio Watch, "a public service program to help protect life and property." The program encourages commercial users of two-way radios, such as cabbies, to report through their dispatchers to the police any criminal deeds, accidents, or public nuisances they witness. Among other benefits, Community Watch has further endeared Motorola to police departments and other users of radio equipment.

Philosophy. Communications is the watchword inside Motorola. Following the open-door policy set by the Galvins, Weisz invites all suggestions and comments. He issues "philosophy memos" to Motorolans, quoting such savants as Henry Ford, Machiavelli, and the late Vince Lombardi. Item: "Failure is not falling down; it is failing to get back up— quickly!"

A Motorola man through and through, Weisz would probably not have considered leaving even if he had not been made president in advance. Every day, he can be found in the company cafeteria, with the rest of the brass, sitting in shirtsleeves with a pocket pager strapped to his hip. "It's the only place to eat around here," he says as he starts for the lunchroom. "But I'd go there anyway." ■

CB-GB14

Big cat cracker for extra big production

Heart of Texaco's giant new 1,500 acre refinery at Convent, Louisiana is this fluid catalytic cracking unit, one of the largest ever built in the United States. It's the key unit of a refinery designed to help fuel half the nation. • The fabrication and construction of this complex mountain of steel was CB&I's responsibility, under contract from Bechtel Corporation, general contractor of the refinery. CB&I's contract also included 33 storage vessels ranging in size from 51-ft. dia. to 210-ft. dia. • All told, a large, diversified job in big steel structures. • Building big in steel has long been the order of the day at CB&I. When industry thinks big in steel, CB&I is tuned in — prepared to take full responsibility almost anywhere in the world. • Chicago Bridge & Iron Company, Oak Brook, Illinois 60521. Offices and subsidiaries throughout the world.

Chicago Bridge & Iron Company CB&I

Serving the fields of Natural Gas, Nuclear Power, Aerospace, Petroleum, Chemistry, Cryogenics, Hydroelectric Power, Water Storage, Municipal and Industrial Water and Wastes Treatment.

* * * Mgt Bldg Trades

ELECTRICAL WORKERS UNION and the Labor Department move close to agreement on a contract to establish a new, fast training program for older minority-group workers with previous construction experience. The department also holds preliminary talks with the Iron Workers. The Plumbers Union agreed in January to set up such a program.

* * * Minimum Wage

FEDERAL PROTECTION for minimum-wage investigators would be provided under a proposed Labor Department bill. The measure would make it a Federal crime to attack or in any way interfere with agents enforcing the wage-floor law. The department reports that attacks by irate employers on its investigators are increasing.

* * *

CONFLICT OF INTEREST: The NLRB rules that a medical clinic run by a board of directors composed of United Mine Workers officials engaged in an unfair labor practice. Successful efforts by the clinic's administrators to get its employes to switch to the UMW as their bargaining agent involved a "conflict of interest," the NLRB holds.

* * *

UTILITIES LAG in their hiring of minorities, the Equal Employment Opportunity Commission charges. Its checks of 65 gas and electric utilities show that the average increase in minority employment between 1966 and 1969 was only 0.6%. The EEOC warns that its "patience with the inaction . . . is running short."

* * *

UNCLE SAM CONSIDERS creating a special corps of top Federal executives.

To make inter-agency transfers of key officials easier, the Civil Service Commission proposes abolishing individual job classifications for 7,000 executives in the upper Civil Service grades. They'd be lumped together in what's tentatively dubbed the "executive manpower group." Final commission action on the proposal is expected within 30 days, officials say.

The designation of certain posts for career officials and others for political appointees would be eliminated. Instead, the plan would require only that a three-to-one ratio of career to noncareer officials be maintained within the new group. Officials in the group would work under five-year contracts, which would be renewable on a year-to-year basis by the agency involved.

Under the proposal, the executives could be paid any amount from $25,000 to $33,500 as long as their agency maintained a specified "average salary level."

* * *

THE CHECKOFF: Mrs. Nixon invites the wives of officials of the AFL-CIO Building and Construction Trades Department to tea this afternoon. . . . U.S. Steel boasts that its rate of disabling injuries to workers during 1969 was less than one-tenth of the average for all industry and equivalent to one disabling injury for every 830 man-years worked. . . . The Fire Fighters Union raps what it terms the Administration's "shameful delay" in implementing key provisions of the Fire Research and Safety Act of 1968.

Wall Street Journal 3-24-70

MANPOWER CHIEF pushes state employment agencies to add Negro staffers.

Arnold Weber, Assistant Labor Secretary for manpower, unveils a new policy for Federally financed state employment services. It's designed to spur them to employ "such numbers" of minority group workers "as will assure" effective service to the black community. Specific guidelines for implementation will be issued in a few weeks.

The policy is part of a Federal drive to get the employment service to work harder at placing the hardcore unemployed. The staff of a state employment agency, Weber says, "must be a model of equal opportunity to the residents of the community it serves." About 14% of the 63,000 employment service staffers are from minority groups. But many offices, particularly in the South, have no blacks.

Recent court decisions could open the way to withholding Federal funds from a single office that discriminates—rather than having to stop funds for the entire state agency.

* * *

JUNIOR COLLEGE GRADS find fewer jobs available as the economy slows.

Like their counterparts at four-year schools, the junior college students aren't being pursued as hard by corporate recruiters these days. In St. Louis, Meramec Community College reports eight of 20 companies that signed up for interviews have canceled. At Boston's Bryant & Stratton College, only about 35 companies will be recruiting this year compared with 60 a year ago. El Camino College in Torrance, Calif., says its placement service has been able to locate only five full-time "career" jobs since January.

The slump touches a wide range of fields, including aerospace, electronics, drafting, technical illustrating and computers. Los Angeles City College finds offers from aerospace firms almost nonexistent and detects a "downward trend" in other areas, too. Yet demand continues strong for accountants and secretaries in many places.

Technical schools in New York turning out printers, auto mechanics and medical assistants report strong demand for grads.

* * *

UNEMPLOYMENT RATE for March will be announced at least three days later than scheduled. Originally set for April 7, it won't be out before the 10th. The postal strike has delayed the arrival of reports from local information-collecting points.

* * *

BEACHCOMBING: National Cash Register carries its campus recruiting slogan to Ft. Lauderdale and Hollywood, Fla., where hordes of college kids gather for annual spring rites. The company hires a plane to haul a sign over the beach and hotel area that proclaims: "NCR means computers—computers means exciting jobs."

* * *

MEANY'S PINCH HITTER, AFL-CIO secretary-treasurer Lane Kirkland, gets a hard workout. With Meany having trouble shaking a heavy cold, Kirkland's delivered three major speeches in recent days—on international trade policy, the nomination of Carswell to the Supreme Court, and labor's drive for national health insurance.

* * *

JOB-BIAS FIGHTERS plan their first public hearings in the South. The Equal Employment Opportunity Commission will hold hearings in Houston in early June. They will focus on the employment problems of minority groups and women uncovered by EEOC surveys.

* * *

MINE SAFETY LAW may help ease the nagging shortage of coal miners.

Some top coal company executives figure the new regulations that go into effect tomorrow ought to relieve the scarcity of miners, which they blame on the industry's "poor image." "The new law should help improve that image," predicts John Corcoran, president of Consolidation Coal Co.

Meanwhile, many companies expand their recruiting efforts. North American Coal Corp. doubles the size of its personnel department and launches a company-sponsored school to train badly needed supervisors. Eastern Associated Coal Corp. concentrates on wooing high school graduates in mining areas. Because opening new mines would compel some companies to take skilled workers away from existing locations, mine expansion could suffer.

Federal efforts to hire the 1,000 inspectors needed to enforce the tougher new law further deplete the supervisory ranks at some companies.

* * *

THE CHECKOFF: The Brotherhood of Locomotive Engineers bestows an honorary membership on country singer Johnny Cash, noting that many of his songs reflect "an obvious affection for railroads and the men who work on them." . . . An outside arbitrator awards professional and technical staffers at the AFL-CIO an 11% pay raise over the life of a new 15-month contract. . . . The Marine Engineers Union plans to expand its organizing efforts outside the maritime industry, with special emphasis on professionals, scientists, nonmarine engineers and banking employes.

Wall Street Journal 3-31-70

SUBJECT: MANPOWER PROGRAMS

IN

ATLANTA, GEORGIA

Programs under the auspices
of the Economic Opportunity
Atlanta, Inc.

ECONOMIC OPPORTUNITY ATLANTA (EOA)

PURPOSE: To provide employment and placement for low income individuals within the five target areas of Atlanta and surrounding cities.

SERVICE: A Georgia State Employment Service representative is placed in the EOA Neighborhood Service Centers to counsel and test individuals for employment. There is a manpower director in each service center to help with placement. Recruitment for other agencies is done through the service center such as ACEP, New Careers, Job Corps, Neighborhood Youth Corps, Job Training programs and others.

Funds: Georgia Department of Labor, United States Department of Labor and the Office of Economic Opportunity.

Mr. T. M. (Jim) Parham, Jr., Executive Director
101 Marietta Street, N. W.
Atlanta, Georgia

ATLANTA CONCENTRATED EMPLOYMENT PROGRAM
101 Marietta Street, N. W.
Atlanta, Georgia 30303
~~523-1963~~
Mr. C. Rodgers, Acting Director

PURPOSE: To help up-grade job opportunities and skill for unemployable persons in the low-income category.

DESCRIPTION: The enrollees are recruited from the neighborhood service centers in the target areas: Pittsburgh, Price, Nash-Washington, Summerhill and West End. They are referred to the Atlanta Employment and Service Centers for intensive psychological, social and physical evaluations, for 2 - 3 weeks. After evaluation the enrollees receive 2 weeks of basic orientation and 6 weeks of pre-vocational training at the ACEP Institute Training Center. The enrollees may be placed in the following ACEP components:

1. Institutional Skills Training
2. New Careers Program
3. Special Impact
4. Neighborhood Youth Corps
5. Direct Job Placements
6. Other non-ACEP Programs

The enrollees also receive stipends for the number of dependents in the family during the training period.

ACTION: The ACEP Program as a quoter of 1,260 from September of 1968 til August of 1969. 60% of the enrollees are women and 40% are men, 70% are young men from 16-21.

FUNDS: United States Department of Labor and Georgia State Department. 3.5 Million dollars program.

NEW CAREERS
101 Marietta Street, N. W.
Atlanta, Georgia
688-5140
Mrs. Francis Luysdin, Director

PURPOSE: To provide working-training experience for unemployed or low-income adults for entry level positions in non-professional occupational careers with advancement.

DESCRIPTION: New Careers is a component of ACEP and it recruits from the ACEP centers. The major objective of the program is to contribute to and facilitate the process of designing and creating new career jobs in public service. The program opens up career lines by setting up realistic entry level requirements and by making possible structured advancement to better paying and more responsible jobs.

Programs and Skills

1. Educational Program (work-training through an established accredited institution.)

2. Counseling and Guidance (vocational aspect of counseling and guidance.)

3. Nursery's Aid

4. Teacher's Aid

5. Health Education Aid

6. On-The-Job-Training

ACTION: 150 enrollees.

FUNDS: U. S. Department of Labor

INSTITUTIONAL TRAINING PROGRAM
MANPOWER TRAINING CENTER
111 Ivey Street, N. E.
Atlanta, Georgia
Mr. B. G. Jackson, Director
523-6023

PURPOSE: To provide needed training, retraining, and basic educational courses for persons referred for training by the local offices of the Georgia State Employment Office or the ACEP Program or agencies representing the Department of Labor.

DESCRIPTION: The Manpower Development Act is designed to deal with the problems of workers facing job displacement and the special problems of the hard-to-employ. The Act is jointly administered by the Secretary of Labor and Secretary of Health, Education and Welfare. The responsibility of the Secretary of Labor is to identify the need for training, eligibility for the payment, training benefits and placing on jobs after training. The Secretary of Health, Education and Welfare provides Training Through State education or through other arrangements for the training of persons referred by the Secretary of Labor.

ACTION: Trainees receive stipends up to $50.00 a week depending upon family income and the number of dependents or heads of household. They receive medical services up to $1.00 per person.

Quota	600	
Students	180	
Drop-outs	11%	
Graduate	58	(4 weeks of training)
Placement	38	
Faculty members	33	
General Education Test	10	(10 passed out of 11)

* 15 Students in each class; one white student
** Georgia State Department of Labor
*** Employees of the Atlanta School System (6 whites and 10 Blacks)
**** $6.00 fee is paid by the Department of Labor. (Personnel and counselor. 5 counselors - 2 whites, 3 Blacks.)

Skills

1. Automotive Mechanics - 48 weeks
2. Alteration and Repair
3. Building Maintenance Man - 10 weeks

5. Clerk, general office - 21 weeks
6. Cook, Hotel and Resturant - 18 weeks
7. Shipping and receiving Clerk - 18 weeks
8. Welding - 20 weeks

FUNDS: U. S. Department of Labor
Prime Contractor: EOA, Economic Opportunity Atlanta
Subcontractor: Atlanta Board of Education and
Georgia State Department of Education

INTERNAL STRUCTURE OF THE MANPOWER DEVELOPMENT CENTER

ATLANTA AREA TECHNICAL SCHOOL
1560 Stewart Avenue, S. W.
Atlanta, Georgia 30310
758-9451
Robert A. Ferguson, Director

PURPOSE: The purpose of the Atlanta Area Technical School is to prepare students for useful and gainful employment in occupations that do not normally require a four-year college degree. These occupational areas include the engineering technician, skilled business, office and health occupations. The total curriculum offered at the school was established on the basis of training needs of business and industry in the metropolitan Atlanta area, plus indicated student interest in the area of instruction.

Objectives:

1. To increase the individuals potential through planned instructional activities by using all the modern techniques of teaching that produce the best motivation for learning.

2. To equip every individual with the productive capacity to attain his economic, social and intellectual goals in our society.

In - Plant Training:

1. Atlanta Area Tech's Department of Industrial and Business Service enhances the pre-employment training of the school by assisting local industry and business with their continual problems of upgrading the skills and knowledge of their personnel.

2. The school Industrial Training Coordinators consult with the company in an effort to help them identify their training needs and develops appropriate courses. The coordinators also secure qualified instructors and administer the class to assure quality results.

3. Any organization private or public that has as many as fifteen employees who need training in a particular area can get assistance from our coordinators.

4. There is no cost to companies for the service of the coordinators or the instructors. A modest registration fee is charged for the student's instructional supplies and incidentals.

Learning, Earning and Educational Program:
(L E E P)

1. This program is designed to provide those students who want to prepare for a job but don't qualify for any of the school's regular programs because:

    a. They do not meet the basic education requirements, for their vocational choice.

    b. They are uncertain as to what vocational endeavor would be best for them.

    c. They cannot or do not want to spend over one quarter in preparing for a job.

FUNDS:

Vocational Division of the State Department of Education.

GEORGIA STATE EMPLOYMENT SERVICE AND EMPLOYMENT SECURITY

AGENCY --- GEORGIA DEPARTMENT OF LABOR

AND

GOODWILL INDUSTRIES OF ATLANTA

DEFENSE MANPOWER FORCE PROGRAM
101 Marietta Street, N. W.
Atlanta, Georgia
688-9491
Mr. Rubin G. Geeslin, Director

PURPOSE: To help provide jobs for hard-core persons with companies under government contract.

DESCRIPTION: This program is centered around companies that have government contracts or negotiating for government contracts, agree to hire 50% of their labor force from the hard core area.

ACTION: Only one company is participating in this program.

funds: U.S. Department of Labor

YOUTH OPPORTUNITY CENTER
Georgia Department of Labor Employment Security Agency
522 West Peachtree Street, N. W.
Atlanta, Georgia 30308
875-0971
Mr. Forrest Humphries, Director

PURPOSE: To increase employability of young people, ages 16-21.

DESCRIPTION: Testing, counseling, job referrals, job development, job training in relation to current labor needs. A remedial educational program is designed to help young persons who did not complete high school. The training program lasts from 12 weeks to one year. Recruitment is handled through the neighborhood service centers. Referrals are made to other manpower programs depending on individual interest.

ACTION: The monthly quota is 300.

FUNDS: U. S. Department of Labor.

JOB CORPS FOR MEN
101 Marietta Street
Room 313
Atlanta, Georgia 30303
577-2855
MR. HUBERT MURRAY, DIRECTOR.

PURPOSE: To provide disadvantaged young men with an opportunity to acquire skills and attitudes needed to become useful and productive members of the community.

DESCRIPTION: Job training for out-of-school boys aged 16-21, who come from low-income families whose earnings does not exceed $3,500. Each applicant is screened and tested before leaving for a Job Corps Center. An applicant has to wait for a period of two weeks before leaving for a center. The centers are located throughout the country on government land or on college campuses. The boys receive stipends of $30.00 a month for living allowances and $50.00 a month goes into a savings fund which the boy receives at the end of the training program. Recruitment is handled by neighborhood service centers and field recruiters. The recruiters are given a quota of five boys per week.

ACTION: 2,012 boys have been sent to Job Corps centers in last two years throughout the country. 301 have been processed and waiting for assignment. 297 boys have graduated from different centers.

GATE HOUSE
522 West Peachtree
Atlanta, Georgia
876-4331
Mr. Ernest Phibbs, Director

PURPOSE: To help Job Corps returnees with job placement in the area they were trained.

DESCRIPTION: Gate House is a program that acts as a go-between for Job Corps returnees and the business community. They may refer the individual to different agencies under the direction of EOA or the employment office. This program is related to the YOUTH OPPORTUNITY CENTER.

ACTION: They have placed roughly 200 persons on jobs.

FUNDS: U. S. Department of Labor

NEIGHBORHOOD YOUTH CORPS (IN SCHOOL)
101 Marietta Street, N. W.
Room 213
Atlanta, Georgia 30303
524-7886
Mr. Eugene B. Wimby, Director

PURPOSE: To provide work experience and to help develop good work habits to enable young person to find suitable jobs after high school graduation.

DESCRIPTION: The youth are screened, interviewed, counseled within the high school by the principal or counselor. During the school year they will earn $1.25 per hour for 10 hours a week, summer $1.40 per hour for 25 hours a week.

ACTION: 665 for the school year 1968-69 and 1,292 for the summer of 1968.

FUNDS: U. S. Department of Labor

NEIGHBORHOOD YOUTH CORPS (OUT OF SCHOOL)
101 Marietta Street, N. W.
Atlanta, Georgia 30303
688-6232
Mr. Charles Pearson

PURPOSE: To help out-of-school unemployed youth to develop good work habits, ages 16-21.

DESCRIPTION: This program provides on the job training in non-profit organizations. The training usually lasts for two years. The youth earns $1.40 an hour for 32 hours per week. The neighborhood service center does the counseling and placement. Recruitment is handled through the neighborhood service centers in-take counselors.

ACTION: 440 positions are opened, 4,033 have participated in this program over the last three years.

FUNDS: U. S. Department of Labor

NATIONAL ALLIANCE OF BUSINESSMEN
415 Candler Building
125 Peachtree Street
Atlanta, Georgia 30303
Mr. Henry Reed, Executive Secretary
Mr. Bradley Currey, Metro Director

PURPOSE: The task of the National Alliance of Businessmen is to encourage private companies to put 100,000 men and women to work by June 1969, and 500,000 by June of 1971. The alliance will also work this summer to provide 200,000 jobs for youth in order to give them some working experience.

DESCRIPTION: NAB is an organization whose purpose is to mediate between the unemployed and industries. The company agrees to hire a certain number of persons from the hard-core area in a given year. Recruitment and placement is done mainly by the ACEP, and other agencies. NAB also has a sensitivity training session for supervisors or personnel manager who may have certain bias attitudes. The training sessions consist of role playing and role taking.

ACTION: 200 companies have 2,753 jobs for the year 1968-69. The total placement has been 4,397 over a year period. 1,637 have terminated and 2,767 are presently on the job.

FUNDS: This is a non-profit organization and work is done on a volunteer basis.

(NAB cont'd.)

MANPOWER DEVELOPMENT TRAINING PROGRAM
215 Candler Building
125 Peachtree Street
Atlanta, Georgia 30303
Mr. Garner, Director (Georgia State Employment Security)

PURPOSE: To provide training skills for hard-core persons entering into a company.

DESCRIPTION: This program is designed to help companies with training programs for hard-core persons at the expense of the government. The company is reimbursed for training cost for a certain number of individuals.

ACTION: Presently there are 14 companies participating in this program and 63% of the people on jobs are in training.

GEORGIA STATE EMPLOYMENT SERVICE
EMPLOYMENT SECURITY AGENCY
GEORGIA DEPARTMENT OF LABOR
254 Washington Street, S. W. State Labor Building
Atlanta, Georgia 30334

Travis Stewart - Georgia State Employment Service
Walter O. Brooks - Employment Security Agency
Sam Caldwell - Commissioner of Labor

Refer to listings below for addresses and phone numbers of specific services.

PURPOSE: To bring together the qualified applicant and the employer; to administer the Job Insurance function.

SERVICES: Interviewing; aptitude testing; counseling; selection; referral to job training or other agencies; administering the Job Insurance program. A counselor is assigned to each Neighborhood Service Center of Economic Opportunity Atlanta

AREA SERVED: State of Georgia

Located strategically throughout the five county Atlanta Metropolitan Area are five Georgia State Employment Service Offices which serve the Atlanta Area. Although the offices differ little in their basic function, several are unique in the type of applicant served:

PROFESSIONAL-CLERICAL-SALES OFFICE - 161 Peachtree Street, N. E., Atlanta, Georgia 30303, Phone Number: 688-9050. Specializes in services to employer and workers in the professional, clerical and sales field.

METROPOLITAN MANPOWER CENTER - 1 Peachtree Street. Specializes in services to employers and unskilled, semi-skilled, and skilled workers in the services and industrial fields. In-depth counseling and special placement assistance is provided to adults who need this type service. The Center also houses the Atlanta Area Staff and the Employer Relations Representative Unit.

EMPLOYMENT SERVICE/VOCATIONAL REHABILITATION PILOT PROJECT: A joint project housed in the Metropolitan Manpower Center to furnish extensive service to applicants with explicit handicaps.

EAST POINT OFFICE - 1737 West Washington Avenue, East Point, Georgia, 30044, Phone number - 766-1471. A full functioning office serving all applicants in Clayton and Fayette Counties and the southern portion of Fulton County.

MARIETTA OFFICE - 61 Fairground Street, N. E., Marietta, Georgia 30060, Phone number - 482-0492. A full functioning office serving all applicants in its tri-county area: Cobb, Cherokee and Douglas.

BONDING DEMONSTRATION PROGRAM - A Georgia Department of Labor Program to furnish bonding for qualified workers who cannot secure employment in their field of work due to arrest, imprisonment, bad credit, or other records which made them ineligible for commercial bond coverage.

LABOR MOBILITY DEMONSTRATION PROGRAM - A Georgia Department of Labor program to financially assist workers on relocation of other jobs. This includes persons in the following categories: handicapped workers, those involved in mass layoffs, returning servicemen, Job Corps trainees, long-term unemployed, and workers displaced by technological changes in both agricultural and non-agricultural occupations, individuals who have completed MDTA training and have been unsuccessful in obtaining employment locally and individuals who have work experience under Title V and for whom there are no local job opportunities.

STATE PRISON RELEASE PROGRAM - This program initiated by the Georgia Department of Labor is a joint endeavor undertaken by the Department of Labor, State Board of Corrections and State Board of Pardon and Parole designed to provide special assistance to releases and parolees in entering or re-entering the labor market. This program is directed toward developing a segment of the State's manpower which has formerly been neglected through counseling, testing and individual interviewing initiated by a task force at the prison release site prior to the inmates release. The prisoner is then, upon release, referred to the Releasee Program Representative in the local office nearest his home residence.

SELECTIVE SERVICE REJECTEE PROGRAM - A service provided by the Georgia State Employment Service at Georgia's only Army Induction Center to aid Selective Service Inductees who have failed to pass the Army Classification Battery or are physically disqualified by explaining the available services of the Employment Service and referring the individuals to the appropriate Employment Service Office.

THE MANPOWER DEVELOPMENT AND TRAINING ACT - A program to provide occupational training through the various State Employment agencies for "those unemployed and underemployed persons who cannot reasonably be expected to obtain appropriate full-time employment without training.

Training under this Act is designed to provide workers with new skills where needed, to upgrade their present skills, and to meet the job needs of workers displaced by automation and technological change.

JOINT APPRENTICESHIP PROGRAM - This program is a cooperative program with the joint apprenticeship committees of several skilled trades. The Employment Service provides the screening and general aptitude testing required under an agreement established between the Employment Service and these committees.

ATLANTA URBAN LEAGUE
LABOR EDUCATION ADVANCEMENT PROGRAM (LEAP)
243 Auburn Avenue, N. E.
Room 400
Atlanta, Georgia 30303
522-8839
Mr. Lloyd Smith, Director

PURPOSE: LEAP is an apprenticeship program to help young men age 16 and up to learn trades in areas that are not traditionally held by Blacks.

DESCRIPTION: The enrollees in this program are recruited from ACEP, neighborhood service centers, and other agencies. In some cases, it has become necessary for enrollees to be tutored in reading in order to take an examination. The trades range from electronic to printing.

ACTION: 65 boys are in the program. 63 boys are being tutored for training and taking tests. 62 are working and being trained in the apprenticeship program.

FUNDS: U. S. Department of Labor

ATLANTA URBAN LEAGUE
Mr. Lyndon A. Wade, ACSW, Executive Director

Mr. Westergard, Director
LABOR EDUCATIONAL ADVANCEMENT
PROGRAM - Mr. Lloyd Smith, Director
MANPOWER DEVELOPMENT AND TRAINING ACT 44
(OJT)
Mrs. Delara, Director

GOODWILL INDUSTRIES OF ATLANTA, INC.
15-17 Courtland Street, N. E.
Atlanta, Georgia 30303 688-1220

Stephen G. Youngblood, Director

PURPOSE: To provide work adjustment, work training and employment for the handicapped; to work with the public schools in helping slow learners; to try new methods of serving the handicapped and those who have poor educational and intellectual development, poor social adjustment(includes juvenile deliquency), inadequate income, and problems in discrimination and problems of community relations.

DESCRIPTION: Work evaluation by standardized tests; psychological testing where needed; job placement; sheltered employment; counseling services, both group and individual, by ministers, psychologists and vocational counselors; follow-up on placement; some recreational activities provided, as well as vocational guidance; recreational activities and chapel optional.

Training of 4 weeks to 6 months depending on individual.

Capacity of about 500 yearly.

FINANCIAL ASSISTANCE WHILE IN TRAINING: Vocational Rehabilitation pays $100 for full-time trainee and $50 for part-time trainee eligible for VR services. Both receive separate allotment for lunch, transportation. Trainee receives portion of fees, depending on individual productivity. Training and assistance not limited to those ineligible for VR, for whom no fee is charged.

ELIGIBILITY REQUIREMENTS: Ages 14 and over. There must be an identifiable handicap---physical, mental or social; medical or psychological examination may be required. Should meet state Vocational Rehabilitation requirements; 60 days residence is required under normal circumstances, can be waivered.

AREA SERVED: Metropolitan Atlanta area; also individual cases from other parts of the State.

APPLICATION PROCEDURE: Contact Rehabilitation Director or Personnel Director at 15-17 Courtland Street, Monday through Friday, 8:30 a.m. to 4:30 p.m. or through Department of Labor or any other referring agency.

Referring agencies should send all medical data available.

GOODWILL INDUSTRIES OF ATLANTA, INC. (Cont'd.)

RECRUITMENT PROGRAM: Referrals from office of Vocational Rehabilitation, Department of Labor or other agency; also walk-in applicants.

SOURCE OF FUNDS: Fees from Vocational Rehabilitation; sale of reprocessed items, United Appeal; Government grants.

AUSPICES: Voluntary

NATIONAL ASSOCIATION OF MANUFACTURERS
URBAN AFFAIRS DIVISION
1412 Peachtree Street, N. E.
Atlanta, Georgia 30309 892-0530

Mr. Sam M. Booth, Director

PURPOSE: To establish programs to upgrade the hard core unemployed segment in our society in the fields of basic education, employment, housing, transportation and economic development.

DESCRIPTION: Counsel with our membership and other interested persons in community affairs as related to the hard core unemployed; supply these parties with action reports of successful programs in the above fields that have been conducted throughout the United States; assist in finding methods whereby these needs might be met in each community and industry as they see the need existing.

This is normally done by working with corporations and organizations in setting up a program to work with an individual to bring him up to job entry level so that he will become a productive employee, earning a good living for himself, and in most cases removing him from the hard core unemployed relief roles. Through a period of time, this enables him to accept his proper role as a citizen.

ACTION: Southern Division - 12 Southern states.

Interested corporations, organizations and individuals contact Sam M. Booth, 1421 Peachtree Street, N. E.

Through letter contact with our member companies and through public press releases.

SOURCE OF FUNDS: All programs are financed in their entirety by the individual, industry, company or community implementing the program on a free enterprise basis.

Sir:

We would like to receive one copy of each of the following two of your publications to use in our Manpower and Economic Education research and program development and for placement in our Center library;

Black Youth in a Southern Metropolis

Study about the South published by Reese Cleghorn, Associate Editor of the Atlanta Journal, under the auspices jointly of the American Jewish Committee and the Southern Regional Council

Enclosed are two publications which I thought would be of interest to you about the Manpower and Economic Education program. We are developing this program here in the state of Arkansas and we believe that it has potential for use throughout the South as well as the rest of the nation. If you are interested in further information or other assistance about this program, please contact me.

Could we be placed on your mailing list to receive copies of your forthcoming publications?

Thank you for the prompt response we have received to our previous requests for materials from the Council.

Sincerely,

Phillip E. Powell

RE: REQUEST FROM CBS NES

Last week, Joan Burke of CBS news called and wanted to locate some 2500 taped interviews. The interviews were with civil rights leaders during the height of the civil rights movement is the '60s. CBS is going to do a special on the civil rights movement of the 60s or something like that. And I think they are trying to compile a resources list.

After making about 2,500 phone calls, I traced the tapes and material to an organization called the Civil Rights Documentary Project. The director of the project is Dr. Vincent Browne. Dr. Browne informed me that they are in the process of getting a bibliography out on the tapes. They do plan to do something with the material, but since it is so much they don't really know where to start. The bibliography on the tapes will go to the printers next week and SRC will get a copy as soon as it is ready.

Dr. Brown said they would welcome calls from anyone who wanted information from them concerning the tapes. His phone number is (202) 636-6974.

Lucy said maybe there's a story here for historians and researchers, at least a note in South Today.

Asked CBS for their list of resources when it was completed.

FOR RELEASE: P.M. Editions, Friday, March 7, 1969,
or thereafter

SOUTHEASTERN BUILDING TRADES WAGE SCALES CONTINUE UPWARD TREND

Union hourly wage scales for building trades workers in the Southeast averaged $4.26 an hour on January 2, 1969, according to Brunswick A. Bagdon, Southeastern Regional Director of the U.S. Department of Labor's Bureau of Labor Statistics. Nationally, all trades averaged $5.27 an hour.

The all-trades average in the Southeast rose 0.8 percent over the quarter and 5.4 percent over the year. Building laborers received the largest percentage increases - 2.4 percent for the quarter and 12.4 percent for the year.

For all trades, quarterly cents-per-hour increases averaged 3.4 cents and varied from 1.1 cents an hour for painters to 6.7 cents for plasterers. On an average, the quarterly increase for bricklayers was 1.8 cents an hour; carpenters 3.8 cents; plumbers 4.4 cents; and building laborers 6.4 cents.

Among the six journeymen crafts, plumbers had the highest average scale as of January 2, 1969 - $5.16 an hour. Their basic scale varied from $4.45 an hour in Columbia, South Carolina to $6.50 in Mobile, Alabama. For the other journeymen trades, regional average hourly scales were: painters, $4.22; plasters and carpenters, $4.48; bricklayers, $4.96; and electricians, $5.05. Building laborers' scales averaged $2.68 an hour.

Among the fifteen Southeastern cities included in the quarterly survey, rates for all trades were highest in Mobile.

- MORE -

Changes in union scales over the quarter and the year and the rate levels on January 2, 1969 are shown below. In computing the changes in rates, the increases in each trade were averaged among all workers in the trade, whether or not they received raises. Data for the separate crafts, by city, are shown on the accompanying table.

Trade	Change in Average to January 2, 1969 From				Average Rate	
	October 1, 1968		January 2, 1968		January 2, 1969	
	Percent	Cents	Percent	Cents	Average	Range
Bricklayers 1/ ..	0.4	1.8	3.9	18.7	$ 4.96	$4.25 - 5.91
Carpenters	0.9	3.8	5.6	23.7	4.48	3.70 - 5.44
Electricians	-	-	6.4	30.4	5.05	4.15 - 6.40
Painters 1/	0.3	1.1	5.6	22.4	4.22	3.25 - 5.34
Plasterers	1.5	6.7	3.3	14.4	4.48	2.75 - 5.76
Plumbers	0.9	4.4	6.7	32.6	5.16	4.45 - 6.50
Building Laborers	2.4	6.4	12.4	29.6	2.68	1.95 - 3.52
All Trades	0.8	3.4	5.4	21.9	4.26	- -

1/ Data for previous quarter have been corrected.

Union scales are the minimum wage rates (excluding holiday and vacation payments made directly to the worker each pay period) agreed upon through collective bargaining and reported to the Bureau by local respondents. The scales do not reflect rates for apprentices or for premium work. Overtime beyond established maximum daily and weekly hours is excluded.

Labor

The union war on postal reform

Opposed to Nixon's corporate concept for the Post Office, postal unions attack it through friends on Capitol Hill

The postal unions don't like President Nixon's formula for converting the Post Office from a deficit-ridden federal agency to a money-making, government-owned corporation. And when the postal unions don't like something, they take their case to Congress. There—in the words of former Senator and Republican National Chairman Thruston B. Morton—"they are right effective politically."

The postal unions are waging an all-out fight against the Administration's postal reform bill in the corridors of Congress. The unions do not oppose the reform goal. They do oppose the corporate concept, and particularly the bill's blueprint for collective bargaining. They would prefer a substitute bill proposed by Representative Thaddeus J. Dulski (D-N. Y.), which would reform Post Office procedures while retaining government ownership and Congressional control of Post Office wages.

Representative Dulski proposed the reform bill preferred by unions.

Unionist David Silvergleid calls Nixon bill "short end of the stick for postal workers."

Winton Blount pushes reforms on corporate lines Nixon seeks.

"We're all in favor of reform," says Patrick Nilan, legislative director of the United Federation of Postal Clerks. "I think we are in dire need of reform, but I also think we ought to crawl before we walk."

"We're all for postal reform—it's long overdue," says David Silvergleid, president of the National Postal Union. "We were in favor of postal reform long before Larry O'Brien ever became Postmaster General," says James H. Rademacher, president of the National Assn. of Letter Carriers.

A lot of votes. Among them, the three unions represent more than 400,000 of the Post Office Dept.'s 750,000 employees. That means a lot of votes and potentially a lot of precinct workers, as postal union lobbyists are skilled at pointing out.

President Johnson's Postmaster General, Lawrence F. O'Brien, first proposed a corporate structure for the Post Office two years ago. Johnson appointed a commission to explore the idea. The commission, headed by Frederick R. Kappel, former chairman of American Telephone & Telegraph, championed the concept, and Johnson formally proposed it.

President Nixon carried the ball from there. He directed his Postmaster General, Winton M. Blount, to develop a reform program based on the corporate structure. The result is receiving strong support from the Administration, and from Morton and O'Brien, both former chairmen of their political parties and masters of Congressional maneuver.

The test. Apparently their mastery will be put to the test on the Administration Post Office bill. The postal unions have made clear that they will accept no reform bill without revisions of the Administration's proposed procedures for settling labor-management disputes.

The Administration bill currently provides for private sector-style collective bargaining, with a "postal disputes panel" of nine members responsible for settling any dispute that arises. The panel would have a "broad array of settlement techniques" at its command to deal with bargaining table impasses. Like other federal employees, postal workers do not have the right to strike—and would not under the Administration bill.

The unions want no part of this arrangement. They say they want the right to strike over money issues and to arbitrate all other areas of disagreement.

Actually, the postal unions know perfectly well that the federal government is not going to make an exception for them under the blanket ban against strikes by all federal workers. The Nixon Administration, for its part, is equally disingenuous in arguing that the bill already provides for compulsory arbitration.

Arbitration is only one of the settlement techniques available to the postal disputes panel. And of all the settlement techniques, only arbitration is binding. Presumably, the postal corporation management could reject a panel recommendation reached by other means with no risk of legal penalty or of provoking a legal strike.

"Blount wants to bring us under the provisions of the Taft-Hartley and Landrum-Griffin laws without giving us the right to strike that goes with them, and without providing compulsory, binding arbitration instead," Silvergleid says. "If we have to bargain collectively, we have to have the right to strike on money."

Compromise. Recently, officials close to the situation have begun to suggest that "there are indications the Administration fully intends to grant compulsory arbitration, but wants to use it as a fallback position for compromise." Nilan of the Postal Clerks insists that arbitration by itself is not enough. But many Capitol Hill observers believe that the unions will settle for it if it appears likely that some

EFV – M – Bldg Trades Copy to MS & A.C.

corporate reform bill will pass Congress.

The situation is complicated by the fact that the postal unions have never practiced—or sought—collective bargaining. Their methods and history are entirely different from those of such government employee unions as the American Federation of Government Employees (for federal workers), the American Federation of State, County & Municipal Employees, or the American Federation of Teachers. These limped along for years, lobbying as best they could and pushing for bargaining rights, until President Kennedy's Executive Order 10988 directed federal agencies to bargain over working conditions with unions that represented a majority of the agencies' employees.

Union strength. The postal unions were strong long before President Kennedy's 1962 executive order. Their weapon was lobbying, and most congressmen rate them as experts at it. The reputations of most postal union leaders rest on their familiarity with congressmen and their effectiveness in translating this familiarity into benefits for members. For many years, the postal unions set the pattern for wage gains for other government employees. Now, the proposal for a postal corporation threatens to upset the applecart.

Silvergleid summarized the union position in a recent statement entitled, "The Postal Corporation: A Trojan Horse."

"Postal workers have recourse to Congress, where we have bargaining leverage because of our contacts with the voters we serve," he said. "Our wages attest to the fact that we hold no big club over the Congress. We are satisfied, nonetheless, that we can make progress, and we will not give up our recourse to Congressional petition for wage increases unless we are armed with the right to strike. The Administration bill would deny us the right to strike while taking away the right of Congress to establish our wage rates." In brief, the bill "represents the short end of the stick for postal workers."

Union confidence. Silvergleid and other postal union spokesmen feel their members would get a better deal under the bill proposed by Representative Dulski, chairman of the House Post Office & Civil Service Committee. Dulski's reforms involve no change to a corporation.

The unions seem moderately confident that Congress, which is traditionally reluctant to give up the power to set Post Office wages, will ultimately pass a bill closer to the Dulski model than to the Administration bill. "The way things are going, I think you're going to get a bill that Blount says he can't live with, a compromise based on the Dulski bill," Rademacher predicts. Other Capitol Hill observers are not so sure.

All three unions agree there is little chance of any bill getting through Congress this year, but they think there will be Post Office legislation before the 91st Congress calls it quits next year.

Patching up construction woes

President Nixon has decided to create a tripartite commission to deal with construction industry labor problems that hamper the fight against inflation and the building of more and cheaper housing.

The commission will be patterned roughly on the Missile Sites Labor Commission named by President Kennedy in 1961, but few expect it to be as effective as its highly successful predecessor. Most government officials will be grateful if it provides even moderate help in a situation marked by spiraling wages, numerous labor disputes, and charges of restrictive employment practices followed by unions and contractors.

The panel is the brainchild of Harvard economist John T. Dunlop, who is serving as consultant to Labor Secretary George P. Shultz. Dunlop has been working on the plan since May, when representatives of the government, the construction industry, and the AFL-CIO building trades unions agreed on the need for such a body. President Nixon is expected to issue an executive order establishing the commission sometime this month. Its objectives, says Dunlop, are:

John T. Dunlop drew up Nixon-backed plan for construction labor commission.

- Creating a forum to study and develop private and public policies to upgrade skills, expand the labor force, reduce instability in labor demand, eliminate seasonality, and assimilate new technology.
- Establishing effective machinery for resolving labor disputes.
- Strengthening the role of national unions and national contractors' associations in settling disputes to "restore some of the responsibility of these parties for the results of collective bargaining in an industry characterized by local negotiations under conditions of full employment."

Powers. Like the Missile Sites Commission, on which Dunlop also has served, the construction unit will be empowered to impose a 30-day cooling-off period on disputes of significant local or national interest. It will also have the right to conduct investigations, hold public hearings, and recommend settlements.

In this respect, the commission apparently marks a turnabout from the President's original rejection of "jawbone" wage and price policy. A short time after taking office, Nixon told a news conference it was unnatural to ask the parties to practice voluntary restraint; it was up to the government to employ fiscal and monetary policies that would enforce restraint. But publicizing settlement recommendations that have no legal weight is obviously a technique for embarrassing labor and management into practicing voluntary restraint.

Shadows. Pessimistic predictions regarding the commission's prospects stem in part from the difference between national defense and such lower-voltage issues as housing and inflation. Construction unions that defied the Missile Sites Commission could expect to feel the full force of public indignation. It will be far harder to generate that kind of public pressure regarding strictly civilian concerns.

A second shadow over the commission's chances of success is local control of construction bargaining. Unions at missile base sites also bargained locally. But the sites were concentrated in a comparatively few areas, where local government strove to protect a major source of local income, federal contracts. Building trades unions frequently have close links with local politicians, who encouraged compliance with commission recommendations.

No such counterforce to the frailty of international union influence exists on a national scale. Links with political parties vary by state and union. Politicians may see little advantage in twisting the arms of on-the-spot allies on behalf of a faraway federal government.

Dunlop, who has been associated with the construction industry for many years as an arbitrator and mediator, noted that there were substantial precedents for union-industry cooperation under emergency conditions. "Labor and management in the construction industry have on a number of occasions in the past responded by participating in specialized procedures to resolve collective bargaining disputes when the national interest required, both in and out of wartime," he said.

He cited the Board of Review and the Wage Adjustment Board of World War II,

WE STICK TO THE BUSINESS WE KNOW BEST

Three telecommunications specialists started Continental Telephone Corporation in 1961. Today, there are some 13,000 of us in the system. This is the business we know and we stick to it and make it grow. That includes all the 100-plus Continental telephone operating companies and their allied operations in 41 States, Canada, and the Caribbean.

the Construction Industry Stabilization Commission of the Korean War period, the Atomic Energy Labor Relations Panel, and the Missile Sites Labor Commission. He noted that all but the Atomic Energy Panel were tripartite and all were created by executive order rather than legislation, with the exception of the Korean War commission.

Dunlop also warned that further delay in dealing with the industry's vital problems "is likely to result in demands for more severe government intervention at a later date."

Members. Whatever its handicaps, the projected construction industry labor commission will start out with a blue-ribbon membership. Government members include Secretary Shultz as chairman; Dunlop; George Romney, Housing & Urban Development Secretary; and J. Curtis Counts, Federal Mediation & Conciliation Service director. Labor members include C. J. Haggerty, president of the AFL-CIO Building Trades Dept.; Maurice Hutcheson, president of the United Brotherhood of Carpenters; Peter Schoemann, president of the Plumbers Union; and Hunter Wharton, president of the International Union of Operating Engineers. Industry members include Carl Halvorson of the Associated General Contractors of America; Edward Torrence of the Painting & Decorating Contractors of America; Edward Higgins of the National Electrical Contractors Assn.; and John Stastny of the National Assn. of Homebuilders.

USW threatens to boycott bonds

Most unions traditionally have urged their members to invest in U. S. savings bonds. This week, a major union president warned Congress that his union would reverse its stand and urge members to stop buying the bonds unless Congress raises their interest rate.

I. W. Abel, president of the million-member United Steelworkers, charged that a 4.14% interest rate on savings bonds "discriminates against workers who rely upon their purchase of such bonds as a chief means of saving." He noted that upper-income investors can invest in stocks, tax-exempt notes, and Treasury bills at interest rates well above 4.14%.

"Just because workers do not have the money to invest in such issues is no reason to penalize them for the money they do invest," Abel said.

The AFL-CIO executive council called for a boost in the U. S. savings bond interest rate last February. The Treasury Dept. recommended an increase to Congress in July. But Congress "still has given no indication it will act," Abel said. **End**

Unions and Blacks

The Building Trades Still Get Low Grades

By RICHARD J. LEVINE

ATLANTIC CITY—The 55th convention of the AFL-CIO Building and Construction Trades Department proceeded with statesmanlike calm this week.

Committee reports were made, motions seconded, resolutions adopted—all in strict accordance with Robert's Rules of Order. The serenity of the 300 delegates contrasted sharply with the unruly street demonstrations recently in Chicago and Pittsburgh, where militant blacks shut down job sites to back up demands that building trades unions make more room for Negroes in highly skilled construction work. (Another discussion of discrimination in the building trades appears on page one.)

To a large extent the calm in the Traymore Hotel ballroom was a tribute to the foresight and tactical skill of Department President C. J. Haggerty, who arranged to unveil at the outset what was billed as a "major policy statement" on the black problem. The statement, combined with Mr. Haggerty's keynote address, even-handedly expressed the 3.5-million-member unions' resolve both to resist "unreasonable demands" of the militants and yet to speed and expand current efforts to recruit Negro members.

The timing and content of the policy statement neatly foreclosed any swarming of delegates to floor microphones to denounce the Negro militants, Government officials and civil rights leaders who they believe have unfairly made the building trades whipping boys for the nation's racial ills.

Yet while the policy pronouncements helped avert a scene that might have proved embarrassing to organized labor, they are hardly likely to cool the passions of the street demonstrators.

For the building trades chieftains had little new to say to the Negro community at a time when many Government labor experts worry about a nationwide spread of confrontations like those in Pittsburgh and Chicago, where militant blacks essentially seek a sweeping expansion of apprenticeships plus a supervisory role in the training programs. One Pittsburgh building tradesman now negotiating with the Black Construction Coalition there conceded that the convention's 15-page policy statement does little more than "reaffirm" his present position at the bargaining table.

In a key phrase, the policy statement asserted: "We do not favor acceptance of unreasonable demands. The mere assertion of a proposal by a minority group does not necessarily mean that it is in the best interest of the black worker, other workers, or the industry."

What Is 'Unreasonable'?

And in case anyone wondered what "demands" the mostly white unions considered "unreasonable," Mr. Haggerty—to some of the loudest applause of the three-day convention—declared:

"The teaching of skills must be done by persons in the industry and can never be turned over to unqualified outsiders. . . . I believe we should make it clear again that the conduct, curriculum and control of our apprentice training programs are going to remain in the hands of our crafts and our contractors. They are not going to be tuned over to any coalition."

The building tradesmen also made it clear again that they look with acute disfavor on proposals to shorten apprentice programs, which normally run from three to five years. "A stroke of the pen will not transform the learning process so as to graduate a qualified skilled craftsman in eight months," the policy statement said.

Similarly, as the biennial convention ended, the delegates unanimously voted to condemn what they term a "quota-system principle" embodied in the Nixon Administration's controversial plan for employing more Negroes on Federally-aided construction projects. Critics say this "Philadelphia Plan," requiring contractors there to meet specific "goals" for hiring minority-group members, in fact establishes "quotas" for such hiring, and quotas are illegal under the 1964 Civil Rights Act. The convention resolution said it appears, "upon preliminary examination," that the Philadelphia Plan "continues the quota system under new legal verbiage."

At the heart of the militants' grievances is the relative scarcity of Negroes in the skilled building trades. Though the laborers may be as much as 40% black, among such craftsmen as plumbers and electricians the percentages are known to be small. What the unions did offer here to critics of their admission policies were:

—a pledge to expand and accelerate efforts to attract minority-group apprentices through Outreach programs, which provide the unions Federal funds to recruit, test and counsel minority youth.

—an unqualified recommendation that union locals, for "a stated period of time," invite membership applications from nonwhites who are already qualified journeymen.

Unlikely to Assuage Blacks

Still, such efforts are hardly likely to assuage the blacks who in recent months have carried their long-festering grievance into the streets. One of the building tradesmen's staunchest allies in Government tried mightily to get this point across in an emotional convention speech.

"We're dealing with a different world today," said Hugh Murphy, director of the Labor Department's Bureau of Apprenticeship and Training. Referring to the street demonstrators, he declared, "There's got to be a realization that you can't say to these people—'out the window.' . . . Please look at your situation: You've got no friends."

The delegates, however, seemed not to understand. Early in the session Mr. Haggerty said the building trades have "circled the wagons" on the defensive "far too long." But a good deal of convention time thereafter was spent defensively extolling the unions' recent record in attracting minority applicants: Over 27,000 non-white youths recruited for apprentice programs beginning in 1967, and over 3,800 formally indentured as apprentices. "I think (the) record speaks well of our sincere efforts," Mr. Haggerty insisted.

Likewise, AFL-CIO President George Meany told the overwhelmingly white convention that he likes "the way the building trades are facing up to this challenge. I think you are on the right track."

Yet that record of which the building trades are so proud is viewed less enthusiastically by others.

For example, Secretary of Labor Shultz, the onetime economics professor, was asked recently what grade he would give the building trade unions for adding non-whites to their ranks. Mr. Shultz responded, "I haven't been thinking in terms of grades lately . . . but I guess I would give them about a C-plus to a B-minus."

And, for today's militant minority group workers that just isn't good enough.

Bucking Big Labor

Negro Drive for Jobs In Construction Unions Is Gaining Momentum

Black Coalitions Organizing In More Big Cities; Union Control of Hiring Assailed

AFL-CIO Defends Record

By THOMAS J. BRAY
Staff Reporter of THE WALL STREET JOURNAL

"It's just like the early 1960s."

That comment, offered up by a veteran of the civil rights movement, tells much about the goals, tactics and mood of Negro protest groups that have embarked on a potentially explosive confrontation. They are charging organized labor with racial discrimination in the nation's huge construction industry.

The clash has heated up considerably in the last few days. Negotiations between black coalition groups and representatives of unions and contractors in Pittsburgh and Chicago, where demonstrations have focused national attention on the issue, have stalled amid angry recriminations. Negro leaders elsewhere are threatening to shut down work on building projects unless their goals are met, and a Nixon Administration plan to place more minority workers on Federally funded projects has met with hostility from all sides.

"The issue is no longer whether a few blacks ought to be given jobs," declares Herbert Hill, labor director of the National Association for the Advancement of Colored People. "The time has come to take a completely new approach and bypass the entire obsolete structure of union control over hiring and training in the construction industry."

The Opening Rounds

The preliminary skirmishing in the drive late last month in Pittsburgh and Chicago was reminiscent of the South earlier in the decade. There were singing marchers, emotional rhetoric, mass arrests and counter-demonstrations by outraged whites. Since then, "Black Monday" demonstrations have been held by Negro groups in both cities, and it's known that black coalitions are being organized to protest job practices in the building trades in New York, Boston, Cleveland, Detroit and Milwaukee.

Observers warn that the current job protests could easily turn violent. There have been eruptions already. Nearly 50 blacks and 12 policemen were injured during one clash in Pittsburgh, and in Seattle earlier this week a white workman was set upon and beaten and thousands of dollars worth of construction equipment was destroyed when blacks and a few whites moved to shut down work on a building site at the University of Washington.

Indeed, most of the black coalitions are a volatile, uneasy mixture. Though led by such "traditionalist" and basically nonviolent organizations as the NAACP and the Southern Christian Leadership Conference, they also include a wide assortment of self-styled militants.

Continued From Page One

building trades unions have Negro membership exceeding 2%, and only one has Negro membership exceeding 10%—the general construction laborers local. However, blacks account for 23% of Pittsburgh's population, and the nonwhite unemployment rate is three times higher than the rate for whites.

The building trades unions thus are branded by civil rights leaders as the most socially backward in the labor movement, with the possible exception of a few Southern textile unions. William H. Brown, chairman of the Equal Employment Opportunity Commission, recently warned the construction unions that their "flagrant failure . . . to recognize the equality of opportunity for minority groups" might lead to serious confrontations over the issue.

It's no accident that civil rights groups have chosen this particular time to press their attack on the building trades. They clearly are betting that contractors—beset by spiraling wage costs—and the public in general will be sympathetic to demands for expansion of union hiring and training efforts in hopes it might slow inflation in construction by increasing the supply of workers. And they note that an increasing number of projects are financed with public funds. This, they believe, strengthens their demands for equity.

More Workers, Lower Costs

Building trades unions have traditionally limited their numbers through control of apprenticeship training and hiring hall procedures in order to insure work in bad times as well as good. This practice also has worked to make their pay scales the fattest in the labor movement. Electricians and painters commonly earn more than $6 an hour, while plumbers and pipefitters get up to $8 an hour. A plumbers union in Philadelphia recently negotiated an agreement that calls for an annual minimum wage of $19,400.

Richard C. Van Dusen, undersecretary of the Department of Housing and Urban Development, this week called on the building trades to help curb inflation by opening up their membership to more whites as well as to blacks and by streamlining training techniques. An estimated 140,000 skilled workers must be added to the construction manpower pool each year until 1975, Mr. Van Dusen said. At present fewer than 40,000 apprentices complete training each year in all trades, according to Labor Department estimates.

The construction industry has become an increasingly visible target for civil rights groups in recent years as more and more money has been poured into the cities—including the ghettos—under such programs as public housing, urban renewal and Model Cities. "It's impossible to imagine that blacks will continue to stand on the sidelines while lily-white unions come into these areas and take home all the pay," NAACP executive director Roy Wilkins said recently.

Though current demonstrations in Pittsburgh, Chicago and elsewhere have focused on private building projects, the primary emphasis in the past has been on government-financed construction. The reason: Laws and statutes govering hiring procedures under contracts involving Federal, state and local money are much clearer than on privately financed projects.

Under Federal contract compliance laws, for example, the Government is empowered to cut off funds on any contract where officials consider equal employment opportunity laws to have been breached. And in a landmark decision in May 1967, a Federal district court in Columbus, Ohio, directed state officials to insure that equal opportunities for minority workers are provided before entering into public works contracts.

Other laws go even further. Under Model Cities legislation, for example, authorities not only are required to observe existing anti-discrimination statutes but also are directed to provide "maximum opportunities for employing residents of the area (designated for Model Cities funds) in all phases of the program."

An Uncertain Factor

It's uncertain, of course, what effect the Nixon Administration's proposed cutback of 75% in new Federal construction contracts—announced earlier this month—might have on the Negro drive. Though most observers doubt that the cutbacks will greatly affect spending in the nation's blighted urban areas, some argue that the overall effect may be to dilute present protest efforts; whites as well as blacks would find it difficult to find work.

There are strategy differences in the Negro ranks. Some moderate blacks fear that tackling the unions head-on may lead to a battle that can't be won. For one thing, the very shortage of skilled workers would help protect these men from much of the civil rights pressure; if work is shut down in one area, most craftsmen can find it elsewhere with a minmum of difficulty. It's already common practice for unions to call in craftsmen from as far away as 200 miles to work on building projects.

Moderates also fear that a powerful backlash could develop if the jobs issue is pushed too fast and too hard. The unions, after all, aren't exactly newcomers to the arts of organizing and demonstrating, as was graphically shown during the recent counter-demonstra-

the construction industry."

The Opening Rounds

The preliminary skirmishing in the drive late last month in Pittsburgh and Chicago was reminiscent of the South earlier in the decade. There were singing marchers, emotional rhetoric, mass arrests and counter-demonstrations by outraged whites. Since then, "Black Monday" demonstrations have been held by Negro groups in both cities, and it's known that black coalitions are being organized to protest job practices in the building trades in New York, Boston, Cleveland, Detroit and Milwaukee.

Observers warn that the current job protests could easily turn violent. There have been eruptions already. Nearly 50 blacks and 12 policemen were injured during one clash in Pittsburgh, and in Seattle earlier this week a white workman was set upon and beaten and thousands of dollars worth of construction equipment was destroyed when blacks and a few whites moved to shut down work on a building site at the University of Washington.

Indeed, most of the black coalitions are a volatile, uneasy mixture. Though led by such "traditionalist" and basically nonviolent organizations as the NAACP and the Southern Christian Leadership Conference, they also include a wide assortment of self-styled militants, black craftsmen, urban poor and hangers-on in the poverty program. One prominent participant in the Chicago talks has been the Black P. Stone Nation Inc., a youth gang formerly known as the Blackstone Rangers.

Nate Grates

The contrast with the conservatively garbed and carefully groomed union leaders and contractors could scarcely be greater. "Man, you can tell it just grates on those cats to be in the same room with us," says Nate Smith, a 39-year-old ex-prizefighter and leading member of the Pittsburgh coalition. The outspoken Mr. Smith commonly turns up at negotiations clad in a colorful African dashiki and sandals.

Charges of job discrimination in the construction industry are nothing new, of course. Civil rights groups picketed building sites in Northern cities in the mid-1960s, and court suits attacking union job practices stretch back more than 25 years. In the 1940s, civil rights protests resulted in extensive hearings on the subject by the Fair Employment Practices Committee, a precursor of today's Equal Employment Opportunity Commission.

Building tradesmen say substantial progress has been made in opening up job opportunities for minorities in the last few years. Earlier this week, at the annual convention of the AFL-CIO Building and Construction Trades Department in Atlantic City, union officials asserted that 3,862 nonwhite youths had been taken into building craft apprenticeship programs since 1962 under a Labor Department program called Apprenticeship Outreach.

The officials said this helped boost the proportion of newly enrolled nonwhite apprentices to 9.4% of the total during the first half of 1968 from an estimated 2.5% in 1960. Their prepared statement also dealt with another sensitive matter—the acceptance of nonwhites already competent in a craft. It said: "We make the flat and unqualified recommendation to local unions throughout the U.S. that for a period of time they should invite the application of qualified minority journeymen for membership in their respective local unions. . . ."

A Few Statements

Black leaders dismissed the statement and its accompanying claims as self-serving at best. "It's nothing new," says one decidedly un-militant official of the Urban League. "The national union officers don't have any real control over the locals, so they're free to issue these statements from time to time without upsetting the membership."

Critics also question some of the union statistics. For one thing, they say, more than half the minority youths taken into the building trades under the Apprenticeship Outreach program were found, tutored and placed—" 'wedged in' would be a better term," says one Chicago coalition member—by civil rights groups themselves.

Also, less than 4% of all black apprentices in the building trades unions are in skilled craft training programs. The remainder are in the so-called trowel trades—general laborers, cement masons and the like—that have traditionally been heavily Negro. Wages in these jobs average at least 30% less than the pay scales of skilled workers such as electricians, plumbers and elevator constructors.

In some areas the proportion of Negro construction workers demonstrably lags behind the union's claims. Only four of Pittsburgh's 25

Please Turn to Page 18, Column 1

Cities funds) in all phases of the program."

An Uncertain Factor

It's uncertain, of course, what effect the Nixon Administration's proposed cutback of 75% in new Federal construction contracts—announced earlier this month—might have on the Negro drive. Though most observers doubt that the cutbacks will greatly affect spending in the nation's blighted urban areas, some argue that the overall effect may be to dilute present protest efforts; whites as well as blacks would find it difficult to find work.

There are strategy differences in the Negro ranks. Some moderate blacks fear that tackling the unions head-on may lead to a battle that can't be won. For one thing, the very shortage of skilled workers would help protect these men from much of the civil rights pressure; if work is shut down in one area, most craftsmen can find it elsewhere with a minmum of difficulty. It's already common practice for unions to call in craftsmen from as far away as 200 miles to work on building projects.

Moderates also fear that a powerful backlash could develop if the jobs issue is pushed too fast and too hard. The unions, after all, aren't exactly newcomers to the arts of organizing and demonstrating, as was graphically shown during the recent counter-demonstrations in Pittsburgh. "Wallace in '72" signs abounded, testifying to the depth of passions aroused among white unionists by the issue.

But the civil rights leaders involved show little sign of slackening their efforts. If anything, their stance is becoming more militant. In Chicago last week, the black coalition rejected an offer by unions and contractors to provide up to 4,000 construction jobs within a year if the economy remains strong. The coalition has been asking for 10,000 jobs. Other demands: That Negroes with four years experience be made foremen on construction in black communities and that the union hirng hall system of assigning jobs be abolished.

Civil rights leaders also have become increasingly critical of the so-called Philadelphia Plan, a complicated arrangement worked out by Federal officials, unions and contractors that sets "goals" for hiring minority workers. Union leaders also have attacked the Philadelphia plan, on the ground that it establishes illegal hiring "quotas."

The Nixon Administration is pushing ahead with the plan despite a ruling in August by Commerce Secretary Maurice Stans that the "specific goals" of the program violate the Civil Rights Act of 1964. At a news conference Tuesday, Attorney General Mitchell issued a contrary opinion stating that the plan indeed is legal.

Roots of the Problem

"It's a step in the right direction," concedes the NAACP's Mr. Hill, who is generally acknowledged to be one of the main driving forces behind the attacks on the building trades, "but it doesn't get at the roots of the problem. First of all, the plan would require constant Government enforcement and scrutiny. Secondly, if a contractor merely signs a statement that he has made a sincere effort to find Negroes, he's home free. It's a prime example of paper compliance."

Thus, in addition to demanding more jobs, it has become increasingly clear that the real goal of Negro protest groups is to gain some measure of control over union hiring and training practices. Under the present system, contractors nominally share responsibilities for hiring workers and apprenticing them. But in practice contractors exercise little real power in hiring.

When a contractor needs a work force, he calls the unions for referrals. First call goes to union members who have been certified as competent by the unions themselves. Ideed, a union "book," or journeyman's card, gives a craftsman almost unlimited mobility to work anywhere in the U.S. Without the card, he may still be able to find a substantial amount of work, but usually only for a fraction of union wages and seldom on prime projects.

This system affects all would-be building tradesmen, of course. Whites as well as blacks can find it difficult to obtain a union card. The International Brotherhood of Electrical Workers in Pittsburgh, for example, has 1,000 members—the same number it had 25 years ago.

But when unions do decide to take in new members, there is little question that whites stand a better chance than blacks. For one thing, most building craft unions are extremely clannish. Memberships often are handed down from generation to generation, or at least reserved for members of common ancestry.

In addition, Civil rights leaders argue that apprenticeship standards are unduly tough. Apprentices must be between 18 and 26 years of age, have a high school education, work at half salary and be willing to undergo three to five years of training. "It's a little unreal," says Pittsburgh's Mr. Smith. "You can get a Ph.D. from Harvard in less time than you can get a painter's book."

ST. LOUIS POST-DISPATCH
FRIDAY, OCTOBER 17, 1969

Two Unions Open Ranks To Negroes

Carpenters and operating engineers agreed today to throw their unions open to blacks under a new training program that will involve all residential and commercial construction in St. Louis and St. Louis County.

Under the program, to be known as the "St. Louis Plan," blacks would have an opportunity to become journeymen union members within two years if they have had any construction experience. Blacks with no experience would become journeymen in two and one-half years.

The new agreement, which takes the form of an amendment to existing pacts between the unions and the Associated General Contractors of St. Louis, calls for adding one trainee for each three journeymen working on rehabilitation, residential and commercial construction involving projects of less than five stories.

Training Preference

On all other projects, one trainee would be added for each five journeymen on the job. Trainees with some construction experience will be given preference in hiring practices.

Protests Cited

The new agreement, which could have profound impact on the construction industry in this area, comes at a time when blacks in other cities have been conducting demonstrations to force the building trades to open their doors.

The St. Louis Plan is an extension of a similar pact that had been achieved between building contractors and 12 trade unions for rehabilitation work in the Yeatman District on the north side.

Leon R. Strauss, chairman of the AGC's equal employment opportunity committee, said that preliminary talks concerning the new program had been held with four other unions.

"It is hoped that the entire St. Louis construction industry will participate in this agreement," Strauss said.

Less than a month ago, the United States Court of Appeals here ruled that the Electrical Workers and the Sheet Metal Workers were continuing to discriminate against blacks in violation of the Civil Rights Act of 1964.

The court ordered the two unions to modify their hiring hall systems and "undertake an effective public information program designed to make it clear that Negroes now have equal opportunities for union membership and related benefits."

One of the provisions of the St. Louis Plan specifies that trainees who complete their training in a period of not more than two years will be eligible for full union membership and benefits.

For trainees with some construction experience, the pact oulines four categories of pay that range from 60 to 90 per cent of journeyman wages plus fringe benefits. Automatic incremental increases of 10 per cent every six months are called for.

Trainees with no experience will be hired by the contractors and will work across jurisdictional lines for six months. They will receive $3 an hour. Purpose of the unspecified work rules is to give the trainee an opportunity to choose a trade and determine whether he wants to pursue a career in the construction field.

Contractor Signatures

The new plan has been approved by the Carpenters' District Council and Operating Engineers, Local 513. The AGC board of directors also ratified the plan. It will become effective when individual contractors sign. An AGC spokesman said the contractors are expected to sign soon.

O. W. Langhorst, executive secretary-treasurer of the carpenters council, said the plan "is another in a series of steps taken by the carpenters to provide an opportunity for minorities to become skilled members of the carpentry trade."

John H. Murphy, president and business manager of the operating engineers, said the new pact goes "hand in hand with a current program for training minority groups through the engineers' international union."

W. W. Zenfell, area co-ordinator of the Office of Federal Contract Compliance, was named to head a nine-member committee to administer terms of the plan.

Other committee members will include a representative from the carpenters' council and one other labor representative; an AGC member and one other person from management; two representatives from the Model City Agency, one from the St. Louis Council on Human Relations and one from the St. Louis County Commission on Human Relations.

CHRISTIAN SCIENCE MONITOR OCT 21 1969

Worker changes traced: blue to white collar

By the Associated Press

Washington

A government report shows one out of every five blue-collar workers is likely to cross the job color line into a white-collar position—many of them taking at least a short-term pay cut.

But most workers who make the shift from production jobs to management, professional, technical, clerical, or sales positions figure the switch is worth it in the long run, the report says.

"Most respondents were convinced that their socioeconomic status had risen above that of their parents and above the current status of most of their boyhood friends," said the survey of 452 workers.

The report was published in the Labor Department's Monthly Labor Review. It said job switching is largely haphazard, and urged government employment agencies, employers, and unions to make it easier for workers to climb up the job ladder.

The study by University of Wisconsin economic professors David B. Johnson and James L. Stern said 39 percent of blue-collar workers making the switch moved into managerial jobs and increased their base pay by nearly 15 percent.

But it added, "Men shifting into professional-technical jobs suffered an average loss of weekly gross income of 5.7 percent. In terms of base pay without overtime, however, the loss was only 2.7 percent."

Blue-collar workers shifting to clerical jobs lost 9.8 percent in gross pay, 6.3 percent when lost overtime was excluded.

The workers interviewed gave many reasons for wanting to make the job switch.

"Very prominent among them were reasons related to an improved financial situation resulting from steadier work in the white-collar job, higher fringe benefits, and prospects for better long-run earning opportunities," the report said.

Job Agency Role Under New Welfare Law Told

About 350 members of private employment agencies from throughout the nation Friday heard a state official describe a new California law permitting welfare departments to use agencies such as theirs in finding jobs for welfare recipients.

Sig Hansen, deputy director of the new Department of Human Resources Development's tax collection and insurance payments division, noted that the law will become effective in November.

He told the National Employment Assn. annual conference at the Century Plaza that county welfare departments will be able to go outside government employment services to contract with private, fee-charging agencies.

The law, written by Assemblyman John V. Briggs (R-Fullerton) and passed during the last legislative session, will enable welfare departments to draw upon many of the 1,600 such agencies in California, Hansen observed.

Hansen, former chief of the California Bureau of Employment Agencies, suggested that other states could substantially reduce unemployment and save tax dollars by following the California plan.

Joseph Wroble of Wilkes-Barre, Penn., newly elected president of the National Employment Assn., said he hopes 8,000 private employment agencies throughout the country will be able to participate in such programs.

The California Department of Social Welfare will hold public hearings in Sacramento Nov. 13-14 to help formulate regulations under the new law.

Comprehensive Manpower Survey Is Scheduled

10 Southwest Mississippi Counties to Be Covered

Polling Booths to Collect Information Planned

(Special to The Times-Picayune)

JACKSON, Miss. — A comprehensive manpower survey will be conducted in 10 southwest Mississippi counties Saturday to determine the number and qualifications of workers who might be interested in employment at a new or expanding plant in the area.

The survey will be conducted in Adams, Amite, Franklin, Jefferson, Jeff Davis, Lawrence, Marion, Pike, Walthal and Wilkinson counties. Franklin County polling booths will be open Friday and Saturday.

Representatives of the Mississippi Employment Security Commission working with county boards of supervisors and interested civic organizations and officials will set up polling booths to collect information.

Once collected the information will be turned over to the Mississippi Research and Development Center for storage and tabulation on a computer.

LABOR SITUATION

The data will be used to show industrial prospects exactly what the labor situation is in a particular area.

Survey Chairman Oliver Emmerich of McComb said every person who would be interested in working at a new or expanding plant should register, whether now employed or not.

Emmerich said it was vital to the area's future industrial growth to get an accurate and complete labor count. This is the second in a series of area surveys for the state. By the end of 1970 all of the state wil have been surveyed.

Emmerich said if the results are good and the area has a high number of prospective workers, new industries would be attracted, thus raising the opportunity and income level of the entire area.

"In order for the southwest Mississippi area to have an effective development program," Emmerich said, "we must first have accurate information regarding our manpower situation."

ONE-DAY TEST

The registration Saturday, he said, would be a one-day test. "A god count with a high number of qualified workers would be an economic asset to the various communities and the area," Emmerich said. "In order for this to be successful, however, all citizens must lend their support."

Emmerich called on community leaders who are not already involved to contact their board of supervisors for information o nhow they could best assist.

"Every citizen can play an important role in this effort," Emmerich said. "If you know some one who is unemployed or employed in a job that is not utilizing his full talents, you would be doing both yourself and the individual a favor by telling him orher of the registration and encouraging that person to go to one of the polling booths."

Information will be collected on county and beat of residence, race and sex, age, education, work skills, employment status and time which the worker would spend traveling to and from work daily.

The first area survey was conducted earlier this year in 14 central Mississippi counties. Over 21,000 persons were registered.

SUNDAY HERALD TRAVELER, OCTOBER 19, 1969

Summer Job Program Helps 5500 Youths

Over 5,500 Boston area disadvantaged youths were placed in jobs this past summer through the efforts of private business, community groups, and state, local and federal agencies. Wages for the 16 to 21 year - old students ranged from $1.60 to $3.40 per hour with the average wage as $1.98 per hour.

Joe Breiteneicher, Boston Metro Director of the National Alliance of Businessmen and Chairman of the Mayor's Summer Job Program, said this year's accurate measure of public and private employer efforts to help Boston youth, but more was accomplished than just job placements. The youths got their message across to employers that they are responsible, willing to and have limitless potential."

He observed that many social agencies had teamed together effectively and that, "The agencies were the strength of our placement system. Without agency input, we would not have had a summer job system;; and without agency cooperation, we would have had no program to coordinate." The agencies performed without the benefits of additional staff or funds.

PRINCIPAL cooperating agencies were: ABCD and its Neighborhood Employment Centers, SOUL, Kennedy Family Center, SNAP, SEMCO-APCROOSS, Youth Alliance, and the Massachusetts Division of Employment Security and its Youth Opportunity Centers.

Edward J. Ferrarone, Jr., youth coordinator, on loan from the Mayor's office, set up offices in Boston's City Hall Annex and began lining up job opportunities last January. The Mayor's office, the Greater Boston Chamber of Commerce and Associated Industries of Massachusetts provided publicity and loaned personnel. Job developers were loaned by private industry, ABCD, the Division of Employment Security, and the Department of Labor.

In all, 3,113 jobs in private business and industry were filled and 2,479 jobs filled in various branches of government. The Federal Executive Board and the Mayor's office reserved more jobs for students from poverty areas than in any previous summer.

Ferrarone said he hoped that the number of jobs offered by private industry would be increased next summer. "Many firms performed well and shared our sense of urgency in finding work for young people. Regrettably, almost one-third of the original job commitments offered by business failed to materialize. Some jobs were withdrawn because of apprehension surrounding statements of the S. D. S., others were filled on a first-come basis before disadvantaged students had finished their school year and were available for work."

IN PLANNING for next year, Breiteneicher said that efforts should be made to increase coordination with the State House, to provide more jobs for girls and Spanish-speaking youth, and to correct inadequate transportation facilities. Jobs were lost because the Federal Government did not commit a $10,000 transportation grant until mid-July when it was too late to implement any type of transportation assistance.

An attempt should also be made to provide businessmen unable to take on summer help an opportunity to make financial grants to the public and community agencies where manpower is needed but funds are not available. Employers should also try to provide exposure to all aspects of business rather than just a job, he said.

Breiteneicher added, "The summer work experience can do much to motivate youth, or it can dull any enthusiasm for what we call socially acceptable endeavors."

11/1/69 AFL-CIO News Public Employee Unions

For Federal Employes:

Nixon Sets Policy In Labor Relations

Significant changes in labor-management relations policy within the federal government have been incorporated in a new executive order signed by Pres. Nixon Oct. 29.

The new order, replacing the now-famous No. 10988 issued by Pres. Kennedy in 1962 and hailed at the time as a major breakthrough in federal labor policy, was released after a meeting at the White House between the President and the AFL-CIO Executive Council.

Of major importance in the new order is the creation of a Federal Labor Relations Council to administer the program, decide major policy issues and issue rules and regulations. Previously administration had been in the hands of various departments and agencies.

The labor relations council will have authority to issue binding arbitration decisions on grievance disputes and questions of interpretation of contracts.

The new order calls also for establishment of a Federal Service Impasse Panel to help resolve disputes in negotiations and "take any action it considers necessary to settle an impasse." Panel members will be appointed by the President.

The various form of recognition extended to groups of government workers was revised and clarified. The virtually meaningless category of "informal" recognition is abolished and the "formal" category will be abolished in a year.

This would reduce the recognition category to "exclusive," based on winning a majority in an election, and national consultation rights, which covers a wide area short of actual right to negotiate.

There were no changes in the checkoff rules in the old order and the new order prohibits union security arrangements.

Exclusive recognition will be granted only through a secret ballot representation election, eliminating the present option of card checks. However the new order abolishes a requirement of the

(Continued on Page 8)

(Continued from Page 1)

1962 order that at least 60 percent of the eligible employes must vote in order for the election to be valid.

The order does clarify the status of supervisors, who can belong to general membership unions but cannot be bargained for.

The new regulations also include procedures and rules governing internal union affairs comparable to provisions of the Landrum-Griffin Act.

The new Federal Labor Relations Council will be made up of the chairman of the Civil Service Commission, the Secretary of Labor and an official in the President's Executive Office. The President may appoint other officials in the Executive Branch to the council.

Elections and other matters to be decided under the order will be handled by the Assistant Secretary of Labor for Labor-Management Relations.

The new order—No. 11491—will become effective Jan. 1, 1970.

The report and recommendations to the President on which the order was based was made by Labor Sec. George P. Shultz, Defense Sec. Melvin R. Laird, Civil Service Commission Chairman Robert E. Hampton and Robert P. Mayo, director, Bureau of the Budget.

They noted that the Kennedy order in 1962 "produced some excellent results, beneficial to both agencies and employes."

They noted also the growth of union representation in the seven years, which exclusive union recognition growing to 2,305 units in 35 agencies covering 1,416,073 employes—52 percent of the total federal work force subject to the order.

The AFL-CIO and its federal employe unions all have called for updating and improvement of the Kennedy order in important respect and testified before a special presidential commission last year on needed changes.

Trades Score Racial Quotas In Hiring Plan

The Administration's racial quota system for hiring minority group members in the Philadelphia building industry is illegal, unworkable, and in conflict with the intent of Congress and the language of a presidential executive order, the AFL-CIO Building & Construction Trades Dept. has charged.

The department "supports the objectives of non-discrimination and affirmative action in the Equal Employment Opportunity program" in deeds as well as words, BCTD Pres. C. J. Haggerty said in a statement presented to the Senate Subcommittee on the Separation of Powers by Louis Sherman, the department's legal counsel.

The statement paralleled a policy declaration of delegates to the department's 55th convention, held in September. That convention agreed unanimously that "we are unalterably opposed to the quota system."

The AFL-CIO convention which followed said the Philadelphia plan "sets up unsound procedures used in no other industry, segment of the labor market or in government itself."

The Philadelphia Revised Plan was issued last June 27 by the Labor Dept. in an order to the heads of all federal procurement agencies. It set quotas or rate ranges which employers bidding on federal contracts must try to achieve in hiring.

Black demands

M- Bldg Trades

Construction workers' plaints could produce Negro unions and more building contractors

By James B. Alexander
Staff writer of The Christian Science Monitor

Boston

Rising black demands for equal opportunity in construction work could have two far-reaching effects, according to various black community leaders here.

First, there could develop an appreciable increase in the number of black-owned construction firms.

Second, black demands could lead to black labor unions.

A chain of events, the most recent of which was a nonviolent protest at Tufts University in Medford, Mass., has focused increasing attention on the role of blacks in construction.

The Tufts dispute centered around a demand that the Volpe Construction Company employ additional minority workers on a $2 million, federally aided dormitory project. The demand called for minority workers to make up 20 percent of the work force.

Quota reached

Through extensive negotiations the quota was reached. However, the conflict did not end there. Two black workers recently were fired, and the students took to the picket lines again.

Incidents such as this are becoming numerous. Yet white-owned construction firms have not yet met the demands for swift increases in minority employment. Why?

Martin Gopen, director of transportation and labor for the New Urban League of Greater Boston, says: "They're being intimidated by labor unions who wish to remain the sole supplier of manpower."

Mr. Gopen does not believe contractors should be absolved of blame, however.

"Contractors can only be intimidated if they desire to be," he says.

Few black observers believe the construction field and labor unions are going to open to them, either.

Many believe it's time for them "to do their own thing"—forsaking those they feel have not been cooperative.

NAACP moves

In an apparent move to better the lot of existing minority contractors, while encouraging the development of more such firms, the National Association for the Advancement of Colored People (NAACP) recently began a survey of 10 major cities to find out the problems of minority contractors. With this data the NAACP hopes to show the U.S. Department of Housing and Urban Development the problems, and needs of minority contractors in regard to bonding, long- and short-term borrowing, impact of unions, and management.

Early returns for minority contractors interviewed by the NAACP have indicated that minority contractors are sharing in little of the building-industry business.

According to the NAACP, "The majority of contractors interviewed to date seem primarily relegated to rehabilitation of existing buildings and are hindered by bonding and union and personal-management difficulties.

Using this survey as a wedge, the NAACP hopes to secure a larger amount of construction work for minority workers and contractors.

In line with this, observers believe blacks will have to take similar action on unions.

According to Mr. Gopen, racial discrimination by unions is going to force blacks to develop parallel structures in the near future.

Whether such a move is afoot Mr. Gopen did not say.

The Dallas Morning News — Friday, November 21, 1969

Farm Mechanization Sends More Migrants to Cities

By JUSTIN BAVARSKIS

DETROIT (UPI)—The young gas station attendant stood in an island of neon one recent autumn night outside Baird, Texas, pumping gas into a car with Michigan license plate. He told the driver he and his family had been migrant workers in Michigan about 15 years ago, when he was 6.

He said his Spanish-American family had followed the crop harvests up the shore of Lake Michigan. They worked at least 12 hours a day, and slept in converted chicken cooks with other migrants. He could barely remember when the family was not hungry.

IN 15 YEARS, these conditions have hardly changed. About 80,000 migrant workers each year arrive in Michigan, largely from Texas, to pick fruit and vegetables.

"The conditions under which tens of thousands of field laborers, living in converted sheds, barns, chicken cooks and old schools and farmhouses, exist while working to grow and harvest food . . . is living evidence that the low food prices have been gained, partially, at the expense of these workers . . the hazards to health are great, but rights to health care are few. In all of these ways, migrant workers may be treated legally . . . and inhumanely," the Michigan Civil Rights Commission reported this fall.

But even then, they were assured of steady work. When the sugar beets had been harvested, the cherries were ripe; when these were picked, the cucumber, tomato and apple harvests provided them work throughout the season.

Now, mechanization is setting in. Already, the mechanical cherry harvester has taken the place of many a worker.

"By 1975, almost everything will be mechanized," says Rou Fuentes, program director of the Latin American project of the MCRC. "That's mainly why the migrants will move into the cities."

ALREADY, an estimated 1,600 migrants leave the fields each year and try to strike up a new life in the inner cities of Michigan. By 1980, Fuentes estimates 3 million ex-migrants will be living in midwest cities, mainly in Michigan and Illinois.

In the cities, they live in overcrowded tenements; they lack the education and skills to find work, and unlike the poor blacks and whites they often run into a language barrier, since many speak only Spanish.

"The problems of Spanish-sur-

PROFIT-SHARING CAST AS LABOR PEACE KEY

MADISON, Wis. (UPI) — Profit-sharing may be an answer to many labor-management disputes, a labor union executive said.

Speaking at a conference on studies and disputes and settlement at the University of Wisconsin, Irving Bluestone, a special assistant to Walter Reuther, president of the United Auto Workers, said:

"Profit-sharing is a sane and responsible answer to many labor-management disputes.

"As it is now, management has to guess what it can afford over the next two or three years, and then labor has to determine what it thinks management can afford. The problem is that no one can predict with certainty what company performance will be in the future."

The union leader said that many unions were badly splintered, with each union organized in its own technological specialty, resulting in each union trying to outdo the one before it when negotiating for a new contract.

Profit-sharing would allow a more reasonable approach based on fact rather than projection, Mr. Bluestone said.

"Then we could move away from operating blindly, a cause of many disputes," he added.

Sugar dilemma

Puerto Rico's unemployed sidestep cane-field labor during hunt for jobs

By Jo Ann Levine
Staff writer of The Christian Science Monitor

Aguadilla, Puerto Rico

Aguadilla's sugarcane cutter of yesterday may be Boston's meat packer of today.

As agriculture moves into the background of economic life here, the rural worker is the one most likely to move to the United States in search of a job, any job.

But first he attempts to find work in Puerto Rico.

Every Monday morning, Victor Ujaque, director of the United States Division of Employment Security office here faces 400 to 500 unemployed workers. Most of them go home at the end of the day—still unemployed.

Ninety percent of the jobs he has to offer are in the 17 small factories in the Aguadilla district, factories that usually skim off the skilled workers first when they do have openings.

Job situation compared

After too many disappointing trips to Mr. Ujaque's office the unemployed worker may head straight to a travel bureau where he can buy a ticket to the United States on credit

Often the job situation is worse in the United States.

Many Aguadillians come to Boston where it is estimated that 60 percent of the Puerto Ricans are unemployed. Aguadilla's unemployment rate is 27 percent, compared with 13 percent for the island as a whole.

"Every year we place more people in jobs than the year before," he said. "But at the same time, the unemployment rate remains the same or goes up. If we place 1,000 a year more in jobs, the labor force goes up 3,000.

"The rural labor force is near 6,000 workers. Last year it was more than 6,000, and this year, I expect to have 5,500," he said.

A sign in Mr. Ujaque's office said that workers were needed in the tobacco fields in Connecticut.

"Already this year we have sent 2,000 workers from here to the United States. We will probably send 2,400 by the end of the year—400 more than last year," he said.

By January, United Hosiery, Inc., will employ 1,000 in a new Aguadilla factory.

Skills in short supply

"If today, they called for these 1,000 workers, I could send 1,000 tomorrow," says Mr. Ujaque.

"However," he added, "we can supply the people, but not with the skills the factory needs."

Even professionals in the Aguadilla area find themselves unemployed.

"We have persons with college degrees unemployed," said Mr. Ujaque. "Sociologists, chemists. This is very bad for us because we don't have opportunities here for them. If they moved to San Juan, they would be working the next day."

Mr. Ujaque says there are not enough job-training programs for all those who want to apply.

"More than 75 percent of the people who come here to our office searching for a job also apply for job training. We can only train 25 out of every 100 who apply for training."

Migrants considered

While Mr. Ujaque struggles to get enough money to provide job training for unskilled workers, Sugar Coloso, the nearby sugar mill, couldn't get all its sugarcane cut last year because it couldn't find enough laborers who wanted to work in the fields.

Coffee plantations in the area are thinking of importing laborers from nearby islands.

Mr. Ujaque says that the problem of not being able to get enough cane cutters also involves a change of attitude. "When I was a teen-ager," he said, "I overheard some workers from the sugarcane and also coffee plantations who said they worked 12 hours a day. And for a good worker it was something great to say, 'I worked from 6 a.m. to 6 p.m.'.

"Now the majority of those workers say, 'I want to work eight hours as a human being. Before, I was an animal working in that way.' "

Sugar Coloso can be reached by driving through fields of uncut cane. Mr. Arsenio Martinez, the local manager, tells of the troubles of his sugar mill.

"I invite you to cut cane for an hour, and then you will know why men don't want to cut cane," he said.

"Until three years ago, there were plenty of people to cut cane. In the last five, six, seven years, industry from the states has come in. They sorta forgot about agriculture.

"Either we get cane-cutting machines in the next two or three years here, or else we are not going to have enough people to cut cane."

Mr. Martinez soberly pointed to a map of Puerto Rico which was marked with black crosses at every place a sugar mill had been discontinued. "We now have 17 sugar mills in Puerto Rico," he said. "Twenty years ago, there were 44."

BUSINESSMEN AIM TO AID MINORITIES

Owners Hope to Strengthen Food Chain's Standing

By LACEY FOSBURGH

There are chick peas and mangoes, pigs' feet, collard greens and 25-pound bags of rice. For three lawyers, one black, one Puerto Rican and and one Jewish, the items symbolize their attempt to transform a $17-million a year chain of supermarkets — the largest minority owned grocery chain in the city — from a successful business venture into a productive social experiment.

Because the supermarket business is traditionally all white and few blacks or Puerto Ricans ever advance byond the check-out counter, the three men consider their project a challenge.

J. Bruce Llewellyn, former deputy commissioner of the Department of Rent and Housing Maintenance, Samuel Berger, a practicing attorney, and Roberto Lebron, City Councilman from the Bronx, have been close friends since they were students 11 years ago at the New York University Law School.

Four months ago, after searching for five years for a business to buy together, they purchased the 11 Fedco Food Markets with a $2.25-million low-interest loan from Prudential Life Insurance Company.

'A Lot to Learn'

Now, with winter coming on and the wide glass plates of their 11 Bronx and Manhattan stores covered with notices about school basketball games and community programs, the three men are grappling with questions of costs, prices, profits and overheads.

"We're in this first and foremost to make money and we have a lot to learn," said Mr. Llewellyn, the president of the company, "but we still want to make this a social venture as well. There's racism in the grocery business just like there is everywhere else."

Their chief concerns, he said, are to overcome the practices that have long excluded minority people from the business as a whole and to strengthen the bond between the large, chrome and steel stores and the crowded ghetto areas in which they are located.

Roberto Lebron, a Democrat whose term as Councilman ends Dec. 31, looked at the young black men and women rushing around him in one Fedco Store at 1718 Madison Avenue, pushing brooms and moving cartons.

"There's never been any real attempt to advance these young people up to the managerial and supervisory level," he said, shaking his head. "No salary incentive, no training. Up till now, it's been an all-white affair."

Man With Experience

Mr. Lebron's chief responsibility after December will be in improving personnel procedures among Fedco's 300 employes in expanding in-service training programs.

Mr. Llewellyn is the only one of the three with previous business experience. The former regional director of the United States Small Business Development Center, he is now co-chairman of the New York Council of the Interracial Council for Business Opportunity.

He explained that Fedco, which caters to black and Puerto Rican tastes, would actively encourage other black capitalists by dealing exclusively with black service companies.

"Most people warn you black companies are not reliable and they say, 'if you're going to have a good business, you should deal with someone you can trust,' " he said.

"But for refrigeration, maintenance, insurance and all the outside help a large company like ours needs, we're black . . . or Spanish," he added, laughing as he looked at his two partners.

"Most people think our friendship is strange," said Mr. Berger, who handles most of the company's legal work. "They don't understand how the three of us can be social friends and business partners. But to us, it's just our own little League of Nations."

IBEW Presses Recruitment Of Minorities

The International Brotherhood of Electrical Workers has called on its construction locals throughout the nation to take immediate steps to increase the number of minority group journeymen and apprentices.

IBEW Pres. Charles H. Pillard outlined to the locals an affirmative action program based on the unanimous policy statement of the AFL-CIO Building & Construction Trades Dept.

It calls for immediate membership for qualified workers who have gained their experience with non-union employers and modification of the local job referral system so that they will have the same priority in employment as present members with comparable qualifications.

Existing requirements for prior employment under the local's collective bargaining agreement should be waived for a one-year period, Pillard told the locals.

He also called on IBEW construction locals to "accelerate your participation in the Apprenticeship Outreach Program in your area or, where no outreach program exists, work through the local Building & Construction Trades Council to establish one." The international union, he said, will provide assistance and help secure financing.

Locals were also urged to negotiate affirmative action programs with employers and to seek the cooperation of minority group organizations "in a program to actively recruit minorities."

Locals, he said, should provide trade union training for new members brought in under the program.

KNOXVILLE BUILDING TRADES COUNCIL
DOUBLES OUTREACH GOAL, GETS NEW
PROGRAM

WASHINGTON -- The AFL-CIO Knoxville, Tennessee Building and Construction Trades Council will prepare another 35 minority youths for skilled-craft apprenticeship exams after more than doubling its previous goal of 35 by placing 78, the U.S. Department of Labor has announced.

The council's new one-year contract, supported with $50,985 in Federal funds, calls for up to 10 weeks of training, using the "tutor and cram" technique, to prepare youths to pass specific examinations, principally in the building and construction trades.

Among the 78 apprentices placed in the council's previous program were 1 bricklayer, 11 carpenters, 4 cement masons, 23 electricians, 1 elevator constructor, 3 glaziers, 5 iron workers, 3 machinists, 8 operating engineers, 4 painters, 9 pipe tradesmen, and 6 sheet metal workers.

The Apprenticship Outreach program was first developed by the Workers' Defense League in New York City. It is designed to "reach out" to minority youngsters, motivate their interest in becoming skilled craftsmen, and help them pass apprenticeship tests in 18 building and construction trades.

Apprenticeship Outreach sponsors also counsel and assist those apprentices selected to remain in their chosen apprenticeships until successful completion.

HOUSTON, NEW MEXICO BUILDING TRADES
START NEW OUTREACH PROJECTS

WASHINGTON -- The Houston Gulf Coast Building and Trades Council and the Albuquerque-based New Mexico Building and Construction Trades Council, both of the AFL-CIO, will prepare another 105 minority youths for apprenticeships in the skilled building trades, the U.S. Department of Labor has announced.

The two one-year contracts will be supported with more than $97,000 in Federal funds. Both programs will provide up to 10 weeks of training, using the "tutor and cram" technique, to prepare youths to pass specific examinations, principally in the building and construction trades.

Under its first Outreach contract, the Houston council nearly doubled its program goal of 45 by placing 84 minority youths as apprentices: 3 bricklayers, 11 carpenters, 36 cement masons, 2 electricians, 2 elevator constructors, 2 glaziers, 10 iron workers, 1 operating engineer, 7 painters, 2 pipe tradesmen, 6 sheet metal workers, and 2 tile setters.

The Albuquerque program met its goal of placing 65 apprentices: 4 bricklayers, 11 carpenters, 3 cement masons, 8 electricians, 4 iron workers, 1 operating engineer, 4 painters, 4 pipe tradesmen, 21 roofers, 5 sheet metal workers.

The New Mexico contract is funded for $47,725 and will operate in 32 counties.

The Houston program will operate in 20 counties in the area surrounding Houston, with $49,745 in Federal support.

(MORE)

The Apprenticeship Outreach program was first developed by the Workers' Defense League in New York City. It is designed to "reach out" to minority youngsters, motivate their interest in becoming skilled craftsmen, and help them pass apprenticeship tests in 18 building and construction trades.

Apprenticeship Outreach sponsors also counsel and assist those apprentices selected to remain in their chosen apprenticeships until successful completion.

WASHINGTON POST DEC 19 1969

Norfolk Calls Dropout Program Successful

NORFOLK, Va., Dec. 18 (AP)—About 50 school dropouts are back in school because Willie J. Ross gave them a reason for going back.

Ross is the mayor's youth coordinator for Norfolk, a post created last spring. His first job was to set up a summer recreation program to keep youths off the streets and to channel their energies into constructive avenues. It worked.

"We've had 50 dropouts return to school this fall because of the program," says Ross, a 27-year-old bachelor who was a policeman before Mayor Roy B. Martin appointed him youth coordinator.

"By these kids participating in the athletic clinics and working with other kids in the schools during the summer, they decided they wanted to go back to school.

"They saw other boys trying to better themselves. It was a good thing we involved them in the program."

Ross, a Negro, isn't stopping there. He knows the importance of an education. He was raised in a rough section of Chicago, orphaned at age 13, but went on to win a football scholarship at the University of Nebraska, where he received his degree.

"I'm going to work on borderline dropouts—talk to them, talk to their parents," says Ross. "I'm planing to work closely with the visiting teacher and probation officers."

Ross says San Antonio, Tex., has had success with a dropout prevention corps program and he would like to see one in Norfolk one day.

Meanwhile, Ross visits some of the neighborhood teen-age meeting places and tacks up posters advising children of the benefits of an education.

"Mainly in the black area, there's no one there encouraging him to go back to school," says Ross. "Sometimes it's the parents' fault — not showing him what he can get out of school."

Man Hard Core

CONGRESSIONAL RECORD — SENATE October 28, 1969

NAB JOB-TRAINING PROGRAM

Mr. PERCY. Mr. President, the effort to eradicate poverty in our country necessitates the cooperation of both the Government and the private sector of our economy. The two, in concert, can develop and finance programs aimed at making all of our citizens contributing members of our society.

The National Alliance of Businessmen—NAB—and the Federal Government, largely through Outreach, have been working together for the past year on an NAB program to train the hard-core unemployed. Through this program, 229,679 previously unemployed men and women have received job training and been placed in jobs. Of these men and women, 54 percent have remained at work—a retention rate which approximates that for the working force as a whole.

On September 8, 1969, Newsweek published an article on the excellent work NAB has been doing through their training and employment program. I ask unanimous consent that the article be printed in the RECORD following my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Newsweek, Sept. 8, 1969]

HOW TO HIRE THE HARD-CORE

When the National Alliance of Businessmen (NAB) launched its widely heralded effort to provide jobs for the hard-core unemployed early last year, there were scoffers who suggested that NAB would endure about as long as yesterday's headlines. Indeed, the group's formation did have some of the earmarks of one of those government-industry love-ins that all too often produce little, or nothing in the way of meaningful results. President Johnson summoned 500 of the nation's top businessmen to a dinner meeting in Washington, spelled out some ambitious goals, tapped Henry Ford II to head the operation—then left NAB pretty much on its own.

Yet NAB has confounded its critics by starting up fast—and actually gaining momentum. Its original goal was the placement of 100,000 workers by June 30 of this year. But that goal was reached before the end of 1968, and in an updated tally released last week, NAB reported that it has so far placed a total of 229,679 men and women—white, black, red and yellow—from the nation's urban slums and rural poverty pockets. More important, of those hired, 124,025 are still on the job—a retention rate of 54 per cent. That is just about the rate for the nation's white- and blue-collar work force as a whole.

MIND OPENERS

To the sellers of these results, both employer and employee have had to change. The typical hard-core unemployed livers [illegible] on a poverty level of $3,[illegible] a year [illegible] family of four; he is a high-school drop-out with no skills and no regular job for at least eighteen months. As often as not, he has a police record. "Employers are a lot more open minded than they used to be," says Paul W. Kayser, vice president for industrial relations of Pepsi Co., Inc., who is now serving as NAB president. "Until recently, most of these people [illegible]

For his part, the worker has to be convinced that somebody actually wants him. "Often," Kayser said, "they will be offered a job and won't show up simply because they are terrified of interviews. So what you have to do is arrange not only the interview but the means to get them to it."

To handle this chore, NAB has enlisted members of the government's Outreach program who seek out job candidates in ghetto bars and tenement buildings and then help them through the employment procedure. The Ford Motor Co., for one, has set up inner-city hiring halls in an effort to bring the job opportunity to the worker, while other companies ask longtime employees to shepherd new recruits through the first difficult months on the job.

Aside from the sheer numbers hired, perhaps the most encouraging aspect of the NAB program is the effort made at upgrading workers through on-the-job training. Even as Negroes in Chicago, Pittsburgh and other cities were demonstrating last week in an effort to gain more work in the building trades (page 34), NAB, with help from the Federal government, was expanding its in-plant, on-the-job training program to assist the hard-core.

During the present fiscal year, the government has set aside $120 million—by far the biggest slice of Federal manpower training funds—to finance programs at the 18,500 companies now participating in the NAB program. The average training grant is $3,000 per worker for an eighteen-month course. But in some cases the government will finance up to $5,000 in training. As one example, the Ford Motor Co. has hired some 2,800 workers at its inner-city employment centers at an average starting wage of $3.45 an hour. Already, "hundreds" of the new employees have moved up to higher-paying jobs through normal competition for better jobs. Currently, there are some 60,000 workers involved in training programs at NAB member plants and that number is certain to grow. Among other reasons, President Nixon's proposed new welfare program provides for an additional 150,000 job-training slots, many of which will presumably be in plants that are part of the NAB program.

Challenge: As far as most NAB leaders are concerned, the key to long-term success is training. As Donald M. Kendall, PepsiCo, Inc., president and NAB chairman, explained last week: "Say it takes a company $1,000 to train a regular employee; well, it might cost them $2,000 to train one of the hard-core unemployed. The government puts up the additional $1,000, but in one large area we studied, the government got its money back within 2 months [because of the savings in welfare costs, unemployment compensation and the sudden contribution of payroll taxes] That's not a bad investment for anyone."

But [illegible] NAB [illegible] face a challenge [illegible] the [illegible] NAB's vice chairman, Curtis [illegible] consortium [illegible] operate much like a [illegible]

[illegible] better than NAB that a great deal of work remains to be done. Estimates [illegible] hard-core unemployed who haven't been reached by NAB. The heath of the program also depends upon the continued health of the economy. As one Labor Department administrator observed: "If the economy takes a nose dive, this program is going to go to hell."

Still, for men like PepsiCo., Kendall, the effort is well worth the risk of disappointment. "The response has been marvelous by both business and the unemployed," he summed up last week. "In fact, I never would have dreamt of the response we would get when I first took over the job. It's been the most rewarding experience I have ever had."

A Parley to Raise Hawaii Immigration Gets Plea to Curb It

HONOLULU, Dec. 14 (AP)—Gov. John A. Burns called a conference on immigration to examine ways to attract more Pacific and Asian peoples to the islands. However, at the conference he heard a plea from a labor leader that the doors to Hawaii's open society be closed.

Edward Tangen of the International Longshoremen's and Warehousemen's Union said that Hawaii should take care of its own people first.

"The I.L.W.U. is not opposed to immigration," he said, "but is opposed to overpopulation or exploitation."

He said that his union did not want Hawaii's present work force "to run the risk of sharing the poverty solely for the purpose of priding ourselves on an open-door policy."

Governor Burns, in opening the conference Thursday, referred to Hawaii as an "open society that welcomes all visitors to our islands."

Increased immigration from the Pacific Basin, he said, is needed "to keep in balance that unique character of our society that makes us the envy of the world."

But Mr. Tangen retorted:

"We don't buy the argument that groups of people in the Pacific and Asian areas should be imported to maintain an ethnic balance.

"We are satisfied that a favorable balance should be maintained, based on the size of the labor force, the size of the total population and a

URBAN LEAGUE OUTREACH CONTRACT
ADDS 900 MORE APPRENTICE CANDIDATES

WASHINGTON -- The Labor Department has extended to August 1971 a highly sucessful contract with the National Urban League that will prepare nearly 900 additional minority youths for apprenticeship entry tests in the construction trades.

Manpower Administrator Paul J. Fasser, Jr., recently announced that extension of the apprenticeship outreach contract for $1.4 million will increase to at least 3,700 the number of youths being prepared for apprenticeship.

In 34 cities the past year, the Urban League outreach program has recruited nearly 10,000 minority youth who wanted to enter the construction trades. To help them pass written exams for specific apprenticeship openings, AFL-CIO journeyman instructors gave the youths up to 10 weeks of "tutor and cram" schooling.

Through this past September, 2,755 of these youths had passed their exams and become apprentices.

"We had expected the League to place only about 1,000," Fasser said, pointing out that experience had shown that only 10 percent of all youth recruited could successfully pass tests and be placed.

"But the League has placed almost 2,800 -- nearly tripling its expected contract goal, -- without additional funds, also, and we salute the League for this outstanding accomplishment," the Manpower Administrator said.

(MORE)

The previous contract between the Urban League and the Department was for $1,697,015 to support 25 outreach projects in the 34 cities. Four of the projects embrace 13 cities.

Other apprenticeship outreach program sponsors include the Workers' Defense League, with 2,144 placed; the Building and Construction Trades Councils, AFL-CIO, with 2,257, and eight other organizations with 876, totaling more than 8,000 apprenticeship placements (including the Urban League) as of October 1, 1970.

In addition, the Urban League has a separate on-the-job training (OJT) contract to train 5,500 unemployed and underemployed persons in 17 States assisted with $7.2 million in Federal funds. The League had successfully placed 12,355 trainees in jobs through its OJT projects up to October of this year.

As a byproduct of the National Urban League's Apprenticeship Outreach programs, it is estimated that about 45,000 youths will nave attended classes to a major or minor extent and received instruction in mathematics, reading, and other trade-related subjects, although they did not complete classes.

The Outreach program recruits prospects through local State Employment Service offices, Apprenticeship Information Centers, and various community-action agencies.

Written and oral tests are given by joint apprenticeship comittees representing management and labor in each trade.

(MORE)

Apprenticeship Outreach sponsors also counsel and assist those apprentices selected to remain in their chosen apprenticeships until successful completion.

(MORE)

The following is a breakdown by city of apprentice placement goals and funds apportioned under the extended National Urban League contract:

Allocation By City

City	Apprentice Placement Goal	Funds
Akron	50	$ 83,892

NEWS from the AFL-CIO

DEPARTMENT OF PUBLIC RELATIONS

(202) 293-5010

For Release:

A.M. PAPERS, WEDNESDAY, JANUARY 7, 1970

LABOR NEWS CONFERENCE PROGRAM 37, SERIES 9

The Nixon Administration has turned in a "pretty bad" first-year record in behalf of minority group Americans, with more show than substance, the AFL-CIO's Director of Civil Rights declared today.

Donald Slaiman said that unless the momentum of earlier administrations is again developed, "we will see a lot of razzle-dazzle, but a slowdown in minority progress." He made the statements on the AFL-CIO produced public service radio interview, LABOR NEWS CONFERENCE, broadcast Tuesday at 7:35 p.m. (EST), on the Mutual Broadcasting System.

Even the "substantial amount of progress" in earlier administrations "wasn't enough," Slaiman said, despite the implementation of "excellent legislation" that helped stem unemployment and stimulate school desegregation, manpower and poverty programs. He said that "significant gaps" in unfulfilled minority expectations existed when President Nixon took office, but instead of pressing ahead, the Administration slowed "what was being done -- on school desegregation -- on voting -- on training -- on eliminating poverty -- and on maintaining the kind of high-level employment situation that would produce more (job) opportunities for minorities."

Slaiman said the Administration's Philadelphia Plan "is of questionable legality, of little practical value," and, "given the nature of the construction industry," will do little to "bring Negroes into permanent jobs." He stressed that the building trades unions had already gone forward with affirmative programs to recruit, train and place minority workers in permanent jobs. He said the union-sponsored Apprenticeship Outreach programs have placed more than 5300 minority youngsters in registered apprenticeships, many of them in such highly-skilled crafts as "electricians, the pipe trades, iron workers, sheet metal workers and carpenters."

The union spokesman charged that the Philadelphia Plan is "a political gambit . . . a calculated attempt to confuse the public . . . about doing something on the job front to cover up a retreat in civil rights." He said he doubts that the "minority community really buys the idea that with this effort, the Administration is really doing something for minorities."

Reporters questioning Slaiman on LABOR NEWS CONFERENCE were William Eaton of the Chicago Daily News and Frank Swoboda of Business Week magazine.

LABOR NEWS CONFERENCE

PROGRAM 37, SERIES 9
Tuesday, January 6, 1970

SUBJECT : Civil Rights 1969

GUEST : Donald Slaiman, director of the AFL-CIO's Department of Civil Rights

REPORTERS: William Eaton, Washington correspondent for the Chicago Daily News
Frank Swoboda, Washington correspondent for Business Week magazine

MODERATOR: Frank Harden

MUTUAL ANNOUNCER: The following time is presented as a public service by this station and the Mutual Broadcasting System.

HARDEN: LABOR NEWS CONFERENCE. Welcome to another edition of LABOR NEWS CONFERENCE, a public affairs program brought to you by the AFL-CIO. LABOR NEWS CONFERENCE brings together leading AFL-CIO representatives and ranking members of the press. Today's guest is Donald Slaiman, director of the AFL-CIO's Department of Civil Rights.

Equality of opportunity in every phase of life -- education, employment, voting, housing and all the rest -- is a basic tenet of America's trade union movement. Here to question Mr. Slaiman about developments in civil rights during the first year of the new Administration and the first session of the 91st Congress, are William Eaton, Washington correspondent for the Chicago Daily News, and Frank Swoboda, Washington correspondent for Business Week magazine. Your moderator, Frank Harden.

And now, Mr. Eaton, I believe you have the first question?

EATON: Mr. Slaiman, how would you sum up the Nixon Administration's record on civil rights during the President's first year in office?

SLAIMAN: Well, I think it has been pretty bad -- since in previous administrations, we had a substantial amount of progress. Even that progress, we -- as well as the civil rights groups -- had concluded was just not enough, even though there had been excellent legislation and some implementation of it.

And, there was some especially significant economic progress, as a result of a decrease of unemployment, and an increase of manpower and poverty programs.

We had made substantial progress, but it wasn't enough.

In spite of this progress, there were significant gaps, not only in unfulfilled expectations, but in reality.

Then comes a new Administration that slows down what was being done -- on school desegregation -- on voting -- on training -- on eliminating poverty -- and on maintaining the kind of high-level employment situation that would produce more opportunities for minorities.

EATON: Mr. Slaiman, Attorney General Mitchell says there is about twice as much school desegregation now as there was in any year of the Johnson Administration. How do you say that that represents a slowdown?

SLAIMAN: Following the Supreme Court decision, the Congress, as well as the country, found that progress was at a snail's pace, instead of "all deliberate speed."

The Department of Health, Education and Welfare made regulations and used the powers they got under the Civil Rights Act -- sanctions -- where regulations weren't being followed, to end the dual school system in many states.

As they went along, the amount of desegregation accelerated.

Now, what you got this year, obviously, was more than the year before, and more than the year before that.

But, the Administration went into court and asked the courts to slow down.

This is the first time an Administration not only didn't take initiatives to implement the Supreme Court's school desegregation decision, but asked the courts to slow down. And remember, this was fifteen years after the Supreme Court ruled that dual school systems should be ended "with all deliberate speed", and then found out, a decade and one-half later, it was too slow and asked for acceleration.

Then the Executive Department goes in and asks the court to slow down.

Now, Mr. Mitchell can't take credit for the fact that there is more desegregation in 1969 than there was in 1967. They may, after losing their battle with the courts, now turn around and acquiesce -- do the job that they should have started doing when they came into office.

SWOBODA: Mr. Slaiman, on the basis of the first year's performance, what do you see for the next three years in the area of civil rights?

SLAIMAN: Well, I am afraid that unless momentum is again developed in the country -- and this has its effect in Congress -- that we will see a lot of razzle-dazzle, but a slowdown in minority progress.

In fact, if the economic indicators continue the way they have been going, there could be substantial retrogression.

SWOBODA: Well, one of the programs that the Nixon Administration has come up with or the Labor Department has come up with -- is the Philadelphia Plan -- for hiring minority workers on construction jobs -- federal construction jobs. What is the AFL-CIO's position on this? Why did it oppose it, when the rider was put into the supplemental appropriations bill in Congress?

SLAIMAN: Well, we opposed it on three grounds:

The civil rights resolution that our convention in Atlantic City adopted made it very clear. We did not oppose the Philadelphia Plan because we want to slow down the entry of minorities into skilled construction jobs. We opposed it because it is of questionable legality and of little practical value. It surely wasn't intelligently conceived, given the nature of the

industry and what is needed to bring Negroes into permanent jobs.

We also opposed it because it is, we think, a calculated attempt to confuse the public -- not merely the minority public, but the public in general -- to confuse them about doing something on the job front to cover up for a retreat in civil rights. It wouldn't do anything on the job front.

EATON: Mr. Slaiman, why do you say that it wouldn't do anything on the job front, when it would give a substantial federal spur to contractors to hire more minorities, who allegedly, --and, I think, admittedly, by all sides -- have been generally excluded, along with other workers, from building trades unions?

SLAIMAN: Well, you see there are a lot of myths about what the situation is in construction. There was, as in other parts of the labor force in the past, discrimination.

Occasionally, one can find it even today.

But the supposition that you make is that there are large numbers of skilled minorities being kept out of jobs because of discrimination.

This is not true.

The Building Trades, at their convention in Atlantic City, not only called for accelerating and increasing the effort to bring minority youths into apprenticeships, where they could be trained while getting paid decent wages, and learning to become top-paid journeymen. They also called on all of their locals to take the initiative to bring in every qualified minority journeyman that could be found.

They went further. They said that these locals should explore programs to bring in minority workmen who are not qualified to become apprentices -- who aren't presently qualified journeymen.

In other words, they called for a three-point program. The first part has been highly successful already, in bringing minorities into the trades through apprenticeships, and bringing whatever journeymen there are into the unions.

They also called for further exploration of ways to bring in minorities who were not qualified in either of those categories.

This is the sound way to provide permanent jobs in increasing numbers for minorities in these trades. What the Administration proposed instead of this would not bring them in.

SWOBODA: Well, Mr. Slaiman, in that case, how would you characterize the efforts of Labor Secretary Shultz and Assistant Labor Secretary Arthur Fletcher, who is in charge of the Office of Federal Contract Appliance -- their efforts to integrate the building trades and the construction unions? Do you think they are off on a lark, or, what are they doing?

SLAIMAN: Well, first let me quote Secretary of Labor Shultz. He said, in effect, that the most favorable way to increase the number of minorities in the trades would be to get an area-wide, affirmative action program from the unions and the contractors -- a program that would bring minority youths and workmen, on a permanent basis, into the union and into the permanent labor supply for the area. He said this is better than the Philadelphia Plan they proposed.

In presentation of the Philadelphia Plan, there has been very loose use of facts by many people.

Let's make clear what the Philadelphia Plan says, as they presented it on September 23rd. It would not be for all construction, it would set ranges -- minimum ranges -- for contractors to hire minorities in each of the trades where minorities were poorly represented, on particular federal jobs.

Now, a particular construction job for a journeyman can last a week, a month, two months, two years, three years. Most of them don't have long duration.

So all that is proposed is to set a minimum number for a particular contractor on some jobs.

Then, all the contractor has to do is make a good-faith effort to try to meet this number.

If he meets the number without bringing a single new Negro into the labor force, this is adequate.

If his good faith effort doesn't find anybody, this is also adequate.

Now, this is no guaranteed plan to increase the number of minorities who will be skilled -- who will have permanent jobs -- who will be in the union -- on either count, either way.

SWOBODA: Well, Mr. Slaiman, in late December, just before Congress adjourned, the AFL-CIO took --appeared to take-- a very active role in trying to bring about the defeat of the Philadelphia Plan. Yet, last August, AFL-CIO President George Meany said that labor wouldn't take this type of role. Does this mean that labor is now taking a new position, or a new stand regarding the Philadelphia Plan— attacking it?

SLAIMAN: No, the labor movement, and the AFL-CIO has said that we agreed with the stated objective announced by the Secretary of Labor. That was, to take affirmative action to bring more minorities into skilled jobs.

We still agree with this objective.

When the Comptroller General announced that he felt that the Philadelphia Plan, as amended, as presented, was illegal, and that he didn't want to expend federal funds on any program where federal law would be violated, we felt it was incumbent upon us to support him, because this was our position.

Federal funds shouldn't be expended where the NLRA is violated -- where the Civil Rights Act is violated.

Our main interest, however, in this area is to maintain our positive stance on civil rights matters -- across-the-board -- to work with civil rights groups and all people of good will -- to improve the position of minorities in employment, and education, and housing without unnecessarily attacking and underminding the position and security of other people.

We think this can be done.

We think that more minorities can be brought into skilled jobs, not only in construction, but in all

sectors of the labor market. This can be done, if we have a good economic climate -- if we end discrimination -- if we have affirmative programs to make up for the gaps that exist in education and training -- gaps that were caused by discrimination in the whole of society.

For example, when people pointed out, very early, that one of the big problems in getting the skills necessary to be a journeyman in the key trades was getting into apprenticeship programs, we not only endorsed legislation to guarantee non-discrimination in apprenticeships -- we not only endorsed compliance with the regulations drawn up by the Labor Department -- we also took the initiative to help develop affirmative programs to recruit, and prep, and place minorities in apprenticeships.

Let's look at the results.

There are 109,000 apprentices -- registered apprentices -- in construction. The Outreach programs have placed, in the last few years -- not merely recruited, not merely involved, but placed -- more than 5,000 minority youngsters in registered apprenticeships -- 5,304, to be exact, by October 31, 1969. And they are working.

Of these 5,304, 4,948 were in the construction industry. Of those in construction, 2,910, 60 percent were not in the trowel trades, where there already were Negroes in substantial numbers. These men were placed in the electricians, and the pipe trades, iron workers, sheet metal workers, and carpenters.

Now, this kind of program is consistent, is permanent and solid. It brings minorities into the trades and into the best-skilled jobs with the highest skills. They will be there permanently. And it doesn't undermine anybody else's right to get in. It doesn't violate the intent of the law.

And, it produces results.

EATON: Mr. Slaiman, I think you said earlier that a contractor would be exempt from the Philadelphia Plan, if he were involved in actively recruiting minorities. Is that still in the Plan?

SLAIMAN: No.

I said that the Secretary had made the statement that an area-wide plan by contractors and unions -- an area-wide, affirmative plan -- would be preferable to any other method.

EATON: But, there is no exemption for contractors or unions involved in such a plan?

SLAIMAN: The Labor Department has never spelled out what they consider would be such an area-wide plan.

The present Outreach program for recruiting apprentices existed in Philadelphia before they started their plan. They obviously don't consider this a sufficient area-wide plan, but they haven't said why.

We have gone further.

We have recommended that the Outreach programs go beyond apprenticeship. But the Labor Department, knowing this -- the Administration, knowing this -- knowing what the Building Trades had voted unanimously -- knowing what has already been successful on the apprenticeship front -- went ahead with this quota plan -- deliberately.

EATON: It is sort of a "rubber quota" though, isn't it? You can go from five percent to seven percent -- it has a lot of flexibility. If you make a good faith effort, you don't even have to meet that quota -- it's very "rubber," isn't it?

SLAIMAN: That is precisely the point.

It sounds as though a great deal is being done, but it doesn't have substance.

Yet, it's been effective -- not in bringing in minorities, but effective in dividing minorities, and liberals, and labor. It has been effective in allowing the Administration to sell the idea that they were doing something significant on civil rights, after a whole record of action after action that infuriated the civil rights organizations and the minority community.

EATON: You mean, it was a good political gambit for them?

SLAIMAN: It was a political gambit -- it is a political gambit.

Clarence Mitchell, who didn't agree with us on the Philadelphia Plan, points out that this was a political move to divide civil rights groups and labor, over what he considers a minor problem. Even if it worked -- if it worked completely -- it would provide only a small number of jobs.

EATON: Well, now that the Administration has won this test in Congress, do you think they will extend it to other cities -- Chicago and Pittsburgh, for example -- where there have been many demands for more black hiring?

SLAIMAN: Well, if they do, they will again interfere with the solution of the problems that are being worked on in those cities.

In both Chicago and Pittsburgh, the coalitions and the building trades have been negotiating for some time, with, presumably the benign interest of the Administration, and it hasn't been over quotas or ranges.

It's been over what kind of affirmative programs would produce the best results, given the actual situation in the industry.

SWOBODA: Well then, in summary, would you consider the Philadelphia Plan to be the Administration's "red herring," to draw attention away from the other areas of civil rights?

SLAIMAN: Yes, I would. And I would say it's a very dangerous game. What if the same criteria were used in other industries? They occasionally imply they are doing this, but they are not.

Let's take a look -- let's take a look at the newspaper industry.

EATON: Very few have federal contracts.

SLAIMAN: I know. But they have lower figures for professional, technical and higher-paying jobs than those few, selected locals in the building trades.

Should all future hirees on the major newspapers be black, until they reach an agreed-upon percentage, regardless of whether people are applying, qualified and trained? Should there just

be a number set, and nobody else hired until that number is reached -- in the federal government -- or any industry?

EATON: Mr. Slaiman, do you think that President Nixon's success in getting the civil rights organizations to line up on one side, and organized labor to line up on the other side of the Philadelphia Plan, is going to be successful in 1970, in splitting the liberal-labor alliance that has been so successful in the past?

SLAIMAN: No, I do not.

EATON: Why not?

SLAIMAN: Because it isn't that simple -- that all the civil rights organizations are lined up.

Nor is it true, in my opinion, that the bulk of the minority community really buys the idea that with this effort, the Administration is really doing something for minorities.

HARDEN: Thank you, gentlemen. Today's guest on LABOR NEWS CONFERENCE was Donald Slaiman, director of the AFL-CIO's Department of Civil Rights. Representing the press were Frank Swoboda, Washington correspondent for Business Week magazine, and William Eaton, Washington correspondent for the Chicago Daily News. This is your moderator, Frank Harden, inviting you to listen again next week. LABOR NEWS CONFERENCE is a public affairs production of the AFL-CIO, produced in cooperation with the Mutual Broadcasting System.

MUTUAL ANNOUNCER: The preceding program time was presented as a public service by this station and the Mutual Broadcasting System. The opinions expressed are solely those of the participants.

Philadelphia Plan Assailed As Masking Rights Retreat

Meany Calls Job Quotas Unworkable

The Philadelphia plan won't help a bit to increase the number of minority-group jobs in the construction industry and is simply a "concoction and contrivance" designed to mask the Administration's overall retreat on civil rights, AFL-CIO Pres. George Meany declared.

Meany, in a speech at the National Press Club in Washington, said "I have seen more misinformation and confusion about the Philadelphia plan from columnists, editorial writers and public officials than anything I have seen or heard in a long time."

The plan, which sets up government-determined "goals" for minority-group hiring on major federal construction jobs, would have been killed in the Senate by a rider to an appropriations bill on the ground that racial quotas in hiring are a violation of the 1964 Civil Rights Act.

Rider Removed

However, the rider was removed in subsequent votes of the House and Senate after a vigorous push from the Administration which included a White House press conference by Sec. of Labor George P. Shultz and Assistant Sec. Arthur Fletcher.

Meany described as "just plain, ordinary bunk" many of the press accounts of the plan, including one columnist's description of the congressional action as "the most important civil rights vote in the history of the country."

On the contrary, Meany said, the plan "served its purpose when it got the Madison Avenue publicity

(Continued on Page 11)

Meany Calls Quotas Unworkable:

Philadelphia Plan Assailed As Masking Rights Retreat

(Continued from Page 1)

job that was done on it." In actual practice, he said, the plan "will fall of its own dead weight."

"Perhaps the greatest drawback to the plan," he said, "is that it diverts attention from the real solid task of training and qualifying minority workers for a permanent place in the ranks of skilled workers, available and qualified for employment on all of the construction work in an area, not just the federally-financed work."

Such a solution is offered, Meany said, by the Apprenticeship Outreach program inaugurated by the AFL-CIO and its affiliates two and one-half years ago. In contrast to Outreach, he said, the Philadelphia plan has these shortcomings:

- The plan applies only to construction work and then on a job basis, which could mean employment for only a few months, while making no provision for getting minority-group members into permanent places in the area work force.
- A contractor could comply with the Philadelphia plan by transfering workers from private jobs to government jobs, without bringing any new workers into the work force at all.
- A "good-faith" effort is all that is needed for compliance, and a contractor could dismiss the responsibility with "one phone call to some source."

"The only sound method to bring minority representatives into the skilled construction trades is the comprehensive program outlined by the Building Trades and backed up in every

Recession, Inflation At the Same Time?

The Nixon Administration's anti-inflation policy isn't working because the key problem is "profit inflation," not catch-up wages, AFL-CIO Pres. George Meany said.

In answer to a question at the National Press Club, he warned that the Administration policy could bring about "a very strange phenomenon —a recession and inflation at the same time."

While "that's going to take a lot of doing," Meany observed, "it looks like Nixon may be able to do it."

that could be helpful in the black community—it would seem that this attempt to use the Building Trades as a whipping boy could be designed to give the Nixon Administration a few Brownie points to offset their shortcomings in the civil rights area as a whole."

Meany also contrasted the Administration's attitude toward the Building Trades with its approach to three big textile firms in the Carolinas—J. P. Stevens, Burlington and Dan River Mills. He said Shultz had pointed with pride to a six-month report that minority employment in those mills had risen nine-tenths of 1 percent, reach an overall ratio as of Sept. 30 of 18.3 percent under the pressure of the Labor Dept. "Big Deal. They came up to 18.3 percent in their employment of minority groups. This could be compared to the

Meany called for a similar breakdown by skills on employes of the southern textile mills. "Well, this isn't done," he said. "They don't break down the figures. They take the whole thing en masse and if you took the whole thing en masse, the Building Trades would be No. 1 in this area in the country.

"Nobody would be ahead of them—no manufacturers, no industrial set-up, not the auto workers or anyone else.

"Still, they try to make a whipping boy out of them because the percentage of the skilled trades is not as high as they would like to see," Meany said. "We would like to see it higher and the unions in skilled trades are doing what they can to make it higher."

And if breakdowns according to skills are going to be made, Meany said he'd like to see the same done for the textile mills, but "this would not fit in with the southern strategy" of the Administration.

Meany also refuted the figures of minority-group membership in the Philadelphia Building Trades on which the Philadelphia plan was based. The Labor Dept. set the figures for the Iron Workers at 12 minority-group members out of 850, or 1.4 percent.

"Our official union records show a different picture," Meany said. "We show that there is not one Iron Worker local union in Philadelphia, there are five. The total membership is not 850, it is 3,575, of whom 690, or 19 percent, are from minority groups."

He also challenged the statement that 302 Iron Workers

VOTER REGISTRATION efforts of organized labor for the 1970 elections are discussed by LaRoy H. Purdy, assistant to the president of the Communications Workers, and national COPE Dir. Al Barkan, right. Purdy is on loan to the AFL-CIO to direct the COPE registration campaign. He held the same post in 1968 when 4.5 million persons were added to voter rolls.

Such a solution is offered, Meany said, by the Apprenticeship Outreach program inaugurated by the AFL-CIO and its affiliates two and one-half years ago. In contrast to Outreach, he said, the Philadelphia plan has these shortcomings:

- The plan applies only to construction work and then on a job basis, which could mean employment for only a few months, while making no provision for getting minority-group members into permanent places in the area work force.
- A contractor could comply with the Philadelphia plan by transfering workers from private jobs to government jobs, without bringing any new workers into the work force at all.
- A "good-faith" effort is all that is needed for compliance, and a contractor could dismiss the responsibility with "one phone call to some source."

"The only sound method to bring minority representatives into the skilled construction trades is the comprehensive program outlined by the Building Trades and backed up in every way by the AFL-CIO," Meany said. "Even Sec. Shultz, after singing the praises of this [Philadelphia] plan, recognized its limitations just a few days ago when he strongly endorsed what he called an area-wide, multi-employer program.

"This is what we have. This is what Outreach is. But it was started under a previous Administration. It started under a different Secretary of Labor, and of course, it doesn't have the attraction of being something that can be attributed to this Administration," Meany observed causticly.

"And when we contemplate the record of this Administration in the civil rights field—the softening on voters' rights, delayed desegregation of the schools in the South, the attempt to put Strom Thurmond's baby on the Supreme Court, the cutting back of programs that could be helpful in the black community—it would seem that this attempt to use the Building Trades as a whipping boy could be designed to give the Nixon Administration a few Brownie points to offset their shortcomings in the civil rights area as a whole."

"a very strange phenomenon —a recession and inflation at the same time."

While "that's going to take a lot of doing," Meany observed, "it looks like Nixon may be able to do it."

Meany also contrasted the Administration's attitude toward the Building Trades with its approach to three big textile firms in the Carolinas—J. P. Stevens, Burlington and Dan River Mills. He said Shultz had pointed with pride to a six-month report that minority employment in those mills had risen nine-tenths of 1 percent, reach an overall ratio as of Sept. 30 of 18.3 percent under the pressure of the Labor Dept. "Big Deal. They came up to 18.3 percent in their employment of minority groups. This could be compared to the employment in Philadelphia of the Building Trades of over 30 percent minority-group members."

But the 30 percent minority-group involvement in the trades in Philadelphia is called meaningless, Meany noted, because it includes the membership in the "trowel trades," while the Philadelphia plan is "directed especially to iron workers, plumbers, carpenters, steam fitters, sheet metal workers and electricians."

Meany said the charge is often made that blacks are not admitted to the highly-skilled trades but only to the low-wage, dirty jobs. "First of all," he went on, "there are no low-wage jobs in the building trades. Lower paid at $7 an hour is not too much lower paid. And as far as dirty jobs are concerned, there are no clean jobs. They are all dirty."

cause the percentage of the skilled trades is not as high as they would like to see," Meany said. "We would like to see it higher and the unions in skilled trades are doing what they can to make it higher."

And if breakdowns according to skills are going to be made, Meany said he'd like to see the same done for the textile mills, but "this would not fit in with the southern strategy" of the Administration.

Meany also refuted the figures of minority-group membership in the Philadelphia Building Trades on which the Philadelphia plan was based. The Labor Dept. set the figures for the Iron Workers at 12 minority-group members out of 850, or 1.4 percent.

"Our official union records show a different picture," Meany said. "We show that there is not one Iron Worker local union in Philadelphia, there are five. The total membership is not 850, it is 3,575, of whom 690, or 19 percent, are from minority groups."

He also challenged the statement that 302 Iron Workers from minority groups were available for union membership in Philadelphia. Meany said the union president John H. Lyons, wrote to Shultz asking for names and addresses and pledging that these persons would be given every assistance in securing employment.

Shultz responded that it would be impractical to provide the names, Meany said, "because of the nature of the information-gathering techniques used by the Dept. of Labor." Meany said it therefore "seems reasonable to suggest that the Secretary of Labor might look over the fact-finding process that prevails in his department."

He said the labor movement had no apology to make for its commitment to civil rights and the stories which said the Philadelphia plan was splitting labor away from civil rights groups were not true. Meany traced labor's close ties with civil rights groups in various legislative programs, including its 1963 insistence on getting a fair employment practices clause into civil rights legislation at a time when the Kennedy Administration gave up on being able to get it passed.

The clause was included in the 1964 Civil Rights Act, Meany said, but the power to issue cease-and-desist orders to enforce it was stricken from the bill. That fight is still going on, he said.

"At the present time, the AFL-CIO and all of the civil rights groups are fighting side by side to re-establish these powers under the bill and the Nixon Administration, including the Secretary of Labor and the Assistant Secretary of Labor, are opposing these powers."

In contrast to the publicity surrounding the Philadelphia plan, Meany said the Outreach Program is progressing steadily, with minority-group participation in apprenticeship up to 9.4 percent from the 2.5 percent of 1960.

Chicago Minorities Pact Hailed as Pattern-Setter

The "Chicago plan" to step-up employment and training of Negro and other minority group workers in the construction industry is a "significant forward step," AFL-CIO Pres. George Meany said, and a possible guide for other areas of the nation.

The agreement, setting an immediate target of 4,000 job and training opportunities, was signed in Chicago's City Hall by the Chicago & Cook County Building Trades Council, the employers' association, and the Coalition for United Community Action, which includes black neighborhood groups.

"Its most important attribute," Meany said, "is that this multi-employer, area-wide agreement is truly a hometown product, developed by men aware of the problems, needs and practicalities of this area.

"It is an achievable program, that rests four-square on mutual trust. As such, it is vastly superior to any government-imposed quota system—which is, of course, artificial and discriminatory."

Meany's comments, contrasting the Chicago plan with the Labor Dept.'s government-dictated Philadelphia plan, were made in a letter to C. J. Haggerty, president of the

Chicago Minorities Pact Hailed as Key to Jobs

(Continued from Page 1)

AFL-CIO Building & Construction Trades Dept.

Meany noted that the agreement is "substantially in line" with the policy set by the building trades unions at the department's recent convention "and with the continuing policy of the AFL-CIO."

He promised the continuing cooperation of the federation's Dept. of Civil Rights in making the program work.

"The Chicago agreement may well serve as a guide to Building Trades councils in other areas as they implement your convention policy," Meany added.

He suggested that the department send copies of the agreement to its affiliated councils "for their study and consideration, for it is a worthy extension of Operation Outreach, which has already proven itself."

Six Months of Negotiations

In Chicago, delegates to the Building Trades Council unanimously endorsed the plan. Its key points had been proposed earlier by the unions and employers, but rejected last fall by the community action coalition. With help from Mayor Richard J. Daley, talks were resumed and agreement reached, ending six months of sometimes bitter confrontation.

Robert McGlotten of the AFL-CIO Dept. of Civil Rights helped bridge the gap between the black community groups and the construction industry unions and employers.

With the proviso "if general business conditions permit," the parties to the agreement "hope to achieve . . . over a period of not more than five years, a level of minority group employes proportionate to their percent in the community at large."

It stresses that neither skill standards nor collective bargaining provisions will be discarded or diluted in working toward greater minority group employment.

The first-stage target of 4,000 jobs contemplates:

- Recruitment of 1.000 workers, already possessing the skills of their trade, who will be accepted into the unions as full journeymen.

Last September, before the community action coalition agreed to the program, a construction industry labor-management committee opened a recruitment center for journeymen in the black community.

- Workers with at least two years of experience in a craft but with less than journeymen skills will work a 30-day probationary period and then be slotted into the appropriate step of the apprenticeship scale, as determined by the Joint Apprenticeship Committee for the craft. Alternatively, a special training program will be set up.
- Inexperienced young men from 17 to 23 would be eligible for a one-month pre-apprenticeship training program, similar to the Outreach program, to prepare them for apprenticeship tests.
- An on-the-job training program in industries where this is practicable for persons who do not wish to take the apprenticeship test or who fail the test.

The community groups would be expected to recruit applicants for the various programs—a source of difficulty in earlier efforts to increase minority membership in the skilled crafts. Applicants would have had to have been residents of Chicago for over one year.

An administrative committee for the program will include two union representatives, two employer representatives, two coalition representatives and the mayor or his designated representative. Each craft would have its own operations committee of four coalition representatives (who would be expected to be knowledgeable in the craft or industry involved) and two representatives each from the union and employers.

Fund-Raising Operations

Any action by the administrative committee would require approval by at least five of the seven members. The committee's functions would include fund-raising to finance the programs developed by the operations committees, including recruitment, counseling and staffing.

Thomas J. Murray, president of the Chicago Building Trades Council, termed the agreement "historic." He added:

"We are confident that if economic conditions permit, we will move ahead rapidly in bringing more minority youth into our industry. We will do this without diluting our standards, conditions and agreements."

Building Trades Are Yielding to Pressure, But Blacks Wonder if Jobs Will Open Up

By THOMAS LINDLEY EHRICH
Staff Reporter of THE WALL STREET JOURNAL

PITTSBURGH—"This is a monumental occasion," proclaimed William J. Usery Jr. Assistant U.S. Secretary of Labor.

"We didn't get anything," countered Nate Smith, an ex-prize fighter, and a leader of the Black Construction Coalition, a militant local group pressing for more jobs for blacks in well-paying construction jobs.

Both men were talking about a document made public last Friday after four months of heated negotiations involving the coalition, building trades unions and local construction-industry officials. The talks, sometimes mediated by Mr. Usery, were designed to solve a dispute that had triggered street demonstrations and temporary closedowns of construction projects in Pittsburgh last summer.

The document, "An Affirmative Action Program for Minority Progress for the Construction Industry," is intended to bring unions and builders here into compliance with a Federal executive order requiring that they grant minority workers equal opportunity for jobs in Federally aided construction work.

Federal Pressure

It was the latest in a series of signs that increasing Federal pressure is forcing building trades unions and contractors to unusual steps in attempting to correct the long-standing under-representation of Negroes in skilled construction trades. Only last month, a similar agreement involving black groups, unions and contractors was hammered out in Chicago under the eye of Mayor Daley. Just last week, the plumbers union signed a labor department agreement meant to increase journeymen's openings for Negroes.

Despite these apparent signs of emerging solutions to an old problem, there's some doubt how far such moves will go toward really opening many jobs to blacks. The Pittsburgh "agreement," for instance, was causing disagreement even before it was unveiled Friday. Thus, it was hastily redesignated a "Memorandum of Understanding," but then there wasn't unanimity as to just what had been understood.

The Pittsburgh program sets up a tripartite committee of union, industry and coalition representatives. It will develop training programs for minority workers. The plan also provides that the committee can interview graduating trainees and refer them to "craft selection committees" for union membership, but it doesn't require the unions to accept them.

In fact, nothing in the document is binding on individual craft unions—a sore point with the blacks. It was signed by the Building Trades Council of Pittsburgh, which is made up of several construction unions and which had voted "unanimously" to approve the document. But council president William Lally said actual participation in the plan is left to the unions and is contingent upon approval by rank-and-file members, who haven't been known for their sympathy toward the black job demands.

Only a Beginning

Black spokesman were quick to call the document only a beginning, not a solution to the problem. Lloyd Bell, chief spokesman for the coalition, called it "a first step toward building a complete affirmative action program, a skeleton to which meat must be added." It was the blacks who belatedly demanded that the document not be called an "agreement," which they felt would have suggested compliance with the Federal executive order.

The question of compliance is crucial because Federal construction funds have been held up pending evidence that Pittsburgh builders will come into line with the executive order. One industry official estimated that some $50 million in Federal construction money has been "frozen" pending compliance.

Unions and contractors argued that the document amounted to compliance. "We feel Federal funds should be released on the basis of what was done today," said Pasquale Navarro, vice president of the Master Builders Association, a contractors' group.

Mr. Lally of the union group said labor officials take a similar position, but he commented that the plan "doesn't obligate the unions to change their policies."

The "Memorandum of Understanding" itself doesn't specify how many blacks will be aided. However, a supplementary letter sent by the contractors to the Office of Federal Contract Compliance, an enforcement arm of the Labor Department, stated the contractors' intention to "make a good faith effort to employ 1,250 new minority journeymen" over a four-year period. But that number was contingent upon all unions approving the plan, and would be reduced proportionately if any unions balked.

Mr. Usery of the Labor Department wouldn't comment on whether compliance with the Federal executive order had been achieved. Some industry and union men angrily commented after the press conference that Mr. Bell's remarks might lead to a continuation of the Federal fund freeze. Mr. Smith of the black coalition said that was precisely what the blacks had in mind.

Despite apparent loopholes and the need for further negotiations, Mr. Usery hailed the Pittsburgh plan and said the Labor Department hopes for more such "home-town solutions." He said: "We're hopeful this is the initial step that will pave the way not only in Pittsburgh and Allegheny County, but in the rest of the country."

Similar negotiations on the same problem have been underway in other cities, including St. Louis, Detroit, Atlanta and Seattle. In Philadelphia, the Government has initiated a controversial plan of ensuring black representation on Federal construction that numerous critics contend is an illegal, racial-hiring quota system. The Philadelphia plan, viewed unfavorably by the unions, has served as a prod in the negotiations in Pittsburgh and elsewhere.

Week of February 9, 1970

AFL-CIO UNION COUNCILS TO PROVIDE APPRENTICESHIPS FOR MINORITY YOUTHS IN 2 CITIES

WASHINGTON -- Building and construction trades union councils in three areas will prepare 180 minority youths for skilled-craft apprenticeship examinations, the U.S. Department of Labor has announced.

The San Antonio Building and Construction Trades Council, AFL-CIO, has a new one-year contract, supported with $46,790 in Federal funds, to prepare 40 minority youths. The Council has already placed 42 youths as: carpenters (11), cement masons (3), electricians (4), plumber-pipe fitters (11), sheetmetal workers (10), and an elevator constructor, an ironworker, and a painter.

The Oklahoma City Building and Construction Trades Council, AFL-CIO, has a new one-year contract, supported with $49,620 in Federal funds, to train 40 minority youths. Among the 111 trainees previously placed in Oklahoma City by the Council were 9 bricklayers, 15 carpenters, 1 cement mason, 4 electricians, 1 ironworker, 2 operating engineers, 5 painters, 7 plumbers-pipefitters, 57 roofers, and 10 sheetmetal workers.

The Southern California Area Construction Opportunity Program has a one-year contract, supported with $126,187 in Federal funds, to train 100 minority youths from Orange, Riverside, and San Bernardino Counties. No previous contract existed for this area.

(MORE)

The contracts all call for up to 10 weeks of training to prepare the youths to pass specific apprenticeship entrance examinations, particularly in the building and construction trades.

The Apprenticeship Outreach program, aimed exclusively at minorities, uses the "tutor and cram" technique, to help youths enter the building and construction trades.

Youths who indicate interest and aptitude will be "drafted" to study for apprenticeship tests as openings occur. Program people will select the apprentices from among the larger group of aspirants. Skilled craftsmen and other specialists will be hired to develop materials and coach the prospective apprentices.

A project director will be employed to maintain liaison with employers, unions, joint apprenticeship committees, the Labor Department's Bureau of Apprenticeship and Training, and others.

Outlook for '70:

Battle Over National Priorities Emerges in Halls of Congress

The following is excerpted from "Congress and National Priorities," an article in the February issue of the American Federationist by AFL-CIO Legislative Dir. Andrew J. Biemiller.

THE FIRST SESSION of the 91st Congress will be remembered for passage of major tax legislation, the Senate's rejection of a Supreme Court nomination and the drawing of sharp battle lines with the Administration over appropriations, or what amounts to the ordering of national priorities.

The first two are history. The tax reform bill, while not as sweeping as the AFL-CIO proposed, was nonetheless the biggest step toward tax justice since 1912. The rejection of Judge Clement F. Haynsworth, Jr. for the Supreme Court is distinctive only as an example of what a concerned coalition can accomplish on a basic issue.

But the appropriations battle has barely started. It will be the name of the game throughout the second session—indeed the first action of the second session was the fight against a presidential veto in an attempt to add much-needed funds to education and health. The bid to override the veto failed in the House, but the fight for such funds will continue.

The AFL-CIO was totally involved on these issues in the first session and will be in the second session—joining the battle for adequate funds for the great social programs begun in the 1960s. Without the money—previously promised by Congress—these programs will wither and die in the 1970s.

Early in 1969 signs of a tax revolt among middle and low-income Americans were growing in the aftermath of publicity given a Treasury report of tax-dodging by millionaires and others of extreme wealth. The report confirmed charges labor had made for some time without getting publicity.

AFL-CIO President George Meany, testified that workers are "willing to pay their fair share" but are fed up with paying a share for millionaires. The federation proposed closing major loopholes to raise $16 billion in new revenue—enough to provide $9 billion for domestic programs and grant $7 billion in tax relief to low-and middle-

Congress came in the Senate at just past noon on Friday, Nov. 21. Packed galleries watched intently as the roll of Senators was called. When it was completed, the Senate rejected the nomination of Judge Clement F. Haynsworth, Jr. to the Supreme Court, 55-45.

Labor seeks extensive social security reforms through a bill introduced last year by Rep. Jacob H. Gilbert (D-N.Y.). It calls for further improvements in benefits; expansion of Medicare to cover prescription drugs and the disabled; financing of medical insurance on a contributory basis during working years; cost-of-living protection for benefits; an increase in the taxable earnings base and bringing the government in on social security financing.

THE 1969 SESSION passed two important safety bills: The Federal Construction Safety Act authorizing the Secretary of Labor to set safety standards for federal and federally assisted construction, and the Federal Coal Mine Health & Safety Act to set safety and health standards in coal mining and provide workmen's compensation to miners covering "black lung" disease.

These were other highlights of the first session, including the progress or lack of it on issues left to the current session:

- Congress extended for two years from June 30, 1969, the Office of Economic Opportunity and its anti-poverty programs, after the House voted down, 231-163, an attempt by the conservative coalition to turn the program over to the states.
- The same House coalition managed to scrap the 1965 Voting Rights Act to facilitate voter registration for Negroes in the South. It substituted an Administration program that would abolish close supervision of the South. Labor will press for extension of the 1965 act in the Senate.
- Congress approved a $4.8 billion, one-year expansion of major federal programs for public housing, rent supplements, urban renewal and government-backed housing insurance programs.
- The House approved a labor-backed constitutional amendment to abolish the Electoral College and choose the President and Vice President by direct vote. The Senate still must act.

By Press Associates, Inc.

WHEN THE AMERICAN PEOPLE suddenly discovered that a great many of their fellow Americans suffer from hunger or at least malnutrition, despite huge agricultural surpluses, they also discovered that hunger can be a worldwide problem.

There are, of course, areas of the world where hunger has been endemic—India, for example—but for most Americans the thought of a hungry world has been somewhat remote.

Yet, for many food scientists, the problem is by no means a theoretical matter. It is very real. Ever since Malthus published his theory that sooner or later human population would outrun food production, there has been a debate on the subject that is becoming increasingly heated.

There is one school—the "green revolution" one—that is convinced that Malthus was all wrong. They envision a continuing growth of food production through improved agricultural technology, use of fertilizers, new, highly productive and disease-resistant strains of useful plants and the cultivation of that vast storehouse of rich protein, the ocean, as holding the answer to increasing food needs.

There is a second school that takes the position that this optimism is unwarranted. Only recently two Stanford University scientists published a report contending that at least half a billion people in the world are undernourished or "slowly starving" while another billion are malnourished, that is suffering from nutrient deficiency.

They further contend that India alone would need half the world's present production of fertilizers to reach the scale applied in the Netherlands, and that hope for getting more food from the sea is made doubtful by problems of over-exploitation, pollution and economics.

The Population Reference Bureau early this year also published a study making the startling statement that "if all food in the world were equally distributed and each human received identical quantities, we would all be malnourished." This study contended that the only well-fed areas of the world are in the United States and Canada, parts of Western Europe, Australia, New Zealand and La Plata countries of Latin America.

The Russians, East Europeans and Japanese, the study said, belong to an in-between group, while Asia, Africa and most of Latin America are critical hunger areas.

WHATEVER THE MERITS of the conflicting viewpoints, the reality of hunger in the present world, our own country included, cannot be neglected.

Just as the United States suddenly appears to have come to the conclusion that today's pollution of the environment must be met head on and eliminated, so it would appear that a study of our

tion can accomplish on a basic issue.

But the appropriations battle has barely started. It will be the name of the game throughout the second session—indeed the first action of the second session was the fight against a presidential veto in an attempt to add much-needed funds to education and health. The bid to override the veto failed in the House, but the fight for such funds will continue.

The AFL-CIO was totally involved on these issues in the first session and will be in the second session—joining the battle for adequate funds for the great social programs begun in the 1960s. Without the money—previously promised by Congress—these programs will wither and die in the 1970s.

Early in 1969 signs of a tax revolt among middle and low-income Americans were growing in the aftermath of publicity given a Treasury report of tax-dodging by millionaires and others of extreme wealth. The report confirmed charges labor had made for some time without getting publicity.

AFL-CIO President George Meany, testified that workers are "willing to pay their fair share" but are fed up with paying a share for millionaires. The federation proposed closing major loopholes to raise $16 billion in new revenue—enough to provide $9 billion for domestic programs and grant $7 billion in tax relief to low-and middle-income families.

The bill worked out in conference passed the House, 381-2, and the Senate, 71-6. All opposing votes were cast by Republicans. It was signed into law by the President on Dec. 30, known as the Tax Reform Act of 1969.

Although the new law narrows long-favored capital gains tax treatment, it does not go far enough. The capital gains loophole remains an attractive tax escape for high income individuals.

However, the law is a good start toward tax justice. It contains notable reforms, most of which were opposed by the heaviest special-interest lobbying on any one bill in history.

The Senate rejected, 59-27, an amendment to the tax bill sponsored by Sen. Paul J. Fannin (R-Ariz.) and pushed by the National Right to Work Committee. It would have stripped unions from tax exempt status if they engaged in political activities, including non-partisan voter registration.

The most dramatic vote in the first session of safety bills: The Federal Construction Safety Act authorizing the Secretary of Labor to set safety standards for federal and federally assisted construction, and the Federal Coal Mine Health & Safety Act to set safety and health standards in coal mining and provide workmen's compensation to miners covering "black lung" disease.

These were other highlights of the first session, including the progress or lack of it on issues left to the current session:

- Congress extended for two years from June 30, 1969, the Office of Economic Opportunity and its anti-poverty programs, after the House voted down, 231-163, an attempt by the conservative coalition to turn the program over to the states.
- The same House coalition managed to scrap the 1965 Voting Rights Act to facilitate voter registration for Negroes in the South. It substituted an Administration program that would abolish close supervision of the South. Labor will press for extension of the 1965 act in the Senate.
- Congress approved a $4.8 billion, one-year expansion of major federal programs for public housing, rent supplements, urban renewal and government-backed housing insurance programs.
- The House approved a labor-backed constitutional amendment to abolish the Electoral College and choose the President and Vice President by direct vote. The Senate still must act.
- The Administration proposed extending unemployment insurance coverage to 4.8 million uncovered workers. The House approved an even smaller extension, 4.5 million. The AFL-CIO seeks extension to all of some 16 million workers plus federal standards for minimum benefits.

In this session, the AFL-CIO will press for a number of new social measures, strengthening of some existing ones and completion of some unfinished business from 1969.

Congressional action is needed to extend coverage under the Fair Labor Standards Act and increase its minimum wage to $2 an hour; apply federal standards to workmen's compensation; protect workers' pension rights; expand manpower programs and secure wage increases for federal employes.

Other labor goals will be advancement of a bill to establish a National Health Insurance program covering all Americans, additional consumer protection and critically-needed new restraints on air and water pollution.

Key to Results:

'Real Opportunities' Credited To Labor-Backed Chicago Plan

THE CHICAGO PLAN is directed at results, not rhetoric, in putting more minority group workers into construction jobs, declared AFL-CIO civil rights specialist Robert McGlotten.

The area-wide agreement directly involves the community as well as the unions and the industry in its operations, opening an effective course to "meaningful jobs . . . with real opportunities," McGlotten said.

Questioned by reporters on the network radio interview Labor News Conference, McGlotten said the Chicago plan is keyed to four key categories that will mean wider job opportunities for greater numbers of minority group workers.

He pointed out that the plan will open new opportunities for workers who already have journeyman experience, as well as those with limited experience, apprentices and workers who need on-the-job training.

McGlotten said that "if we are really serious about job opportunities, and we are going to get about the business of training people for meaningful employment," the way to do it is to expand, not contract, the "job market." He noted that at about the same time that the Administration was talking about its Philadelphia plan, it was preparing to cut back federal construction by 75 percent, thereby "shrinking" the number of real employment opportunities.

The federal government has to "understand two things" about equal employment opportunities, he declared: "We have got to have volume construction . . . and we have got to have continuity of employment," if there is going to be progress.

of useful plants and the cultivation of that vast storehouse of rich protein, the ocean, as holding the answer to increasing food needs.

There is a second school that takes the position that this optimism is unwarranted. Only recently two Stanford University scientists published a report contending that at least half a billion people in the world are undernourished or "slowly starving" while another billion are malnourished, that is suffering from nutrient deficiency.

They further contend that India alone would need half the world's present production of fertilizers to reach the scale applied in the Netherlands, and that hope for getting more food from the sea is made doubtful by problems of over-exploitation, pollution and economics.

The Population Reference Bureau early this year also published a study making the startling statement that "if all food in the world were equally distributed and each human received identical quantities, we would all be malnourished." This study contended that the only well-fed areas of the world are in the United States and Canada, parts of Western Europe, Australia, New Zealand and La Plata countries of Latin America.

The Russians, East Europeans and Japanese, the study said, belong to an in-between group, while Asia, Africa and most of Latin America are critical hunger areas.

WHATEVER THE MERITS of the conflicting viewpoints, the reality of hunger in the present world, our own country included, cannot be neglected.

Just as the United States suddenly appears to have come to the conclusion that today's pollution of the environment must be met head on and eliminated, so it would appear that a study of our natural resources and their conservation should be next in line.

The United States still has great resources in arable, food-producing land. Yet each year about 1 million acres of arable and semi-arable land are swallowed up by advancing industrialization and population growth—highways, airports, industrial plants—leaving the cities constantly expanding housing developments.

Just the physical loss of land is becoming more and more serious. In addition, the use of pesticides and fertilizers, urgently needed to produce larger and larger crops from smaller and smaller acres, is becoming a pollution problem of major proportions. The day may well come when their use will be barred or limited in the interest of a livable environment.

American expenditures for conservation of our Natural Resources are not commensurate with the problem. The Nixon 1971 budget, for example, earmarks $4.6 billion for natural resources, including recreational facilities, water resources and power. Of this, about $1 billion is for land management and other natural resources work.

These modest outlays in a $200 billion budget are not believed by conservationists to be adequate for the huge job that must be done if our people are to continue to remain among that small group of people who are well fed.

MEANINGFUL JOBS with real opportunities for minority workers are the objectives of the labor-backed Chicago plan, declares Robert McGlotten, center, of the AFL-CIO Dept. of Civil Rights. McGlotten was interviewed on Labor News Conference by Sam Sharkey, left, of the Newhouse Newspapers and William Eaton of the Chicago Daily News. The radio program is aired Tuesdays at 7:35 p.m. on the Mutual Broadcasting System.

M- Bldg Trade

A $3 MILLION LOAN from the AFL-CIO Mortgage Investment Trust Fund made possible this housing project in Pittsburgh. When completed, Penn Circle Tower will provide low-cost housing for 152 families.

Labor's Mortgage Trust Held Way To Build Jobs as Well as Homes

The placement of union pension money in the AFL-CIO Mortgage Investment Trust "offers a means to build unionism, create union jobs and aid union contractors caught in the tight money squeeze," AFL-CIO Urban Affairs Dir. John Evans says in an article for the labor press.

Evans explains the five-year-old Mortgage Investment Trust (MIT) as an opportunity for unions to help ease the nation's critical need of new housing for low- and moderate-income families. "At the same time, it is providing a better rate of yield on invested union monies and at a higher degree of security than many pension funds now realize." he observes.

The trust now has construction loans working in five major cities with projects in the planning stage in as many more. Evans

For unions which do not want to disturb their present investment program, Evans proposes the alternative of pledging a percentage of each month's new available funds to the MIT. The Painters international union and Local 77 of the Operating Engineers have done this

rity of MIT is often greater than in trusts in which union funds are now invested. If the mortgages are sold before maturity, they are subject to the FHA market prices, Evans notes.

It is a program "which will return a reasonable, secure yield,

Industry in 'Shambles':

Keenan Asks Action To Revive Housing

High interest rates have foreclosed on the dream of home ownership for millions of American families, the House Banking & Currency Committee was told.

Sec. Joseph D. Keenan of the International Brotherhood of Electrical Workers blamed current anti-inflation policies which "have made a shambles of the housing industry and are self-defeating since they are directly responsible for the soaring increase in the price of both new and existing housing."

The housing industry has been victimized by a one-two combination of high interest rates and tight money, he said.

Keenan, testifying at a hearing on housing mortgage funds, said the foremost challenge of the decade will be to assure a decent home and suitable environment for every American family. These goals were established in the Housing Act of 1949 and reaffirmed 19 years later in the Housing & Urban Development Act of 1968, he observed.

An AFL-CIO vice president, Keenan is chairman of the federation's committee on housing.

He told the Banking & Currency Committee that a number of bills it is considering are imaginative responses to the problems strangling the housing industry. They include:

- A proposal by Representatives Leonor K. Sullivan (D-Mo.) and William A. Barrett (D-Pa.) to create a Home Owners Mortgage Loan Corporation. It is intended to assist many middle-income families whose housing needs have been inadequately provided for.
- Committee Chairman Wright Patman's proposal to establish a
- Another proposal by Patman for the Mortgage Investment Act, designed to help meet national housing goals through the purchase of mortgages with private pension funds and Federal Reserve assets.

Keenan said there is much overlap between the Sullivan-Barrett bill and Patman's proposal for a development bank. He suggested the committee consider consolidating both bills into a National Housing & Development Bank bill.

He also noted that there is a growing consensus to make the Federal Reserve Board more responsive to the will of both the President and the Congress. Yet, he said, there are strong arguments for keeping an independent Federal Reserve and much more study and information is needed before any changes should be considered.

The impact of present monetary policy and inflation is severely hurting the housing industry, Keenan declared.

"Our nation's money managers in their insensitive wisdom were not satisfied with the impact of high interest rates so they implement policies which dried up the availability of credit," he said.

"Mortgage credit accounted for about one-third of the cutback in

A $3 MILLION LOAN from the AFL-CIO Mortgage Investment Trust Fund made possible this housing project in Pittsburgh. When completed, Penn Circle Tower will provide low-cost housing for 152 families.

Labor's Mortgage Trust Held Way To Build Jobs as Well as Homes

The placement of union pension money in the AFL-CIO Mortgage Investment Trust "offers a means to build unionism, create union jobs and aid union contractors caught in the tight money squeeze," AFL-CIO Urban Affairs Dir. John Evans says in an article for the labor press.

Evans explains the five-year-old Mortgage Investment Trust (MIT) as an opportunity for unions to help ease the nation's critical need of new housing for low- and moderate-income families. "At the same time, it is providing a better rate of yield on invested union monies and at a higher degree of security than many pension funds now realize." he observes.

The trust now has construction loans working in five major cities with projects in the planning stage in as many more, Evans says. He notes that the program has been expanded recently because of the housing crisis, which he describes as the worst in 20 years.

"Basically, the supply of housing has not kept pace with population increases or the current steep climb of marriages by the 'war babies' of 25 years ago," Evans says.

"With interest at a 100-year high and land costs high, the day of the $10,000 or $15,000 home is pretty well gone. The average price for a new home is over $20,500 and the typical wage and salary earner is already priced out of it."

All of this has resulted in a drop in housing construction to below the 1950 level, he notes, and the trade union movement is feeling the crunch—with unemployment in housing construction averaging 11.1 percent between 1960 and 1968.

At the same time, Evans points out, various unions have "some **$20 billion in union pension and welfare funds invested through banks, insurance companies and other financial institutions and only 5 or 6 percent of the total is invested in mortgages."**

Often, the unions are able to exercise little control over this money, it is pointed out, and there is no guarantee that it won't be used for loans to non-union contractors or anti-union firms. Also, the investment may not be yielding as much to the union as the 8 percent that can probably be expected from new investments in the MIT.

The long-range goal for MIT is described as $1 billion, with several hundred million sought immediately. The fund has grown by almost $3 million in the last two calendar quarters, Evans reports, and several million more has been pledged.

Certificates in MIT are issued in units of $500, with a minimum investment of $1,000, Evans explains, and the plan has the flexibility of allowing funds to be withdrawn on 60 days notice.

For unions which do not want to disturb their present investment program, Evans proposes the alternative of pledging a percentage of each month's new available funds to the MIT. The Painters international union and Local 77 of the Operating Engineers have done this recently.

All funds invested are insured by the Federal Housing Authority when held to maturity, Evans explains in pointing out that the security of MIT is often greater than in trusts in which union funds are now invested. If the mortgages are sold before maturity, they are subject to the FHA market prices, Evans notes.

It is a program "which will return a reasonable, secure yield, afford direct control over use of our own money and help solve a national problem too," Evans says. "Similar opportunities do not readily come to mind."

goals were established in the Housing Act of 1949 and reaffirmed 19 years later in the Housing & Urban Development Act of 1968, he observed.

An AFL-CIO vice president, Keenan is chairman of the federation's committee on housing.

He told the Banking & Currency Committee that a number of bills it is considering are imaginative responses to the problems strangling the housing industry. They include:

- A proposal by Representatives Leonor K. Sullivan (D-Mo.) and William A. Barrett (D-Pa.) to create a Home Owners Mortgage Loan Corporation. It is intended to assist many middle-income families whose housing needs have been inadequately provided for.
- Committee Chairman Wright Patman's proposal to establish a National Development Bank that would finance housing for low- and moderate-income citizens who suffer from the tight money squeeze and high interest rates.

He also noted that there is a growing consensus to make the Federal Reserve Board more responsive to the will of both the President and the Congress. Yet, he said, there are strong arguments for keeping an independent Federal Reserve and much more study and information is needed before any changes should be considered.

The impact of present monetary policy and inflation is severely hurting the housing industry, Keenan declared.

"Our nation's money managers in their insensitive wisdom were not satisfied with the impact of high interest rates so they implement policies which dried up the availability of credit," he said.

"Mortgage credit accounted for about one-third of the cutback in total outstanding credit in 1966. It is a gross injustice to impose one-third of the cutback necessary to reduce inflation on an industry which comprises 3.5 percent of the gross national product."

The money crunch has hurt low- and moderate-priced housing the most, Keenan noted. He compared the declines between 1965 and 1966: "The sale of housing priced under $12,500 dropped 51 percent; houses priced between $12,500 and $15,000 declined 42 percent, and those between $15,000 and $17,000 slid 20 percent."

While low and moderate housing was being massacred, the sale of housing priced over $30,000 rose 10 percent, Keenan pointed out.

There is a general agreement on the need to stop inflation, he noted, but "the disagreement is how to stop it and who should bear the burden of anti-inflation policies."

"Organized labor believes in a selective approach—the rifle as opposed to the blunderbuss—whereby efforts are made to control the areas of the economy which are causing the inflation."

Keenan said that inflation has been a convenient excuse for not recognizing the fundamental inadequacies of the mortgage instrument. Mortgages cannot compete with other forms of investment, and the result is that housing suffers even in periods when the economy prospers.

He cited the labor movement's efforts to ease the housing crisis through the AFL-CIO Mortgage Investment Trust. Unions and other labor organizations participate in the trust for investment in federally-insured or guaranteed construction loans and mortgages.

The IBEW pension fund and its affiliated funds own about 16,000 mortgages valued at more than $250 million, Keenan reported. He said the union plans to invest about $40 million in FHA and VA mortgages during 1970.

Nixon Outlines Broad Program To Combat Air, Water Pollution

(Continued from Page 1)

cleaning up the nation's environment:

WATER—Adopt uniform federal standards for purity. Encourage municipalities to build sewage treatment plants by offering $4 billion in federal grants from fiscal year 1971 through 1974. Stiffen penalties against polluters by authorizing fines of up to $10,000 a day for industries and cities.

AIR—Reduce exhausts from motor vehicles and authorize $9 million for research to develop a **"virtually pollution-free" automobile. Set federal minimum standards for air pollution for all communities. Stiffen enforcement with fines up to $10,000 a day.**

LITTER—Provide cash incentives for hauling abandoned cars to junk yards.

PARKS—Take a fresh inventory of all federally-owned land, especially that belonging to the Dept. of Defense, to open suitable areas for public recreation.

Particularly significant in the message was Nixon's emphasis on the need for greater federal authority in the enforcement of anti-pollution programs, a departure from his long-time advocacy of local and state controls.

"The present fragmenting of jurisdiction . . . has hindered comprehensive efforts," he said in referring to problems of water pollution control.

Nixon's message suggested that industry faces heavier cleanup outlays in the coming years.

This, he said, is based on the principle that "the nation's waterways belong to us all, and that neither a municipality nor an industry should be allowed to discharge waste into those waterways beyond their capacity to absorb waste without becoming polluted."

He also cited the need for stiffer clean air regulations with federal minimum standards.

The absence of national standards in the Clean Air Act of 1967 has meant that industries in states and communities requiring strict controls are often at a competitive disadvantage against "more permissive rivals," the President noted.

The act requires only that the federal government establish "air quality control regions," so individual states may develop air quality standards. But adjoining states within the same region have developed inconsistent standards, Nixon noted, and some areas of the country have remained outside the program completely.

The time has come, he stressed, for Congress to establish nationwide standards, giving the states one year to provide abatement plans to meet those standards and to provide for strict enforcement as well.

The President gave special attention to the automobile which, he said, accounts for nearly half of all air pollution in the country—dumping an estimated 66 million tons of carbon monoxide into the atmosphere annually.

He said the auto industry is voluntarily making plans to produce a 1972 model car that runs more efficiently on unleaded gasoline.

Under existing authority, Sec. Robert Finch of the Dept. of Health, Education & Welfare has issued new proposals to tighten federal emission standards for 1973 and 1975 model cars.

Nixon also ordered the start of an effort to "marshal both government and private research with the goal of producing an unconventionally powered, virtually pollution-free automobile within five years."

The President's new three-man Environmental Quality Council will direct a federal research program on such vehicles.

On the proposal for more parks, the President said that the federal government owns thousands of acres of land in and near metropolitan areas that is no longer needed. He said the property would be converted to recreational use or sold to finance new recreational areas.

Leo D. Ritter Dies, Merkle Official

Leo D. Ritter, senior vice president of Merkle Press, Inc., died at 69 after a two-month illness following a paralytic stroke. He was buried in Washington, D.C., after services at Christ the King Church, Silver Spring, Md.

Ritter had close personal and business ties to many unions as printer of numerous labor publications.

Born in Johnstown, Pa., he joined Ransdell, Inc., Merkle predecessor, in 1926. At his death he was an officer of Merkle and Publishers Co., Inc.

'Real Opportunities' Credited To Labor-Backed Chicago Plan

THE CHICAGO PLAN is directed at results, not rhetoric, in putting more minority group workers into construction jobs, declared AFL-CIO civil rights specialist Robert McGlotten.

The area-wide agreement directly involves the community as well as the unions and the industry in its operations, opening an effective course to "meaningful jobs . . . with real opportunities," McGlotten said.

Questioned by reporters on the network radio interview Labor News Conference, McGlotten said the Chicago plan is keyed to four key categories that will mean wider job opportunities for greater numbers of minority group workers.

He pointed out that the plan will open new opportunities for workers who already have journeyman experience, as well as those with limited experience, apprentices and workers who need on-the-job training.

McGlotten said that "if we are really serious about job opportunities, and we are going to get about the business of training people for meaningful employment," the way to do it is to expand, not contract, the "job market." He noted that at about the same time that the Administration was talking about its Philadelphia plan, it was preparing to cut back federal construction by 75 percent, thereby "shrinking" the number of real employment opportunities.

The federal government has to "understand two things" about equal employment opportunities, he declared: "We have got to have volume construction . . . and we have got to have continuity of employment," if there is going to be progress.

MEANINGFUL JOBS with real opportunities for minority workers are the objectives of the labor-backed Chicago plan, declares Robert McGlotten, center, of the AFL-CIO Dept. of Civil Rights. McGlotten was interviewed on Labor News Conference by Sam Sharkey, left, of the Newhouse Newspapers and William Eaton of the Chicago Daily News. The radio program is aired Tuesdays at 7:35 p.m. on the Mutual Broadcasting System.

Unions, Blacks Reach Accord In Pittsburgh

Pittsburgh—Building trades unions, their employers and a coalition of Negroes have entered into a "memorandum of understanding" to bring more members of minority groups into construction jobs.

The document sets up a tripartite committee of four members each from the Pittsburgh Building & Construction Trades Council, the Employers Association and the Black Construction Coalition.

The 12-member committee will develop programs to bring blacks into craft apprenticeship training, arrange for the hiring of qualified black journeymen where available and seek to place older black workers in construction jobs.

The memorandum doesn't specify any set number of opportunities to be opened to blacks. But a contractors' supplementary letter to the Labor Dept. pledged a "good-faith effort to employ 1,250 new minority journeymen" over the next four years.

Dir. Donald Slaiman of the AFL-CIO Dept. of Civil Rights said the agreement, like a similar one established recently in Chicago, is in line with policies set by the AFL-CIO Building & Construction Trades Dept. and the AFL-CIO.

"We hope that this action in Pittsburgh will bring a continuing flow of minority workers into the construction industry in that city," he said.

Construction Industry

Week of March 9, 1970

CONSTRUCTION INDUSTRY BARGAINING
UNIT ADOPTS DISPUTES PROCEDURES

WASHINGTON -- The Construction Industry Collective Bargaining Commission has adopted procedures that it will follow in labor-management disputes in the construction industry, Secretary of Labor George P. Shultz has announced.

The policy statement was adopted at a Commission meeting on January 27. The panel was created by President Nixon last fall for the purpose of assisting in the improvement of labor relations, manpower and other practices in the important construction industry. The Commission membership represents the industry, labor organizations, and the public.

Secretary Shultz, the Commission's Chairman, said the policy statement stresses that reliance in preventing and settling labor disputes will be placed upon procedures established by builders and construction unions themselves, and upon the regular mediation agencies of the Government. The Commission itself will enter disputes only in special situations.

(MORE)

The Secretary expressed hope that publication of the Commission procedures at this time would clarify its role before representatives of management and labor enter a period of intensive bargaining on contracts expiring this year.

It was pointed out that from information currently available approximately 850 contracts involving an estimated one million workers are to be renegotiated in 1970, most of them before July 1.

The Commission procedures contain several key points:

1. The Commission does not regard its procedures as a substitute for responsible effective bargaining.
2. The Commission endorses use of private dispute-settling procedures developed by the parties.
3. Full utilization of Federal Mediation and Conciliation Service assistance is expected.

The Commission summarized its policy as follows:

"In setting forth a disputes procedure the Commission emphasizes that it is not intended to provide a substitute for the collective bargaining process. Nor is it a means to bypass or neglect existing mediation facilities or industry branch dispute settling procedures. The standard procedure for the Commission to accept

(MORE)

cognizance over a collective bargaining dispute is through referral to the Commission by the Director of the Federal Mediation and Conciliation Service. The Commission will exercise its judgment in accepting or declining specific disputes. The staff of the Commission is directed to maintain close contact with the Federal Mediation and Conciliation Service on all aspects of bargaining in the construction industry and to see that critical disputes are brought to the attention of the appropriate International Union and the national offices of an appropriate contractor association."

HEARINGS ON EQUAL OPPORTUNITY IN NEWARK CONSTRUCTION WORK SET BY LABOR DEPARTMENT

WASHINGTON -- The Labor Department will hold public hearings this week in Newark, N.J., to obtain information for assuring that equal employment opportunity requirements are met in Federally-involved construction work in the Newark area, John L. Wilks, Director of the Office of Federal Contract Compliance, has announced.

The hearings will be held on March 18 and 19 in Room 807A and B, Federal Office Building, 970 Broad Street. They begin at 9:30 a.m. on March 18.

Information gathered from the hearings will be used by the Labor Department to carry out the requirements of Executive Order 11246 in Federal and Federally-assisted construction work in the Newark area.

Executive Order 11246 prohibits discrimination against any employee or applicant for employment because of race, color, religion or national origin, and further requires that the employer or prospective employer take affirmative action to insure equal employment opportunity.

The Department of Labor is responsible for implementing Executive Order 11246 throughout the country on Federally-involved construction.

Newark is one of 18 cities, and 1 of 6 priority cities, where special efforts will be made in 1970 to develop equal employment opportunity programs, the Labor Department announced recently.

The hearings will offer an opportunity to those working and living in the Newark area to present their views regarding implementation of the Executive Order before a panel designated by the Director of OFCC.

(MORE)

The information sought includes, but isn't necessarily limited to:

1. The current extent of minority group participation in each construction trade, and the full employee complement, of each trade.
2. A statement and evaluation of present employee recruitment methods as well as the assistance and effectiveness of any employer or union programs to increase minority participation in the trade.
3. The availability of qualified and qualifiable minority group persons for employment in each construction trade, including where they are now working and how they may be brought into the trades.
4. An evaluation of existing training programs in the area, including the number of minorities and others recruited into the programs, the number who complete training, the length and extent of training, employer experience with trainees and the need for additional or expanded training programs.
5. An analysis of the number of additional workers that could be absorbed into each trade without displacing present employees, including consideration of present employee shortages, projected growth of the trades and projected employee turnover.

(MORE)

6. The desirability and extent -- including the geographical scope -- of possible Federal action to assure equal employment opportunity in the construction trades.

Those invited to the hearings include community leaders, academic specialists, Federal, State and City legislators and executives, local contractors, representatives of local and national trade associations, officials of both local and national trade unions, and interested citizens.

Persons desiring to be heard should notify the Office of Federal Contract Compliance, 110 East 45th St., Rm. 533, New York City (Tele. 212-573-6066) of their intention to appear as early as possible. Those desiring to file written statements and pertinent information may file their materials with OFCC on or before Friday, March 20, 1970.

LABOR

Construction pay push is raising the roof

The datelines read Chicago, Miami, Hartford. The headlines blare:

- "Building strike ends; $21,000 a year victory."
- "Plumbers demand $13.37, double present pay."
- "Road laborers sign for 88.3% wage hike."

The Chicago story discloses that operating engineers had won pay boosts of upwards of $3.90 that would take them to $10.05 an hour in January, 1972. The Miami plumbers, capitalizing on a condominium building boom, demanded a $7.37 boost in their $6.07-an-hour rate over three years, and threatened to strike for it. The Connecticut road workers won hikes that will push their pay from $3.85 an hour to $4.50 now and to $7.25 by 1973.

The headlines underscore the obvious: Building trades pressures have not eased this year, despite the Nixon Administration's warnings about the heavy inflationary impact of construction settlements at "very high" levels.

Despite federal pressure, pay boosts in early contracts are nudging 20%

In 1969, the median first-year wage boost in building union contracts, as measured by the Labor Dept., was 14%, with increases averaging 12.8% a year over the duration of the pacts. That was almost double the rate for settlements in other industries. But if last year's rate caused worries, the trend so far in 1970 is generating bigger ones.

On the way up. In advance of pattern-setting agreements, ordinarily somewhat larger than the early settlements, the construction pay boost rate already is nudging 20%, according to Labor Dept. figures for the first quarter of this year. One in every four accords reported to Associated General Contractors, an employer association, called for annual pay increases averaging more than $1 an hour, ranging as high $1.64 for carpenters in Vero Beach, Fla. The AGC noted that in the 1960s, construction pay tended to double about every seven years, but that the trend now is for raises that would double pay every four years.

A couple of years ago, building trades were talking about an eventual wage of $10 an hour for skilled workers. But that level has been reached in some negotiated pacts, and unions now are setting sights on $13 to $14.

In Miami recently, a contractor commented: "If the plumbers get the money they want, I'm liable to go back to my tools." He and other contractors say demands are "exorbitant and completely unjustified," but they concede privately that they do not know what they can do about it.

The Nixon Administration is in much the same fix. It is against big construction settlements, because they are inflationary and run up the costs on many of government's urban programs. But the Administration's hopes of taking effective steps to hold down construction wage increases have been abandoned.

'If the plumbers get the money they want, I may go back to my tools'

Last September, President Nixon created a Cabinet Committee on Construction and a separate tripartite Construction Industry Collective Bargaining Commission to try to cope with the industry's particular problems. Above all, the aim was to forestall what Labor Secretary George Shultz called "the formula for disaster," by which building trades pay had risen almost 15% a year in 1969.

The Cabinet-level committee was charged primarily with the problems of federal construction work. Among other things, it took steps to spread work more evenly throughout the year and ease "seasonality" pressures on pay—workers' arguments that they need higher hourly rates to offset idleness in "off seasons."

The tripartite commission, headed by Shultz, is patterned after the Missile Sites Labor Commission, which has functioned quietly but effectively since 1961. The government, contractors associations, and building trades unions have four members each on the new panel. Its chief of staff is Dr. John T. Dunlop of Harvard, who for years served as the industry-unions arbiter of jurisdictional disputes. The commission is studying possible solutions for such major construction industry problems as manpower shortages and seasonality of work, as well as the industry's complex, costly, and strike-prone collective bargaining structure. It also is looking for ways to avoid the recurrent disputes over jurisdictional matters, minority hiring practices, and contract terms. The Administration's expressed hope was, and still is, that the panel's efforts might, in time, ease labor cost pressures.

Proposals. During its initial meeting, the commission suggested unanimously that bargaining, which is largely dispersed now, could be improved by imposing tighter controls over local union actions and giving union negotiators "binding authority" to sign labor agreements. This would eliminate contract rejections and renegotiations, avert many strikes, and perhaps avoid

Building pay: still soaring in '70

Early settlements	Raises in dollars	Spread over
Vero Beach, Fla., carpenters	$3.70	27 mos.

CONSTRUCTION JOB BIAS in the District of Columbia proves less prevalent among nonunion employers, a Government survey shows. It finds six of nine nonunion contractors on Federally assisted projects in compliance with Equal Employment Opportunity regulations. But only three of 19 union contractors were reported in compliance.

* * *

FEDERAL-EMPLOYE UNIONISM continues to grow, but at a slower pace.

The number of Federal workers represented by unions with exclusive bargaining rights climbed to 54% last November from 52% a year earlier. The gain was the smallest year-to-year increase since a 1962 Presidential order gave exclusively recognized unions the right to negotiate contracts. Outside the Post Office, union representation of blue-collar workers rose to 72% from 67%; the white-collar figure edged up to 29% from 28%.

The representation strength of exclusively recognized postal unions remained unchanged at 87% of all Post Office employes, according to the Civil Service Commission's latest count. The figure for the Post Office, which was highly unionized even before 1962, has been "about the same" since 1963.

The largest Federal employe union: The American Federation of Government Employes, which represents 482,000 workers.

* * *

THE CHECKOFF: To dramatize his case against no-strike laws for public employes, jailed Teachers Union president David Selden plans a series of "bread-and-water receptions" in 13 cities starting after his release from prison Thursday. . . . Departing from such traditional picket-line pastimes as drinking black coffee and singing union songs, striking Goodyear Tire & Rubber employes set up a tent near a plant gate where they spend some evenings watching stag movies and drinking beer.

FOR RELEASE: AM TUESDAY, MAY 19, 1970

70-15

Phone: 202/343-5621

Nationwide figures for 1968 on minority group membership in local unions with hiring hall or other referral arrangements were released today by Chairman William H. Brown III of the U. S. Equal Employment Opportunity Commission.

These statistics, based on 1968 reports from almost 3,000 local unions with more than 1.8 million members in hiring hall/referral bargaining units, show that Negroes account for 9.2 percent of the total membership in these unions. An additional 6.4 percent were Spanish Surnamed Americans.

In the building trades unions, Negro participation averaged 7.4 percent, ranging from no Negroes in the Asbestos Workers to 29.2 percent for the Laborers. A closer analysis indicates that almost three of every four Negroes in the Building Trades were members of the Laborers Union. Spanish Surnamed Americans made up 2.8 percent of the membership in the building trades unions.

Outside the construction unions Negroes accounted for 12.0 percent and Spanish Surnamed Americans 9.5 percent of the total membership. In these non-building trades unions, four international unions had substantial minority group membership: the Building Service Employees, Bakery and Confectionery Workers, Meat Cutters, and Hotel and Restaurant Employees. On the other hand, Patternmakers and Masters, Mates & Pilots reported an exceedingly low minority group representation.

In announcing the data today, Mr. Brown stated that "while we are aware of the efforts of some unions to increase their minority union membership, these figures indicate the need for more aggressive action by many others."

This data, which is the most up-to-date available, was prepared by the Office of Research and based on the 1968 Local Union Report EEO-3, required annually under Title VII of the Civil Rights Act of 1964.

LABOR

Integration drive fails to overcome

Plans for minority hiring in the building trades falter at working level

The efforts of the Nixon Administration to integrate the nation's building trades are bogged down in red tape and other complexities. Its "Philadelphia Plan" for minority group quotas on all federally financed construction has yet to produce results. Other programs are doing no better.

In part, this failure is a product of the times. Tight money and government spending cutbacks have put a crimp in construction, and too few jobs are being created for the inexperienced. Actually, building trades unemployment figures are running high in many areas. But the roots of the problem are as deep as racial prejudice itself—and plans that looked fine on paper have clearly failed in practice.

The Philadelphia Plan, strongly opposed by builders and the unions, is tied up in the courts. It is expected to wind up in the U.S. Supreme Court, with the distinct possibility that its quotas aspect will render it unconstitutional. In Newark and Boston, where the plan was to be used, some hearings have been held, but actual programs appear far off.

In Buffalo, Governor Nelson Rockefeller ordered construction resumed on the state university buildings despite tough talk by the Administration that minority hiring in the city should be speeded up. In Chicago and Pittsburgh, "hometown solutions" were worked out between the unions and the industry in an effort to keep the government out. In both cities, plans were drawn up to put thousands of blacks into construction jobs at various levels—from starter jobs, to trainees, to journeymen. These plans were negotiated under the pressure of minority-group demonstrations and the angry reactions of "hard hat" union members. But, so far, the gains for blacks under these plans have been minimal.

Only in Seattle is a plan working. And this formula developed with little federal involvement. The program grew from efforts to bring together federal contractors, who must hire minorities, and the unions, whose hiring halls got in the way of open hiring. Problems remain, but there is progress. Unions and employers agree there would be more progress if the slowdown had not severely limited the number of available jobs. The plan is being implemented with the help of a non-profit corporation, BUILD, set up and financed by the building unions, joint apprenticeship committees, and several non-construction unions.

The statistics. Few question the seriousness of the problem. A recent report by the Equal Employment Opportunity Commission showed that blacks averaged 7.4% of all jobs in the construction industry—with their ratio varying from virtually none in the Asbestos Workers to a high of 29.2% among low-skilled Laborers. Minority membership in the latter group exaggerates the position of blacks in the building trades—EEOC studies show that almost three out of four blacks in the construction industry are Laborers. In general construction, blacks make up 3.2% of the work force; in the higher skilled mechanical trades only about 1.4%.

Even these figures represent gains over the past. Many of the unions are trying to increase minority-group membership, but, according to EEOC's chairman, William H. Brown III, "more aggressive action" is necessary by all unions. The question is: What kind of action?

Unions decry 'quota system'; contractors say they're caught in a hopeless situation

In other industries, the government acted against individual employers. Because of the special problems of the construction industry, with its casual employment and hiring through unions, a different approach was taken: EEOC "standards for affirmative action" to be met by any employer with a contract involving federal money. EEOC decided to set minority-hiring goals on an area basis, and initiated its pilot plan in Philadelphia.

The criticism. The plan there has been under constant attack. Labor—from the AFL-CIO's George Meany down to the union "hard hat" building tradesmen—criticizes it as "a quota system" that is unworkable and unfair. Contractors contend that they are in the middle of a hopeless situation. They say they are required to hire blacks who are not available and who would not be usable or acceptable to unions if they were. And civil rights groups protest that the plan does not assure enough jobs.

The government is trying to make the Philadelphia Plan more acceptable to contractors, less of a threat to the union apprentice system, and more productive of jobs for minorities. But conflicts continue, and the plan still is not in operation.

Andrew Freeman, director of the Philadelphia Urban League and chief of a citizens' watchdog agency—the Action for Jobs Committee—says that he "is very disappointed in the failure of the Labor Dept. to monitor construction sites." As yet, there is no estimate of how many minority group members, if any, have been hired under the plan.

Benjamin Stahl, head of the city's Human Resources and Development Institute, a manpower arm of the AFL-CIO, says; "The Philadelphia Plan is a good slogan, but ineffectual. I don't think one person has been put to work under the Philadelphia Plan." Like other union spokesmen, Stahl complains that there is no "intensive training program to upgrade the skills of inexperienced black workers."

Demonstrations in Pittsburgh brought pledges but so far few jobs for blacks.

Meanwhile, federal plans have run afoul of state politics. The building trades are important politically in every big city. They have clout in city halls and state offices. In Newark and Boston, the unions, supported by contractors, appear to have bottled up local proposals—for now.

In Washington, all future federal construction work has been held up by a District of Columbia row over quotas

THE 3 "STATES" OF

Tennessee

3 STATES IN ONE

for minority hiring on the city's new subway system. Black groups, supported by former EEOC Chairman Clifford Alexander, accuse the government of presenting a false picture of minority employment in the area.

A year after the plan for minority hiring was first announced by the Labor Dept. in the Philadelphia test area, few additional blacks are on the job. A long and potentially hot summer is dead ahead.

Chicago's plan. Chicago's six-month old plan for bringing blacks into the construction trades has labor's approval because it permits, the unions say, a greater degree of voluntary action. Contractors and unions blame the lack of progress on the fact that funds were slow in forthcoming. Blacks say the cause is "discrimination by whites—the old story all over again."

But, while the Chicago plan itself has not showed much in the way of positive results yet, more blacks are getting jobs in the city's building trades unions under the unions' own rules. Labor spokesmen say there is "more concern being shown" for the needs of the blacks. Observers point out, however, that the unions were under very heavy attack for discrimination and, to alleviate some of the pressure, they may be taking in blacks they might have excluded before.

'I doubt if one man has been put to work with the Philadelphia plan'

Chicago's Black Coalition was important in winning the minority-job plan. It has an important role in making the plan work. But unions and contractors complain that the alliance of minority groups has not learned to work harmoniously with whites. One labor man said, "We're bending, but they haven't learned to. They don't realize that once the fight is over, you have to work together." Moreover, conflicts exist within the Black Coalition, itself. So far, the strain is beneath the surface.

For a time last week, trouble seemed imminent on the streets of Pittsburgh, where another "hometown plan" has bogged down. There, too, difficulties of working with a militant Black Construction Coalition, an amalgam of black organizations, appeared to be at the root of the problem. Police were alerted for demonstrations and marches similar to those last September. Unions agreed to open up 58 jobs for black apprentices immediately and to set up union subcommittees to decide on additional numbers of blacks to be given jobs. This staved off new confrontations—but the 58 jobs agreed on and the promises of more are a long way from the "at least 1,200 black jobs" demanded by the coalition. ■

AFL-CIO News 7-11-70

In 3 More Cities:

Trades Sign Pacts On Minority Jobs

Area-wide agreements to bring an increasing number of black workers and other minority-group members into the building trades have been signed in three more cities—Boston, Denver and Los Angeles.

The plans, similar to earlier agreements worked out in Chicago and Pittsburgh, provide for recruiting, counselling and placing of minority-group members at all levels of the building crafts.

All three plans call for pre-apprenticeship training and apprenticeship entry, but also for upgrading to journeyman status for older workers with some experience in a craft.

In each instance, the agreement was signed by representatives of the local Building Trades Council, the contractors association and representatives of minority organizations.

In Boston, the signatories included the Workers Defense League, one of the original groups which set up Apprenticeship Outreach, a three-year-old program which has placed over 6,000 apprentices in more than 60 cities. Outreach was subsequently expanded to include upgrading to journeyman status.

All three of the new agreements established boards to oversee the program.

In Los Angeles, the board will consist of 20 members, four each from the building trades and contractors association and 12 from minority-group organizations. Those 12 are broken down to four spots for Negroes, four for Mexican-Americans, three for Asians and one American Indian.

for jobs at the appropriate level—apprentice, trainee or journeyman.

The Los Angeles agreement was signed at a meeting of the full city council with press coverage. John A. Cinquemani, executive secretary of the Los Angeles Building and Construction Trades Council and one of the signers of the agreement, told the press that "one important ingredient is missing—jobs" and urged the council to take "bold steps to create jobs in the city."

All three agreements will span five years. The original Boston agreement is for one year, renewable annually for a total of five years overall. Denver set up an 18-month program originally, also with extensions to five years, and the Los Angeles agreement is for five years, with year-to-year extensions on a self-renewing basis after that.

KANSAS CITY PLAN FOR BOOSTING MINORITY HIRING IN CONSTRUCTION INDUSTRY ANNOUNCED BY LABOR DEPARTMENT

WASHINGTON -- Secretary of Labor J.D. Hodgson has announced that local parties have reached agreement on a Kansas City Plan for increasing minority hiring in construction trades.

Kansas City was one of 18 target cities designated by the Labor Department last February for concentrated efforts to achieve equal job opportunity in the construction industry.

The Kansas City agreement brings to six the number of these cities where unions, employers and minority coalitions have worked out "hometown" plans for minority hiring in the industry.

"This latest agreement is another encouraging step toward America's long-standing goal of equal employment opportunity," Secretary Hodgson said.

"But the signing of this agreement is not an end in itself," he added. "It is a beginning. Achievement of equity at the workplace is a day-to-day process that requires earnest efforts by all parties involved.

"For its part, the Labor Department will continue giving metropolitan areas the opportunity and assistance to develop area-wide, voluntary agreements, that cover public as well as private construction.

"Where such agreements are not possible, the Department will continue to impose solutions such as those initiated in Philadelphia and Washington, D.C."

Other target cities which have worked out area-wide agreements for achieving equal opportunity in various construction crafts are Boston, Denver, Los Angeles, St. Louis and Indianapolis.

Two other cities -- Chicago and Pittsburgh -- developed hometown solutions before the target list was established. In addition, a hometown solution has been reached in Rochester, New York, a non-target city.

On July 9, Secretary Hodgson announced an intensive summer program to assist cities in developing hometown agreements to achieve equal opportunity in construction work.

Secretary Hodgson listed these basic ingredients of the Kansas City Plan.

-- It will cover all Federal, State, local, and private construction work in the Greater Kansas City area (10 counties in Missouri: Clay, Platter, Jackson, Bates, Carrol, Lafayette, Ray, Johnson, Henry, Cass; 3 counties in Kansas: Wynadote, Johnson, and Miami).

(MORE)

-- It will provide that within a 5-year period minority representation in the construction trades be equal to the minority proportion of the population. The goal of the plan is the employment of 1100 additional minority workers within the 5-year period.

-- It will establish a tripartite, 7-member Administrative Committee to implement the program. Operations committees for each trade will formulate programs with goals and timetables for each trade.

The Labor Department's Office of Federal Contract Compliance assists cities in drawing up hometown agreements. OFCC is responsible for carrying out Executive Order 11246, which prohibits discrimination in Federal contract work because of race, color, religion, sex and national origin and requires contractors to take affirmative action to insure equal job opportunities.

MINORITIES MAKE UP MORE THAN ONE-FIFTH OF WORKERS EMPLOYED IN PHILADELPHIA PLAN PROJECTS, HODGSON REPORTS

WASHINGTON -- Employment of minorities in construction trades on current projects covered by the Philadelphia Plan is running ahead of the required first-year goals, Labor Secretary J. D. Hodgson has stated.

Mr. Hodgson reported that 41 minority group members comprised 22.7 percent of the 180 persons actually at work in five mechanical trades on 25 projects covered by the plan as of Friday, September 4.

This fact was turned up in on-site reviews conducted by the Labor Department over two weeks to validate contractors' regular reports which indicate the percentage and number of hours worked by minorities. The reviews verified data from the employer reports.

Though the covered crafts traditionally are only a small segment of the total work force on construction sites, they are the five high-paying mechanical crafts from which minorities have been largely excluded in the past.

When the Philadelphia Plan was unveiled, it was reported that minority workers make up less than 2 percent of the six construction crafts unions now covered by the plan.

The great majority of the workers on projects reviewed were in crafts not covered by the plan. These other crafts traditionally have had much larger minority representation than the mechanical crafts.

The year-old Philadelphia Plan requires all bidders on Federally-involved construction projects exceeding $500,000 to submit affirmative action plans setting goals and timetables for utilizing minorities.

The following is a status report on employment of minority workers for five of the six crafts covered by the plan as of September 4, date of the last one-site survey:

-- Iron workers: total number, 70; minorities, 21 (30%)
-- Steamfitters: total number, 8; minorities, 2 (25%)
-- Sheetmetal workers: total number, 13; minorities, 2 (15.3%)
-- Electricians: total number, 48; minorities, 12 (25%)
-- Plumbers and Pipefitters: total number, 21; minorities, 4 (9.7%)

Not any elevator construction workers -- the sixth trade covered by the equal employment opportunity plan -- have been involved in the 25 on-going projects surveyed by the government.

The first-year goals of the trades are: iron workers, 5% to 9%, plumbers and pipefitters, 5% to 8%; steamfitters, 5% to 8%; sheetmetal workers, 4% to 8%; electrical workers, 4% to 8%, and elevator construction workers, 4% to 8%.

(MORE)

By the end of 1973, these goals will range from a high of 22% to 26% for iron workers to 19% to 23% for sheetmetal, electrical and elevator construction workers.

Anticipating an increase of Federally-involved construction activity over the remaining three years of the Philadelphia Plan, the Labor Department is developing a training program to assure an ample supply of minority craftsmen for these expanding job opportunities.

Out of 43 contractors involved in the 25 projects now under way, Mr. Hodgson said, six either are not or appear not to be complying with the Philadelphia Plan.

Of these six employers, three have been served with notices to show cause as to why the Government should not move to cancel their contracts and to deny them future contracts. One of these has been notified that the Government intends to impose sanctions. The contractor has requested a hearing.

The Labor Department will ask that a show-cause order be issued in another case and will check the payroll records of the other two contractors to determine if they are in compliance after the on-site review turned up possible deficiencies.

To date, nine show-cause notices have been issued, with Federal agencies subsequently finding that six of these contractors have sufficiently corrected their deficiencies and are judged to be in compliance.

The Labor Department's Office of Federal Contract Compliance is responsible for carrying out Executive Order 11246, authority for implementing the Philadelphia Plan. This order prohibits discrimination in Federally-involved contract work and requires contractors to take affirmative action for achieving equal job opportunity.

3,000 MINORITY APPRENTICES PLACED THROUGH "OUTREACH"

WASHINGTON -- More than 3,000 minority youths became apprentices in the building and construction trades through the Apprenticeship Outreach Program during the year ended June 30, Secretary of Labor J. D. Hodgson has announced.

The 3,052 entering apprenticeship from July 1, 1969, through June 30, 1970, brings to more than 6,900 the number of minorities who have become apprentices through the outreach program.

During this period, 6,914 minority youths from all sources became apprentices in programs registered with the U.S. Department of Labor or with State Apprenticeship Agencies.

Citing this achievement, Secretary Hodgson said, "This program is but one of the means we are pursuing to get more minority group members into the skilled building and construction trades. The success noted here indicates that we are moving in the right direction. When our goals are reasonably attainable, they can be met."

The more than 6,900 apprentices in the program are learning one of 18 building and construction trades such as carpenter, structural iron worker, operating engineer, and a few miscellaneous trades.

Apprenticeship Outreach uses the "tutor and cram" technique to assist minority youths (Negro, Mexican American, Puerto Rican, Indian, and Oriental) in preparing for specific apprenticeship examinations.

The courses run from four to 10 weeks, determined by the type of test to be given and each trainee's individual needs.

Apprenticeship Outreach agreements have been signed with 10 different sponsoring groups to conduct 78 programs serving minority youths in 81 major industrial cities and intracity areas. The programs represent a total Labor Department investment of more than $5.6 million.

Sponsoring groups include the National Urban League which operates 29 projects in 32 cities to place 980 apprentices; the Workers' Defense League has 16 projects in 17 cities to place 915; the local building and construction trades councils of the AFL-CIO operate 26 projects serving 27 cities to place 1,320 apprentices; 7 other sponsors operate one project each in six cities with a total placement goal of 920 apprentices.

Of the more than 6,900 placed as apprentices, the Urban League placed 1,015 during fiscal year 1970 for a new high of 2,415; the Workers' Defense League 650 for a new total of 1,923; the building and construction trades councils 933 for a total of 1,803; and the others 454 for a new total of 773.

(MORE)

Among the 18 building and construction trades in which all except about 4 percent of the 6,914 minority youths are apprenticed, five trades account for 3,918, or more than 56.6 percent of the total. They are: carpenter, 1,410 apprentices; electrician, 746; plumber and pipefitter, 643; painter, 633; and sheet metal worker, 486.

Biggest gains during the fiscal year were made in the carpenter trade, 641 apprentices; followed by electrician, 309; painter, 310; plumber-pipefitter, 275; and operating engineer, 216.

On July 1, 1969, 53 Apprenticeship Outreach projects were in operation. By the end of June 1970, 26 more had been added.

Other more detailed information on the Apprenticeship Outreach Program follows:

MINORITIES SHOW CONTINUING GAINS AT
APPRENTICESHIP INFORMATION CENTERS

WASHINGTON -- Twenty-two percent of all apprentices placed last year by the 36 Apprenticeship Information Centers were from minority groups, Secretary of Labor J.D. Hodgson has announced.

During the year ended June 30, about 1,700 minorities became apprentices in programs registered with the U.S. Department of Labor, out of 7,800 who were placed through the AIC's.

The minority placement rate is 7 percent better than that for the previous year and 33 percent higher than that for the year ending June 30, 1968.

The Secretary pointed out that the AIC's, part of State Employment Security operations in 22 States, were not established primarily to place persons in apprenticeship, but were doing so as part of their services to prospective candidates.

During the year, 49,900 persons appeared at the Labor Department-sponsored AIC's 16,900 or 34 percent from minority groups.

Of this number 36,800 were referred by the centers to employers of apprentices, 11,400 (31 percent) members of minority groups.

During the three-year period ending June 30, 1970, 127,300 persons interested in apprenticeship programs appeared at the 36 centers, 40,000 (31 percent) minority members; 89,900 were referred to employers, 23,500 (26 percent) minority members; and 22,100 were accepted as apprentices, 4,300 (20 percent) minorities.

Apprenticeship Information Centers were conceived in 1963. Their purpose is to provide available information on apprenticeship opportunities in the community in which they operate and to give necessary support and assistance to young men and women who wish to become apprentices in the skilled trades.

Since the first AIC was established in Washington, D.C., in 1963, 35 more were added, operating in the District of Columbia and in 22 States.

To promote the work of the centers during fiscal year '70, staff personnel at the 36 centers made nearly 6,000 personal contacts and over 18,500 telephone contacts with employers, unions, apprenticeship committees, community organizations, vocational schools, and other groups interested in increasing the number of apprenticeship opportunities in the skilled trades.

Detailed information on the activities of the Apprenticeship Information Centers over the past three fiscal years and the locations and names of the 36 centers now in operation follow:

NEW ORLEANS, SANTA CLARA PLANS FOR
EXPANDING MINORITY HIRING IN CONSTRUCTION
ANNOUNCED BY LABOR DEPARTMENT

WASHINGTON -- Local citizens in New Orleans and Santa Clara County, California, have reached agreements on plans to increase minority hiring in construction trades, Labor Secretary J.D. Hodgson has announced.

New Orleans was one of 18 target cities designated by the Labor Department last February for concentrated efforts to achieve equal job opportunity in the construction industry.

The New Orleans agreement brings to seven the number of these cities where unions, employers and minority coalitions have worked out "hometown" plans for minority hiring in the industry.

Other target cities which have worked out area-wide agreements for achieving equal opportunity in construction crafts are Boston, Denver, Los Angeles, St. Louis, Indianapolis and Kansas City.

Two other cities -- Chicago and Pittsburgh -- developed hometown solutions before the target list was established. And Rochester, New York, a non-target City, has also worked out a local agreement.

Secretary Hodgson said the New Orleans and Santa Clara agreements represent "encouraging steps toward America's long-standing goal of equal employment opportunity.

"But the signing of these agreements is not an end in itself," he added. It is a beginning. Achievement of equity at the workplace is a day-to-day process that requires earnest efforts by all parties involved."

The Labor Department, he said, will continue giving metropolitan areas the opportunity and assistance to develop area-wide, voluntary agreements that cover public as well as private construction.

Where such agreements are not reached, he said, the Department will continue to impose solutions such as those initiated in Philadelphia and Washington, D.C.

The New Orleans Plan was signed by the Associated General Contractors and other contractors groups covering trades involved; the Urban League of New Orleans and other groups representing the minority community, and all member unions of the Southeast Louisiana Building and Construction Trades Council, with the exception of the plumbers' union.

The agreement calls for minority group workers to comprise 20 percent of the membership of each union involved within five years. This is to be accomplished by following these year-to-year goals: 5 percent, first year; 9 percent, second year; 13 percent, third year; 17 percent, fourth year, and 20 percent, fifth year.

(MORE)

Other features of the plan include:

-- Establishment of a 15-member Administrative Committee to study and implement programs tailored for each trade. Membership will include the Mayor or his representative; 6 persons from the Building Trades Council; 4 from contractors' groups, and 4 from the minority coalition.

-- Establishment of 6-member operations committees for each of the participating trades.

-- Provision by contractors of supervisory training for minority employees and assurance that these workers will receive every consideration when advancements to supervisory positions are made.

The Santa Clara Plan, which cover all construction in the county, includes these principal features:

-- A minimum goal of 16 percent to 18 percent minority participation in each craft covered by the agreement within five years; the timetable calls for achievement of 35 percent of the goal the first year, 20 percent the second year and 15 percent over each of the following three years.

-- Establishment of a 9-member Administrative Committee comprised of three representatives from labor, management and the minority coalition to seek program funding, review implementation of the plan monthly and settle any disputes arising.

-- Establishment of a 6-member, tri-partite operations committee for each participating craft to screen applicants and develop work-equivalency classifications and programs tailored for each craft.

The Labor Department's Office of Federal Contract Compliance assists cities in drawing up hometown agreements. OFCC is responsible for carrying out Executive Order 11246, which prohibits discrimination in Federal contract work because of race, color, religion, sex and national origin and requires contractors to take affirmative action to insure job equality.

WEEK OF NOVEMBER 2, 1970

MINORITIES FACE JOB BARRIERS IN
2 CONSTRUCTION CRAFTS NOT COVERED
BY LOS ANGELES PLAN

WASHINGTON -- All but two construction craft unions in the Los Angeles area -- asbestos and sheetmetal -- have undertaken efforts through the Los Angeles Plan to expand minority job opportunities, the top Federal contract compliance officer has stated.

John L. Wilks, Director of the Office of Federal Contract Compliance (OFCC), based his statement on findings of a U.S. Department of Labor panel that conducted two days of hearings last month in Los Angeles.

The hearings, called by Mr. Wilks, were designed to gather information on minority hiring practices in the asbestos and sheetmetal trades, the only two construction crafts that are not parties to the Los Angeles Plan.

Los Angeles is one of 18 target cities designated by the Labor Department last February for concentrated efforts to achieve equal job opportunity in high-paying construction crafts.

It is also one of seven of these cities where unions, employers, minority coalitions and local officials have worked out "hometown" plans for minority hiring in the industry.

The plan addresses itself to widening job opportunities for Mexican-Americans, Negroes, Orientals and American Indians in skilled construction crafts throughout the metropolitan area. It covers both public and private construction.

In its report on the Los Angeles hearings, the three-member panel noted that, while all minorities face job barriers in the construction industry, Negroes are least successful in finding work in the sheetmetal and asbestos trades.

Information gathered at the hearings included the following:
-- 47 minorities, none of them Negroes, out of 450 journeymen asbestos workers in the Los Angeles metropolitan area.
-- 128 minorities, four of them Negroes, out of 690 journeymen sheetmetal workers, (according to on-site compliance reviews of 20 contractors made by the Departments of Health, Education and Welfare and Housing and Urban Development.)

"Because of past and continuing exclusionary practices by unions," the report states, "Negroes and other minorities have been and continue to be under-represented in construction crafts unions."

(MORE)

Pointing out that the "vast majority" of construction projects in the Los Angeles area are performed by union members or others referred to work by unions, the report says the exclusionary practices include but are not limited to:

-- The failure to admit minorities into union membership.

-- The failure of unions to refer minorities for employment.

-- The failure to admit minorities into apprenticeship or equivalent training programs.

The panel makes two basic recommendations regarding the asbestos and sheetmetal trades, which are not covered by the Los Angeles Plan:

-- First, further negotiations to secure their participation in the hometown plan through the use of skilled mediators.

-- Second, that, failing resolution by mediation efforts, every effort be made to ensure compliance by these trades with Federal equal employment requirements, including recommendations to the Department of Justice for enforcement action.

Panel members were Nathaniel Pierson, Special Assistant to the OFCC Director for Field Operations; Roberto Ornelas, OFCC's area coordinator for the Southwest, and Gresham Smith, Deputy Associate Solicitor for Labor Relations and Civil Rights.

Labor Agency Seeks to Void Unions' Right To Veto On-the-Job Training of Minorities

12/21/78

By BYRON E. CALAME
Staff Reporter of THE WALL STREET JOURNAL

WASHINGTON—The Labor Department is seeking to take away unions' practical veto power over the suitability of Federally aided on-the-job training programs that are set up as part of minority-hiring plans.

The action would give minorities a better chance to qualify for high-paying jobs, particularly in the construction industry, according to department officials.

A regulation change just proposed by the department would permit the Secretary of Labor to waive an existing requirement that an on-the-job training program can't get Federal aid unless the unions involved agree to it.

The proposed change, if adopted, would be "a major breakthrough" for the department's Office of Federal Contract Compliance, an official of the agency said. Top OFCC officials have complained frequently that unions were using the existing regulation to thwart Federal efforts to open up jobs in the building trades to minorities through voluntary hiring plans in major cities.

A special OFCC drive to get 102 target cities to come up with such hometown solutions to alleged construction-industry job discrimination has been lagging badly. So far, only 13 of the cities have been able to get representatives of contractor, union and minority groups to agree on a plan.

Philadelphia Plan Problems

Moreover, some OFCC officials have charged that the minority-hiring plan the agency imposed on Federally aided construction projects in the Philadelphia area last year has been hampered by the unions' use of the existing regulation to resist training programs aimed at minorities.

Because a Federally funded on-the-job training program is regarded by OFCC officials as an essential element of any minority-hiring plan, union agreement is usually necessary under the existing regulation. Officials in the department's Manpower Administration, which must approve the training programs, deny that any union actually has blocked a hometown solution. But sources concede that a voluntary plan in Seattle was "almost lost" because the unions refused to accept the training program.

"This is being put in to get around the problem if it really does develop in the future," a Manpower Administration insider explained. The present situation, he conceded, is "a little bit like having a judge sit on his own traffic case." Within the department, OFCC officials have been pressing the Manpower Administration in recent months to modify the existing regulation. Arthur Fletcher, the assistant Labor Secretary with responsibility for the OFCC, recently outlined the problem to a Congressional committee in these terms:

"This (the existing regulation) is creating quite a problem with the 'hometown solution' program because it simply means that organized labor at the local level can stay away from the table and not sit down and discuss the need for training—and in so doing frustrate the efforts of the contractors and the black community . . . to bring new persons into the crafts."

Mr. Fletcher warned that "the hometown solution won't work as long as they (unions) have that prerogative and exercise it, unless there are some changes in attitude."

Storm of Protest Expected

The proposed rule change, published in the Federal Register last week, apparently caught several union officials by surprise. But some Labor Department insiders conceded the proposal is likely to bring a storm of protest from organized labor. Interested parties have 30 days to submit comments on the proposal.

Most union officials withheld any assessment of the proposed change until they have had a chance to study it. But an AFL-CIO insider, after being informed of the proposal, snapped: "Who's going to train them if union journeymen don't?" He contended that bypassing unions would "mean a lot of people will be half-baked journeymen." Indeed, Manpower Administration officials had conceded in the past that it is pointless to launch training efforts that unions don't actively support.

It wasn't immediately clear just how the department would go about staffing a training program set up under a waiver after the unions involved had refused to go along with it.

The existing regulation provides that before the Manpower Administration agrees to fund an on-the-job training program, it must determine "there is joint agreement to the training program and wage scale by the training facility and the bargaining agent where there is a collective bargaining agreement applicable to the establishment and the occupation."

The proposed change adds a provision permitting the Secretary of Labor to waive this requirement when it is "reasonably necessary for the establishment of a training program pursuant to an affirmative action plan approved as meeting the requirement" of Federal equal employment regulations.

Five N.C. Cities Preparing Youths For Apprenticeship

Labor News - 12/4/76

Five North Carolina cities are among 18 urban areas designated for tutoring minority groups by the Workers' Defense League (WDL) to pass apprenticeship entrance examinations in the building and construction trades. The announcement was made today by Secretary of Labor James D. Hodgson.

The League has been awarded an 18-month Apprenticeship Outreach contract for the overall program to recruit and prepare 1,025 minority youths to become apprentices in about 18 skilled building and construction trades.

Local AFL-CIO Building Trades Councils will provide skilled union craftsmen as instructors.

The Apprenticeship Outreach projects will be conducted in the following locations:

The Apprenticeship Outreach program provides for up to 10 weeks of preparation, using the "tutor and cram" technique, to repare candidates to pass specific examinations in the building and construction trades, as they are announced.

Program sponsors have found that less than 10 percent of the total number of youths recruited for the tutoring courses are able to take and pass the examinations. As a by-product of the program, therefore, an estimated more than 10,000 youths will have attended classes to a major or minor extent and received instruction in mathematics, reading and other trade-related subjects.

Under its previous Labor Department-sponsored Apprenticeship Outreach contracts, the Workers' Defense League placed a total of 2,000 minority apprentices through July of this year, all but 120 of them in the building and construction trades.

The Outreach program recruits prospects through local State Employment Service offices, Apprenticeship Information Centers, and various community-action agencies.

Written and oral tests are given by joint apprenticeship committees representing management and labor in each trade.

Apprenticeship Outreach sponsors also counsel and assist those apprentices selected to remain in their chosen apprenticeships until successful completion.

LITTLE ROCK, PROVIDENCE PLANS FOR EXPANDING MINORITY HIRING IN CONSTRUCTION GIVEN TENTATIVE FEDERAL APPROVAL

WASHINGTON -- Agreements to increase minority hiring in construction trades reached by local citizens in little Rock and Providence have been tentatively approved by the Office of Federal Contract Compliance.

In announcing the development, Secretary of Labor J.D. Hodgson said the two equal opportunity plans bring to 13 the number of cities and areas that have developed "hometown" solutions for construction.

OFCC gives tentative approval to a plan when the parties make a general commitment to establish numerical goals and timetables for expanding minority job opportunities in various crafts.

Final OFCC approval comes only after the signatories to the plan agree to specific goals and timetables for achieving equality in each trade covered by the agreement.

After giving final approval, OFCC monitors the plan as long as it operates to insure compliance with Federal equal opportunity requirements.

"These latest agreements represent another encouraging step toward America's long-standing goal of equal employment opportunity," Secretary Secretary Hodgson said.

"But the signing of these agreements is not an end in itself," he added. "It is a beginning. Achievement of equity at the workplace is a day-to-day process that requires earnest efforts by all parties involved."

For its part, the Secretary said, the Labor Department will continue giving metropolitan areas the opportunity and assistance to develop area-wide, voluntary agreements covering public as well as private construction.

"Where such agreements are not possible," he added, "the Department will continue to impose solutions such as those initiated in Philadelphia and Washington, D.C."

The Little Rock agreement provides that the parties will work to achieve minority representation in the construction trades equal to the minority proportion of the area population within five years.

The goal of the plan is employment of 800 additional minority workers within the five-year period. At least 160 persons are to be trained in the first year.

Signing the Little Rock agreement were the Building Trades Council, the Associated General and Speciality Contractors, the Arkansas Urban League and the National Association for the Advancement of Colored People, and other minority community representatives.

The Providence Plan is unique in that it is the first "hometown" agreement to involve a state government.

(MORE)

Signed by Rhode Island Governor. Frank Licht and representatives of unions, contractors, the State's Urban League and other minority groups, the agreement features these immediate goals:

-- Enrollment of 100 minority youth in pre-apprenticeship training programs.

-- Placement of 100 minority youths in apprenticeship training programs.

-- Enrollment of 100 minority group people who are over the apprentice ticeship age or who have not had training or experience in a particular craft in various construction and building trades as journeyment trainees.

-- Enrollment of 50 fully-qualified journeyment for regular union membership.

The plan to increase minority hiring in the construction industry in the Providence area is to be carried out over a five-year period in five counties: Providence, Kent, Bristol, Washington and Newport.

During the five-year period, the agreement calls for the enrollment of 200 minority youths in apprenticeship and pre-apprenticeship training programs, the placement of 100 minority group people as journeymen for regular union membership.

An administrative committee, composed of a member of the Governor's Office, contractors, unions, and members of the minority community, will carry out the agreement. Craft operations committees, composed of employer union and minority community representatives will also be responsible for implementing the agreement.

Eleven metropolitan areas have developed hometown agreements since the Labor Department launched a nation-wide program last February to achieve equal job opportunity in the construction industry. They are: Providence, Little Rock, Rochester, New Orleans, Santa Clara County, (Calif.), Kansas City, Indianapolis, Denver, Boston, St. Louis, and Los Angeles.

Two other cities -- Chicago and Pittsburgh -- developed "hometown solutions" before the national effort was lauched. Seattle, Washington has a court-imposed plan.

The Labor Department's Office of Federal contract Compliance assists local parties in drawing up hometown agreements. OFCC is responsible for carrying out Executive Order 11246, which prohibits discrimination in Federal contract work because of race, color, religion, sex and national origin and requires contractors to take affirmative action to insure job equality.

Apprentice Program Rule Changes Urged By Labor Department

Proposals Are Aimed at Insuring Minorities Equal Opportunity In Federally Certified Plans

2/1/71

By a WALL STREET JOURNAL *Staff Reporter*

WASHINGTON — The Labor Department formally proposed revised regulations aimed at insuring minorities of an equal opportunity to enter Federally certified apprenticeship programs.

The proposed tightening of the regulations, as expected, would require program sponsors "with deficiencies in the utilization of minority apprenticeships" to adopt an approved selection method or set specific goals and timetables for admitting minority applicants.

Program sponsors agreeing to admit specific percentages of minority apprentice applicants would be permitted to use any selection method approved by the Labor Department.

Those who don't set specific goals and timetables would have to use one of three alternate methods of selection under the proposed rule changes. Apprentices could be picked from a list of applicants ranked in the order of their scores on a Government-validated test, chosen randomly by "impartial" persons from a pool of qualified but unranked applicants, or selected from a pool of eligible employes that is established by existing labor contracts or company policy so long as they aren't discriminatory.

There is no requirement in the present regulations covering entry into apprenticeship programs for any kind of equal-employment goals or timetables. And the tests used to screen applicants don't have to be validated by the Labor Department under current rules.

"For the first time," Labor Secretary Hodgson said, "we are adopting specific measures in the U.S. apprenticeship system to insure that minorities will be afforded full and equal opportunity in all (Federally) registered apprenticeship programs."

Roughly two-thirds of all apprentices in training are enrolled in programs registered with the Labor Department or Federally approved state apprenticeship councils. The building trades account for more than half of all registered apprentices.

Secretary Hodgson said the rules changes were proposed because "there continues to be underutilization of minorities in apprenticeships in some circumstances." The latest figures released by the Labor Department show that 7.7% of the apprenticeships in registered programs in 1969 were minority-group members.

The formal publication of the revised regulations in the Federal Register followed months of informal haggling among the Labor Department, union officials and employer groups. Many construction-union leaders have objected strongly to the proposed tightening of the regulations; some of them, however, have conceded the present proposal intrudes less into the detailed procedures for selecting apprentices than some versions under consideration several months ago.

All interested parties have 30 days in which to submit official comments on the proposed new regulations. But unless the official comments turned up "something new and different" from the views already presented informally, a top department official predicted, the proposed rule changes will probably be put into effect by Secretary Hodgson in something close to their present form.

The revised rules would apply to an estimated 10,000 registered apprenticeship programs that have five or more enrollees. Under the revised rules, a program's minority enrollment would be "deficient" if it wasn't roughly proportionate to the number of minorities in the local population, to the area's labor force and to those available to enter the program.

In the event a sponsor with a deficiency submits inadequate goals or refuses to set goals, the department would have the power to establish specific goals and a timetable for that program.

Federal certification of programs can be terminated after a hearing if there's a failure to make a "rigorous, determined, good-faith effort" to bring in minorities. Apprentices in registered programs can qualify more easily for veterans' training benefits and for draft deferments, among other things, than if they were enrolled in a plan that wasn't approved by the Labor Department.

Week of March 22, 1971

"PITTSBURGH PLAN" PROJECT WILL TRAIN
314 CONSTRUCTION APPRENTICES, JOURNEYMEN

WASHINGTON -- Manpower Administrator Paul J. Fasser, Jr., recently announced a $471,255 manpower training project to prepare 314 minority workers for apprenticeship or journeyman training and to help them become members of Pittsburgh building and construction unions.

The project supports the "Pittsburgh Plan," a voluntary commitment worked out by the Black Construction Coalition and the construction industry to get more blacks into construction jobs.

The one-year contract is between the Labor Department's Manpower Administration and the Pittsburgh Building and Construction Industry Administrative Committee for Research, Education and Training, Inc. The Committee has agreed to prepare 158 minority youths for apprenticeship and to upgrade the skills of 156 construction workers who have varying levels of experience so they can become fully qualified journeymen, or -- if already qualified -- gain union status. Construction union members will provide instruction and supervision.

Fasser said the contract is a "major contribution" toward helping the Black Construction Coalition and the Pittsburgh construction industry fulfill their joint commitment to implement the voluntary Pittsburgh Plan.

"The financial support and emphasis the Manpower Administration is giving this project is a tangible indication of the Labor Department's concern for making sure the Pittsburgh Plan works," Fasser said.

The contractor will use five subcontractors to expedite the project and ensure a high level of performance. Three will concentrate on applicant recruitment, selection, counseling, and follow-up: the Opportunities Industrialization Center; Operation DIG, a community-action organization that

(MORE)

trains minority applicants for the building and construction trades; and the Bidwell Cultural and Training Center, Inc.

A fourth, Community Action of Pittsburgh, Inc., will coordinate subcontractors' financial reports.

The fifth, the Construction Advancement Program of Western Pennsylvania, will help the contractor with administrative work.

Applicants for the 158 apprenticeship openings will be trained along the lines of the Apprenticeship Outreach Program's concentrated tutoring plan. This includes basic education, preapprenticeship classroom training, and orientation in specific construction trades.

The 156 workers selected for the journeyman training project will be credited for their previous experience and given classroom or on-the-job training, or both, to provide the additional knowledge and experience they require to gain full journeyman and union status. The project will see that their previous experience is credited towards that required for union membership.

The Pittsburgh project sponsors estimate that about 2,700 recruits will be needed to attain its goal of 314 apprentice and journeyman placements.

The project will operate in the City of Pittsburgh, in the Hill District, Northside, and Homewood-Brushton, as well as other areas of Allegheny County.

SAN ANTONIO UNIONS GET 3RD CONTRACT
TO PLACE 40 MINORITY APPRENTICES

WASHINGTON -- The San Antonio Building and Construction Trades Council will prepare another 40 minority youths to become apprentices in the construction industry, Manpower Administrator Paul J. Fasser, Jr., reports.

The Council's new contract will run for one year through next January, supported with $47,272 in Federal funds.

This is the Council's third Apprenticeship Outreach contract to prepare 40 young men to pass entrance examinations and become apprentices in one of 17 building and construction trades.

In its two previous contracts, the Council placed 68 minority apprentices. By trade there were 16 carpenters, 1 bricklayer, 1 elevator constructor, 3 cement masons, 11 electricians, 6 ironworkers, 3 painters, 15 plumbers-pipefitters, and 12 sheet metal workers.

Of the minority apprentices placed in the Council's second contract, 60 percent were blacks and 40 precent chicanos.

The Apprenticeship Outreach Program is designed to prepare minority youths to take and pass written and oral apprenticeship entrance tests through a concentrated tutoring program of up to 10 weeks per trainee, tailored to fit each individual's specific learning needs.

(MORE)

For participants who are employed on other jobs, the concentrated preparatory sessions are conducted after the regular work day.

Over the three-year period since the program was fully organized at the beginning of 1968, more than 8,700 minority youths have become apprentices.

Major sponsors in the Outreach Program are the Workers' Defense League with 17 projects, the National Urban League with 28, the Building and Construction Trades Councils, AFL-CIO, with 26, and 20 other individual program sponsors.

The projects operate in the Nation's major industrial cities where there are high concentrations of racial and ethnic minority groups, but also opportunities for apprenticeship in the building and construction trades where more than half of all skilled-trade apprentice openings occur.

Apprenticeship Outreach projects recruit candidates through local State Employment Service offices, Apprenticeship Information Centers, and community-action and social-service organizations.

Nationwide, major minority participants in the program are blacks, with strong Mexican American representation in the southwestern States. Other ethnic participants include people with Spanish surnames such as Puerto Ricans, as well as Indians, Orientals, and, in Alaska, Eskimos and Aleuts.

Divide and Rule

By Stephen Clapp
Mr. Clapp is staff writer for the Public Information Center.

The Labor Department's minority hiring plans to integrate the building trades unions have produced few new black construction workers. In fact, whether in Washington or Philadelphia, Chicago or New York, Buffalo or San Francisco, minority hiring plans fail to come to grips with most unions' calculated policy of excluding outsiders and discriminating against blacks.

What the hiring plans have done is increase animosity between blacks and the labor movement, which has been used to political advantage by mayors and governors. Some critics believe this is what the Nixon Administration intended all along.

Bayard Rustin, director of the A. Philip Randolph Institute, recently called the Philadelphia Plan "part and parcel of a general Republican attack on labor" that includes embarrassing the unions and organizing public pressure against them.

"The advantages to the Republicans from this kind of strategy should be obvious," he states. "Nixon supports his friends among the corporate elite and hurts his enemies in the unions. He also gains a convenient cover for his anti-Negro policies in the South, and above all, he weakens his political opposition by aggravating the differences between its two strongest and most progressive forces—the labor movement and the civil rights movement."

As evidence of this thesis, there is George Meany, president of the AFL-CIO, describing the Philadelphia Plan as "a concoction of a bureaucrat's imagination" while Herbert Hill, national labor director of the NAACP, denounces "racist hard hats (who) are the potential street fighters of American fascism . . . acting with the support of both Nixon and Meany."

There are, of course, valid reasons for attacking discrimination in the building trades. Racial imbalance in the building trades is dramatic and well-documented. Figures compiled by the Labor Department in 1967 showed that nation-wide there were only 61 black asbestos workers, or roughly one per cent of union membership. There were 33 black elevator constructors, 92 black sheet metal workers and 177 black lathers. In the laborer category, by contrast, blacks had 81,457 members, or roughly 30 per cent of union membership.

Moreover, construction is a fast-growing industry that receives millions of federal dollars. Labor economists estimate that the industry will require a minimum of 800,000 additional workers over the next decade. Wages in the industry are high, and construction should provide new job opportunities at good pay for large numbers of unemployed or underemployed black workers.

To maintain job security and high wages, craft unions in recent years have developed elaborate apprenticeship programs to limit the number of persons available to work. It can take longer to become a hardhat than it takes to become a doctor or lawyer. Even though most white construction workers have never gone through an apprenticeship program—some have never even completed

Continued on page 2

Continued from page 1

primary school—many unions now require candidates to undergo four- or five-year apprenticeship programs before joining the union as journeymen.

Official AFL-CIO policy is non-discriminatory, but various local unions have adopted procedures that present opportunities for discrimination. Blacks are often subjected to a more extensive training process than their white counterparts. Some apprenticeship programs only exclude minority candidates; others practice nepotism. Still other apprenticeship committees employ inappropriate or purely subjective tests. A graduate of a Washington, D.C. training program recently took the elevator constructors' apprenticeship test. He was asked complex questions on air flow and ventilation. "None of us could have passed that test," his instructor reported. Yet there is no way to determine whether white applicants were given the same examination. The elevator constructors union in Washington has 128 members, of whom 6 are black.

When young blacks and Puerto Ricans taught by the Workers Defense League in New York City scored in the top 10 per cent of candidates for sheet-metal apprenticeship openings in 1965, the local unions threw out the results. The Workers Defense League had to take the union to court to get the applicants accepted.

"The whole setup is designed to discourage black interest," says Clifford Alexander, former head of the Equal Employment Opportunity Commission. "You try to convince some black kids to go into a six-month preapprenticeship program, then four years of apprenticeship. It's ridiculous. That kid is either going to go to college or sign on as a laborer."

An even more serious problem is unwillingness to admit black workers, many of whom have been certified by state licensing boards as fully-qualified journeymen, directly into union membership and union controlled jobs. On this issue the craft unions refuse to budge. The EEOC reported that black membership in the building trade unions actually declined in 1969.

"About three-fourths of all the skilled construction workers in the United States . . . do not have to be prepared or primed or tutored," says NAACP's Herbert Hill. "They learn by doing. It is only blacks and members of other minority groups who must climb the slow apprenticeship ladder."

Nearly everyone agrees that the most potent instrument for achieving integration in the construction industry is forcing contractors to live up to anti-discrimination guidelines that are written into every federal contract. Federal contracts are a privilege, not a right, and the government could devise ways to insure that public money is not put into the hands of unions that practice restrictive and racist membership policies.

The difficulty lies in achieving compliance. In 1969 the Nixon Administration devised its Philadelphia Plan to reform the six construction trades characterized by the poorest records of minority employment. The plan covers all federal and federally-assisted projects of a half million dollars or more in the five-county Philadelphia area. Since February, contractors have also been required to demonstrate compliance with minority hiring goals on their privately-financed projects as well. This provision is designed to eliminate so-called "motorcycle compliance," by which contractors were

moving black workers from private projects to federal projects when government inspectors came to check.

To be considered for a federal contract, a contractor must include in his bid the percentage of nonwhite craftsmen he hopes to employ in his trade. His bid is not considered unless his employment goals meet federal standards for Philadelphia. The standards will allow contractors to gradually increase minority participation over a period of five years, with the ultimate goal of 19 per cent minority participation in the construction crafts in Philadelphia, which has a minority population of 30 per cent.

John Wilks, who heads the Office of Federal Contract Compliance, contends that Philadelphia is well on its way toward meeting its goal, since nearly 15 per cent of on-site workers in the six affected trades are now minorities. He concedes that the Philadelphia Plan has been less successful in making union members out of these workers but argues that union membership, too, will come in time.

"All blacks and Puerto Ricans who are members of the affected unions are now working," Wilks told *P.I.C. News*. "We have forced equity in that system. As for non-union craftsmen, after they have been on the job for a specified length of time, they are entitled to enter a local. It's a civil rights violation if they don't. I think the unions will want these guys as members, since they are now in the labor pool. Some black craftsmen told me they are not interested in union membership, but that may be just a rationalization."

In June 1970 the Labor Department issued a plan to increase black construction workers in the Washington, D.C. metropolitan area. The Washington Plan is modeled after the Philadelphia Plan, except that Washington is expected to reach a maximum of 25 per cent non-white in the unions by 1974. The Labor Department estimates that this goal can be reached by filling one of every two openings in the craft unions with a minority worker.

OFCC officials say that the success of the Philadelphia Plan is "representative" for Washington as well, where 71 per cent of residents are black, and the unemployment rate for blacks is twice that for whites. However, critics of the two plans question whether the federal agencies directly responsible for compliance have effectively monitored construction work in the two cities. The OFCC sets up the monitoring system but depends on the contracting agencies to do the actual site reviews.

The OFCC has only 31 professionals to coordinate compliance efforts. Overseeing the Philadelphia and Washington Plans is a compliance officer in Philadelphia with a three-man staff and several other responsibilities. Contractors can rest secure that the construction project will be over and their money in the bank before the project inspector gets around to checking their minority employment.

The Washington Area Construction Industry Task Force, representing a spectrum of community organizations and civil rights groups, recently accused the Nixon Administration of failing to enforce the Washington Plan. The task force pointed out that federal contractors had failed to keep records and file reports on equal employment despite requirements to do so. An advisory committee to oversee the plan had met only once, with notice to community representatives—who were greatly outnumbered by union and industry representatives—only hours beforehand.

"Nor has there been any access to any significant statistical information by representatives of the minority community," the Task Force said. "Assistant Secretary of Labor Arthur Fletcher tells us that all his department can do is coordinate, and that there is no information forthcoming from the agencies. Compare this to what Mr. Fletcher's department does to 'coordinate' enforcement of the Wage and Hour Act and the Davis-Bacon Act, which are of importance to white unions. Last year there were 2,835 government employees and over $41 million deployed in this effort."

The task force pointed out that Project Build, a federally-funded training effort sponsored by the Greater Washington Central Labor Council with Labor Department funds, had failed to get a single black graduate accepted for membership in any Washington-area construction union.

"This training program will be a dead end for every black trainee since none will be accepted into white unions and without union membership will be unable to find work in the construction trades until the federal government effectively enforces the Washington Plan," the task force said.

If the Washington and Philadelphia Plans have proved difficult to enforce, even more difficult to enforce are so-called "hometown" solutions that the Labor Department began promoting after meeting resistance to the Philadelphia Plan. If a city's voluntary plan is approved by Labor, the city gets money for job training programs and continues to receive federal construction funds. To encourage cities to develop these hometown plans, Labor has threatened to impose plans on cities that fail to come up with their own approaches. Washington was the first of these.

Of 102 cities designated as target areas for hometown plans, approximately 30 have come up with acceptable solutions. On May 12 the Labor Department announced it was preparing plans for Atlanta and St. Louis in the absence of local action. A government plan was imposed June 3 on San Francisco, which has a hometown plan that is not working.

On June 4 the Labor Department announced that it was imposing a plan on the city of Chicago, where the "hometown" plan had collapsed and $94,500 was missing from the plan account, representing a total of 12 forged checks. Alderman Fred D. Hubbard, a Daley Democrat representing the all-black Second Ward and project director, has been charged with forging a $20,000 check drawn on the account.

The Chicago Plan began with high hopes. The Labor Department provided $824,000 for administration and training which was expected to give immediate union membership to 1,000 blacks and Puerto Ricans and apprenticeship training to an additional 3,000 minority youths. The AFL-CIO lauded the plan as a model that should be used for future negotiations in other cities.

Despite the enthusiasm generated by the plan, it never got off the ground. One difficulty was Mayor Richard J. Daley, who became interested in the negotiations when he saw that his Model Cities funds might be tied up because of street demonstrations by black contractors and their community allies. At stake was $35 million in Model Cities funds, with which Daley wanted no interference. The Chicago Plan placed immense power in the hands of the mayor, giving him the swing vote on the seven member committee that oversaw administration of the plan. Each faction—labor, employer and minority coalition—had two members, with the seventh member being the mayor or his representative. Since five votes were needed to pass any matter, the mayor could veto any action unsatisfactory

Continued on page 4

Continued from page 3

to either the contractors or the unions by adding his vote to theirs.

There was constant bickering between labor and the minority community over how the numbers would be apportioned among the 19 craft unions involved. Since the plan became effective 17 months ago, 885 minority group members have begun apprenticeship training, but few have been put to work. Last year's construction season ended without a single minority worker on the job as a result of the plan.

The city of Buffalo, N.Y., has a plan imposed by Governor Nelson A. Rockefeller against the wishes of the minority community. On February 3, 1970, Rockefeller lifted an 11-month moratorium on state-financed construction and imposed a plan on the Buffalo area. No members of Buffalo's minority community were consulted on terms of the plan.

The announcement of the plan was preceded by a year of community action directed toward unions and contractors' associations. In April 1969 the Governor's office recognized a Minority Coalition as the agent for blacks, Indians and Puerto Ricans; this group subsequently received $275,000 in manpower funds to "identify" minority applicants for training programs. That fall the Minority Coalition, the industrial unions and the contractors' association reached tentative agreement on a plan. Five unions then refused to sign, and all negotiations were ended.

Rockefeller's response to this development was to lift the moratorium on New Town and State University construction projects valued at $135 million and impose a plan under which he claimed 4,500 minority workers would be trained and taken in by the unions over the next four years. The plan is based on the percentage of non-whites in Erie County, which is only half the percentage of non-whites in the City of Buffalo.

The task force that came up with the Rockefeller Plan included Peter J. Brennan, president of the Building and Construction Trades Council of Greater New York. Brennan, a powerful labor figure, was one of the first union leaders to throw the support of his organization behind Rockefeller's reelection last year. A possible reason for Rockefeller's desire to resume construction activities in 1970 was the fact that he had failed to carry Erie County, the most populous area of New York State outside New York City, in the two previous gubernatorial elections.

Rev. James T. Hemphill, leader of the Minority Coalition, has accused Rockefeller of treating Buffalo blacks as a "plantation, to accept what is given."

"The community is awaiting Governor Rockefeller to announce and fulfill his pay off to the minority community for adopting his affirmative action program," Hemphill said recently. "The Governor was paid off by the unions, who endorsed his reelection. Rockefeller paid off the unions by delivering the 'minority community' to embrace union-designed programs which guarantee the unions absolute control."

Backed by the NAACP, the Minority Coalition has filed suit in federal court to halt all state and federal construction in the Buffalo area. The Coalition has petitioned President Nixon in hopes of getting the Labor Department to impose a plan of its own on Buffalo, which has the lowest percentage of minorities in craft unions in any major city in the country. But the OFCC continues to negotiate with Rockefeller.

"Construction is going forward like crazy," Rev. Hemphill told *P.I.C. News*. "The hometown solution isn't working, and the unions are not about to undertake affirmative action as long as they are able to work. With white craftsmen laid off from the steel plants here, the contractors have a ready-made labor force. All we're trying to do is get the law enforced. In Buffalo, nobody's enforcing anything."

The Labor Department is also having trouble negotiating a "hometown solution" in New York City, where the NAACP's Herbert Hill describes a plan that was rejected by the Labor Department as "an obvious attempt by the contractors and the building trades unions of New York City to prevent genuine contract compliance by government agencies."

The New York Plan provides no guarantee of minimum percentages of minority workers on public construction and no guarantee of work for already-qualified minority workers. It does not even require a minimum number of trainees, or specify which trades they were to be trained for. The plan could be implemented without placing a single black or Puerto Rican worker in training.

In general, minority hiring plans accept the unions' argument that long periods of training are required for construction work, including such ridiculous notions as "pre-apprenticeship training" and "post-training." To keep the excluded blacks pacified, the Labor Department has doled out nearly $9 million in salaries and training subsidies to Outreach programs run by unions and by black community organizations willing to go along with the game.

Contractors use the fact of discrimination as a counter in collective bargaining, holding down the wage base as a price for allowing unions to continue discriminating. It is no coincidence that the same Administration that salleyed forth so bravely to end discrimination in the building trades was also the first to suspend the 1931 Davis-Bacon Act, which guarantees non-union workers the same wages as union workers on construction jobs.

The Washington and Philadelphia Plans cannot be discounted entirely. The problem is one of monitoring and enforcement. The OFCC claims that the fault for non-enforcement lies with other federal agencies. Last March, it cited 10 federal agencies that had either ignored reporting requirements or else had failed to take corrective action against building contractors. In only one case to date, a small $43,000 contract in Philadelphia, has an agency agreed to proceedings against the contractor.

Last January, civil rights and community organizations met with Ford Foundation officials to discuss placing teams of lawyers and community organizers into each city where a plan exists. "Once you accept the idea of a hiring plan, you have to monitor and you have to sue," says one of the participants at the meeting. "As it is now, nobody can make life miserable for the federal government. But effective monitoring of the plans could break the back of the resistance within six months or a year."

Instant Prejudice

"The Farmers Home Supervisor told me that he could look at a family when they came in (to his office) and know whether he was going to lend them money for a house or not."

—Pat Gish, director of the Eastern Kentucky Housing Development Corporation, during hearings by the House Education and Labor Committee.

MINORITY EMPLOYMENT UNDER 'PHILADELPHIA PLAN' GENERALLY RUNNING ABOVE 1971 GOALS

WASHINGTON -- Average minority employment in construction crafts covered by the Philadelphia Plan is running above the second-year goals set by the Government, Secretary of Labor J.D. Hodgson reports.

Minority workers have accounted for 14.2 percent of the 287,777 total manhours logged in construction work under the plan for the latest reporting period, June 1 through August 1, 1971, he said.

When the Philadelphia Plan was imposed in September 1969, the second-year ranges set for the six covered trades averaged from 9.8 to 13.8 percent.

The 14.2-percent figure is based on reports received by the Office of Federal Contract Compliance from 11 Federal contracting agencies with 77 projects under construction from June 1 to August 1.

Secretary Hodgson said the reports showed that four crafts were above their second-year goals, one was within its prescribed range and one trade was below its 1971 goal.

The following is a craft-by-craft comparison of minority employment, by manhours, with total employment and the second-year goals based on reports received from the 11 Federal agencies:

-- Iron workers: Total manhours, 42,275; minority manhours, 6,509 (15.3 percent). Second-year range: 11 to 15 percent.

-- Plumbers: Total manhours, 72,571; minority manhours, 8,658 (11.9 percent). Second-year range: 10 to 14 percent.

-- Electricians: Total manhours, 94,796; minority manhours, 15,366 (16.2 percent). Second-year range: 9 to 13 percent.

-- Sheetmetal workers: Total manhours, 39,415; minority manhours, 6,824 (17.3 percent). Second-year range: 9 to 13 percent.

(MORE)

-- Steamfitters: Total manhours, 35,499; minority manhours, 2,825 (7.9 percent). Second-year range: 11 to 15 percent.

-- Elevator constructors: Total manhours, 3,221; minority manhours, 640 (19 percent). Second-year range: 9 to 13 percent.

In addition to the reports received from the 11 Federal agencies, the Department of Labor last week made on-site compliance reviews at all 78 active projects under the plan to determine the exact number of minorities employed at that time. John L. Wilks, Director of the OFCC, sent the team of investigators to review the projects.

The on-site reviews, conducted October 7 and 8 in the five-county area covered by the plan, showed that 102 minorities were among the 743 persons working in the six crafts on active projects. Of the 102, Federal investigators were able to interview 92 to them personally.

A sizeable number of minority workers was also employed in other trades not covered by the plan at the time of the two-day review.

The Philadelphia Plan requires all bidders on Federally-involved construction projects exceeding $500,000 to submit affirmative action plans setting goals and timetables for employing minorities in the six trades in their Government as well as private work.

By the end of 1973, the goals under the plan will range from a high of 22 to 26 percent for iron workers to 19 to 23 percent for sheetmetal, electrical and elevator construction workers.

Philadelphia was the first city where the Federal Government imposed a construction hiring plan. Other cities with imposed plans are Washington, D.C., San Francisco, Atlanta and St. Louis.

(MORE)

In more than 100 cases where contractors have not met requirements of the Philadelphia Plan, Federal contracting agencies have been instructed by Mr. Wilks to issue show-cause notices requiring the contractors to take corrective action within 30 days.

In most cases, contractors have fully corrected the situation and signed written agreements with the Government to take remedial action.

About 20 contractors are under investigation to determine whether there is sufficient evidence to bring them to debarment hearings.

On September 17, 1971, Edgely Air Products, a sheetmetal contractor, was debarred from further Government work for failure to meet requirements of the Philadelphia Plan.

LABOR SECRETARY HAILS U.S. SUPREME COURT
REFUSAL TO STRIKE DOWN 'PHILADELPHIA PLAN'

WASHINGTON -- Secretary of Labor J.D. Hodgson has hailed the United States Supreme Court's refusal to review a case challenging the legality of the Philadelphia Plan.

"This Administration is delighted," the Secretary said, "that the Supreme Court, by refusing to take up this case, has affirmed our program as a valid means of achieving equal job opportunity."

Under the plan, Federal contractors are required to use numerical goals and timetables for boosting minority employment in six high-paying construction crafts in five Philadelphia-area counties.

The two-year-old plan requires bidders on construction work exceeding $500,000 to submit "affirmative action" plans setting percentage ranges for utilizing minorities in these crafts: Iron work, plumbing and pipefitting, steamfitting, sheetmetal work, electrical work and elevator construction.

The High Court refused to hear the case filed by the Contractors Association of Eastern Pennsylvania, which challenged the validity of the minority-hiring plan.

On April 22, 1971, the 3rd U.S. Court of Appeals upheld unanimously a decision rendered last year by the U.S. District Court for the Eastern District of Pennsylvania on the plan's validity.

At the time of the appellate court's decision, Secretary Hodgson said, in part:

"Every American concerned with fairness and equity in the world of work can find a large measure of satisfaction in the appellate court decision written by Judge Gibbons."

(MORE)

The Gibbons' decision specifically upheld the plan's concept of "affirmative action" for widening minority job opportunities among Federal contractors, including the use of numerical goals and timetables.

Only last week, Secretary Hodgson reported that average minority employment in construction trades covered by the Philadelphia Plan is running above the Government's second-year goals.

Hard-Hats Split

Nonunion Contractors Winning Sizable Share Of Construction Work

Rules and Wages Fuel Trend; Destructive Clashes Erupt At Sites Around Country

The Double-Breasted Outfit

7/7/72

By BILL PAUL
Staff Reporter of THE WALL STREET JOURNAL

NASHVILLE — It's known around here as the great Boy Scout ploy.

Last April, union construction workers unhappy about a new contract offer walked off their jobs at Opryland USA, a new amusement park and museum complex here. Picket lines went up, and for three weeks work at the site was at a standstill. The park's owner, National Life & Accident Insurance Co. of Nashville, was faced with the embarrassing prospect of having to delay the park's much-publicized May 21 grand opening.

So on Sunday, April 30, a nonunion contractor was called in to finish the job. Predictably, the union hard-hats reacted with fury; about 500 pickets showed up Monday morning, and there was "a lot of rock throwing and window breaking," according to one eyewitness. One subcontractor had all the windows of his office shattered, and the man in charge, Joe Rogers, president of Joe M. Rogers & Associates Inc. of Nashville, had to hire around-the-clock guards to protect his family.

Windfall for the Scouts

But the resourceful Mr. Rogers had an ace up his sleeve. He quickly announced that National Life had agreed to pay $25,000 to local Boy Scout and Girl Scout organizations for each day the amusement park was finished ahead of schedule. In the face of a possible public-relations disaster, the steam soon went out of the union protest. And by working his men 24 hours a day seven days a week, Mr. Rogers finished two days ahead of schedule—a $50,000 windfall for the appreciative Scouts.

Unfortunately, not all confrontations between union members and "open shop" or nonunion contractors end on such a mild note. Today in many parts of the country, nonunion contractors have captured a sizable portion of construction work as union wages have soared and union work rules have become increasingly restrictive. (Except for a handful of independent unions, all construction guilds are members of the AFL-CIO Building and Construction Trades Department.) The result has been a mounting number of destructive--and often bloody—clashes between AFL-CIO craftsmen and nonunion craftsmen.

In January, for example, Maryland Gov. Marvin Mandel had to appeal to Baltimore building trades leaders for a cease-fire after several outbreaks of violence on nonunion construction sites. In March, the National Guard had to be called out in Port Allen, La., after independently organized hard-hats used helicopters to go up and over building trades pickets. And in February, a union man was shot to death during picketing at a Jay, Fla., refinery site.

Biggest Demonstration Ever

The conflict in the Philadelphia area has been particularly violent. For example, in

Hard-Hats Split: Nonunion Firms Winning More Construction Work

Continued From First Page

workers today. For one thing, labor costs account for about 40% of a typical contract estimate. And with union craftsmen receiving average pay increases of 15% in 1970 and 11% in 1971, according to the Labor Department, union builders now find themselves with sealed bids 15% to 20% higher than the nonunion competition on some contracts.

Equally important, nonunion contractors aren't subject to many of the work rules imposed by unions. In part, that means they can assign workers to jobs outside their particular craft and can assign the number of workers they think is needed to do a certain job. In addition, nonunion contractors aren't subject to crippling walkouts every time there is a labor dispute.

Indeed, some union work rules do seem quite far-fetched. For example, a contractor often is required to pay a union electrician or electricians to be on hand during any hours in which temporary lights are on. On some projects, of course, such lights are never turned off, which means that the electrician is getting paid around the clock to watch the bulb burn. Another common rule requires that an operating engineer be on hand whenever a welding machine or compressor is in operation, even though those machines can run unattended all day and turn on with the flick of a switch.

Rules Defended

Most building trades leaders defend the rules and charge that nonunion builders are out to undermine union solidarity. They also contend that unions aren't responsible for many of the rough tactics in the industry. Ed Courtney, president of the Baltimore Building and Construction Trades Council, says, "We got blamed" when trailers were burned at the site of a new shopping center being built partly with nonunion labor. "But I think some of these nonunion contractors had their own trailers burned so they could collect the insurance on them."

But at least a few union bosses recently conceded that the unions themselves are at least partly to blame. "Had productivity increased as wages began to rise, we would not now be faced with some of our present-day problems," Hunter P. Wharton, president of the International Union of Operating Engineers, told his union's national convention in April "As demands were made upon and met by employers, the telltale effects of a system without reason began to show in the loss of construction to dual and nonunion employers."

Robert Georgine, secretary-treasurer of the AFL-CIO's Building and Construction Trades Department, was even blunter. He recently blamed both unions and union employes for "a serious problem of featherbedding, where two guys are assigned to a piece of equipment that needs only one."

But the message, for the most part, seems to go unheeded and the violence continues. Law enforcement agencies are beginning to respond. In Denver, a statewide grand jury is investigating a series of fires that destroyed $2 million worth of construction projects during the last four years in the Denver area. The projects, mostly condominiums near completion, were all built by nonunion contractors. The grand jury has been taking testimony for several months now, including that from the top 15 local building trades leaders.

Award to Beaten Man

In Ft. Lauderdale, Fla., a state circuit judge recently denied a union motion to set aside a $1.25 million judgment against the International Union of Operating Engineers and Local 675. The jury award, said to be the largest for personal damages in U.S. history, was made in December to a construction foreman who was severely beaten by a member of the union during a labor dispute. In another case, eight union men were recently sentenced to prison terms ranging from six months to five years for their part in an April 1970, incident in which 2,500 union men stormed a nonunion construction job on a Volkswagen agency in West Palm Beach, Fla. The attackers did an estimated $160,000 worth of damage, including burning 67 cars.

Some union contractors are responding by going "double-breasted," which means setting up a separate nonunion or open-shop company run by the same management that's running the unionized firm. The Associated General Contractors says that a large portion of its 10% increase in open-shop membership in the past year was due to the growing number of double-breasted firms. The association predicts another 10% increase this year.

But other union contractors see the incursion of nonunion builders as just as great a threat to them as to their workers. Some contractors are trying to bury the hatchet with local labor bosses, and one group, the North Texas Contractors Association in Arlington, has even signed a "memorandum of understanding" with the Dallas and Fort Worth building and construction trades councils. It calls for elimination of unnecessary and inefficient work practices and a fostering of increased productivity attitudes through education. The association represents 180 builders.

two days ahead of schedule—a $50,000 windfall for the appreciative Scouts.

Unfortunately, not all confrontations between union members and "open shop" or nonunion contractors end on such a mild note. Today in many parts of the country, nonunion contractors have captured a sizable portion of construction work as union wages have soared and union work rules have become increasingly restrictive. (Except for a handful of independent unions, all construction guilds are members of the AFL-CIO Building and Construction Trades Department.) The result has been a mounting number of destructive--and often bloody—clashes between AFL-CIO craftsmen and nonunion craftsmen.

In January, for example, Maryland Gov. Marvin Mandel had to appeal to Baltimore building trades leaders for a cease-fire after several outbreaks of violence on nonunion construction sites. In March, the National Guard had to be called out in Port Allen, La., after independently organized hard-hats used helicopters to go up and over building trades pickets. And in February, a union man was shot to death during picketing at a Jay, Fla., refinery site.

Biggest Demonstration Ever

The conflict in the Philadelphia area has been particularly violent. For example, in mid-June more than 1,000 angry union demonstrators firebombed half-finished buildings, stoned police and wrecked an estimated $300,000 worth of construction equipment at a new industrial park in King of Prussia, Pa., outside Philadelphia. Police the next day arrested 129 union members, who defied a court order and picketed the nonunion contractor on the job, Altemose Construction Co. of Center Square, Pa. About a week later, some 2,000 state police, half of Pennsylvania's state force, were mobilized to contain a protest march by 20,000 union hardhats near another Altemose site. It was the largest demonstration by organized labor in the state's history.

"Union workers are frustrated," says an official of the Associated General Contractors of America, an organization of both union and nonunion contractors based in Washington, D.C. "They've declared war on the open-shop firms that are taking away their jobs."

Statistics showing the shift to nonunion or independently organized labor on construction sites are sketchy but convincing. The National Constructors Association; the largest single group of union contractors in the industrial field, says that last year 32% of all industrial construction went to nonunion builders, a figure "at least double" what it was three years ago. The Associated General Contractors group says it has 1,000 more nonunion members than it did three years ago and that nonunion membership now comprises 35% of its 9,000 total membership.

Winning Bread-and-Butter Jobs

Traditionally, union builders have had the lion's share of industrial and commercial construction, while nonunion firms have handled the residential construction. But one building source says that in middle Tennessee, for example, nonunion builders now have about 80% of all industrial and commercial building compared with only 40% five years ago. In Miami, James L. Woodall, executive director of the local chapter of the Associated General Contractors, says that nonunion contractors are winning "more and more of the bread-and-butter jobs" that run up to $5 million or so. One estimate shows nonunion contractors now receiving more than 70% of Miami-area apartment building.

In Baltimore, another AGC official asserts that nonunion hard-hats are working on 75% to 80% of all area construction jobs, up "significantly" from five years ago. A recent survey in St. Louis showed that while 31% of the 25,000 AFL-CIO building tradesmen were out of work there, less than 1% of 4,000 independently organized tradesmen were jobless. And in Middleberg Heights, Ohio, where a bomb in April destroyed sections of a new car agency being erected partly by two nonunion subcontractors, including an electrical firm, sources note that there were some 400 union electricians out of work at the time. (Both nonunion subcontractors were put off the job by the general contractor 48 hours after the explosion.)

Both union and nonunion sources agree that there is a substantial incentive to use nonunion

Please Turn to Page 15, Column 1

burned so they could collect the insurance on them."

But at least a few union bosses recently conceded that the unions themselves are at least partly to blame. "Had productivity increased as wages began to rise, we would not now be faced with some of our present-day problems," Hunter P. Wharton, president of the International Union of Operating Engineers, told his union's national convention in April "As demands were made upon and met by employers, the telltale effects of a system without reason began to show in the loss of construction to dual and nonunion employers."

NUMBER OF BLACK APPRENTICES HAS NEARLY DOUBLED IN FOUR YEARS

WASHINGTON -- The number of black youths in registered apprenticeship programs serviced by the U.S. Department of Labor has increased 91 percent since 1968.

Secretary of Labor James D. Hodgson said the number of black apprentices rose from 6,561 at the end of 1968 to 12,550 at the end of 1971.

During 1971, the number of black apprentices increased 13.6 percent, from 11,045 to 12,550, a record high. Black apprentices represented 6.7 percent of the 186,236 apprentices registered as of December 31, 1971. A year earlier, blacks constituted 5.5 percent or 11,045 out of 199,928 registered apprentices.

Secretary Hodgson noted that the number of black apprentices increased during 1971 even though the total number of registered apprentices decreased 13,692 over the ye year.

New minority apprentices are being fed into the apprenticeship system -- conducted mostly by joint labor-management committees -- by affirmative action programs. These were generated by the Secretary of Labor's revised regulations under Title 29, Code of Federal Regulations, Part 30, which sets standards for equal opportunity in apprenticeship.

Secretary Hodgson pointed out that otureach programs financed by the Labor Department and conducted by AFL-CIO Construction Trades Councils, the Workers Defense League, the Urban League, and several other similar organizations also have contributed to the new apprentice totals.

Marked increases for black apprentices also occured in the construction trades where over half of all apprentices are employed. At the end of December 1971, out of 110,592 apprentices in the trades, 7,983 or 7.2 percent were black.

Yearly increases among registered black apprentices are shown in the following table:

(MORE)

All Trades	Date	Total	Blacks	Percent
	12-31-68	166,087	6,561	4.0
	12-31-69	201,574	9,331	4.6
	12-31-70	199,928	11,045	5.5
	12-31-71	186,236	12,550	6.7
Building and Construction Trades	12-31-68	91,177	3,728	4.0
	12-31-69	107,592	5,193	4.8
	12-31-70	112,890	6,732	6.0
	12-31-71	110,592	7,983	7.2

In other major trade groupings, black apprentice ratios stood as follows in December 1971: metal manufacturing, 5.1 percent; non-metal manufacturing, 4.7 percent; public utilities and transportation, 8 percent; trades and services, 7.5 percent; and mining, 4.9 percent.

SOUTHEASTERN BUILDING TRADES WAGE SCALES INCREASE 1.9 PERCENT IN SECOND QUARTER OF 1972

Union hourly wage scales for building trades workers in the Southeast 1/ rose 1.9 percent between April 3, 1972 and July 3, 1972, according to Brunswick A. Bagdon, Southeastern Regional Director of the U.S. Department of Labor's Bureau of Labor Statistics.

The all-trades average in the Southeast rose by 11 cents during the second quarter of 1972--from $6.00 to $6.11 an hour. Among individual trades, average quarterly increases in the Southeast ranged from 3.1 cents for building laborers to 21.1 cents for painters. Increases for other trades were 6.3 cents for carpenters, 10.6 cents for plasterers, 18.2 cents for plumbers, 18.4 cents for bricklayers, and 20.5 cents for electricians.

The Bureau's computations exclude wage increases negotiated during the second quarter of 1972 but not put into effect pending approval of the Construction Industry Stabilization Committee (CISC). Deferred increases scheduled to become effective between April 3, 1972, and July 3, 1972 are included in the increases shown if such increases were approved by the CISC. Also included are increases approved by the Committee within the quarter, but made retroactive to an earlier period.

The Southeastern average hourly wage scale on July 3, 1972 was 46.1 cents above that of the previous year, an increase of 8.2 percent. Yearly advances

1/ Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee.

varied from 6.6 percent for carpenters to 11.5 percent for electricians.

Among the six journeymen crafts, plumbers had the highest average scale as of July 3, 1972--$7.52 an hour. The basic scale for plumbers varied from $5.80 an hour in Columbia, South Carolina to $8.34 in Miami, Florida. For the other journeymen trades, regional average hourly scales were painters $5.75, plasterers $6.15, carpenters $6.43, bricklayers $6.94, and electricians $7.33.

Building laborers' scales averaged $3.99 an hour, ranging from $3.25 in Montgomery, Alabama to $5.60 in Miami, Florida.

Changes in union scales over the quarter and year and the rate levels on July 3, 1972 are shown below. In computing the changes in rates, the increases in each trade were averaged among all workers in the trade, whether or not they received raises. Data for the separate crafts, by city, are shown in the accompanying table.

Trade	Change* in Average to July 3, 1972 from --				Average Rate	
	April 3, 1972		July 1, 1971		July 3, 1972	
	Percent	Cents	Percent	Cents	Average	Range
Bricklayers.....	2.7	18.4	8.9	56.7	$ 6.94	$4.95 - 8.13
Carpenters.....	1.0	6.3	6.6	40.0	6.43	4.80 - 7.80
Electricians.....	2.9	20.5	11.5	75.6	7.33	5.35 - 8.98
Painters.....	3.8	21.1	8.3	43.9	5.75	4.00 - 7.20
Plasterers.....	1.8	10.6	7.4	42.5	6.15	4.25 - 7.75
Plumbers.....	2.5	18.2	7.4	51.9	7.52	5.80 - 8.34
Building Laborers...	0.8	3.1	7.4	27.5	3.99	3.25 - 5.60
ALL TRADES.....	1.9	11.2	8.2	46.1	6.11	- -

Data not comparable with Southeastern averages published prior to July 1, 1969, due to a change in regional definition.

* Increases made retroactive to April 3, 1972 or before were not considered in calculating changes shown. Data based on such retroactive pay changes are available upon request.

Union scales are the minimum wage rates (excluding holiday and vacation payments made directly to the worker each pay period) agreed upon through collective bargaining and reported to the Bureau by local respondents. The scales do not reflect rates for apprentices or for premium work. Overtime beyond established maximum daily and weekly hours is excluded.

Bldg Trades

Five N.C. Cities To Prepare Youths For Apprenticeship

Five North Carolina cities are among 18 urban areas designated for tutoring minority groups by the Workers' Defense League (WDL) to pass apprenticeship entrance examinations in the building and construction trades. The announcement was made today by Secretary of Labor James D. Hodgson.

The League has been awarded an 18-month Apprenticeship Outreach contract for the overall program to recruit and prepare 1,025 minority youths to become apprentices in about 18 skilled building and construction trades.

Local AFL-CIO Building Trades Councils will provide skilled union craftsmen as instructors.

The Apprenticeship Outreach projects will be conducted in the following locations: the Metropolitan New York City areas of Brooklyn Manhattan, Harlem and Westchester, Nassau and Suffolk counties; Buffalo, Rochester, Newark, Bridgeport, New Haven, Cleveland, Nashville, Lexington, Kentucky, Charlotte, Greensboro, Raleigh-Durham and Wilmington, North Carolina.

The Apprenticeship Outreach program provides for up to 10 weeks of preparation, using the "tutor and cram" technique, to prepare candidates to pass specific examinations in the building and construction trades, as they are announced.

Program sponsors have found that less than 10 percent of the total number of youths recruited for the tutoring courses are able to take and pass the examinations. As a by-product of the program, therefore, an estimated more than 10,000 youths will have attended classes to a major or minor extent and received instruction in mathematics, reading and other trade-related subjects.

Under its previous Labor Department-sponsored Apprenticeship Outreach contracts, the Workers' Defense League placed a total of 2,000 minority apprentices through July of this year, all but 120 of them in the building and construction trades.

The League successfully placed 17 asbestos worker apprentices, 68 bricklayers, 289 carpenters, 61 cement masons, 304 electricians, 78 elevator constructors, 449 glaziers, 90 iron workers, 19 lathers, 446 machinists, 434 operating engineers, 242 painters, 243 plumbers and pipefitters, 55 plasterers, 79 roofers, 182 sheet metal workers, 3 tile setters, and 121 in miscellaneous trades.

There are now 81 outreach projects in operation serving 83 major industrial cities.

The Outreach program recruits prospects through local State Employment Service offices, Apprenticeship Information Centers, and various community-action agencies.

Written and oral tests are given by joint apprenticeship committees representing management and labor in each trade.

Apprenticeship Outreach sponsors also counsel and assist those apprentices selected to remain in their chosen apprenticeships until successful completion.

Nixon Rescinds Some Building Curbs, Pushes Training of Apprentices

Action Signals Partial Turn In Fiscal Policy Emphasis To Staving Off Recession

By a WALL STREET JOURNAL *Staff Reporter*

WASHINGTON—President Nixon signaled a partial turn in the emphasis of fiscal policy toward fighting recession and away from fighting inflation.

The President gave state and local governments a green light to resume normal levels of construction spending. He said the move is warranted because anti-inflation policies launched last year "are now moving the economy to the path of more stable economic growth."

The President also ordered increases in training and hiring of building-trades apprentices, directed that more Federal work be diverted into the slack winter months, and called on the "monetary, banking and financial community . . . to help the economy get on with the task of achieving lower interest rates."

Last Sept. 4, Mr. Nixon had requested state and local governments to voluntarily curtail Federally aided construction projects, and had asked governors to voluntarily limit purely state-financed activity. Dropping these requests, officials said, should give a $1.5 billion fillip to the sagging construction industry.

The President's eight-page statement on construction costs and labor supply left unmentioned and intact, however ,the Federal Government's 75% cutback in its direct construction commitments.

Reduction Exceeds Estimates

Because of the lag between planning and spending, officials last September had estimated that direct Federal savings in the fiscal year ending next June 30 would be only $300 million from postponing $1.6 billion in contracts. Now, the Budget Bureau estimates that $1.8 billion of purely Federal projects were postponed, along with "well over $1 billion" of state and local projects. All three levels of government spent $28.2 billion on construction last year, a White House fact sheet shows, or about one-third of the industry's $91.1 billion total.

Seeking to assure the nation that the White House is alert to both recession and inflation dangers, Mr. Nixon said the "rate of inflation still remains an urgent concern, and this action is no signal that our effort to sustain a strong budget has relaxed. As our policy to combat the rate of price increase takes hold, I will take the action necessary to help the nation's economy achieve a stable growth."

The slump-preventive nature of the construction-spending move was suggested at a White House briefing by Chairman Paul W. McCracken of the President's Council of Economic Advisers. Mr. McCracken said that in altering economic policy "the right time to change will seem premature at the time." Because of the lags with which policy changes actual activity, he said, policymakers shouldn't wait until they "see the effects."

Ford Proclaims Victory

A far more conclusive victory statement in the inflation fight came earlier yesterday at the White House from House GOP leader Ford. The Michigan Congressman declared that "the problem of inflation has been defeated." And with the danger of recession "nil," Mr. Ford said, the economy won't be an issue in the 1970 Congressional elections. Later, Mr. McCracken more gingerly concurred that "the basic evidence appears to be consistent with what Congressman Ford said."

The Federal budget's restraint on the economy is fading anyway, Assistant Budget Director Murice Mann said separately in a speech to the American Paper Institute in New York. It is "moving into smaller surplus this quarter—which means less restraint—and, on a seasonally adjusted basis, will move into deficit—which means stimulus—in the second and third quarters" of 1970, he said.

On the "national income accounts" basis that Mr. Mann cited, the Commerce Department reported yesterday, the surplus slipped to an annual rate of $6.7 billion in the December quarter of last year from the $7.7 billion pace of the September quarter. The "swing" back to deficit is due to the higher Social Security payments slated for next month, Mr. Mann said, and the phasing out of the surtax as of June 30. It would also be appropriate, he said, for the budget to reflect some "modest modification" in the construction cutback.

The fourth quarter's surplus was slimmed by a decline in corporate profits, the Commerce report said, that cut income-tax accruals from this source by $400 million to a $39.4 billion annual rate; the profits figure is to be issued today. Federal receipts from all sources moved up $2 billion, to a $203.3 billion annual rate, in the December quarter; spending rose by $3.1 billion, to a $106.7 billion annual rate. The $1.1 billion drop in defense spending, to a $79.2 billion yearly pace, was the sharpest since 1962, the department said.

Focusing chiefly on the slump in housing starts, Mr. Nixon said getting at the root of the problem requires "actions that will end the rampant inflation of construction costs." The steps he recommends for bringing "the supply and demand of labor, money and materials into better balance," he said, can simultaneously meet pressing needs for shelter and for opening up "new job opportunities for millions of working men and women."

Ironically, the government construction freeze that the President thawed was billed last September as a major way to free more resources for housing. Partly reversing this action appeared to be a last-minute decision spurred by fresh evidence of cutbacks in private construction contracting. A few days ago officials were insisting that inflationary pressures were still far too strong for this to be part of the package.

Although the President said he is "proposing new actions" to channel more credit into home building he didn't go beyond plugging for already-pending proposals such as a limited subsidy for advances to savings and loan associations and creation of "secondary market" operations in conventional mortgages—those that aren't Federally backed.

Increasing Manpower Supply

Stressing that what the construction industry "most" needs is "more trained workers," the President directed that a number of steps be taken by Federal agencies to increase the manpower supply.

Mr. Nixon ordered the Labor Secretary to prepare a plan for expanding by 50% during the next six years enrollment in Federal manpower programs that provide training in construction skills. Mr. Nixon said there are about 30,000 construction trainees in Labor Department programs.

The President also directed Labor Secretary Shultz to "undertake a comprehensive study of apprenticeship programs" in construction crafts and make recommendations by Oct. 1 on ways to improve and expand the apprenticeship system. As expected, the White House ordered the Secretary to review the equal opportunity regulation governing Federally approved apprentice programs.

Another step in the apprenticeship area calls for Federal agencies to include clauses in construction contracts requiring employment of apprentices or trainees on the projects.

Training for Servicemen

The departments of Defense, Labor, and Health, Education and Welfare were given orders to develop programs to provide servicemen in their final months of active duty with training in construction crafts. "I anticipate that the program will enroll over 50,000 trainees during the next two years," Mr. Nixon told Congress.

HEW also was charged with the responsibility of working with state governments on plans for vocational education programs in secondary schools aimed at producing more building tradesmen.

Noting that the construction industry has long been plagued by seasonal unemployment—notably layoffs in the cold winter months—Mr. Nixon directed that Federal agencies install "counter-seasonal contract award procedures" whenever practical. Pilot projects in off-season construction should be conducted by Federal agencies, he said.

Calling for greater use of science and technology in the construction industry, the President directed the Commerce Department to report on methods of improving the "availability and use of weather information in construction." Mr. Nixon also instructed the Commerce Secretary to develop ways to disseminate information on winter building to businessmen.

Finally, Mr. Nixon said, the Labor Department should experiment with ways of using computerized job banks to place more persons in construction work. Job banks, run by the state employment services, produce daily listing of job vacancies in major metropolitan areas.

Washington, D. C. 20037

Gentlemen:

We have received the two books "Arbitration and Social Change" and "Arbitration Today" and your invoice for a further $10.00. I am not sure what happened to our order but we really do not want "Arbitration Today" and so are returning it to you.

I assume that this means that our account is in order.

Sincerely,

Emory F. Via, Director

THE BUREAU OF NATIONAL AFFAIRS, INC., 1231 25th Street, Northwest, Washington, D.C. 20037 • Telephone 202 223-3500

Will the events of 1970 alter *your* next contract? This year? Next year? In '72?

More major contracts in critical industries, affecting a greater number of workers, are expiring in 1970 than in any year of the past decade. New precedents seem sure to be set in these hard-fought negotiations.

So, whether your contract comes up for negotiation this year or not, 1970's bargaining will have a message for you. You'll want to keep abreast of what's happening in bargaining techniques and trends, in settlements, in contract clauses, in emerging contract patterns--and you can . . . with BNA's COLLECTIVE BARGAINING NEGOTIATIONS & CONTRACTS (CBNC).

This authoritative labor information service assures you of the timely notification and valuable working data you need to keep on top of what management and unions are doing in the ever-changing field of wages, hours, and working conditions. More than that, CBNC is invaluable in preparing for negotiations, in working out the contract, and in administering and living under the contract.

The enclosed study of vacations is just one example of CBNC's thorough treatment of basic patterns in union contracts. A complete description of CBNC is given in the accompanying brochure.

Don't risk moving ahead in 1970 without the "information insurance" provided by COLLECTIVE BARGAINING NEGOTIATIONS & CONTRACTS. Try it for 45 days, without obligation.

Sincerely,

J. B. Holt

Dear Sir:

You will shortly be receiving the publications of the Southern Regional Council. They will include our quarterly magazine, New South, and our monthly paper, South Today. Beyond these two regular publications you will receive pamphlets, special reports, and other special releases of the Council.

These materials have been ordered for you by the National Office of HRDI. I trust that they will prove to be of interest to you, useful in your work, and provide you with background information on the changing South.

We would be pleased to hear from you anytime if you have comments on the materials. If we can be of assistance to you as you carry out your duties for HRDI, I hope you will call on us.

Sincerely,

Emory F. Via, Director
Resources Development Center

Washington, D.C. 20001

Dear Mrs. Neal:

You will shortly be receiving the publications of the Southern Regional Council. They will include our quarterly magazine, New South, and our monthly paper, South Today. Beyond these two regular publications you will receive pamphlets, special reports, and other special releases of the Council.

These materials have been ordered for you by the National Office of HRDI. I trust that they will prove to be of interest to you, useful in your work, and provide you with background information on the changing South.

We would be pleased to hear from you anytime if you have comments on the materials. If we can be of assistance to you as you carry out your duties for HRDI, I hope you will call on us.

Sincerely,

Emory F. Via, Director
Resources Development Center

Manpower - Govt. Employ.

AFGE Charges Southern Jobs Shortchanged

New Orleans — The American Federation of Government Employes charged that the federal government is shortchanging many of its employes in the South.

AFGE Pres. John F. Griner said this is being done by assigning southern workers to lower salary grades than employes doing the same work in other areas of the country.

He charged that this is direct defiance of civil service classification rules which are supposed to ensure "equal pay for equal work."

Griner told a news conference that a number of federal agencies are apparently following "the law of supply and demand" rather than the civil service law.

"In the large metropolitan areas, where there is competition for the skills of the employes, the government is willing to pay the price," Griner said. But when it can get people to work for less, as in parts of the South, he added, it hires them at lower civil service grades than their jobs should carry.

The union's executive council, meeting here, protested the practice.

Manpower Shortage Seen As Critical In Year 1975

WASHINGTON, D.C. (PAI) — At the rate that the American economy has been advancing and with the current priorities for a better life for all Americans, there will be a manpower shortage by 1975 according to a study by the National Planning Association.

The Association estimates that in order to fulfill some 16 national goals in both the private and public sectors, the United States will need 101,000,000 workers — about 10,000,000 more than are expected to be in the labor force by 1975.

"As a result," the NPA says, "the nation must establish priorities to determine how much of the available manpower should be devoted to each present goal, as well as any new goals that may be added by our society in the early 1970's."

The study — "Manpower Needs for National Goals in the 1970's," by Leonard A. Lecht — finds that assigning top priorities to the goals of health, social welfare, housing and urban development will be ineffectual "without early and vigorous steps to eliminate prospective bottlenecks in key occupations."

Setting high priorities on the housing and urban development goals would demand increases in many skilled crafts at rates above the recent growth in these occupations.

3/30/69

The strong demand for manpower will provide an added incentive for making full use of the potentials of non-whites, the study says. The goals of education, health, social welfare, consumer ex- [illegible] res and urban development would be pendi[illegible] generating employment for non- foremost in [illegible] jobs for non-whites re- whites with 10,000 mo[illegible] ars spent on these sulting from every billion do[illegible] rban develop- objectives. Achieving the goals in [illegible] jobs ment would create an estimated one million [illegible] for non-whites in the next ten years.

ADVANCE FOR WEDNESDAY AFTERNOON NEWSPAPERS
NOT TO BE USED BY PRESS, RADIO, OR TV
BEFORE 6:30 A.M., EDT, WEDNESDAY, JUNE 18, 1969

The Civil Service Commission today announced the completion of its review of the Government Printing Office's Equal Employment Opportunity practices, including employment of minority group members and women. The Commission said that while notable achievements have been made by GPO in providing opportunities for minority group members to attain craft status, it had found a number of matters requiring corrective actions to which the Public Printer has agreed.

While noting that the Government Printing Office's program in some areas falls short of meeting public policy objectives of equal opportunity, it said that the agency has made significant progress which had come largely as a result of the Public Printer's personal concern.

The Commission's principal findings are summarized below:

- GPO excels when compared with the private printing industry in the employment of minority group members. For example, the percentage of Negro journeymen in all crafts at GPO is about four times as high as it is in the local private printing industry. This is significant, the Commission said, because it indicates the willingness of GPO management to employ minority group members in responsible positions, and because it evidences the training and advancement opportunities that already exist, since most of these journeymen were trained and developed internally.

- GPO's overall record also compares favorably with that of other Federal agencies; the latest (1967) census of minority group employment in Government shows that 43 percent of GPO employees are minority members, while the Government-wide figure is 14.9 percent.

- Significant advances have been made in expanding employment and advancement opportunities. For example, since 1961 GPO consistently has had substantial Negro representation in its apprentice programs, averaging over 25 percent throughout this period, and currently having 42 percent Negro representation among the total apprentice group. Contributing to the large representation of Negro apprentices in recent years is a policy established in 1967 by the Public Printer to appoint to the apprentice program GPO employees who can pass the test and who have demonstrated potential for success. Of the first 28 appointments made under this policy, 21 went to minority group employees.

- Heavy emphasis has been given to all types of training, resulting in increasing advancement opportunities for all employees. There are currently 15 non-apprentice craft training programs leading to journeyman status. Minority group members have long been heavily represented in these programs, with Negroes constituting 78 percent of those now in training. In addition, there are two ongoing training programs leading to higher grade sub-journeyman positions, with Negroes constituting 100% of those now in training.

- There has been a lack of minority group members in supervisory craftsmen positions, in higher level supervisory positions generally, and in administrative and management positions at grade GS-12 and above. (However, GPO made six appointments of minority group members to supervisory craftsmen positions in the past 6 months, which reflects management concern with the problem and some recent progress.)

- GPO has not always been able to make work assignments without regard to sex, because in at least one sizeable area of the plant there are no toilet and locker room facilities for women.

- Opportunities for advancement in a few occupational areas have been restricted by lack of training programs or career ladders that would permit employees to become qualified for more responsible work.

- Many supervisors need more training in how to implement a positive equal employment opportunity program in their day-to-day activities.

- Communication between GPO and the local community is not effective, and communication with employees is only partially effective.

- Many concerns and complaints of minority employees relate to supervisory and personnel practices which affect all employees. Although an individual employee might interpret an incident as evidencing discrimination directed at him personally, the event usually is the result of a practice that applies to all employees equally.

To correct the deficiencies noted in these major findings, the Public Printer has agreed to take responsive and specific action, and has already moved ahead on many of the Commission's recommendations. Both the Commission and GPO recognize that some of the needed actions will require additional time, money, and manpower. However, the Public Printer has committed the agency to move ahead with action that will:

- Eliminate practices in the selection process such as over-reliance on nomination of candidates by management, and lack of publicity to employees of their right to request consideration for specific promotion opportunities, which have tended to lessen opportunities for minority group members to advance to supervisory positions.

- Maintain a continuing review of the racial balance in each segment of its work force to determine the cause of any imbalances. If the cause is found to be unequal opportunity, then action must be taken to assure that all candidates, including minority group members, receive fair and equal consideration for employment and advancement.

- Provide an opportunity for interested and qualified employees to secure training needed to qualify for bindery worker positions.

- Equalize training opportunities in craft areas where there are significant employment needs by establishing more apprenticeships when legally possible, where opportunities are presently restricted or lacking.

- Remove any remaining conditions resulting in restricted employment opportunities for women, in accordance with the Federal Women's Program.

- Adhere to Commission requirements for a positive EEO program by: (a) keeping open channels of communication with local schools and minority group organizations to tell them about employment opportunities; (b) making periodic written program activity reports from those responsible for the EEO program to the Public Printer; (c) giving supervisors more training in their EEO responsibilities; and (d) following up at all management levels to get needed action.

In the course of its review, the Civil Service Commission interviewed over 400 Government Printing Office employees. In addition, representatives of 19 employee organizations were consulted as well as representatives of several interested minority group organizations.

The Commission expressed gratitude to the representatives of the Washington Urban League, Council for Negro Progress in Government, National Association for the Advancement of Colored People, and to the leaders of the 19 employee organizations representing various groups of GPO employees who were consulted during the review. These consultations produced many helpful leads which substantially assisted the Commission.

The Commission found that GPO was abiding fully with regulations which require Federal employers to consider all job applicants regardless of sex. It found that women are applying for, qualifying for, and are performing successfully in printing plant worker jobs which often involve heavy or arduous work.

No factual basis was found for charges that Negro women were being employed under "brutal and inhuman" working conditions. The Commission did recommend, however, that: (1) GPO should continue its current policy of showing the job site and the type of work to be performed in advance to women candidates for unskilled labor jobs; and (2) GPO should join with the Commission in developing a procedure for evaluating more accurately the physical capability of applicants for laboring jobs, including women.

Additional findings of the review and remedial actions to be taken by the Government Printing Office include:

- Departmental Service Office employees have not been permitted to participate in central office craft training programs, and training opportunities for those employees have been limited. GPO will act on the Commission's recommendation that Departmental Service Office employees be given a chance to compete for entry in central office craft training programs, and that they be given additional training opportunities.

- Some employees have skills and abilities which are not being utilized in their work assignments, and GPO has not had an effective method of identifying and keeping a current record of employee skills and training. In response to a Commission recommendation, GPO will develop a means of identifying and recording employee skills and training, and will attempt to make full use of employees' capabilities in appropriate assignments.

- There has been considerable variation in policy on use of sick leave, depending upon the particular unit to which an employee is assigned. GPO has agreed to act on a Commission recommendation that it adopt a uniform Office-wide policy for the approval of the use of sick leave so that all employees will be held to the same standard.

Atlanta, Georgia

Dear Emory:

I appreciate your taking some time in mid-crisis to meet with me last week. The upshot of my talks with you and Jack has been that we will move ahead on our own in Lowndes County. We are scaling down the initial size of the shop, compared to that projected in the enclosed study. Once some women have been trained, a gradual expansion will take place. I will appreciate your reactions to our analysis and discussion of the issues involved in poor people's garment plants.

I wish you success in your current efforts, and look forward to future meetings.

Sincerely,

Pirie

M— EEO — Govt.

pansions. The aerospace industry has alternately suffered bust and boom in the postwar period.

"We've shot this course before," says J. L. Atwood, president of North American Rockwell, which is anticipating a major drop in sales as a result of an end to its work on the Apollo spacecraft's Saturn V booster and its failure to win the multibillion-dollar F-15 contract. Atwood can recall the decimation of the aerospace industry after World War II, its buildup for Korea, and the earlier stretchouts and wholesale cancellations of military programs such as the F-108 fighter, the B-70 bomber, and the Skybolt missile.

Resigned. A General Dynamics spokesman in Dallas indicates his company is living with a "wait and see" situation as far as the F-111 program is concerned. "Beyond the 493 production planes contracted for, you're talking about plans and expressed desires of the Air Force, the Defense Dept., and Congress," he says. "None of these have acted yet and it's uncertain what will happen. The Air Force is changing its estimates every few months depending on what funds it thinks it's obtaining."

What happens to the F-111 is particularly important to General Dynamics because its next big production contract on any other plane may be a long way off. GD is in competition with Boeing and North American Rockwell for the prime contract on the B-1 bomber to be awarded this spring, but its funding is uncertain. "This is the only big manned aircraft program up for grabs now," says the GD spokesman.

Hardest hit. Waiting is even harder on the smaller companies, which don't have a broad cushion of diversification to fall back on. Varo, Inc., the Dallas electronics company, saw its sales and profits plunge severely last year. Jack G. Smith, president and board chairman, says for the six months ended Oct. 31 sales were $19.8-million compared with $27.2-million the previous year, chiefly because of lower government sales. Between 80% and 85% of Varo's sales are to the government.

"One of the problems," says Smith, "has been that the government has not come out and said it is going to spend "x" numbers of dollars. Agencies kept saying as soon as funds became available they'd start buying, but funds never became available."

Collins Radio Co., a larger Dallas company that sells about 60% of its total products to the government, has felt the pinch, too. Its sales are in areas such as aviation, telecommunications, specialty military products, and space—all victims of government cutbacks. In the first quarter of its 1970 fiscal year, ending last Oct. 31, Collins earned only $532,000 compared to $2,057,000 in the first quarter of the previous year, a plunge of 75%. This was based on a sales decline of about 4%.

Grim outlook. Aerospace companies predict that they will ride out this contraction better than they have in the past. They base their hopes on improved diversification in sales and various yet-unfunded government contracts. But in truth, diversification in most aerospace companies has not been as successful as was hoped. And everyone seems to be counting on winning the same contracts.

Lockheed, with the loss of income from the 34 C-5As and cancellation of a contract for the AH-56A Cheyenne helicopter, is hoping to absorb some of its personnel and lost sales through increased orders for its L-100, C-130, and Jetstar.

The Autonetics Div. of North American Rockwell, faced with the end of its two major contracts on the guidance for the Minuteman missile and the F-111, has a contract with Sharp Electronics Co. of Japan for the sale of $30-million worth of semiconductors. But neither North American Rockwell nor any other major aerospace company can hope to replace the giant government contracts with what amount to piecemeal contracts.

The grim fact is that government money on which the aerospace industry is so dependent will be less plentiful in fiscal 1971 and the companies in the industry are sure to suffer. The only question is how much. ■

Jim O'Bannion, 31

When O'Bannion was laid off, he was working in personnel at Rocketdyne, processing other fired employees. He spent eight years there and made $9,200 a year. Now he earns $1,000 a month as a fast-food franchisee.

EMPLOYMENT

Where and why the cutbacks hurt

Manpower in the aerospace industry has already taken a beating from big cutbacks in the military and space budgets. And the prospects are that things will get far worse.

Defense Secretary Melvin R. Laird estimates that the $9-billion that will be sliced from the defense budget in the two-year period starting in mid-1969 will chop 1.25-million people from defense payrolls. About 40% of these—or 500,000—will come from the 2-million-man force working at defense contractors' plants. A reduction of 600,000 men from the armed forces and of 150,000 civilian workers at military installations will make up the rest.

'Across-the-board cuts' hit hardest at white-collar workers

Budget cuts by the National Aeronautics & Space Administration in fiscal 1971 will eliminate about 65,000 space workers. The reductions will follow a cut of 28,000 men by the end of the current fiscal year. This will leave NASA with about 125,000 workers on its payroll on July 1, 1971. About 95% of the fiscal 1971 cuts are expected to be in contractor and university work forces.

Victims. Hardest hit will be NASA's Michoud (Miss.) plant, where Boeing Co. is assembling the last of the Saturn V rocket boosters. At Michoud, 2,368 people are still producing the booster. Once it has been completed, Boeing's force will be cut to a housekeeping crew of probably about 500 people.

Chrysler, which has shared the government-owned plant and is producing the Saturn second stage (the S-1B), has already reduced its crew from a peak of 4,000 to 472. At the nearby Mississippi Test Facility, what remains of a 6,400-man work force will also feel the executioner's knife. After a last rocket stage is test fired next October, General Electric Co. and other contractors at MTF could get the word to mothball the big facility. That could mean pink slips for nearly 2,000 people.

NASA's Cape Kennedy launch facility and its Manned Spacecraft Center in Houston have already reduced their work forces to the near-minimum needed to launch and maintain the remaining Apollo flights and thus may be spared further big personnel cuts. The Marshall Space Flight Center in Huntsville, Ala., and the Jet Propulsion

PAGINATION INCORRECT

Lab in Pasadena, Calif., also could be hit lightly.

Defense layoffs. On the defense side, a typical blow is already being felt in Marietta, Ga.

Lockheed Aircraft Corp., which makes the giant C-5A jet transport there, has laid off 1,100 workers since September and estimates that the remaining 29,000 will be cut to 25,000 by the end of 1970. Of more concern to Marietta is what will happen when the C-5A contract runs out in 1972. In December, civic leaders went to Washington to ask for a production increase or a stretchout of the current order—so far without success.

When aerospace payrolls are trimmed, officials invariably say that the cuts are "across the board." But this time the cuts are hitting hardest at white-collar workers in the $9,000 to $11,000 salary range, who are needed less when a project moves from development into production.

"While I was being processed out, 30 assemblers were being processed in," says a former buyer for the Autonetics Div. of North American-Rockwell, which has laid off 2,000. Douglas Aircraft Co. has similarly reduced personnel, from 46,865 a year ago to 39,500 today. And it expects to dismiss 2,500 more by midyear.

So far, however, the aerospace reductions have had little impact on local economies, officials claim. The California Employment Dept. says that engineers or technical people have not been clamoring at its doors.

Robert Hartman, manager of the Hawthorne (Calif.) Chamber of Commerce has seen North American's Los Angeles Div. cut 700 people since December 22. And the company is projecting cuts of another 700 in the next three months. But Hartman says, "We're diversified now, with things going well at Northrop, National Cash Register, and Mattel."

Shifting emphasis. The cuts in aircraft manufacturing cannot all be blamed on reductions in military spending. Some also stem from troubles in the commercial aircraft business. This is especially true of Boeing in Seattle, which employs more people than the entire forest industry in Washington state.

Unemployment in Seattle for the first week in January 1970, was 5% compared to 2.9% a year earlier. Statewide unemployment is 7.1%.

Boeing's layoffs, estimated at 18,000 in 1970, will be caused mostly by declines in orders for its earlier aircraft and by some disappointments in orders for its 747 jumbo jet, which have not come up to quantities estimated. "We need to reduce the hell out of our employment," says T. A. Wilson, Boeing president. Boeing's cutback this year follows a 25,000-man layoff in 1969. ■

Has bias locked up the room at the top?

The status of the Jew in U. S. business is a paradox. As entrepreneur, and more recently as conglomerator, he is often spectacularly successful. But in the executive suites of most large U. S. corporations he is practically invisible.

In some areas of the South and Midwest, Roman Catholics seem to suffer the same disability—they do not climb the corporate ladder so fast or so high as, say, Baptists or Methodists.

The Labor Dept.'s John Wilks will use publicity as main force against bias

The task of determining whether this actually reflects a broad religious discrimination in the promotion practices of U. S. corporations sits largely in the lap of Deputy Assistant Labor Secretary John L. Wilks. As director of the Office of Federal Contract Compliance, Wilks is Washington's watchdog on discriminatory practices among federal contractors. Heretofore his office focused mainly on job opportunities for members of racial minorities. This week, Wilks was gearing up to look into the prospects of advancement for religious minorities.

"We're going to really identify the problem," says Wilks, "and publicize it." Technically, Wilks has most of the tools he needs. Corporations doing $50,000 worth of business a year with the government, and employing more than 50 people, are subject to an annual review of the religious and racial distribution of their employees. Obvious discriminators run the risk of losing their government contracts, but publicity, for the time being, will be Wilks's chief weapon.

Eye on insurance. The examination of the executive suite has actually been under way for more than a year. The insurance industry has been its focus, and the results have moved Jewish spokesmen to urge Wilks to expand the inquiry to other industries. Meanwhile, Wilks intends to meet shortly with various Jewish groups, with the hope of setting up a national advisory group to determine the extent of discrimination in executive selection.

On the evidence at hand, it would seem that prejudice against Catholics as top-level managers is scattered and regional, and that if anyone is excluded from the executive suite because of his faith it is the Jew.

Even in New York City, where 25% of the population and 50% of the college graduates are Jewish, a study has shown that fewer than 9% of the executives in major corporations are identified as Jews. In Hartford, Conn., where 10% of the population is Jewish, only 1.2% of the men who run the city's important insurance industry are of that faith. The average is even lower for the shipping, oil, chemical, and electronics industries. And in Detroit only two-thirds of 1% of the white-collar jobs at the three major auto companies are filled by Jews.

AJC study. The American Jewish Committee, along with the B'nai B'rith's Anti-Defamation League, has been working for more than a decade to open the executive door to members of its faith. In a study of 1,500 U. S. corporations made 10 years ago, the AJC determined that Jews made up 8% of all college graduates and 15% of the alumni of professional and business schools but only 0.5% of management.

"There has been some movement since then," says Samuel Freedman, associate national director of AJC's Business & Industrial Div. Freedman is in charge of the National Advisory Committee on the Executive Suite set up by the AJC and the Jewish Occupational Council. He organizes local committees which send delegates to companies that "have a negative image" in the Jewish community. Their role is to find out whether the Jewish view of the company is accurate, and, if so, why Jews find promotion difficult there.

In many cases, he says, companies have been unaware that they had an "image" problem, and have moved to correct it. In one of its more successful efforts, the committee in Philadelphia won the backing of the First Pennsylvania Banking & Trust Co., Scott Paper Co., and Bethlehem Steel Corp. to set up a full-time office to combat the problem. Whereas only 0.4% of Philadelphia's banking executives 10 years

ago were Jewish, the proportion has risen to nearly 4%.

'Is he our kind?' More often than not, Freedman says, companies indirectly discriminate against Jews. Often, he says, admission to the inner circle is based on such judgments as, "Is he our kind?" or, "Will he fit in with the crowd at the country club?" Freedman's group takes the view that this prevents many U. S. businesses from tapping a source of valuable manpower. It is noted, for example, that 15% of the graduates of the Harvard Business School are Jews.

Much of the group's job, Freedman feels, is to make U. S. corporations aware that exclusion exists. Sometimes the point is made quite unexpectedly. Two weeks ago, the Sybron Corp. of Rochester, N. Y., invited Freedman to address its quarterly personnel conference. Freedman welcomed the invitation, but noted that the meeting was to be held at a social club that traditionally has excluded Jews. With a new, somewhat red-faced awareness, company executives shifted the meeting to a hotel. ■

The unhappy parent of new hiring rules

The National Assn. of Manufacturers is getting credit—or blame, depending on point of view—for a proposed set of federal minority hiring regulations requiring quotas for all except the smallest companies that do business with the government.

The Labor Dept.'s Office of Federal Contract Compliance (OFCC), author and enforcer of the controversial Philadelphia Plan for minority hiring in the construction industry, will soon issue the new minority hiring regulations in the Federal Register. They will call for what amounts to minority hiring quotas for all companies with 50 or more employees that engage in at least $50,000 annual business with the federal government.

The source of the new regulations, according to OFCC Director John Wilks, is the NAM.

Guidelines. Two years ago the NAM and Plans for Progress, the government's business group for promoting equal employment in industry, conducted regional seminars to instruct businessmen throughout the country on federal equal employment opportunity regulations and how to accomplish minority hiring goals.

After the regional meetings, NAM and Plans for Progress jointly issued a series of guidelines for affirmative action on minority-hiring programs. NAM circulated these among businessmen throughout the country in a booklet copyrighted by NAM and intended to help employers with their minority-hiring problems. The new regulations from the OFCC are a verbatim copy of the guidelines.

"When I first came in office nobody could define affirmative action," Wilks said this week. Explaining how the NAM guidelines came to be part of the federal regulations, he said he came across a copy of them "and all we did was . . . make them a standard." Wilks says that more than 400 of the nation's largest companies already have given at least lip service to the approach set down in the guidelines.

Ducking credit. The NAM wants no credit for the new regulations. A spokesman admitted that the guidelines were worked up in connection with the NAM, but said they were released without being cleared by association attorneys. Furthermore, he said, "they were meant as guidelines and not federal regulations."

The NAM is concerned about the reaction of Senator Sam J. Ervin, Jr. (D-N. C.), who has led the Congressional fight against the Philadelphia Plan and now objects to the "dirty pool" of the new order.

Senator Ervin says the order (Order No. 4) is even stricter than the Philadelphia Plan, which does not put a federal contract in jeopardy if a contractor makes a good-faith effort to meet a hiring quota and fails. There is no such provision for a good-faith showing in the new general order. Compared to Order No. 4, he said, the Philadelphia Plan "looks like small potatoes."

The NAM admitted that when the new regulations came to light "we had people who went up to see Senator Ervin to try and calm him down."

Points at issue. Of specific concern to Ervin are the regulations which would require an employer to take "special corrective action" whenever:

- The ratio of minority applicants recruited fails to approximate or equal the ratio of minorities in the population of each location.
- Lateral and/or vertical movement of minority employees [promotions, etc.] occurs at a lesser rate than that of nonminority employees.
- The selection process eliminates a higher percentage of minorities than nonminorities.

The regulations require a company doing business with the federal government to set their own hiring quotas subject to government approval—by division, department, location, and job classification—before they can win a government contract.

EXECUTIVE SUITE

Kerkorian: goodbye to some big chips

Early in his career, Kirk Kerkorian used to ferry crap shooters, chemin de fer fans, and roulette players between Los Angeles and the Nevada gambling palaces in his Trans International DC-3s. Those passengers would savor the Las Vegas mogul's current situation. The free-wheeling Kerkorian's dice have been coming up snake eyes:

- The $70-million cash investment Kerkorian's wholly owned Tracy Investment Co. shelled out in tender offers for 1.9-million shares of Metro-Goldwyn-Mayer common stock has been hard hit by the bear market, dwindling to $43.7-million market value early this week.
- MGM stock Tracy pledged to European banks as collateral for $72-million in short-term loans, on which there is a huge 12⅞% interest, had faded so much in value that at least one bank has asked for additional collateral.
- Tracy's $57-million investment in Western Air Lines, Inc., for which Kerkorian paid $45 per share in late 1968, had slumped to $17.25 a share.
- International Leisure, Inc., which Tracy formed to operate Kerkorian's Las Vegas hotels and casinos, went public in early 1969 with Tracy keeping 5,428,000 shares, or 83.4%. The stock subsequently reached $66.50, then plummeted to $23 early this week, for a paper loss of $236-million.

Stock market's decline has cut the value of Las Vegas-based empire

- Last but hardly least, Kerkorian's name popped up last week at a joint New York state legislative committee hearing on crime poking into the affairs of a reputed Mafia lieutenant, Charles "Charley the Blade" Tourine.

Disavows link. In Los Angeles, Tracy Investment's general counsel, William Singleton, issued a statement that he can say unequivocally that Kerkorian has no ties with the Mafia, and that Kerkorian denies emphatically that he ever associated with known gamblers. But in Las Vegas in the late 1940s and 1950s, Kerkorian was known as "the Perry Como of the crap tables" because of the cool he displayed in bigstake games.

According to the legislative committee counsel, Kerkorian held one taped telephone conversation with Tourine. The committee's tape, dated Oct. 5, 1961, was said to be of a call

Tracy Investment's skewered stocks

Stock	Price at purchase	Current price	Paper loss Millions of dollars
M-G-M	$35	$23.25	$12.1
M-G-M	42	23.25	11.5
Western Air Lines	45	17.25	35.2
International Leisure	66.50*	23.00	236.1

*Public market established Feb., 1969; price is year's high on over-the-counter market

Tourine made to Kerkorian in Beverly Hills, suggesting that Kerkorian send him a check for $21,300 through actor George Raft.

The big time. Kerkorian burst into prominence with his purchase of the Flamingo Hotel in August, 1968, from a group that included Miami hotelman Morris Lansburgh. This property, plus the 1,500-room International Hotel and their casinos, makes up International Leisure. And according to Singleton, it was Kerkorian's inability to wheedle audited records out of Lansburgh that got Tracy in trouble with the SEC.

International Leisure filed for a secondary offering of 800,000 shares to the public, 730,000 of which were Tracy's, which would have reduced Tracy's holdings from 83.4% to 72.2%. But the SEC nixed the proposal when Kerkorian could not come up with audited records covering the last five years, as Singleton tells it. The SEC says it still holds to its demand for additional financial information.

Those loans. In addition to the paper losses Tracy's investments show, there is the matter of two Eurodollar loans Kerkorian took to raise cash for his tender offer for MGM shares. In one, he negotiated a $50-million loan from Burkhardt & Co., of Essen, West Germany, at 12⅞% interest maturing in August, 1970. The principal of the loan was $43.6-million. But according to the latest MGM proxy statement, Kerkorian personally and unconditionally guaranteed the loan, and pledged more security if the value of the 1,461,000 shares of MGM common he pledged as collateral fell below 140% of the value of the principal. While this meant that the collateral must be worth $61-million, MGM stock closed early this week at $23.25, so that the pledged shares are worth only $33.9-million.

According to Vinzenz Grothgar, the manager of Burkhardt, "He has given us additional, faultless salable shares."

In September, 1969, just before Kerkorian applied for the secondary offering, he borrowed $22-million in Eurodollars from Burston & Texas Commerce Bank in London at 13%, payable in a year. The principal on this loan was $19.1-million, with the same provision for additional collateral if the value of pledged securities fell below 140% of the principal, or $26.7-million. The 420,000 MGM shares he pledged are now worth $9.8-million.

To all appearances, Kerkorian and his Tracy Investment executives are keeping a stiff upper lip. While Kerkorian was not talking, Fred Benninger, president and chairman of International Leisure, told the *Los Angeles Times* that he was considering doubling the size of the 1,500-room International Hotel and paying for the $30-million "through cash flow." ■

URBAN AFFAIRS

Tax gremlins hit the Ford grants

Normally in January, the Ford Foundation starts mailing out quarterly payments on the $200-million it gives away each year to some 700 or so grateful symphony orchestras, colleges, civil rights groups, and widely assorted do-gooding agencies. But this month, the philanthropic Croesus on Manhattan's East 42nd Street turned off the faucet of funds, temporarily.

The new tax reform law went into effect on Jan. 1. Bristling with complexities for "tax-exempt organizations," the law—which one foundation executive wearily labels "the Lawyers & Accountants Relief Act of 1969"—imposes new taxes and stringent new restrictions on the nation's private foundations and the groups that depend on them for funds. The Ford Foundation, which with current assets of $2.5-billion was a target of some of the Congressional architects, is deferring payments while it examines its own grant-making and reporting procedures. The foundation wants to make sure its money is being given and spent for legally tax-exempt purposes.

Brakes. Ford recognizes that its action has caught some agencies short of operating funds. This week, in fact, it started some money on its way to grantees. Howard Dressner, Ford Foundation secretary, says his organization is working to keep hardships to a minimum. He hopes the review will be finished by mid-February.

Meantime, foundation executives, closeted with their legal advisers, are wondering how the law's many ramifications will affect their activities. In the long run, many foundation people feel, the law will give much philanthropic effort a more conservative cast.

BUSINESS BRIEFS

Ma Bell's money line

With the bond market tight and interest rates near record highs, Wall Street has wondered for months how American Telephone & Telegraph Co. would finance an estimated $3-billion of new capital in 1970. This week, AT&T told how. Mother Bell plans the biggest financing ever undertaken by a U. S. corporation, probably the biggest financing ever undertaken by a corporation anywhere: a rights offering to share holders that will involve $1.57-billion in 30-year debentures, plus warrants to purchase 31.4-billion AT&T shares.

For each 35 shares, the company explained, "a shareholder will be entitled, on payment of $100, to subscribe for a $100 debenture, with warrants, exercisable after six months, to purchase two shares." By going to its shareholders, AT&T expects to nail down an enormous amount of money at one crack, with the warrants designed to make as many shareholders as possible accept the deal. The utility says it will pay comparable "market rates" to shareholders. The alternative would have been for Mother Bell to have hit the market a number of times in 1970 with issues of $250-million or so.

Imperial Oil's Arctic strike

Ever since the discovery of oil two years ago on Alaska's North Slope, Canadian oil men have been promising just as big a strike in their own Arctic region. Last week they saw the first sign of success. Imperial Oil, Ltd., Canadian subsidiary of Standard Oil Co. (N. J.), hit low-sulfur crude near the mouth of the Mackenzie River, about 100 mi. from Alaska. Imperial was close-mouthed about details, claiming it would be some time before the size of the discovery could be measured. Carl Nickle, president of the Canadian Petroleum Assn., hailed it as the most important oil event in Canada since the discovery of crude in Alberta 20 years ago.

Environmental politics

Democratic leaders in Congress brought committee chairmen together at midweek to set up a Joint Committee on the Environment (page 116). Patterned after the Joint Economic Committee, it will not draft legislation but will give Congress a forum for coordinating on problems now scattered through many committees. ■

Surveying one of his clients' plants, Levitt can stay in contact with his office thanks to phone-equipped Rolls.

Manpower— Job Creation

CITIES

Business-government middleman makes jobs

Los Angeles investment banker Harold Levitt has brought Labor Dept. contracts—and job commitments—to ghetto companies by cutting through government red tape

Shortly after lunch on most weekdays, Los Angeles investment banker Harold Levitt can be found slowly driving his beige-colored Rolls-Royce through the Watts district of Los Angeles, looking every bit the part of a modern-day plantation owner surveying his holdings. But Levitt's purpose is only indirectly related to property: His tours through Watts or Brooklyn's Bedford-Stuyvesant section have resulted in job commitments for the hard-core unemployed.

A vice-president and senior partner at Dempsey-Tegeler & Co., Levitt has emerged as private industry's unofficial interlocutor for Special Impact, the Labor Dept.'s job opportunity program. The program, which was first funded in 1967 with Office of Economic Opportunity money, subsidizes companies willing to build new plants in low-income areas and to staff them with workers recruited from the ranks of the hard-core unemployed.

Since he began using his afternoons and weekends last winter for cutting government red tape and giving fast answers to businessmen interested in Impact, Levitt has brought Labor Dept. contracts to five small companies in Los Angeles and three in Bedford-Stuyvesant. In the process, he has interviewed nearly 70 companies that have approached him with plans for a ghetto

PAGINATION INCORRECT

Reviewing construction plans with Schneider provides double-check for Levitt.

plant, a product to manufacture, or a job skills training proposal.

Screening. A self-appointed referee for the federal program, Levitt has eliminated about half the applicants he has screened. The others have been recommended for approval to Stanley H. Ruttenberg, assistant secretary of the Labor Dept.

Among the eight companies already awarded grants are:

- A&E Plastik Pak Corp., a producer of transparent meat trays. It is building a $6.5-million plant, $1-million of it federally subsidized. It will hire 335 hard-core unemployed.
- Torite Enterprises, Inc., a maker of aircraft and automotive filters. Its new plant will cost $7.5-million, $1-million of it to be supplied by the Labor Dept. It also will hire 335 hard-core unemployed.
- Udico Corp., a producer of electrical appliances and toweling. It is building an $8-million plant, more than $1-million of which will be paid by the government. It will hire 360 hard-core unemployed.
- Bubble-Up Corp., a soft drink producer, is building a $6.5-million plant, $1-million of it through a Labor Dept. grant. Construction began June 1, and ultimately, 275 hard-core unemployed will have jobs.
- Sahagen Industries, Inc., is investing $8-million in a new plant, $1-million of it granted to the company by the Labor Dept. An electronics manufacturer, Sahagen will hire 250 hard-core unemployed.

So far, Levitt's one-man attack on ghetto unemployment has resulted in 2,500 firmly committed jobs. Thus, the federal government's investment is about $3,200 per new employee.

Levitt discovered the little-known Impact program last year while scouting government assistance for clients interested in aiding the city's ghetto poor, primarily in Watts and predominantly Mexican-American East Los Angeles. "Here was a program that was going nowhere," he recalls. "Government didn't know how to talk to business and business didn't know how to talk to government." An official of one Impact company in Los Angeles agrees. He concedes that Washington could not articulate the program's ground rules and praises Levitt for clarifying them.

Benefits. Under the Impact program, the Labor Dept. will subsidize up to 15% of each company's investment in new plants in low-income areas. To qualify for a grant, a company must be willing to train a specified number of hard-core unemployed for manual skills jobs and pay wages above minimum scales. Trainees at Torite Enterprises, for example, will be paid $2.25 an hour after 90 days on the job. A company is also required to maintain in-plant training programs and to promote qualified employees to supervisory levels. In some cases, companies must offer profit-sharing or stock options.

Levitt flatly takes credit for setting up program guidelines that satisfied both Washington and industry. As one Labor Dept. official explains: "Levitt's big contribution has been to crystallize participation by certain companies and to accommodate their needs as well as federal requirements."

Participating companies are committed to rigid construction schedules, hiring practices, and training. The penalty for failing to meet specifications can result in canceled federal funds. For instance, all contracts in Impact require companies to have a majority of hard-core-background employees on the payroll within 15 months of the Labor Dept. award.

Perhaps the stiffest regulation imposed by the federal agency concerns length of service. The incentive to succeed is that a company must pay a penalty for trainees who do not complete 15 months of training—but gets a bonus of $2,500 for every employee who completes 21 months.

Justice first. However stringent the requirements, Levitt believes Impact companies will have more success retaining employees than

You've got to build a soundproof office.

If it's not, you'll hear about it!

Whenever noise is your problem, thin lead sheeting is your best answer. Use it as a plenum or over-ceiling barrier, for the best in modern soundproofing.

Lead is economical too, because it cuts and shapes easily, simplifying installation around ductwork, lighting fixtures, piping, and conduits.

Look to lead for design advantages in soundproofing, waterproofing, roofing, porcelain enameled aluminum facades, and many others. Just hitch the possibilities to your imagination and the sky's the limit. Build freer, build better with lead, and find out for yourself. For more information write Lead Industries Association, Dept. P-9 292 Madison Avenue, New York, N.Y. 10017

Build better with lead

113A

those participating in comparable hard-core employment programs. (In the National Alliance of Businessmen drive, some hard-core drop-out rates have been as high as 40%.) "If a member of a minority group sees that he is working at a job with the same wages and benefits as other workers," Levitt believes, "he is likely to stick around longer than a guy who is commuting crosstown to work alongside men with different backgrounds."

Although Levitt's involvement began as a service to Dempsey-Tegeler's Los Angeles clients, non-clients soon sought him out as word of available funds for Impact projects spread among small and medium-sized companies. Now, he is beseiged daily with phone calls from all over the country, even though federal funding for the program has dried up temporarily.

Working for nothing, Levitt conducts his own special brand of survey work for interested clients, prior to either rejecting or recommending them to the Labor Dept. He surveys plant sites, determines whether or not the company can effectively employ unskilled labor, and appraises the product itself.

Time saving. He generally spends 30 spare-time days analyzing a company, then sends his recommendation to the Labor Dept., which will make the award about a month later. This procedure, the Labor Dept. and Levitt agree, speeds up the grant considerably since the government need not bother with its own lengthy appraisal.

Occasionally, of course, Levitt is approached by prospective clients seeking little more than a federal grubstake for a new product idea. Recently, for example, a dentist came to him with plans for a new type of dentist's chair. The 52-year-old investment banker dismissed the notion as folly.

Other well-intentioned entrepreneurs, says Levitt, simply do not possess the manufacturing experience or a product profitable enough to sustain a permanent plant in the ghetto. Still others cannot afford inner-city sites where property often is two or three times as expensive as land in other parts of town.

Although Levitt is not employed by the Labor Dept., his rejections are usually final. The federal agency knows of no other private parties acting on behalf of the Impact program. And, says Levitt, only one of the companies he rejected has gone directly to the Labor Dept., and it didn't get a grant.

Despite his enthusiasm for Impact, Levitt admits that it took the

1965 Watts riots to motivate him. Since then, he has been involved in numerous city projects and panels, including Mayor Sam Yorty's Fire & Policemen's Pension Fund Committee. More recently, he has co-chaired the city's Urban Coalition.

Such involvements have helped Levitt as self-appointed middleman in the Impact program. As head of the Urban Coalition's task force committee designed to bring industry into Los Angeles' ghettos, he has easy access to scores of leads.

Levitt admits to enlightened self-interest in aiding companies seeking Labor Dept. grants. He figures that if he helps a privately-held firm over the rough spots in its dealings with the government, the company may come to Dempsey-Tegeler for an underwriting when it decides to go public.

Far-ranging. Levitt feels his efforts on behalf of Impact are more meaningful than his other interests, however. He wants federal assistance not only for blacks and Mexican-Americans in the inner-city, but is seeking Washington support for a plywood mill near a New Mexico Indian reservation, and for a furniture plant in rural Georgia.

He recognizes that even with federal funding, small businesses take a big chance participating in programs like Impact. "It's going to be a losing proposition the first year," he says, "when you consider breakage costs, absenteeism and other add-on expenses." But he has helped his clients secure financing at standard rates, as well as insurance coverage for the high-risk ghetto areas where Impact companies usually locate.

For the government's part, Levitt estimates that it will realize a heady 20% to 30% return per investment the first year. "What nobody realizes —not even Washington," he explains, "is that this means smaller relief rolls and, because of new jobs and new businesses, new tax revenue."

The Impact program has not been without its detractors, however. A few hard-line black militants in Los Angeles consider it merely another form of white plantationism. But H. C. "Chad" McClellan, president of Los Angeles' Management Council for Merit Employment, stresses that the stock option and profit sharing aspects of the program mean that "everybody will have a chance to own a part of (a company)."

Impact is one of the best designed training programs, "if it is operated well," McClellan believes. And he credits Levitt for the push that has made it work. **End**

In vital municipal service...

Municipal services grow and become more demanding each year. Our cities must be set up for routine functions which, in many areas, were not at all routine a few years ago. However, pumping stations, like the Indiana one photographed, have long performed their necessary duties. And few operating plants could operate at all without electric motors. In this municipal pumping station, two 150 Hp Century 9500 Series Motors drive a fine pair of Worthington centrifugal pumps. These pumps and motors will be in coupled duty for many efficient, effective years.

Jeanne R. Lowe

Race, Jobs, and Cities: What Business Can Do

Business can use its influence to open up housing and job markets outside central cities and thereby encourage the movement of ghetto residents into promising economic and social environments.

THE new Republican Administration will be asking business to lend a bigger hand than ever in initiating and carrying out private-sector, community-level "solutions" to America's urban-racial crisis. During the past year, two sets of private-sector approaches have already gained currency. One, now fashionable with some corporation executives and Black Power leaders, focuses on strengthening the ghetto: building up its fragile economic power through private training and employment of residents, locating new plants there, assisting businesses that will be owned by new "black capitalists," and, most recently, forming local development corporations.

The other solution, advocated principally by some builders and real estate developers, calls for decentralizing the ghetto into freshly minted, privately built New Towns: systematically encouraging much of its population to move to new, carefully integrated communities—complete with industry, variously priced housing, and white families—to be built mostly beyond existing metropolitan areas.

Both tacks are worthwhile and should be pursued. Indeed, almost any effort is better than allowing what now exists to continue. Nonetheless, these currently popular courses will produce only limited results in the immediate future. New Towns won't take shape in significant numbers before the 1980s, and not even then unless the Government begins an unprecedented kind of land-use planning right now. In fact, both solutions lean heavily on government assistance, be it to people, property, or corporation. And the former, an agonizingly slow process, is of questionable long-range worth.

Another approach, an intermediate or metropolitan strategy, which has been curiously overlooked by most urban-crisis solvers, appears far more practical and should receive the private sector's most serious consideration. Its objective is to encourage a substantial movement of Negroes into the metropolitan community and the economic mainstream, in the belief that the basic economic, educational, and environmental disadvantages of the Negro can be altered significantly only beyond the ghetto, where economic opportunity lies and where industrial job formation is taking place—in metropolis.

The metropolitan approach is uniquely dependent upon business and industrial initiative; it should appeal to those concerned with business-like methods and sound economic development. It requires minimal cash outlay, little subsidy or risk. Unlike most urban crisis schemes now being considered, it goes with and not against the basic, new technological and economic trends in the country. It appears to have the best chance of benefiting both the Negro and the businessman.

Since most population growth, economic activity, and construction during the next decade will take place in our metropolitan regions—though generally outside the old central cities—we must work within this framework. If this development is to be generally beneficial, instead of intensifying the present artificially maintained and ominous socio-economic-racial divisions, we shall have to put an end to the harmful, omnipresent, and now (under the 1968 Civil Rights Act) illegal discriminatory real estate practices which prevent black people from moving into the residential and economic mainstream, and which keep them isolated, underemployed, or unemployed in inner-city ghettos, far from where the jobs are going.

Manufacturers are uniquely capable of doing this: severing the suburban "white noose" around our core cities, making the metropolitan housing-real estate market work the same for the Negro as for the white, and forcing exclusionist suburbs, exurbs, and smaller cities to accept non-white and lower-income families in significant volume and in a harmonious manner.

THIS is not to ignore the importance of the new federal open-housing statute, which is just now being put into effect. The force of law has had relatively little effect, however, in stemming the ever deepening racial divisions that have grown in cities and states which have had strong laws against housing discrimination on their books for years. What the community wants and is willing to do will make the final difference. Here, business and industrial leadership can be decisive.

For, if industry comes, the home builders won't be far behind. The tract-

PAGINATION INCORRECT

developers depend on industrial locations, as do realtors, merchants, and other local businessmen in the chambers of commerce. Politicians seek out new industry; planning commissions offer zoning concessions. Bankers, public officials, and other powerful local business and interest groups look to industry for its payroll and tax base, as well as its community leadership. Industry can read them the law—if it wants. Also, of course, industry recruits and hires workers.

But industry, the major force in new urban development, commonly has been a too-willing, if perhaps unwitting, partner to the discriminatory and exclusionist practices which have divided our metropolitan areas and nation into the unequal "two societies" described by the National Advisory Commission on Civil Disorders. It has been spending billions of dollars on new plants in communities that not only welcome but seek out its newly landscaped, non-obnoxious factories and laboratories, with their large tax base and bank deposits and loans. These communities even change zoning laws or provide new facilities to accommodate industry, but too often exclude workers, not to mention the black and the poor.

Most manufacturers have not stopped to question the development of these extreme trends—with the accompanying high rate of unemployment or underemployment in ghettos and unfilled jobs in exurbia—or to ask whether it is natural and inevitable, and what might be done to alter it. The more public-spirited among those who have recently discovered the ghetto are concentrating on the ghetto (and its hard-core unemployed) as if all the answers lay there, rather than on looking at the situation closer to home. But it is high time they took a hard look at how the housing market in their area works and at its effect. For the irrational, uneconomic disjuncture we have developed as a result of it is playing havoc with both our metropolitan tax base and labor supply, and is making it necessary for Washington to tax industry nationally to pay for remedies that might be at least partially mitigated locally through private or community-level correctives.

MANUFACTURERS, like other leadership forces in our country, must face up to the causes of the growing concentration of black people in the core cities and their absence in the suburbs, and industry's own responsibility and ability to change the situation. Obviously, many black people face residential problems arising from poverty, different cultures, large families, and lack of education; many want to live with other black people or fear rejection and white hostility. But we do not sufficiently recognize how much of the ghetto problem has been created by the systematic practice of discrimination and denial of residence by realtors, home builders, mortgage bankers, and suburban communities—and is reinforced by unfounded, hard-dying fears of white homeowners over the supposedly adverse effect on property values of racial intrusion. Moreover, under our present crazy-quilt metropolitan system—with free-wheeling fiscal zoning by every tiny suburb, land speculation by private owners, excessive reliance on the property tax, and use of government housing subsidies in effect restricted to older cities—it is extremely difficult to build lower-priced housing in the suburbs.

The fact is that the Negro's housing dollar cannot buy what a white man's can buy. As a rule, realtors simply will not show him a house or apartment in a white neighborhood; owners there are unwilling to sell or rent to him. Those neighborhoods that turn rapidly from white to black do so not for "natural" reasons, but because mortgage-lending and real estate practices encourage it. Bankers believe that only a homogeneous neighborhood offers an economically sound investment, the U.S. Commission on Civil Rights found; thus, they will not sell to a black in a white neighborhood. But once it starts to turn, they do everything they can to complete the transition, even withholding loans from white purchasers.

Because the Negro's residential choices are so restricted by real estate industry practices, he is crowded into too little space and forced to pay more for the generally poorer housing in the areas where he is allowed to live. Simultaneously, realtors play on white owners' fears of economic loss and inundation by the invidious practice of "block-busting," and force their flight.

In the suburbs tract-developers hold that white persons won't buy if the builder has an open sales policy. (Even the Government-guaranteed FHA and Veterans' Administration housing built during the post-World War II suburban boom was not sold to Negroes.) To keep out interracial developments, suburban towns use a host of subterfuges. And realtors there, as in cities, are reluctant to show a home to a black purchaser outside of a changing or substandard neighborhood. These practices go on in cities and states with the most progressive fair-housing laws and enforcement machinery in the country.

The experience of tract-developers

"One of these days, baby, one of these days."

who have rented or sold on an open-occupancy basis has in fact been favorable. And one of the most significant reports by the Ford Foundation-financed Commission on Race and Housing, *Property Values and Race,* the result of a ten-year study by Luigi Laurenti, found that minority purchasers, far from depressing home values, tend to stabilize or even to raise them.

Although industry's new Black Power friends (read: ethnic politicians) cannot be expected to favor the metropolitan approach, the facts are before us, and the logic is hard for even them to refute.

Along with the massive, growing separation of black from white, and poor from middle class, there is also a new and growing separation of places of work from workers. This puts the most severe hardship on the least able and the poorest who are held in the core cities because the jobs that they can best fill are steadily moving away from, or being created far from, the core. "To the extent that there is an unmet demand for the labor of the unskilled and semi-skilled workers in the metropolitan region, it is likely to be found in the suburbs," is the finding of *Manpower Strategy for the Metropolis,* the result of a study carried out by Eli Ginzberg and the Conservation of Human Resources Staff of Columbia University for the New York City Planning Commission. There, not only manufacturing but also growing retail and other service activities which cater to middle- and upper-income residents offer them the "best hope for meaningful employment, that is employment which is steady, well-paid, and opens up the prospect of advancement."

Almost overnight a complete metamorphosis has taken place in the pattern of America's industrialization—and population distribution: Nationally, between 1954 and 1965, more than 50 per cent of all industrial and mercantile construction took place outside the core cities; from 1950 to 1966, 86 per cent of the total increase of the Negro population in the entire country took place within central cities, 77.8 per cent of the white population increase took place in suburbs. Recently the trend has accelerated.

IN the past, during periods of migration of the unskilled and uneducated to the cities, urbanization of the newcomer and industrialization of the city went hand in hand. Industry then located in the big cities specificially because of the large pool of (cheap) labor, and manufacturers sought the new immigrants, even going abroad to attract them to America's urban-industrial centers. Worker housing was commonly built right next to the plants, since low-paid laborers could not afford to pay for vehicular transportation. As recently as World War II, when labor was scarce in defense plants, production jobs (of necessity) were opened up to Negroes, who migrated from the South by the hundreds of thousands to fill them. The movement of these Negro job-seekers was supported then by extensive recruitment efforts of factories and shipyards, and also paid for by the Government.

"I like our people, too. They're cute."

BUT during the 1950s and 1960s, when the Negro was being pushed off the mechanizing Southern plantations and had no place to go but to cities, newly adopted one-level assembly methods were making inner-city, multi-story factories obsolete and non-competitive. This technological change, plus traffic congestion in cities and truck-highway transportation means in the outer areas, led to the vast and accelerating shift of industrial locations from old manufacturing, rail centers into the suburbs, exurbs, and new-growth regions with their acres of inexpensive open land, access to principal markets, and residential exclusion. The result: the Negro faces an employment handicap experienced by no other worker in our history—the denial of residence reasonably near his job.

Race issues aside, relatively little can be done to stop—much less reverse—the industrial trend, as veterans of urban renewal and industrial redevelopment can testify. The nation's total growth and population spread will make this continually less likely. The handful of widely publicized plants built in ghetto locations by a few pioneering companies are, as one leader of this effort has admitted, "noble experiments." They have scarcely been duplicated by themselves, much less copied by other manufacturers on a statistically meaningful scale. The high cost, problems of assemblage, and limited amount of land in central cities make it all but impossible to accommodate many one-level factories that may require ten times as much ground space as old lofts. Moreover, doing business in the slum-ghetto, with its high crime rate and constant threat of vandalism, is not attractive. Even government agencies are finding it difficult to sign up contractors willing to build publicly financed facilities in these blighted areas without an exorbitant overcharge for the risk.

The inexperience and the credit problems of aspiring Negro entrepreneurs aside, it is not surprising that the Small Business Administration has had such a high rate of failure on loans to those trying to do business in the slum-ghetto.

To concentrate industry's and government's technical assistance efforts, cash, and loans on creating "black capitalists" there, where risks are highest and consumer incomes lowest, suggests a dangerous shortsightedness, racist cynicism, or both.

The white businessmen who are trying to help aspiring black capitalists would do better to assist those entrepreneurs to go where the action and consumer dollars are—in the suburban, growth areas, where they can command conventional insurance, serve a more affluent middle-class market, and compete on equal terms.

Sooner or later, the ghetto-improvers will have to admit what the Kerner Commission emphatically stated in its report's conclusion: "A Negro society largely concentrated within large central cities . . . will be permanently relegated to its current status, possibly even if we expend great amounts of money and effort trying to 'gild' the ghetto." Black Power will not become Green Power in the slums.

Equally important to the businessman concerned with sound economic development is the fact that land uses in many of our old manufacturing cities should change to accommodate growing operations in our emerging post-industrial economy that require face-to-face contacts and meeting places and institutional expansion. The metropolitan cores will be increasingly transformed into office and professional centers—headquarters for business, communications, and government—and will create more and more technical, managerial, and professional jobs—which too few inner-city Negroes can yet fill, and to which suburbanites must commute.

To pursue the present course will only worsen the present metropolitan disjuncture with its inherent inequalities. What can and must be altered are present demographic trends and restrictive real estate practices. For not even improved metropolitan transportation is a satisfactory alternative. A recent study concluded:

> Commutation is not a practical solution for reducing the disparity between job location and the housing location of minorities: It is prohibitively expensive, excessively time-consuming; and the ghetto poor are in no position to maintain the automobile necessary for most commuters. . . . To commute from Hunter's Point in San Francisco to a job in suburban Contra Costa County in the East Bay area would cost $3 per day, consume four to five hours daily in travel time, and would involve three or four transfers.

Data about "reverse commutation" in the Philadelphia region makes the point. There, the central city lost 50,000 manufacturing jobs between 1951 and 1965, and the suburbs gained 215,000—although Philadelphia has the nation's most advanced industrial redevelopment program. Of the work force of 480,000 in the Philadelphia suburbs, only 1.8 per cent are non-white commuters from the city proper, and only 8.6 per cent of the employed non-whites who live in the city commute to suburban jobs.

The implications for industry are grim: since the now-urbanized Negro has been having children at a higher rate than the white, a growing proportion of our prime work force will be non-white. And when 10 per cent of the national population is unable to qualify for or compete equally for jobs (or on-the-job training programs)—partly because of inability to be educated for them, or to move to appropriate jobs and training opportunities or to even hear about them—the free-market process upon which industry depends is not functioning, and industry will pay, directly and indirectly.

Even "equal opportunity employers"—commonly government defense contractors located in regions or communities with few minority residents—have failed to address themselves to the effect of residential exclusion on the chances of black persons for equal employment. This has been vividly documented in hearings of the U.S. Commission on Civil Rights.

SOME companies have begun to recognize the connection between housing and job opportunities and have started to exercise their exceptional influence to eliminate residential barriers. The following examples show what can be done:

1) When IBM located its huge new typewriter plant in Lexington, Kentucky, in 1958, it was the first manufacturing facility of significance in the area. Lexingtonians' main concern then was whether the factory would frighten off the horses. Recently, IBM, an outstanding equal opportunity employer, began a new national policy of recruiting black employees for jobs at various levels—white collar, technical, managerial. In Lexington, however, the incoming recruits had trouble. Despite the state's open-housing statute, realtors were not showing them homes.

Last spring the chairman of the Lexington-Fayette County Commission on Human Rights pointed out to IBM's local plant manager that the company—which, with a work force of over 5,000,

(*Continued on page* 91)

Race, Jobs, Cities

Continued from page 30

is the largest employer in the area—was not using the influence it could exert to stop discrimination in housing. IBM has a plan under which it guarantees the sale of employees' homes when they transfer to another location. In 1967, it guaranteed the sale of homes worth $4,000,000 in the Lexington area; realtor commissions on these sales amounted to some $240,000. Although this involved only some 200 homes, it affected the entire local real estate market, as each local realtor handled a number of sales.

IN June, IBM's vice president for manufacturing in Lexington sent a short letter to the president of Lexington's First Security National Bank, which acts as the company's agency in listing homes for IBM under the guarantee plan. The letter reiterated a verbal agreement with the banker:

> In the listing of such properties, First Security will communicate to such realtors that IBM's policy is to utilize only those realtors who provide their services to prospective purchasers without discrimination against such individuals because of race, color, religion, or national origin.
>
> If you discover this policy is not being followed, please advise me.

The bank president sent the letter to the Real Estate Board, which sent a copy of it with an accompanying memo to participants in the local Multiple Listing Service stating that IBM Guarantee Plan Properties "will only be assigned to realtors who agree to observe the IBM policy."

Within two days after the IBM letter went out, one black IBM employee who had made no progress in finding housing after two weeks of effort received nine phone calls from real estate dealers. A local realtor stated that IBM's stand would carry more weight than either Kentucky's open-housing law or the recent U.S. Supreme Court decision banning discrimination in all housing. Galen Martin, executive director of the Kentucky Commission on Human Rights, points out: "Real estate people want someone else to give them the lead."

2) In 1964, Armour and Company moved its Kansas City plant operations to all-white Worthington, Minnesota, a town of 10,000 in the heart of rural America. Among the several hundred workers who were planning to transfer with Armour to Worthington were forty-five Negroes and several Puerto Ricans.

To facilitate employee relocation and retraining for the new plant, Armour's management in Kansas City formed a committee with the unions involved. This committee worked with community leaders in Worthington—bankers, realtors, and public officials—and asked their assistance in finding housing for incoming workers "without discrimination against minority members." They received this cooperation, and, in addition, the local churches, press, and business and fraternal clubs developed and carried out a community relations program which was effective in creating a favorable climate. They also established a Housing Information Bureau to help the newcomers secure homes at a fair price and throughout the community. The result was the peaceful and harmonious settlement of Negro and other minority families in Worthington.

3) In labor-tight Dallas, LTV Aerospace Corporation, a major employer in the metropolitan area, found itself unable to fill assembly-line jobs at its aeronautics plant. To overcome this problem, it worked out a program with the State of Texas Employment Commission through which 750 industrially unskilled Mexican-Americans living 500 miles away in the Rio Grande Valley were trained for work in the Dallas plant. The commission paid the trainees' salaries with funds from the U.S. Department of Labor; LTV set up the training center and provided instruction. When the workers were ready to move to their new

uniCLUB saves you more on more of what you want!

RECORDS TAPES STEREO GEAR BOOKS

Here are 10 facts about uniCLUB. They are 10 reasons to clip the coupon and join now!

1. Any LP or tape on every U.S. or foreign label available. Columbia—Capitol—RCA—London & 350 more. *No* exceptions.

2. You save a minimum of 35% on LP's; 33% on tapes and 25% on books.

LP's LIST	uniCLUB
$1.98	$1.35
2.98	1.95
3.79/98	2.49
4.79/98	3.09
5.79/98	3.79

3. You can save even more by taking advantage of the regular extra discount "Specials." Save up to 80% off list price. Right now, for example, the entire RCA Red-Seal catalog is $2.75 mono; $3.25 stereo. The Vox $4.98 series is $1.75 mono and stereo.

4. Never a requirement to buy. No monthly "stop-order" forms to return. You receive just what you order.

5. LIFETIME MEMBERSHIP
The club membership fee is $5. This is for lifetime privileges which are increasing all the time.

6. FREE CLUB MAGAZINE
Members regularly receive "uniGUIDE" advising them of the latest releases, recommended best-buys and extra discount "Specials." When you join you receive a free 300-page Schwann record catalog listing every available record and its price. You receive a free Harrison tape catalog if you specify.

7. FASTEST SERVICE ANYWHERE
Your orders are not only processed but **shipped the same day** we receive them. This unique service is possible because your orders are picked from an inventory of over 250,000 LP's & tapes. You get factory-new sealed albums and tapes only. Defects are fully returnable at no charge.

8. SAVE UP TO 50% ON STEREO GEAR
Individual components or complete systems—uniCLUB supplies hi-fidelity equipment of virtually **every manufacturer** at tremendous savings. This month's "Hi-Fi Special" is a Garrard SL 95 turntable; List $129.50, to members only $83.00.

9. BOOKS OF ALL PUBLISHERS
The Book Division—only uniCLUB has it—offers members at least 25% off on any book in print.* You get only original publishers' editions. uniGUIDE lists best-sellers, just-published works and book "Specials."
*Texts are reduced 10%.

10. FOUR CLUBS IN ONE
uniCLUB is really a time-saver. It makes joining many clubs unnecessary. Now you can buy all your records, tapes, auto-cartridges, books and stereo-gear from one convenient source. We hope you'll join today!

SAVE MONEY EVEN ON YOUR MEMBERSHIP FEE
Give gift memberships with full lifetime privileges for only $2.50 each. Splitting the cost with one other person lowers cost to $3.75; enrolling five at a time brings cost down to only $3 each.

Send my Free Schwann catalog, order blanks & uniGUIDE by return mail.
$5 enclosed guarantees me:
1. LIFETIME MEMBERSHIP in uniCLUB
2. 35%-80% savings on LP albums, ⅓ off on tapes, 25% on books.
3. No requirements ever to buy anything. Nothing will ever be sent until I order it.

I must be delighted with uniCLUB or within 10 days I will let you know and receive a full refund.

jobs in Dallas, the commission—working closely with LTV—paid their relocation expenses and acted as liaison in finding them housing. Both the company and the state agency prepared the community to welcome the new workers.

They have fitted well into both jobs and community, have had superior records of staying on the job, and have not encountered the many problems experienced by most unskilled newcomers to the city.

These examples and others make clear that when progressive industry understands the facts and implications of a seemingly insoluble "social" problem, it can do much to bring about necessary changes. Industry can have a major impact in breaking rigid residential patterns—making the real estate market function without discrimination and assuring the peaceful accommodation of minority families in new communities.

But if more working and lower-income families are to be enabled to live outside the central cities and ghettos, industry will also have to use its local community influence to facilitate the necessary construction of more moderate-priced housing in suburbs and new-growth areas. It can get more suburban land rezoned for small lots and multiple dwellings; lend its prestige to the establishment of nonprofit corporations that will develop residential land banks, and use low-interest government housing programs in suburbia; and encourage formation of county-wide public agencies to use the rent-supplement program. Business leaders can urge states to assume a larger share of local education costs, which lead to exclusionist suburban zoning, and can discourage the establishment of new plants in communities that practice residential exclusion.

Such corporate measures do not, of course, preclude business support for other necessary kinds of action by both government and private institutions, within ghetto areas and beyond. But it is urgent for the modern corporation, particularly major industrial concerns, to recognize that their practices in communities where they are located, or plan to locate, can make a major difference in altering the racial divisions and inequities in America.

State of Affairs

Continued from page 16

not brought into focus—whether it was the fault of the conference's holding only plenary sessions, or that the Old Left was in preponderance and the New Left only haphazardly represented. There was a lot of talk about the surface manifestations of these conflicts, but no real, searching analysis. The fight of the young against the "unbending institutions," as Congressman-elect Allard Lowenstein said, is one of the most striking events of our day. True, youth has rebelled before, but it has never quite unleashed the same shockwaves around the world. This rebellion is not based on any coherent ideology; it is not operating within a party's discipline, as Anthony Hartley, the editor of *Interplay*, remarked regretfully; it is not based on a rebellion of the poor, but on a revulsion mostly among the middle- and upper-middle-class young. It is, in short, a puzzling, fascinating, and thought-provoking phenomenon worth a special conference of its own.

What struck the Europeans most was that the American liberals had lost touch with their own society and the world generally, except perhaps Europe. Some Americans consoled themselves with the conclusion that "nothing fails like success," some condemned the rebels, some were too arrogantly rational to have a real understanding of the depth of the stirrings against the American way of life.

The good old days of conformity in American society are obviously gone, its traditional pillars shaken by the activist youth which is without leadership. Michael Crozier, the French sociologist, blamed the "elite-kind of thinking" of the liberal Establishment and its over-extended aims for its loss of influence. There was no impressive evidence that the American liberals present, nostalgic for the past glories, had many answers for the present or a vision of the future. Nor did Sam Brown, the radical student, offer much enlightenment beyond the passionate exasperation with the liberals. It left many of the foreign intellectuals wondering who in the future would inspire American leadership.

When Pierre Emmanuel, the French poet, sought to raise the debate to a more humanistic level, saying that he refuses to surrender to the technological age and to the ability of science to organize the individual, Sam Brown was elated; Emmanuel, he said, had spoken from Brown's heart. Harold Cruse, the Negro writer, dismissed the Frenchman's *cri de coeur* with a shrug of the shoulder. "All it means," he said to me, "is that he is against progress."

White House Sees Hope for Ghettoes In Industrial Parks

• • •

Watts Picked for Initial One In 'Unique' U.S. Program; Lockheed to Be First Tenant

By a WALL STREET JOURNAL *Staff Reporter*

WASHINGTON—The Nixon Administration announced what it termed a "unique" approach to solving urban ghetto problems—the creation of Federally aided industrial complexes to provide job and ownership opportunities for minority-group members.

Commerce Secretary Stans, in a statement, declined to describe the new approach as an example of Nixon-style "black capitalism." But Mr. Stans did say he hoped that an industrial park announced for the Watts area of Los Angeles, scene of the 1965 riots, would serve "as a model for other communities . . . in our country's determined effort to restore decency and hope and opportunity in the ghettoes of America."

For the Watts project, the Government pledged $7.6 million in loans and grants to stimulate private investment in the neighborhood, including development of the industrial park where it's hoped 2,400 jobs eventually will be created for the hard-core unemployed.

This approach, Mr. Stans said, "is unique because it is based on the concept of an industrial complex, instead of just a single industrial plant, and this community industrial park is to serve as the economic base for substantial new commercial activity, civic improvements and residential developments in the surrounding areas."

Lockhed Aircraft Corp. will be the park's first tenant, investing $2 million in a parts production plant, the Commerce Department said. Negotiations are under way with other companies to locate in the park, the department said, but no other names were disclosed. Ultimately, the department said, private investment in the park may total seven times the Lockheed figure.

The Watts industrial park concept is the brainchild of Economy Resources Corp. of Los Angeles, a nonprofit organization of Negro and white businessmen that has launched a major program to find jobs for Watts residents.

Richard Allen, president of Economic Resources, said the plan was worked out with the Johnson Administration and ratified by the Nixon Administration. The Negro businessman said the Watts project would provide opportunities for supervisory positions and business ownership as well as jobs.

"I am thoroughly convinced," Mr. Allen declared, "that what we are doing in the Watts community is what should be done in every ghetto in America."

The Watts project eventually will produce payrolls of about $43 million and products valued at $60 million a year, Mr. Allen estimated. Moreover, he said, it will produce about $9 mil-

Cities

Parking place for industry

New York and other big cities borrow suburban idea of industrial parks to halt the exodus of manufacturers

"We shall solve the city problem by leaving the city," Henry Ford once said, and promptly provided the means to do so. True to Ford's dictum, industry in the past two decades has flocked to outlying areas, following a population seeking serenity in suburbia. For the cities, though, problems got much worse.

The industrial exodus has left cities with eroded tax bases and ghetto areas filled with unskilled minorities without the resources to get to suburban jobs. The cities have become desperate for the revenue—needed to finance increasing demand for services—that industry took with it to the suburbs.

While most urbanologists and economists agree that this trend is too deeply entrenched to be reversed, several financially strapped cities are trying anyway. Among other things, they are using the industrial park, a concept perfected in the very suburbs that industry has found so spacious and attractive. In New York, Chicago, and elsewhere, local officials are bent on developing well-planned park-like settings where companies can place large facilities at prices they can afford.

In Brooklyn, for example, the 96-acre Flatlands Urban Industrial Park has signed on five companies so far this year to occupy half of its 2-million sq. ft. of rentable space. Job rolls are in flux right now since the plants are just opening, but ultimately the park, New York City's first, is expected to employ about 7,000 people, chiefly in light to medium industry. The first tenants: APL Plastics Corp., Decitron Communications Systems, Inc., Times Square Stores, Duralab Equipment Corp., and Morse Electro-Products. In all, the city has a dozen or so parks in various stages of planning or development.

Groundbreaking. New York's industrial park program, initiated in 1958 but nearly dormant until 1965, is the country's most dramatic, but so are the city's problems. The flight to the suburbs reached epidemic proportions in the 1950s and early 1960s, when New York lost an average of 15,000 jobs a year, as plants moved out to northern New Jersey, Long Island, and nearby counties upstate.

"Companies wanted to stay, but we couldn't provide them with room for expansion," says D. Kenneth Patton, 38, appointed late last year by Mayor John V. Lindsay to head the city's Commerce & Industrial Development Dept. The lack of space made land prices zoom, and the city grew even more unattractive for new industry.

In the late 1950s, former Mayor Robert F. Wagner's administration began to acquire land in every borough except Manhattan, where population density of 80,000 people per sq. mi. and heavy commercial construction preclude accumulation of large tracts for industrial use. Land was already vacant in some areas; in others, the city exercised its power of eminent domain to acquire decayed or underutilized property.

Lure of the city. "We can assemble sites the market just hasn't made available," Patton explains. "This is our biggest inducement of all." The idea is to build a small industrial land bank; the city currently gathers about 200 acres a year.

Once it gets its hands on enough land to form an industrial park, Patton's office begins to market its product, using several financial and administrative lures to snag prospective developers and companies. Most often, developers lease the land from the city at a fixed price for 50 years, with taxes, improvements, and debt service included. Developers are taxed only on the factories and buildings they construct and on improvements they make once the lease is signed. This ties up practically no money in nondepreciable investments.

Says Arthur Ratner, president of Rentar Development Corp., which handles the Flatlands project: "We wanted 21 streets demapped, and the city took care of it. They also sunk in $2.5-million for new sewers, lights, water lines, roads." Before Rentar even began leasing to the park's occupants, the city poured $12-million into land acquisition and improvements.

Expediters. In New York, at least, such inducements would hardly be enough. The city's enormous bureaucracy nor-

PAGINATION INCORRECT

mally requires approval of large projects by as many as 15 agencies, a tedious process that can take years and that frustrates even the most patient developers. Patton claims to have cut the wait sharply, though it still may take several months, especially when public hearings are involved.

"The job of handling this red tape diplomacy with the city is best handled by city people," chuckles Patton. For that reason, he established a site services group to reduce detail work for developers working with the city. Made up mostly of planners and architects, the group becomes, in effect, the developer's advocate to the city, handling zoning ordinance and building code problems, making presentations to the Board of Estimate, and dealing with other agencies whose approvals are needed.

For the city's part, it collects rental income and tax revenues on buildings, income, and sales. At Flatlands, where the developer's rental alone is $400,000 a year, the city expects to recoup its investment in about five years. But the real plum for New York's treasury is long-term: At the end of the 50-year lease with the developer, all land and improvements revert to the city.

Ghetto bonus. The park program also will generate income by hiring formerly unemployed workers since most of the light-industry jobs call for unskilled or semiskilled labor. Most parks either adjoin or are within 3 mi. of New York's three Model Cities areas—Harlem-East Harlem, the South Bronx, and Central Brooklyn, which includes the Bedford-Stuyvesant section. Explains Patton: "Whenever possible, we bracket the ghettos. It is not our idea to go into them. The facilities aren't available, and we don't want to get into the business of displacing large numbers of people."

Patton, who took a master's degree in economics at Northwestern University and has completed course work on a doctorate in public administration, uses a self-designed "bump-shift" model—a technique that trades off priorities—for evaluating companies expressing interest in industrial park sites. His criteria: the wages a company would create and its comparative job density; tax revenues produced; impact on the community through manpower training programs and open apprenticeship programs at involved unions; and the possible multiplier effects of any economic and social gains. Patton cites a hypothetical trade-off: "In the case of an automobile shredder, we might be willing to sacrifice something else for ridding the city of, say, 100 acres of junkyards."

Midwest efforts. While New York's program is the most ambitious, other cities also are using industrial parks to halt industry's flight to the suburbs. In Chicago, which lost 75,000 jobs between 1955 and 1965, Mayor Richard J. Daley's Committee for Economic & Cultural Development functions as the city's staff agency handling industrial parks. Its biggest project is the redevelopment of the 300-acre Stockyards area south of the Loop into a park for 40 companies, due to employ 15,000 people by 1975. In Detroit, the city is working on two parks, containing 192 acres, on urban renewal sites in ghetto areas near downtown.

Cleveland is converting the 60-acre Gladstone Renewal Area into a park for light industry. The land, with site improvements made by the city, still is slightly less expensive than suburban industrial tracts, says Fred Pizzedaz, commissioner of redevelopment. "A lot of people want that suburban identity—lots of grass, rolling hills, trees. We can't offer that. And we're also up against the trauma

D. Kenneth Patton heads New York effort to expedite industrial park development.

that dealing with city hall induces. So my department actually acts as the developer's representative to the city and the council."

In St. Louis, 1,000 acres of industrial parks, virtually completed, have helped reverse a 10-year loss of 85,000 jobs through 1963. The city has gained about 30,000 jobs in the last five years. Like New York City, the focus is on light to medium industry.

Renewal. Even New York's mammoth job loss has leveled off. Recent figures indicate that the city is losing only about 1,000 manufacturing jobs per year now, but Patton stresses that the city must expand its work force by 20,000 each year just to keep pace with productivity gains.

"We also should be turning over about 2.5% of our industrial land each year, so we modernize every 40 years or so," says Patton. "Abandonment of land has become a natural characteristic, analagous to the city itself, which is worn out, used up. We must keep renewing it."

Jobs: Bringing the Plant to the Slums

By TIMOTHY D. SCHELLHARDT

MINNEAPOLIS — You are a personnel manager for a giant computer firm and you are interviewing Annie Brown. She is black, 42 years old, with only a sixth grade education, and no previous skilled work experience. Her last job was packing butter at a nearby dairy. Do you hire her to build those intricate, complex instruments?

At Control Data Corp.'s North Side manufacturing plant here, that answer, quite simply, is yes. And you hire 434 more employes like her, including welfare mothers, ex-convicts, and high school dropouts. You employ them in a modern, two-story plant in their neighborhood of crumbling residences, boarded-up stores and rut-filled roads. You offer a unique blend of training programs, employe benefits, personal aid and add the flexibility to revamp the entire package if the usual slum plant woes set in. Most importantly, you show the new employes you are sincere and that they are vitally needed.

A Nationwide Interest

The result—for Control Data at least—is a solution to the problems besetting companies operating factories in the slums, with labor from these poverty pinched areas. That solution is attracting the attention of U.S. Department of Labor officials and manpower training experts across the country.

Manpower officials gauge a slum plant's success upon plant productivity, absentee and turnover rates, employe morale, and profits. One Washington, D.C., slum plant, for instance, is considered a "disappointment" and "operating below expectations" by Labor Department officials, even though it has operated at a small profit the past three months. The plant, Fairmicco Inc. (a joint venture between Fairchild Hiller and Washington's Model Inner City Community Organization) has experienced excessively high turnover rates and poor employe morale, Labor officials say. Until July the company had been operating deeply in the red for almost two years and employment, once expected to be 200 by now, still numbers only 85.

Control Data's North Side plant, however, has a relatively low absentee and turnover rate of 6% monthly, production is on schedule and orders for computer units are being completed on time. (Keeping on schedule is important since the plant is the sole supplier of information-transmitting controller units for the company's medium-sized computers.) A recently completed Labor Department evaluation of the Control Data project and 26 other slum training programs cites the North Side plant as a successful model for other companies to follow. "There are hundreds of job training programs, each different, but if you wanted to place a plant in a slum area, Control Data's procedures and methods would be among the best to follow," a Labor Department official says.

Control Data's conscious move to the slum was an important factor in its success, says one Labor official. The plant represents a vital link to untapped manpower resources for the burgeoning computer maker. "We needed these people to survive competitively," declares Norbert Berg, vice president for personnel services, responsible for filling 32,000 jobs in the past 12 years for the company. Manpower supplies were ebbing in the traditional suburban areas—where most of the company's 27 plants are located—so employment officials looked toward slum unemployed.

"We hired slum residents to work in our suburban plants but they found difficulties getting to the plants. Subsequently, our absentee rates skyrocketed," says Mr. Berg. Confides one employe: "We finally opened our eyes and discovered the answer was to build in the slums." The company gained support from slum neighborhood leaders by seeking their assistance, and by emphasizing the plant would not just become the company's slum showcase.

Yet altruism doesn't spell instant success, especially when Control Data's president, William Norris, insisted the company could not lower job standards. "We can't afford to turn out faulty computers," he asserted. That stipulation led to the company's development of an employe training program and benefits package that is aimed at boosting employe motivation and morale. North Side officials term it a "total involvement" approach that offers an employe programs suited to solve those problems that might lead to absenteeism, production errors and failure.

To a casual observer, the aids might seem insignificant: A counseling program, day-care facilities, liberal dress rules, legal aid assistance, an intensive on-the-job training program, monthly "communications" meetings, regular employe evaluations, medical assistance and a variety of semi-skilled and skilled jobs from which to choose. But consider Miss Brown's experiences. When she first gazed at the thousands of tiny colored wires she would have to entwine to make a computer chassis unit, she developed a sudden headache and quit her training class. She returned the next day after an employe counselor phoned her at home, discovered Miss Brown's fears, and set up a training program especially for her—in a job away from wiring the complex chassis. She is now adeptly soldering 54 small resistors firmly on postcard-sized printed circuits. "I haven't missed a day since that foolish decision to quit," she proudly declares.

Learning by Doing

This personal approach is evident in the plant's 22-week training program. While most slum plants include at least two weeks of classroom training, the North Side plant has cut its in-class sessions to a week, with only 28 hours spent on skills training. New employes are introduced to basic handtools and then slowly advanced through the more intricate controller operations. In a two-and-a-half hour session the first day, trainees learn an eight-color code for wiring more than 6,000 feet of power wiring in a controller chassis. By the fourth day, they are wiring tiny resistors onto logic plates.

Another seven hours of classroom instruction are hour-long motivation sessions, developed by training director James Rance, a Negro and ex-Detroit school teacher. Trainees probe job-related topics ranging from gossiping ("These women were always gossiping" says a foreman), to the importance of being on time. Several of the motivation sessions become race sensitivity exercises where employes—65% of them black, 30% white, and 5% American Indian—probe their own racial prejudices. On-the-job assistance occupies most of the training program with foremen and two on-the-job instructors aiding the 15 new trainees each week.

The assistance continues. Corporate attorneys are holding legal advice classes and financial counseling for more than 50 employes after workers requested help with rent contracts, credit and accident suits. Minneapolis school officials conduct night-school classes at the plant for employes like Miss Brown, who expects to complete work for her high school diploma. Employes also are urged to air gripes at regular communications meetings with top plant officials, and an employe suggestion box gets close attention. "Our parking lot lights were installed faster because of the concern from night-shift employes about possible muggings," says one official.

One woman employe, warned about her excessive absences, has not missed a workday since counselors discovered she was staying home to care for a small son who has an acute bronchial lung ailment. The counselors quickly found a community agency only two blocks from her home which provided 24-hour-a-day assistance for her son.

Perhaps one of the most important factors for success is the company's flexibility to change programs at the plant. Six months ago the company discovered the plant was suffering from the usual slum plant woes. There were substantial production problems, absenteeism and turnover were hitting 10% a month, and employe morale was low. One employe relates the account of a fellow worker who became so disgusted with a chassis he took scissors and snipped the wires right up the middle. And inspectors complained they were finding more than 50 errors in one controller.

Officials revamped the training program, new employe services were provided and employes were given a larger voice in plant affairs. The counseling staff was expanded from one part-time and one full-time staff member to five full-time employes. "We're getting to really know each employe and his needs now," says personnel manager Glover Martin, a Negro, who sports an Afro-American haircut and spends much of his day chatting informally with employes.

The plant now offers more than simply assembly-type jobs. The highest skilled positions are those of checkout technicians, who inspect and test the completed controller units. At the North Side plant, brothers Ralph and Stephen Seals and 13 other employes are inspectors after only nine months or less of classroom instruction. The usual requirement is at least two years of technical school training. At previous jobs, one technician had reached a top salary level of a "couple bucks an hour" as a baker and another had been a laundry presser. More than one are ex-convicts turned down at several other area companies. They are now earning over $5 an hour.

Evaluations of employes for promotions and salary raises are made at least quarterly. Of the six trainees left from the first class of 10, three are now plant foremen and all six have had at least two raises. And Steve Seals, 28, with a year's experience at the plant, completed a nine-month-long institute program to prepare him for checking out a $40,000 controller. He is now earning $5.15 an hour, which helps support five brothers and sisters, and he has been named as one of two foremen to help oversee Control Data's second Twin Cities poverty plant in St. Paul.

New Building Plans

Control Data considers the North Side project so successful it has built a similar plant, now employing 150, on Washington, D.C.'s depressed northwest side. Plans have been announced for a 150-employe plant in the impoverished Appalachian community of Campton, Ky., and the company is considering building another facility on an Indian reservation. The St. Paul plant will be located in the depressed Summit-University area and will be manned by 100 part-time employes, most of them disadvantaged, including mothers with school-age children, high school students and technical school and college students.

Critics contend that Control Data's undertakings are too expensive and they point to the company's admission it will spend more than $6 million by 1971 on the North Side plant. However, the company estimates it spends only $2,500 per trainee, a figure still below the $3,000 average for trainees in the Federal jobs program.

Despite criticisms, the Control Data experience seems the most promising answer to problems plaguing businesses in the nation's poverty belts. It looms as one of the brightest possibilities for the Nixon Administration's ambitious manpower development plans. The experiences of the 800 employes at Control Data's five poverty plants may well encourage other companies to establish similar facilities—and to hire more Annie Browns.

Jobless Bosses

Self-Help Group Aids Unemployed Executives Seeking a Fresh Start

Men of 'Forty Plus' Search For Jobs for Each Other; Some End Up in High Posts

Awkward Moments at Parties

By STEVEN M. LOVELADY
Staff Reporter of THE WALL STREET JOURNAL

LOS ANGELES—What's it like to be an executive out of work?

"At cocktail parties, I'd see people looking at me as if I had leprosy," says Irv Horn, former manager of the plastics division of a New York Stock Exchange corporation.

"You sit at home and in a very few days you begin crawling right up and down the walls," recalls Ed Grazda, former editor of a trade magazine.

"How do you explain it to your three teenage kids? How do you tell them?" asks Bill Potter, former shipping manager for a major cosmetics firm.

"You begin to doubt whether you'll ever make it back. You begin to know a little bit what it must be like for a Negro in this country," says Don LeBlanc, former owner of a school for computer programmers.

That's what it's like. And Messrs. Horn, Grazda, Potter and LeBlanc also learned another lesson when, for various reasons, each of them was bounced from the executive suite out onto the sidewalk: In these affluent times, few people sympathize with, or even believe, a veteran of the executive suite who says he can't find a job. So, finally, each of them turned to Forty Plus, a self-help volunteer group of men like themselves.

"In Shell-Shock"

To join Forty Plus, a man must be past 40 and have earned at least $12,000 a year for the past five years—though most have made much more than that. "The men who come here are in shell-shock," says 49-year-old Dan Foster, a former toy store owner and until recently the president of the group here. "They're the guys who have succeeded, who have made it and who suddenly, for one reason or another, usually for the first time in their lives, find themselves out on the street one day."

The idea of unemployed executives pooling their efforts to find each other jobs was born here 22 years ago in the mind of Henry Simler, a retired businessman. Mr. Simler, now dead, was appalled at the great number of middle-aged executives he saw cast adrift during the Depression.

The Depression is gone, but the problem remains. Since then, the group here has found jobs for over 5,000 men, and Forty Plus groups modeled on the Los Angeles organization have sprung up in most major U.S. cities.

The organization here is representative of Forty Plus groups elsewhere. It exists solely to find its members jobs and thus to make them ex-members. Two assumptions guide Forty Plus: That at any given time, a lot of highly talented executives are jobless, the victims of mergers, bankruptcies, firings, personality conflicts, layoffs (executives get laid off, too) or unwanted transfers; and that a jobless man over 40 is often shunned by industry because of his age, no matter how brilliant his record or how extensive his talent.

Moral Support

Once a man qualifies for Forty Plus (by presenting evidence of his age and background), he pays a $75 initiation fee, $8.50 a month dues and agrees to put in at least 16 hours a week working for the group until he finds employment; Forty Plus has no full-time staff. A member may be assigned to keeping records up to date, or to calling companies to match job openings with the skills of his fellow members, or to operating a duplicating machine. Forty Plus issues a monthly "Manpower Bulletin," containing thumbnail profiles of each of its members and mails it to over 5,000 employers in Southern California. It arranges interviews for members, counsels them on the writing of resumes and gives them the moral support of being surrounded by men in the same boat.

All that may not seem like much. But it works. The four executives who talked about the traumatic shock of abrupt unemployment made their comments a few weeks ago. Today, through Forty Plus, three of the four have found jobs, and the fourth has several offers to choose from.

"Only 5% of the members quit the organization before finding jobs," says Joe Belvedere, a former secretary of the Los Angeles group. That's particularly impressive in light of the fact that most men come to Forty Plus only as a last resort, after failing to find a job by themselves. "I looked for a job for four months before I came to Forty Plus," says Bary Cool Jr., an aerospace engineer. "It's an extremely trying experience. The standard employment agency is a cold, impersonal operation. It becomes hard to lick your defeat, to regain your drive."

A Step Up

It took Mr. Cool two months to find a job once he joined Forty Plus—a job "with better pay and more responsibility than my former one."

That's a better record than most members chalk up. Mr. Foster, the former president here, says the "average member"—who is 47 years old and was earning around $22,000 a year—is with Forty Plus three months before he's placed. And usually he takes a salary 5% to 10% less than his old one. Membership here is usually 60 to 70 at any one time.

Forty Plus members say that for a man out job-hunting on his own, age discrimination strikes time and again. "There's a feeling that if you're over 40, you're a deadbeat, you're not with it, you're a relic out of the past," says Arnold Pike, a former member who's now a radio-TV producer. "But these are men who do have something younger men don't—instant experience, deliverable from the first day they're on the job."

Says Bill Klee, a former Navy admiral who is now, thanks to Forty Plus, an aerospace executive: "There's a subtle psychological barrier when a 32-year-old corporate vice president interviews a 50-year-old job applicant. There's an attitude that a man past 50 who hasn't made it to the top must be on the way down. But a 50-year-old man has 15 or 20 years of valuable time left. Look at President Nixon—he's 56 years old."

Forty Plus claims it is skilled in finding openings and matching men to them because it is in regular contact by mail and phone with thousands of companies. Furthermore, it says its success feeds on itself—each former member placed becomes one more missionary in one more company. Those employers who hire from Forty Plus and are pleased with the results are likely to come back.

A number of former Forty Plus members have moved into high-level jobs. Among them: Charles F. Horne, president of General Dynamics Corp.'s Pomona division; Edward J. Crowley, director of West Coast Development for Sheraton Corp.; Robert L. Gordon, executive vice president of Bank of America; Ernest J. Loebbecke, chairman and president of TI Corp.; Philip F. Walsh, president of Southern California Water Co.; John B. Lawson, vice president, Philco-Ford Corp.; Fred M. Rusk, partner, Price, Waterhouse & Co.

A good part of Forty Plus' success obviously stems from its role in bolstering members' morale. Executives who have been out of work agree that such support is badly needed. Don LeBlanc, the former Forty Plus member whose own small business went under, tells of his jobless experience:

"I'd go to the supermarket at 2 p.m. on a weekday with my wife, and I'd see the eyebrows shoot up like venetian blinds. You know, there's no way you can spend eight hours a day, five days a week, job-hunting. The time comes when you just sit and wait. If I'm sitting there at 10 a.m. and my wife's friends come in for coffee, I want to get the hell out of there. How do we explain this indolent bum sitting around the house week after week?"

Failure by a man who has been thought of as a success disconcerts others. Says Mr. LeBlanc, who's now a sales manager for a ballpoint pen company: "I'd go to parties, and people would ask me what I did for a living. I'd say, 'I'm unemployed. I'm looking for a job. I just had a business failure.' They would recoil as if I had spit on them."

Another Forty Plus member says: "You discover your associates aren't used to people out of success. Your relations with them become strained and uncomfortable. So you stop seeing them, for their sake and yours."

Though Forty Plus can't entirely eliminate the shock of a job loss, it can help. "I was scared to death when I first came in," recalls Dan Foster. "I was whipped, beaten. But the first week I was here, I took a look around and saw a former vice president manning the Mimeograph machine and a former admiral taking out the trash. You start thinking, 'By God, I'm not a deadbeat. A lot of other men, good men, are in the same fix.' That's a tremendously uplifting thing to know."

JOB CORPS OPENS 7 NEW RESIDENTIAL MANPOWER CENTERS IN 6 MONTHS

WASHINGTON -- Seven new Job Corps residential manpower centers were opened in the first six months of 1972 with a Federal investment of $8.4 million, Assistant Secretary of Labor Malcolm R. Lovell, Jr., has announced.

There have been 22 inner-city or near-city centers opened since July 1, 1969. Capacity for the new centers is 3,753 youths at a time. The Labor Department is now operating 72 Job Corps centers with a total capacity of 23,800.

Four of the new facilities are large residential manpower centers -- Pittsburgh, with accommodations for 200 enrollees; Woodstock, Md., 275; San Jose, Calif., 215, and Simpsonville, Ky., 200.

The remaining three are residential mini-centers (with 30-bed capacities) in Hartford, Conn., Wilmington, Del., and Davenport, Iowa. They provide special counseling and tutorial services for highly disadvantaged youths and utilize existing training programs in the communities they serve.

The seven new centers will serve about 2,300 enrollees a year, based on a five-month average length of stay.

The 72 operating Job Corps centers of all types include the 22 inner-city or near-city centers with a residential capacity of 3,735; 32 conservation centers, capacity, 6,457; four urban centers for men, capacity, 7,945; 11 urban centers for women, capacity, 5,340; two centers operated by the Commonwealth of Puerto Rico, capacity, 300, and a contract with the YWCA for women's residences in 17 cities.

Job Corps trains young men and women who are out of work, out of school, and cannot get a decent job because they lack marketable skills. They are provided with a basic education, including help in completing their high school requirements, job training, health care, necessary legal services, and assistance in finding a job. Their length of stay at the center varies with individual needs.

Youths selected for Job Corps are those living in adverse social and physical environments which are retarding their potential for employment and education.

(MORE)

The 72 operating centers have a current enrollment of 23,600 and are sending about 50,000 young men and women through the program each year. More than 325,000 youths have gone through the program since Job Corps was established in 1965.

The 22 inner-city or near-city centers have been opened since the Labor Department took over the direction of Job Corps from the Office of Economic Opportunity in July, 1969. The new centers are designed to serve local populations, tied into local needs and local job requirements.

The 50 other centers draw disadvantaged youths from all parts of the country. Job Corps age limits are 16 through 21.

M— Legislative

Statement of Mitchell Sviridoff, Vice President, Division of National Affairs, The Ford Foundation, concerning pending legislation on Manpower (H. R. 10908, H. R. 11620, and H. R. 13472) before the House Select Subcommittee on Labor, March 11, 1970.

I am Mitchell Sviridoff, Vice President for Division of National Affairs of the Ford Foundation. This Division is responsible for the bulk of the Foundation's domestic programming apart from the arts and apart from education as provided by established educational institutions. The Foundation's grants in manpower are part of our responsibilities and they have averaged approximately $4 million per year in the last several years.

By way of personal background, I have been involved with labor and manpower activities for over 30 years. Immediately prior to assuming my post at the Foundation, I spent two years in New York City first designing and then administering that City's Human Resources Administration, the first major attempt to combine a big city Mayor's manpower, welfare, community action, and educational responsibilities in one agency. And for 4 years before that I was Executive Director of New Haven's Community Progress, Incorporated. CPI was one of the Ford Foundation's "Grey Areas" projects, which, with the activities of the President's Committee on Juvenile Delinquency, served as one of the early--and, I think, most successful--models for the poverty program.

I am accompanied this morning by Mr. Basil Whiting, the Foundation's Program Officer handling the bulk of our manpower efforts, and by Mr. Robert Schrank, formerly a Deputy Commissioner of Manpower for the City of New York and before that Director of the Urban Youth Work Corps of the Lower East Side's Mobilization for Youth, one of New York City's and the nation's most consistently innovative and competent experimental and demonstration agencies. Mr. Schrank

is now a consultant to the Foundation.

I am happy this morning, Mr. Chairman, to be able to respond to your request to assist the Committee in its consideration of the proposed manpower legislation. I am convinced that in domestic affairs this legislation is second in importance only to the pending welfare reforms. It will not only reorganize the nation's manpower efforts but, perhaps, also establish a pattern for productive programmatic relationships between Federal, state, and local governments in a variety of fields.

We have just completed a decade of social ferment and change. I will not dwell at length on a history with which I think we are all familiar, but I do think it is useful to point out certain developments in manpower during the last eight years that provide insights of possible value to this Committee in considering the very complex bills before it.

It is fair to say that until 1962 this nation did not have a manpower policy. It did have an unemployment insurance system and an employment referral system designed, essentially, to ensure that those drawing unemployment benefits stopped doing so as soon as possible. The agencies administering these programs, the Federal-State Employment Services, did not see themselves as having special responsibilities for providing services for the hard-to-employ.

In 1962, the Congress passed the Manpower Development and Training Act, clearly a landmark in the formation of a national manpower policy and the most important piece of manpower legislation since the Full Employment Act of 1946. The MDTA was aimed at the mature, skilled worker who was displaced by automation or left behind when industry moved out of what became "depressed areas." Not surprisingly, then, early MDTA programs were devoted mainly to retraining such workers and were often operated through existing school systems.

Almost immediately, however, the nation became abruptly aware--and concerned about--two words seldom previously heard in public discourse but now already and unfortunately accorded the status of cliches: "poverty" and "affluence." The poor, the unemployed, the subemployed, the underemployed, the drop-outs, the minorities crushed into central city slums, and the minorities and the whites "left behind" in rural slums-all became major concerns of public policy.

In terms of legislation affecting manpower programs, we saw the passage of the Economic Opportunity Act, the tax cut of 1964, and subsequent significant amendments to MDTA, EOA, and the Social Security Act.

In programmatic terms, we found that the existing institutions--primarily the Employment Services and the educational systems--were not able to adapt quickly or adequately to the needs of the disadvantaged for a variety of remedial and other services. We, therefore, began to experiment with new structures and new techniques, first with the Labor Department's experimental and demonstration programs, with the President's Committee on Juvenile Delinquency, and with the Ford Foundation's Grey Areas programs, and later with the Office of Economic Opportunity's national emphasis and experimental programs and its locally sponsored community action agencies.

Many of the earliest of these experiments took place in New Haven at CPI. It was there that many of the techniques that are now accepted parts of comprehensive manpower programs were initiated, tested, or demonstrated. These include:

- New outreach techniques, using store-fronts in inner-city neighborhoods manned by indigenous non-professionals. The technique was designed to seek out those needing manpower services and overcome the suspicion

and distrust with which established bureaucracies were viewed. It took manpower services out of "downtown" and placed them into the neighborhood where they were needed.

- New counseling techniques, again relying on non-professionals to provide rapport and models of success.
- New training institutions, such as neighborhood-based skill centers using new curricula instead of the traditional, rigid patterns of vocational education.
- New types of training, such as heavy reliance on on-the-job training.
- New forms of remedial basic education tied to job training and to jobs.
- New approaches to dealing with youths who had dropped out or were thinking of dropping out of school.

Most important was the attempt--not always or even often successful--to provide a comprehensive array of manpower and supportive services tailored to the needs of each individual.

Similar experimentation, with varying success under varying sponsorship, was carried on in other communities around the country. Additional techniques and services were developed. And over the years the Federal government understandably evolved a multitude of categorical manpower programs often supporting a specific technique and often aimed at a particular population.

This decade of rapid growth and experimentation in manpower programs yields, it seems to me, some important lessons and conclusions for the future and especially for the bill this committee will recommend:

- First, it is clear that the existing Federal categorical manpower programs

must be consolidated. The great number, variety, and type of such programs is unnecessarily confusing and an administrative nightmare for state and local agencies through which most are operated. In such circumstances rigid, inflexible, competing bureaucratic fiefdoms thrive at Federal, state, and local levels. Entrance requirements and training allowances unnecessarily vary and conflict. And some services are duplicated while others are lacking altogether. Both funds and staff energy are wasted in coping with problems that have little to do with the actual provision of services to those who need them.

- Second, we must move from a program oriented approach to a client centered one, modelled largely on Vocational Rehabilitation efforts. Consolidating categorical programs will help on this front as well; it should allow agencies to respond flexibly to the needs of each individual, working out with him an "employability plan" or similar comprehensive scheme calling for and making available all the services needed by a client.

- Third, there is a need in manpower, as in other public policy areas, to realign the distribution of funds, of responsibility, and of authority between the various levels of the Federal system. In manpower, where services must be closely attuned to local needs, this means that Federal programs should be decentralized to states and, especially, to local governments and agencies. This must be done in a manner designed to enhance and preserve state and local flexibility, initiative, authority, and responsibility. At the same time, however, some of the dangers frequently associated with a purely block grant approach should be avoided by providing for Federal guidelines, rules, and regulations relating largely to performance objectives and standards and enforceable by

Federal officers on the basis of thorough monitoring and evaluation.

- Fourth, while it is important to decentralize manpower programs, it is abundantly clear from the experience of the past decade that the capacity of state and local governments and other local agencies effectively to plan for and administer such programs is severely limited. Archaic governmental structures, rigid and restrictive civil service requirements, and the sheer absence of adequate numbers of competent experienced manpower personnel (especially among minority groups) will drastically impede the progress of such decentralized programs. This means that a major concern of any new legislation must be the upgrading of state and local manpower capacities.

- Fifth, the past decade has also confirmed the strength of the tensions existing between state and city governments. The hostility that frequently breaks to the surface between these elements of our Federal system is certainly non-productive and often counter-productive. I am afraid, however, that these tensions will not be easily dissipated in the near future. They are built into the existing political and socio-economic systems, and no single piece of legislation, even one as important as the pending manpower legislation, will change that situation. This requires great care on the part of those who would decentralize Federal programs. Ignoring these tensions will not do; rather, legislation must explicitly lay out and protect the powers and responsibilities of both levels of government in hopes of ensuring effective state <u>and</u> local roles and of minimizing conflict between the two. At the same time incentives for voluntary cooperation should be provided. I will come back to this point later.

- Sixth, the pressures for participation by program client groups in both planning and operations are important and not to be denied. They are important because the success of programs aimed at the disadvantaged and the poor depends heavily upon the rapport between program and client. They are not to be denied because the economic and social forces causing client groups to seek participation in decisions affecting their lives are growing. We have all become aware during this decade that substantial numbers of citizens--not just the poor and not just radical college youth--are becoming more and more disenchanted with our increasingly larger, more remote and unresponsive institutions. There is a growing feeling that the "system" is not up to the demands of the times, and making the system adapt may be the greatest challenge facing us in the Seventies. Participation, messy and disruptive though it often is, may be part of the antidote needed for such ennui, alienation, and aggression. It should be pointed out, of course, that participation may take various forms. It does not necessarily mean control. The hiring of responsible non-professionals from the community, the inclusion of community representatives on planning and advisory mechanisms, and the use of community groups to provide needed services where such groups have established their competence are all relevant and appropriate forms of participation.

- Seventh, programmatic and institutional diversity is of utmost importance. We have learned during the past decade that "large bureaucratic organizations almost never make major changes in established behavior patterns unless strongly pressured by outside forces"-- to quote economist and political scientist Anthony Downs. Nevertheless, (again quoting Downs) "even a small dose of competition in certain forms could produce important--even radical--changes in the nature and quality" of the services produced by large bureaucracies. This we

have seen time and time again in the last few years. New ideas have been generated and school systems, Employment Services, and other state and local public and private agencies have been stirred from a stagnant status quo by the challenge of Head Start programs, Labor Department experimental and demonstration projects, and the many programs of local community action agencies. The most effective of these "change agents," it seems to me, were those that designed their operations to feed into and have an effect on established institutions. This means that those designing decentralized Federal programs must take pains to build-in institutional diversity at state and local levels. Large, rigid, monolithic and unchallenged state and local bureaucracies are really not much of an improvement over Federal level bureaucracies and "red tape." And, even though I am in favor of strict Federal standards of local program performance, I am sure that variety, diversity, and competition will have a greater effect on program quality.

- Eighth, it should be clear to us all by now that manpower policies, important as they are, are peripheral in comparison to the effect of national monetary and fiscal policy on the course of the economy. Barring a major public service employment program, it is fair to say that manpower programs "create" relatively few jobs. Manpower programs are designed to put people into jobs and most jobs are still in the private sector. There is serious question now over whether even an economy in inflation can provide enough jobs for all those potentially able to work, and a recession could easily render most manpower programs rather superfluous. Hence, it is of utmost importance to maintain a full employment economy and to explore more fully the issues surrounding a major public job creation program.

- And ninth, one of the most vexing problems encountered by most social programs is the uncertainty of funding inherent in the appropriations process. It is conceivable that more improvement in local programming would result from the continuity and confidence resulting from long-term funding than from most of the reorganization proposals now in the legislative hopper.

I would like now, Mr. Chairman, to turn more directly to the legislation before the Committee. The Committee has the unenviable but unavoidable task, it seems to me, of striking a balance between a number of competing and conflicting considerations:

- Efficiency and professionalism of operation balanced with participation by clients in planning and administration.
- Flexibility and responsiveness balanced with national performance standards.
- Change and innovation balanced with stability and continuity.
- The authority and responsibility of elected officials balanced with the relevance and passion of representatives of the poor.
- Mayoral priorities and prerogatives balanced with those of the Governor.
- Inner-city neighborhoods versus cities versus metropolitan areas.

Each of the three Bills before the Committee is a thoughtful and generally well-conceived attempt to balance these factors and to strengthen the foundations of a true national manpower policy (even though none fully copes with the long-term need to include vocational education, vocational rehabilitation, and such related programs as the Work Incentive Program). Each Bill:

- Consolidates the bulk of the existing manpower categorical programs.
- Mandates provision of truly comprehensive services on a recipient-oriented basis.
- Allows for the establishment of national standards, rules, regulations, and guidelines and retains a strong role for the Secretary of Labor.

In addition the O'Hara Bill emphasizes the clear need for a public job creation program and provides for appropriations one year in advance (as does the Administration's Bill). The Steiger Bill, on the other hand, establishes explicit and long-term funding authorizations, and it and the Administration's Bill both appropriately concentrate services on the disadvantaged.

It seems to me, however, that the thrust of this legislation should be to develop state and (especially) local capabilities in the manpower field. And on balance, the Administration's Bill appears to address itself most directly to this end. The proposed Manpower Training Act:

- Decentralizes planning and operation to state governments, with a pass-through to local governments.
- Emphasizes the gradual development of planning and operating capacities at both the state and local levels.
- Establishes a national computerized job bank.
- Establishes an automatic trigger mechanism to increase appropriations when unemployment rises (although the amount of such increase is probably inadequate).

These are very important and desirable characteristics and in combination with the best features of the other two Bills, the proposed Manpower Training

Act should serve as the basis for the Committee's deliberations. The remainder of my own comments will concentrate on the MTA.

Despite its advantages, the proposed Manpower Training Act not unexpectedly raises a number of questions. In part these questions derive from the lack of specificity of many of the Act's provisions and the considerable authority it provides the Secretary of Labor. In part, too, the questions relate to the apparent need to strengthen the pass-through mechanisms and other provisions relating to the role of local governments.

Even though the proposed Manpower Training Act is vague in many respects and allows a very substantial amount of discretion to the Secretary, it is probably unwise to limit flexibility by making the Act itself more detailed. On the other hand, the Committee would be well advised to obtain from the Secretary at least a preliminary indication of how he intends to exercise his authority on at least the following matters and to make its own desires clear in the legislative history of the Act:

- First, the Act would do away with existing program categories, which, for all their faults, at least provided some guidance to local programmers. What will the nature of the Secretary's planning guidelines be? Will they mandate a wide variety of programs, taking note of the special needs of youth, of present New Careerists, of apprentices, of blue collar workers needing upgrading? Will they permit the lattitude necessary for the development of plans relevant to diverse and varied states and localities?
- Second, there are a number of indications that the Secretary intends to stipulate in his regulations that the State Employment Services be

considered the presumptive supplier of manpower services regardless of of the nature of the local prime sponsor. Is this so? If so, would it not be wiser for the Secretary to limit his standards to performance objectives and information and report requirements, allowing services to be provided by a variety of local agencies (including, as the case may be, the Employment Services) depending upon their abilities and competence as determined by the local prime sponsor in accordance with Federal criteria?

- Third, how does the Secretary intend to specify the formula allocating a minimum share of a state's allocation to a Standard Metropolitan Statistical Area? What figures shall be used for labor force and disadvantaged populations? Who shall make this determination? How will such funds be allocated within an SMSA between suburb and central city?
- Fourth, the success of the programs conducted under this Act will depend very largely upon the quality and nature of the monitoring and evaluation conducted by the Secretary and the training and technical assistance provided to state and local personnel administering programs and staffing state and area planning bodies. How does the Secretary plan to implement Sections 304 and 305 of Title III? How much of the appropriations available will he allocate to these functions?
- Fifth, given the tensions between rural and suburban dominated state governments and urban areas, does the Secretary plan to require that

central cities be represented on state and area planning mechanisms in proportion to their share of the state's or the area's labor force and disadvantaged population?

The models for the State Comprehensive Manpower Agency and for the state planning process outlined in the Administration Bill may be too specific. Some states have already created or are in the process of creating comprehensive manpower agencies that combine the planning and operational functions and that therefore do not fit the MTA model. These states might not be eligible for their full share of Federal funds under the requirements of the proposed Act. And while there are some states in which the model might work adequately, it may not fit any state perfectly. In its subsequent hearings around the country, then, the Committee might well attempt to determine whether and how this provision might best be modified.

Section 102 of the proposed Act states that area plans will be included in the state plan if the Governor finds them to be consistent with the Secretary's guidelines. But local needs are often best discerned by local people; and in order to provide a proper balance between state and local requirements, local area plans ought to be assured of inclusion in the state plan unless the Governor finds them significantly inconsistent with the requirements of the Secretary. Such exclusion should be subject to the approval of the Secretary.

The legislation states that the Governor will designate a local prime sponsor in SMSA's unless heads of government representing 75% of the population of the SMSA agree on a sponsor, in which case the Governor shall designate that nominee. But, as I understand it only two of the top 50 SMSA's in the nation have

75% of their population in the central city. Indeed, more than that number have 75% or close to that in the suburbs! It is very useful, indeed, to foster metropolitan cooperation in manpower planning and programming, especially since many jobs are in the suburbs. But the central cities are where the manpower problems are, and it would thus seem appropriate for the highest elected official of the largest central city in each SMSA to be the presumptive local prime sponsor, and to be otherwise only at the request of the Governor as approved by the Secretary. Other units of government in the SMSA should, of course, be represented on the local area comprehensive manpower advisory bodies that advise the local prime sponsor. Regulations should, of course, stipulate that a fair share of the SMSA's funds under the Act be allocated to communities within the SMSA but outside the central city, and plans for the use of such funds should be subject to the approval of the area comprehensive manpower advisory body. (Plans for the use of funds within the central city should not require such approval.)

As noted earlier, neither the legislation nor the Secretary's standards, criteria, rules, or regulations should establish a presumptive supplier of manpower services. To make such a stipulation is to deny the local prime sponsor the legitimate authority he needs to be fully responsible for the provision of services in his area. Ideally, then, we should see a considerable variety of local agencies involved in the provision of manpower services. In one community the School Board might provide the bulk of such services, in another the Employment Service, in another the community action agency or a model cities agency, and

in still another a city human resources agency. (Regulations should provide that local prime sponsors take note of the special characteristics of community action agencies and their special relationship with disadvantaged communities in selecting the suppliers of manpower services.)

The modifications mentioned above should do much to assure a fairer balance between the Mayor of central cities and other elements in the state. With the interests on both sides protected, there remains the question of fostering cooperation. I would suggest that the 5% of appropriations that are now allocated in the Act for incentive payments be increased to 10% (and that the proportion of appropriations allocated for basic payments to states be reduced to 70% of the total). Further, the incentive should not be designed, as in the present proposal, to spur state and local governments to greater contributions of their own resources to manpower programming. As presently designed the incentive does not seem particularly attractive anyway (a state would receive $9 of its basic Federal MTA allocation for each $1 of its own; as an "incentive" payment it would receive only two Federal dollars for each one additional dollar of its own).

Rather, the incentive should be paid on a 10% or even further reduced matching basis to those cities meeting exemplary standards of integrating their manpower efforts with those of surrounding communities, to those states and cities meeting exemplary standards of integrating their manpower programs with those of each other, and to those states and cities meeting exemplary standards of cooperating with other states in labor market areas crossing state

lines.

Although the proposed Act's statement of findings and purpose mentions a public service employment program, it may be wise to place a greater emphasis on this as the single most important missing element in present manpower programming. The O'Hara Bill does this, but it seems to me inadvisable at present to stipulate the creation of a sizable public employment program. The recent statement of the National Manpower Policy Task Force is persuasive in this respect. That statement notes that we simply do not know enough now to mount a public employment program without running the risk of a disasterous failure that might discredit the whole notion. The Task Force goes on to suggest that a number of sizable and carefully designed experiments be carried out to determine the most appropriate policies and administrative procedures for carrying out such a program. The Committee might well consider stipulating such experiments clearly in Title III, Section 301b.

Thank you for the opportunity to present these views to you Mr. Chairman. I will be happy to try to answer any questions the Committee might have.

Total, Individuals Receiving Training Outside the Regular Schools: 2/	167,800
Total, Individuals Receiving Training Outside the Regular Schools, Excluding Youth Programs:	151,911

1/ Excludes V.R. and Blind Commission.

2/ I.e., excluding Secondary Voc. Ed. and Voc-Tech portion of Community College enrollments.

Potential Effect, New Fed. Legislation[1/]

A. Items I, II, IV, V, VI, IX, XI, XII - No effect.

B. Item III - Effect, but unknown; Sec. will establish criteria for grants; can expect N.C. share to remain about the same.

C. Item VII (MDT - instl.); VIII (CEP); X (NAB -?); and XIII (MDT-OJT) - Out.
Total $ - $14,874,801.

D. New Legislation - Under T.I, for comprehensive programs, N.C. can expect about $14,000,000. - thus offsetting loss under C, above.

Under T. II, Public Service Jobs, N.C. can expect about $12.8 million in new funds.

1/ S. 3867, the Nelson bill, as reported by Subcomm.

Total Population	4, 967, 000
Total Civilian Labor Force	2, 343, 200
Employed	2, 229, 800
Unemployed	113, 400
Rate of Unemployment	4.8%

Population - Preliminary 1970 census data. Other figures - ES, for June, 1970. Because of youth seeking summer jobs and high agriculture employment (up 71,000 over previous month), June is a "high" month. Good 1970 base figures are perhaps on this order:

Total CLF - 2,200,000
Total E - 2,100,500

RTI uses latter figure as base for its community college planning study.

Age and Sex, Total Population, 1970

Age	Male, No.	Pct.	Female, No.	Pct.

	2,027,300	100%	2,027,300	100%	

Based on N.Y. State Study

"If North Carolina workers in 1970 had the national level of educational attainment for the occupations in which they are employed, 1,178,900 or 58.1 percent of the total would have from one to four years of high school, whereas only 1,077,800 or 53.2 percent of the total are estimated to have this level of educational attainment. Conversely, requirements call for 429,300 workers with less than high school training, while it is estimated that 522,900 workers with from zero through eight years of schooling are employed in North Carolina in 1970."

Note: "The training needs as presented above do not include those for persons who are unemployed or not in the labor force. Many of these North Carolina residents have low levels of educational attainment and would benefit from the training offered in the community college system. An educational effort reaching these people would create a better-trained labor pool in North Carolina which should induce an increased rate of employment growth over that projected for the planning decade. It should be pointed out that providing motivation for these unemployed residents to undertake additional training may prove to be an even more difficult task than in the case of employed workers. The North Carolina Manpower Development Corporation experiment now underway in the community college system may be a major step in determining effective procedures for motivation of these underprivileged members of the North Carolina population."

April 19, 1971

APR 21 1971

Dr. Emory Via
Southern Regional Council
5 Forsyth Street
Atlanta, Georgia 30303

Dear Dr. Via:

Enclosed is a copy of the report on manpower needs in North Carolina which was prepared by the North Carolina Manpower Development Corporation at the request of Governor Scott. As you may know, the Governor released the report on Tuesday, April 6, along with a statement pledging his support for the report's recommendation that North Carolina establish a State Manpower Council.

I hope you will find the report interesting and useful. At the same time, I want to thank you again for the help you gave me and other MDC staff members while we were preparing this report last year.

Sincerely,

Bob Smith

Bob Smith

Mr. Bob Smith
North Carolina Manpower Development
Corporation
P.O. Box 1057
Chapel Hill, North Carolina 27514

Dear Mr. Smith:

Thanks for the report on North Carolina's manpower needs. I look forward to reading it. I am sure that you and the rest of the staff should be congratulated both for the work that went into this and for the final product.

Sincerely,

Emory F. Via, Director
Resources Development Center

Worksheets for Quarterly Briefing with Department of Labor

August 9-10, 1972

I. State and Local Manpower Plan

A. Situation in April -- The newly appointed State Manpower Council had held only its third monthly meeting and was engaged in (1) preparing rapidly and under the old CAMPS strictures a "plan" for Fiscal 1973 and (2) setting about real planning for the future. Key staff appointments below the administrative officer remained to be made. An economist under MDC contract with the Council was cranking up efforts to provide a data base for long-term planning. First efforts were beginning to get AMPB's actually functioning in the State's 17 planning regions.

B. Progress Since Then -- The CAMPS plan was completed and approved on schedule in April. At the request of the Council, the administrative officer and MDC's economist undertook a study of how the 17 planning regions have been funded in the past for DOL manpower projects (MDTA and EDA). The study indicated inequities in funding based on comparisons of unemployment and other need factors between the regions. The Council decided to recommend a ceiling on DOL funding for the "overfunded" regions at their present level. Council has been examining the structure of MDTA advisory committees at the regional level with a view toward combining them with AMPB's. MDC has provided extensive technical assistance to the Council's staff in each of these studies and has conducted examinations of the planning structures in four of the State's regions. One region will be chosen for in-depth monitoring and technical assistance in developing its own planning

capabilities, while the other regions will be looked at for purposes of control. The Council agreed at the August meeting that subcommittees would be established to investigate and recommend improvements in various program areas. MDC also has assisted the Council staff in the difficult process of getting qualified manpower personnel cleared through the State's Merit System. To date only two of the six State staff positions under the Council's administrator have been filled.

C. Prospectus for Future -- This is the longest term of long-term activities. Delays in appointing Council members, time needed to acquaint Council members with "the state of the art," and restrictions imposed by law on Council's freedom to act -- all conspire to impede progress on creation of a genuine State and Local Manpower Plan. Nevertheless, we see real progress being made. We have set the latest possible date under the contract, May 31, 1973, for delivery of the monograph, "Creating a State and Local Manpower Plan."

II. Public Service Employment

A. Situation in April -- Having filed in January an extensive "first view" report on how the Emergency Employment Act was working in North Carolina with the National Manpower Policy Task Force (and with ORD/DOL), MDC was ready to make progress in three specific areas of the effort. First, MDC was due to file in May an analytical memorandum citing strengths and weaknesses of EEA legislation and guidelines. Next, MDC wanted to create several demonstrations of creative uses of EEA in North Carolina. And third, we were interested in helping the State Manpower Council take over the operation of EEA in the State and in preparing staff for this task.

B. Progress Since Then -- The memorandum ("An Eight-Month Assessment of EEA in North Carolina") was completed and sent to NMPTF and ORD/DOL. It called for expansion of EEA but with changes in the national formula for allocation to the states and with incentives to try to break down traditional barriers to employment and achieve other objectives of the Act. After a good deal of field work, proposals for demonstrations of EEA programs were written for two rural North Carolina areas (a third proposal, from a North Carolina city, was stimulated by MDC interest in the subject). As no funds are available for these proposals nationally, MDC is setting about to get State funding to get the programs under way. Finally, at the request of the State Manpower Council, MDC assigned one staff member familiar with EEA to the SMC staff for several weeks to do an analysis

of the effectiveness of the staff and report recommendations. MDC is attempting to assist the Council's administrative officer get approval from Regional DOL/Atlanta to combine the EEA and regular manpower staffs.

C. Prospectus for Future -- MDC is following the schedule laid down by the NMPTF for its monitoring reports. At present, this schedule calls for a draft of a final report by October 31, to be reviewed for a final report January 1. MDC plans to prepare a monograph ("Beyond EEA in Public Service Employment") based on its involvement in monitoring EEA statewide and its experience providing developmental assistance both to the State and to local EEA sponsors. The monograph is ticketed for delivery May 31, 1973.

III. Developmental Assistance to ESC

A. Situation in April -- MDC was involved in work with the North Carolina Employment Security Commission on four major fronts. Frist, MDC was concluding two years of operating an experimental rural Concentrated Employment Program in Southeastern North Carolina by helping ES get ready to take over on an ongoing basis. Second, MDC was involved with ES officials in conducting employer relations training for local ES staff statewide. Third, MDC was developing an awareness curriculum based on its Management Awareness Program for use by a client-oriented organization like ES. And finally, MDC was assisting Employment Service officials in bringing together industrialists and businessmen in order to improve agency-industry relations and to increase ES organizational effectiveness.

B. Progress Since Then -- (1) The transfer of the operations of the CEP from MDC to ES was approved by the State Manpower Council in May. ES assumed sponsorship July 15, including full takeover of the MDC-ES job bank computer system. MDC provided staff assistance in writing the new CEP proposal and presently is writing a final report. Perhaps more importantly, MDC top-level staff worked with ES to establish a hiring system and salary scale outside the State Merit System. This enabled ES to hire most of MDC's heavily integrated staff and established a precedent for going outside the State Merit System's hiring strictures on education and experience. In part as a result of involvement in assistance in

writing the final report, MDC's monograph on its two-year involvement with a CEP is running slightly behind schedule. Originally scheduled for delivery in draft form July 15, it is now planned for August 15.

(2) MDC has participated with ES in the planning and implementation of employer relations training in six of the eight ES regions in North Carolina. When all eight regions are finished in early September, 1972, ES with assistance from MDC will have trained approximately 140 employer relations personnel.

MDC's Experimental Center is assisting the ES Raleigh local office in a employer relations demonstration project involving a "blue ribbon" employer council and a local office task force to further improvements in relations between Raleigh area employers and the local office. With the desired results this demonstration could become a pilot effort to be followed by ES local offices as a part of the ES statewide program of Employer Services Development.

(3) Work on development of an awareness curriculum for client-oriented public agencies such as ES was finished in July. ES and MDC have scheduled six to eight sessions during Fiscal 1973, beginning with the director of ES for the State and his key staff people in Raleigh. These sessions will fall far short of reaching all ES personnel who deal with the public, but it is hoped that MDC can assist in the development of a permanent training team to come under ES employ during the year who will be able to carry on the work in the future. This team also can continue to do employer relations training as it is needed

(4) The ES Director and his staff are being assisted by MDC in planning for a management development program to build on the awareness curriculum experienced by ES supervisory personnel.

(5) Another innovative ES program of interest to MDC is the outstationing of job-placement personnel in two technical institutes. The success of this effort could become a productive demonstration of community resource coordination.

C. Prospectus for Future -- (1) Completion of the CEP monograph by August 15; (2) completion of employer relations training; (3) creation of an in-house ES training team capable of continuing awareness training and employer relations training; and (4) further involvement of ES in appropriate community college programs.

A progress report on developmental assistance to ES is due December 31. It is possible that a final monograph on this work will emerge for planning purposes at that time.

IV. Development Assistance to Community Colleges

A. Situation in April -- In April the community college system had just absorbed MDC's training centers in Asheville and Craven County. A week-long training session for personnel of the three new participating community college institutions (following the Lenoir demonstration) had been conducted and programs at these institutions were just getting under way. Additionally, Holding Tech -- the community college institution in Raleigh -- had signified its interest in tying into the work of the Experimental Center in Raleigh.

B. Progress Since Then -- After a long and somewhat frustrating effort involving MDC with the community college's research people, we succeeded in getting a simple data form accepted by all participating agencies to insure compatible follow-up information. While much of the data gathered thus far has not yet been processed, we do know that the new institutions are into their fourth or fifth cycle (graduating a total of approximately 300 new trainees) and that the programs are going, for the most part, smoothly. (We were heartened by a one-year follow-up of trainee-graduates from the Lenoir program in the years 1970 and 1971 which showed that 79 per cent of those originally placed were still employed).

One of the byproducts of the spread of the Lenoir program has been the efforts of institutions not funded by the State specifically for the manpower program. Invited to a major meeting of participating community college leadership in Charlotte July 13-14 were heads of five institutions which have activated the manpower program, to one degree or another, using flexible funds of their own with developmental assistance from MDC.

Another byproduct has been the use of the HRD curriculum in one community college as a standard teaching tool for all students. "We don't have anybody who isn't just a little disadvantaged," said the president of Roanoke-Chowan Community College in northeastern North Carolina. MDC hopes that the program initiated by the college's staff will prove to be a forerunner of wider use of HRD throughout the system, whether these students are in training for jobs or for further study at the collegiate level.

The July 13-14 meeting also saw the president of the community college system put out a call for all participating institutions to host regional meetings over the next few months to prepare other institutions for the program. Present plans call for an effort to get considerable additional funding for the program from the 1973 General Assembly, to be apportioned to institutions in the system according to their desire and ability to become involved. It is thought that the regional meetings will determine which institutions are "ready" for the program. The Community College Advisory Council has requested approximately two million dollars in Priority I for the next biennium for this purpose. An additional 2.6 million dollars is in Priority VI.

C. Prospectus for Future -- The monograph on institutionalization of manpower training in the community college system can not be presented in final form by August 21, 1972, as called for in the present schedule. A progress report can be done by that date, however, looking toward a final monograph by the end of the present contract, after the 1973 General Assembly has met and taken its action. MDC hopes to move along the spread of the Lenoir demonstration in the meantime and also to begin actual institutionalization of MAP in the community college system (See VI. Management Awareness Program).

V. Industry Involvement in Training

A. Situation in April -- After a long series of meetings with industrial and business leaders in Raleigh -- the city chosen as the site of MDC's Experimental Center -- three main program thrusts had been identified: First, there were efforts to establish through "brainstorming" sessions, a system enabling industry to share information of common value, as, for instance, programs designed to reduce worker dissatisfaction. Secondly, there was an effort to involve public agencies in Raleigh in creation of a manpower delivery system. Third, there was a cooperative program between MDC and the Department of Public Instruction to add an additional dimension to a new "career awareness" curriculum being installed from kindergarten through high school.

B. Progress Since Then -- "Think tank" meetings of industrial and business leadership in Raleigh have continued with some considerable exchange of mutually beneficial information between participants. At least one major industry in Raleigh is presently interesting itself in the general problem of worker dissatisfaction as a result of MDC's having presented a paper detailing some of the efforts of industry in this field nationally.

The involvement of public agencies in a manpower delivery system has occupied a major portion of the Experimental Center's efforts over the past several months. Agency heads and city representatives were present at a kickoff meeting at the Center May 17. At that time, seven subgroups were established, each to concern itself with one phase of the manpower delivery process -- recruiting, assessment, etc. During June each subgroup met at least once and efforts have begun in July to tie together their findings. We expect a delivery system to emerge at least in outline prior to involving industry representatives. MDC will then involve the delivery system, including industrial input, in a training cycle at the Center in August. The training will involve personnel at Holding Tech in a learning-teaching capacity. The goal is an advanced version of the old MDC training center, utilizing full community resources for the first time.

The cooperative program between MDC and the Department of Public Instruction has suffered innumerable delays in getting under way. The original program design called for involving teachers of an experimental "career awareness" public school system in Apex, North Carolina, in summer employment, with seminars built in to involve industrial representatives with the educators. Learnings were to be utilized back in the schools this Fall. Despite school official's predictions otherwise, the teachers did not prove enthusiastic about doing entry level work during the Summer weeks to improve their "career awareness." Since MDC had developed only jobs of the sort that the teachers' pupils might get, only two teachers of an original group of 16 candidates actually were placed. However, at MDC's request, a coordinator has been hired under the Department of Public Instruction's budget to broaden the scope of the program to the entire

Wake County school system to involve other teachers and workers, and to prepare a proposal for the Fall. The Department has set aside approximately $60,000 for the cooperative program.

C. Prospectus for Future -- The contract calls for two monographs under the general heading of Industrial Involvement in Training. The first, "Industry Development in Training," is scheduled for delivery September 15. This monograph was conceived as dealing with the cooperative program between industry and the public schools, and probably should be rescheduled for January 1, 1973, to allow time for the Fall program in Wake County to take effect. The second monograph, "Creative Urban Manpower Delivery System," is scheduled for May 1, 1973. It may be that a progress report prior to this date would be useful and in order. It is too early to predict what form learnings from MDC's involvement in industry "brainstorming" should take.

VI. Management Awareness Program

A. Situation in April -- MDC training staff was working on the monograph on MAP, scheduled for completion July 31. At the same time, staff was concerned with efforts to begin institutionalizing MAP in the community college system and to use MAP as a tool in the development of industrial involvement in the Raleigh Experimental Center.

B. Progress Since Then -- Industrial contacts advised MDC to develop a two-hour MAP demonstration to attract participation by reaching top management. Accordingly, training staff set about to develop the two-hour MAP and a demonstration was presented to several representatives of industry and top staff of Holding Tech in June. Based on results of this meeting and on continuing follow-up by MDC staff, we are projecting a regular three-day session for Raleigh middle management in August. At present we have 11 firm commitments and two possible commitments to this session. Hopefully, this MAP will lead to more extensive programs with the individual industries.

Several approaches to institutionalization have been tried. At first it was thought that community college officials in Raleigh could designate three institutions (one from each section of the State) to take on the program. This approach did not prove sufficiently interesting to the

institutions approached. Some of the institutions pleaded money problems -- money for MAP must come from Extension Service funds which in some cases are tied down by previous programming. Finally, MDC decided to work with two institutions which were willing to find money for the program -- Holding Tech in Raleigh and Lenoir Community College. The president of the community college system has indicated his confidence that money for the program can be found from regular institution budgets in Fiscal 1973.

The MAP monograph has been completed on schedule. A draft version has been sent to DOL/ORD for comment.

C. Prospectus for Future -- MDC hopes to develop MAP programs in the two participating community college institutions by the time the General Assembly meets in January, 1973. At that time a further decision on spreading the program can be made. In the meantime, MAP will be done with industry in Raleigh.

VII. Ad Hoc and Other Programs

A. Indian Program -- MDC has developed a plan for surveying Indian manpower needs across the State, combining house-to-house survey work in a concentrated section with individual observation statewide. The product hopefully will be a monograph to be ready by May 31.

B. Tobacco Program -- MDC has been placed on stand-by to assist ORD/DOL in the completion of a study to be done at North Carolina State University on the "migration" of tobacco workers from farms in the State.

C. Final Centers Report -- MDC is finishing work on a monograph resulting from the last year of its experience with the manpower training centers in Asheville and Craven County. The monograph will focus on learnings from the Family Development Unit approach tried out in Craven County. It should be ready by August 15.

D. Intern Program -- Two students from North Carolina A&T University participated in the joint MDC-A&T Intern Program during their spring semester. They worked out of the Raleigh Experimental Center and also with the Planning and Information Department of MDC. Both the interns and MDC agreed the program had been successful in giving the interns a comprehensive experience in the manpower field. However, it was suggested by the interns that the internship period should be longer and orientation more intensive. MDC is

in the process of developing plans for next year's program, incorporating these suggestions.

E. Mobility Project -- Work under the current contract is proceeding on schedule. It is hoped that the increased emphasis on research will provide useful information on the potential of a larger project. Industrial demand for relocatees is increasing; however, our current budget precludes meeting this demand. The corporate aim is still to institutionalize the Mobility capability in the Employment Security Commission.

F. Soul City -- MDC has continued to provide, on request, technical assistance to Soul City on manpower planning for the future. Actual manpower programs in the area would not appear to be in order for the immediate future.

G. Career Education -- The MDC staff continues its formal and informal interest in career education as evidenced by the Apex Project. We have also monitored programs in Caldwell and New Hanover counties. Some preliminary thought is being given to refining HRD techniques to meet the needs of under-motivated students and MAP techniques to improve the effectiveness of teachers and counselors.

SOUTHERN REGIONAL COUNCIL, INC.

MEMORANDUM

TO: Via, Harris, Bowie, Watkins DATE:

FROM: SL COPIES:

SUBJECT:

Please note the enclosed progress reports from N. C. Manpower Development Corporation. Some strengths, some weaknesses, but still rated the best of its kind in the country. At some stage we might feature an article on its innovations.

North Carolina Manpower Development Corporation

September 7, 1972

Mr. Robert Schrank
Project Specialist
Division of National Affairs
The Ford Foundation
320 East 43rd Street
New York, New York 10017

Dear Bob:

In view of your interest and your help in our informal musings over "humanization of work," I thought we might bring you up to date on where we are. For obvious reasons, we are not getting into another study of the dimensions of worker dissatisfaction or inventing our own solutions. We remain interested, however; and the enclosed two in-house memos should bring you up to date.

Under separate cover, I'm sending you a copy of our notes to Seymour for our most recent quarterly meeting. If you will glance through here, it may be that there are other areas on which you would like more information.

At our Board meeting a couple of weeks ago, the staff was instructed to keep MDC in business beyond the expiration of our current funding in June of next year. At some point, I would very much like to have your thoughts on the future of MDC. (I would like to have your money, but I'm serious when I say I would appreciate your thoughts.)

Let me know when we might talk.

Sincerely,

George B. Autry

Synthesis of Memos on State Plan Meetings

(over 30 agency heads and others interviewed in July)

Interviewing Subcommittee: Bob Smith, Ed Stewart
Terry Pridgen, Jeanie Rausch

Givens: (Ideas relating to the creation of statewide manpower planning and policy-making machinery that everyone seemed to accept as true)

1. As presently constituted, CAMPS is virtually useless as a planning and policy making body.

2. To succeed, any planning and policy-making body would have to have as its membership first-line folks -- agency heads or substantial private citizens serving at the Governor's request.

3. Manpower planning on the State level should be coordinated with manpower planning on the level of the new 17 planning regions in the State.

Alternatives:

1. A Department of Manpower, consolidating all agenices now working broadly in the manpower field. (This would be a variation on the tentative new department structure suggested by Senator Henley's committee).

Pluses: Total coordination; full authority vested in a single agency head.

Minuses: Extremely difficult to achieve both politically and practically; would community colleges be regarded as a "manpower" agency? (if so, its educational role would suffer; if not the new department would lose a vital constituent).

2. State Manpower Planning Council, composed of heads of agencies affected and vested with power to recommend to Governor a State plan including amount of disbursement to each manpower-related agency.

Pluses: More practical; good coordination; opportunity for reform of existing manpower related agencies.

Minuses: Might encourage inter-agency squabbling; hard to divvy pot; agency heads not likely to be innovative*

3. Governor's Manpower Council, composed of private, independent citizens from all walks of life, vested with power to recommend to Governor State plan including amount of disbursement to each manpower-related agency.

Pluses: Best chance for independent, creative planning; highest degree of industry and poverty-sector involvement.

Minuses: Either would mix private folks with agency heads (which could restrict innovation), or would leave agency heads out of policy-making.*

* In this alternative, a staff capacity to assist the planning body is assumed. That capacity could be achieved -- most of those we talked with agreed -- by use of the State Planning Division of the Department of Administration.

MEMORANDUM

TO: George Autry, Jim Godwin

FROM: Bob Smith

DATE: September 5, 1972

SUBJ: Conference on Worker Satisfaction (Or the Lack Thereof)

I met this morning with Frank Krieger, Jerry Hart, and Bill Kemp of Kemp Furniture Company of Goldsboro. Purpose of the meeting was to discuss the possibility of an industry conference to trade ideas on the subject of developing management skills in the area of worker satisfaction.

The meeting stemmed from an earlier one involving Jim G. and me with Kemp, a furniture manufacturer of Goldsboro who has done some interesting things in this general field (see my memo of August 25). Jim and I had talked earlier with Jerry Hart, president of Stackpole and found him highly receptive to the idea of a conference. Krieger was invited as the head of the industrial association covering Raleigh and the East, and as a member of our think-tank group.

Those present agreed that a conference with perhaps 20 participants would be useful. The idea would be for us to arrange several fairly brief demonstrations on what's being done in the state in the field (Kemp, for instance, would discuss his various incentive plans; somebody else might talk about problems he hasn't been able to solve, and so on). Then workshops could be set up to feed back to both sides -- reaction to Kemp's things, possible solution to the problems, etc.

It was agreed that the conference should be a short one. Kemp suggested Quail Roost on a Sunday evening and a Monday morning, adjourning sometime in the afternoon. He stated that his involvement in politics would make it difficult for him to meet on a Friday or Saturday. Krieger and Hart seemed to think that the somewhat unusual meeting time might work to our advantage by screening out individuals with only a marginal interest in the subject. After some consultation with calendars, Sunday-Monday (October 15-16) was chosen as a possible target date, depending upon the availability of Quail Roost. It might be necessary to move to November, or find another meeting place, if this doesn't pan out. Krieger agreed to serve with Jim G. as a committee to determine who should be invited to this first meeting. Kemp said he'd like to bring two others from Goldsboro. Raleigh names suggested included Jim Peden, Jr., Ben Kilgore, Gregory Poole, Harry Richter, and Paul DelaCourt. One big question this first conference will have to answer is

what the next step will be. Should the group attempt to persuade others in industry to adopt this or that technique, or should it see itself strictly as an idea trading organization? And what permanent organization should the group seek to develop?

In view of Seymour's interest in industry sharing information, Schrank's interest in "humanization of work," and Bill McGehee's general concern, I think we should proceed along the lines suggested in this memo.

I also think that somewhere down the road -- and not far down the road -- we will want to break the news to the industrial types that we'd like to involve workers in their meetings and deliberations.

MEMORANDUM

TO: George Autry, Dewitt Sullivan

FROM: Bob Smith

DATE: August 25, 1972 (August 17, 1972)

SUBJ: Work Environment-Job Alienation

Jim Godwin and I visited Wednesday with Bill Kemp, Jr., of Kemp Furniture Company in Goldsboro. He had been described to us as one of the more progressive employers in the State and we were interested to learn what he is doing in the general field of work humanization -- or, as Luther put it in the board meeting -- "work environment or job alienation." (Pretty good; better than h-o-w.) Kemp is a second term member of the North Carolina House of Representatives and as you know was friendly to our efforts to get money for the Lenoir spread in the General Assembly.

After some years of exposure to the industrialist who is all sweetness and humanity on the subject of "his" workers, I've become somewhat cynical. I'll admit, though, I had a hard time restraining our enthusiasm for this guy. He sounds almost too good to be true -- even down to candid admissions of his own and his company's shortcomings.

I'm going to list a few -- and I mean a few; there are others -- of his policies as they appear in the company handbook:

1. "A 1 percent bonus will be paid to all employees who own their own homes. Any time an employee becomes a homeowner he becomes eligible to collect retroactively for the last 20 quarters."

2. "For each one-half day of outside training each year, a .2 percent bonus will be paid during the following year up to a total of 2 percent." (The training can be in a wide variety of generally job-connected activities. In response to a question I asked, he said he is seriously considering allowing bonuses for "any kind of training that the individual thinks improves him." That would include, he said, art, ceramics, etc.)

3. "A 1 percent bonus shall be paid if employee is an active member of an organization such as the Junior Chamber of Commerce, Supervisors' Club, etc."

4. "A 1 percent bonus shall be paid if employee purchases an amount of stock equal to 3 percent of employee's previous W-2 earnings."

There are additionally bonuses for production, attendance, meeting deadlines, holding down double time, safety, etc. A particularly interesting one is a bonus of 15 percent each time a foreman has an employee enter the Supervisory Training Program (which is done on company time to move the likely looking entry level people up the ladder.) Each time an employee is promoted to another department, the foreman gets a 7.5 percent bonus, which then goes up to 15 percent if the individual goes into training there. The higher up you get in the organization, the more liberal this system is. The executives get extra free time for various community and civic activities. An interesting twist is a rule that women with children under 16 can't work more than 35 hours a week. This is the result of Kemp's conviction that mothers need to spend more time with their families, particularly developing children.

Kemp is quick to admit that his programs have not met with universal success. Some women resisted the 35-hour cutoff, although he says that those he persuaded to do it now say that they like it. He hasn't gotten as much response as he'd like from the stock ownership bit. The company has moved from family owned in a few years to 15 percent employee owned. He says he'd like to see it 75 percent employee owned "or more."

He doesn't think he's created a Garden of Eden for furniture workers either. But he does say that in an industry with an approximately 85 percent annual worker turnover, he's got one of approximately 25 percent. And "nobody" leaves from office or executive jobs. He also thinks that his policies actually pay off in cold, economic terms, although he hasn't tried to prove this.

He said he'd be more than willing to help MDC convene a meeting of industrialists who would like to share their learnings in the work environment area. His purpose, he said, would be to learn from others. He'd bring three or four more "interested" businessmen from Goldsboro, if that would help.

Jim and I suggested convening a small planning meeting involving a few industrial folk in Raleigh soon. The meeting would look to a larger meeting of industry people at Quail Roost -- a day of idea and problem sharing.

It seems to me that this is something worth following through with. It comports with Seymour's desire for MDC to help industry share its learnings in this area. And it seems in line with what Bill McGehee was suggesting in the board meeting Thursday. What do you think?

Atlanta, Georgia 30303

Dear Emory:

Yes, the Erie, Pennsylvania project conducted by Success Motivation Institute was supported by the Ford Foundation in part -- but out of another shop. Unfortunately, I've fallen heir to the monitoring of this project, which has had numerous difficulties both in its administration and execution. The project was conducted by the ERIE OIC with SMI under contract to it. The bulk of support was provided by the State of Pennsylvania with us providing some central administration and evaluation support aimed at developing a work study program for OIC students.

Attach this letter to materials of this company in our Pat. Bus. Consultants folder

I'm asking Bob Schrank, our monitor on this project, to share with you some of his reports. From what they've told me SMI's program is a bit hilarious but does seem to psyche the kids up.

Sincerely yours,

Basil Whiting

ECONOMIC DEVELOPMENT WORKSHOP

-SAMPLE-

Savannah Neighborhood Council
Economic Development Workshop

AGENDA

February 21, 1970

9:30-10:00 Assemble and Receive Materials

10:00-11:00 Background

Why is the Model Cities Area depressed? What factors have created poverty? What causes must be attacked to eliminate poverty?

11:00-12:30 Purposes of Community Development Corporations

General Purposes

1. Create more jobs for community people.

2. Assist and/or create black-owned retail and service businesses both within and outside the community.

3. Create and/or encourage the establishment of new industry in the community.

What Should Be the Goals in the Savannah Model Neighborhood?

--If jobs, what kind of jobs? Jobs for women, jobs for men? Part-time, full-time? High skill, low skill? White collar, blue collar?

--If neighborhood-owned businesses, what kind of businesses? What kind of stores--liquor stores, hardware, drug, beer and wine, supermarket, variety? What kinds of services--shoe shops, TV repair, taxis, dry cleaning, janitorial, automotive?

--If new industry, what kind should it be--sewing, electrical wiring, chemical, hand assembly, plastics?

12:30-1:30 Lunch

1:30-3:00 Types of Programs of Community Development Corporations

Small Business Expansion & Stabilization

1. Counseling Services

   a) one-to-one on-going advice
   b) seminars or group counseling
   c) informal, college taught management courses

2. Neighborhood Businessmen's Association

   a) to influence zoning ordinance, parking regulations, etc.
   b) to assist each other with banking and finance problems.
   c) act as Chamber of Commerce.

Industrial and Commercial Development

1. Joint-venture new plants

2. Create SBA 502 corporations

3. Establish loan pool

4. Carry out economic planning

5. Prepare feasibility studies, cash-flow projections, market analyses, etc.

Considering the goals discussed in the previous session, what type of program should the Model Neighborhood have? What specific kinds of things need to be done?

3:00-3:15 Break

3:15-4:30 Legal Types of Community Development Corporations

Profit Motivated Corporations

--Selling shares in the neighborhood
--Selling shares in the downtown business community
--Using a credit union base
--SBA 502 corporations

Non-profit Corporations

--Getting foundation money
--Hustling local "fat cats"
--Federal Programs

What type or combination of types would serve best in the Model Neighborhood?

4:30-5:00 Summary of Workshop

AN INTRODUCTION TO THE ECONOMIC DEVELOPMENT WORKSHOP

"Economic Development" has become an important part of the programs aimed at improving the lot of America's poor people. Phrases like "Black Capitalism", "Green Power", "getting a piece of the action" and "doing your own thing" are watch words as communities seek not only to improve their housing, health and social services, but also their pocketbooks.

This increased attention to improving the economic well-being of the poor has brought with it numerous new programs, considerable financial and technical assistance and the opportunity to join in the competitive and complex world of American business and industry.

The road to economic success is a hazardous one and requires careful planning. Perhaps one of the most crucial steps on this road is the first one. The one that decides "where we are going" and "how we will get there". The Economic Development Workshop is designed to assure that this first step is carefully planned and representative of the goals and aspirations of the people by and for whom the program is being developed.

THE WORKSHOP

The Economic Development Workshop has three basic purposes. These are:

1. to acquaint representatives with development programs that are being undertaken in communities across the country;
2. to assist the community to define its own problems and goals;
3. to chart a course for accomplishing these goals.

The "AGENDA" included in this kit is illustrative of the format and content of a typical workshop. Certain portions of each workshop are tailored to the individual community after a preliminary meeting between the consultant and sponsors of the workshop.

WHO WILL PARTICIPATE?

A successful workshop can be conducted with both large and small groups. The ideal size, however, is about 20 community participants. The selection of the participants is entirely at the discretion of the sponsors of the workshop. The following are suggested guidelines for determining who should participate.

1. Participants should be residents of the community that the development program will assist.

2. Participants should represent the entire community, i.e., all social groups, all organizations and churches, all age groups, etc.

3. Participants should be knowledgeable of their community and be able to relate their feelings and experiences.

4. Participants should be potential leaders in the economic development effort.

HOW LONG DOES THE WORKSHOP LAST?

An effective Economic Development Workshop will normally run for six hours plus time for breaks. Workshop sessions are normally scheduled for one full day. Sponsors may, however, prefer to split the workshop into two evening sessions to run on consecutive days.

Since most of the people who can benefit from these workshops must work during the week days and often on Saturday, it is recommended that the workshop be scheduled either for a Sunday or consecutive week nights.

HOW MUCH WILL THE WORKSHOP COST?

The cost of the Economic Development Workshop is $600. This covers the cost of materials (this sample kit contains much of the materials that are given to each participant) and the expenses of the consultant.

HOW DO I ARRANGE TO HOLD AN ECONOMIC DEVELOPMENT WORKSHOP?

For further information about the workshop contact:

Bron Cleveland
Bron Cleveland Associates
Suite111
805 Peachtree Street, N. E.
Atlanta, Georgia 30308

or call: 404/876-0725

ENCLOSED MATERIALS

The materials included in this kit are representative of the information that will be reviewed and left with each participant. These materials are continually updated as new programs are established and new booklets published.

Louis L. Allen

Making capitalism work in the ghettos

The need is to adapt the old-fashioned, no-nonsense approach that has always been used by successful capitalists

Foreword

The term "black capitalism" is misleading and confusing, the author believes. Capitalism does not vary according to the color of its practitioners. Whether in Watts or on Wall Street, capitalism develops according to certain time-honored rules and principles. It is created out of know-how, hard work, and intelligent risk taking—and it cannot be given ready-made to anyone, nor can it be legislated. At the same time, though, would-be capitalists in the ghettos urgently need the help of experienced white businessmen; they need financial assistance as well as managerial guidance. Some valuable lessons that have been learned about how (and how not) to give this help are outlined here.

Mr. Allen is President of Chase Manhattan Capital Corporation, which has invested about one third of its portfolio in ghetto enterprises. In 1968 he received a special award from the Small Business Administration for his pioneering work in helping entrepreneurs from disadvantaged minority groups start and succeed with their own companies. He has been the proprietor of his own business, an officer in several small manufacturing companies, and a partner and consultant in several other small business ventures. His writings include *Starting and Succeeding in Your Own Small Business* (New York, Grosset & Dunlap, Inc., 1968).

During a recent month, at least two dozen meetings, conferences, seminars, and orientation sessions were held in New York City on the subject of entrepreneurship and small business in the ghetto areas. Despite my interest in the subject, I did not attend a single one of the meetings. This was not because I knew all about the problem (I did not) but because I knew I would see the same faces, hear the same questions, and listen to the same answers that had long since become familiar to me from earlier meetings. Also, I was convinced that the ballroom of a plush midtown hotel was not the place to study or work on the problems of new business in disadvantaged areas.

In trying to help the ghettos, we have followed the time-honored approach to business problem solving that was started 50 years ago with time and motion study—breaking a task down into its smallest, irreducible parts in order to analyze them further. This approach has led us to:

- Make an already difficult task much more complex by trying to "engineer" a magical, quick solution.
- Adopt labels for the problem and solution that direct our attention along false and misleading lines.
- Look in the wrong places for someone or something to blame for the problem.

PAGINATION INCORRECT

○ Fail to talk with the people actually involved in ghetto business problems, while consulting with those who, though not directly involved, consider themselves spokesmen for the disadvantaged.

○ Forget what are known to be the basic rules of capitalism.

The purpose of this article is to clear away the logjam in thinking about the economic development of slum areas. I shall elaborate on the points just mentioned, recount some experiences I have had with ghetto entrepreneurs, and summarize some of the practical lessons I have learned about investing in ghetto businesses. I call for a moratorium on conferences and meetings until we in management have something *new* and relevant to talk about. Such methods as decision trees, PERT, and planning models are not applicable to the problems at hand. What we are testing is the entrepreneurial spirit, which means that successful capitalists must go one at a time into the ghetto, find entrepreneurs, and work with them one at a time in the small businesses they seek to build.

Epiphany of capitalism

We are a jingle-writing and "sloganeering" people, we Americans. We like to tag everything with an acronym or a label, and this frequently gets us thinking along lines that we did not intend. Worse, with our aptness for phrasemaking, we sometimes mesmerize ourselves into assuming that since we have cleverly labeled something, we have somehow magically solved the problem it presents.

On occasions, the problem *does* go away. For example, as long as one fish product was called "horse mackerel," it could not be given away; now that it is called "tunafish," it's a very big seller. But the reverse can happen; the problem can be aggravated. For example, consider the label, "black capitalism." Although it is in current use, it is not appropriate to the circumstances, and its continued use will be dangerous. For "capitalism" is a word which describes a concept, a complex concept of many interwoven threads. Capitalism is an economic system in pretty much the same way that Christianity, Judaism, or Mohammedanism are religious schools of thought; that is, its basic appeal is that it can be universally applied, and the truths can withstand the closest scrutiny.

Capitalism can no more be adequately described by stating the color, racial origin, or religion of its practitioners than it can be described by the locality of its implementation—for example, Ohio capitalism as compared with New York capitalism. Its greatest strength is that it is, or should be, available to anyone, anywhere, anytime as a means to participate in an economic system, in the same way that Christianity, Judaism, or Mohammedanism can be practiced by all who want to believe in them. To use the term "black capitalism" is to demean those of its practitioners who are black.

It is true that there are many who have been and still are deprived of the opportunity to practice capitalism. But those who believe in this system, who have practiced it, and who have prospered from it must remember that there is no exclusivity in it. Exclusivity will change it—drastically and unfavorably.

The Epiphany is an annual feast celebrating the coming of the Magi with news for the Gentiles. What capitalism needs now is an "epiphany" of its own—many wise men who will bring its principles to those who need to know about them and who will remain with the initiates to make the principles work.

Illusion of quick solutions

Basic to a working understanding of capitalism is that it is built one step at a time by practitioners—not handed to them fully constructed. To talk about quick solutions is a terrible mistake because there are none.

An article in the March-April 1969 issue of HBR [1] proposes that the government take over selected large corporations by eminent domain and give control of them to the black man. The author goes to some lengths to outline the ways in which this approach could be implemented, how payment could be made, how transition to black control could be effected, and so on. All of this explanation misses the point. My six-year-old son learned how to swim last winter at the local YMCA. But this summer I will still insist on his wearing a life jacket when he goes in a small boat. I will bet Richard F. America would do the same. Of course, the child may say he knows how to swim and does not need the life jacket.

Exactly the same principle holds in running a big business. No one can know how to manage a large corporation without experience in doing

1. Richard F. America, Jr., " 'What Do You People Want?' " p. 103.

just that. Certainly experience in small company management is no substitute. America has outlined plans for an orderly transition of a few months time. I doubt how "orderly" the transition will be under the circumstances, and, in any case, the best of men could not learn to manage a big company in less than two years.

But the greatest oversight America has made is to give no thought to the customer. How many Ford customers would be lost if that company were turned over to blacks to own and manage? How many Maxwell House buyers would switch to other brands if that organization were one of the ones selected for black control? The problem with being a dictator and arranging things by decree, as America suggests, is that the decrees must cover all ramifications. America's proposals, I take it, ambitious as they may be, stop short of decreeing how many people are required to buy Fords and no other make, or to purchase only Maxwell House coffee.

Like a religion, capitalism can be practiced only on an individual basis. It is a matter of one man working at his task or working with a few or many others at an assigned or a selected task. If their work is to be successful, it must be done according to the rules. Capitalism cannot be legislated as suggested by America, nor does it offer any easy answers or comfortable compromises. To suggest that blacks take over a large corporation on a ready-made basis is very much akin to suggesting that the fox be placed in charge of the henhouse.

Capitalism can be made to work for the economically disadvantaged in our urban centers; it is working there now in many instances. But it requires new approaches, new commitments, and new efforts by everyone who has been a recipient of its great promises.

Getting started

What are the requirements of making capitalism work in a depressed urban area? My experience in financing new and small businesses for the economically disadvantaged has led me to conclude that we have been asking the wrong questions of the wrong people. The people who want to know about small business and capitalism in the ghetto are the people who live there and are trying to make decent lives for themselves and their families there. They do not attend the meetings at the Waldorf; they probably never have talked to anyone who has. Hence the first mistake we have been making is not listening to the right people. We have been listening instead to banquet table speakers.

And the questions we have been asking are wrong—for example, questions such as "What needs to be done?" If one has to ask that question, he will not understand the answer, which is simply that the knowledgeable businessman must go into a ghetto area and begin to work with a person there who aspires to something better than what he has.

The making of a precedent

To illustrate that the need is to get on with the job, not discuss it further, let me tell you about the first investment in a ghetto business we made at Chase Manhattan Capital Corporation. While other businessmen may choose to make the jump into ghetto investing in a different way, they will have to be just as resolute as we were in this case:

□ As of several years ago, we had not yet begun a program of investing in small businesses in New York City. We had been going to all the conferences, reading all the articles and books, and getting very discouraged. It seemed to me hopeless to continue the meetings and conferences. I decided that the next applicant who walked into my office would get his financing.

I thought of an analogy about swimming. A man could learn all about the theories of bodies in a fluid medium, he could understand completely the skeletal and muscular functions of the human body, he could know all about the motor nerves, and everything else. But he could be dropped in the middle of a lake, and his knowledge would be of little comfort to him if he sank to the bottom. What we needed was "swimmers"—not men who knew how and why a person could swim. We needed men who would invest a portion of their substance and their time, and generally assist those who could not get started without such help.

The next applicant at my office was a man in his late forties. He was from Jamaica. For 10 years he had been a furniture polisher and repairman for a large New York City hotel. And he wanted to be in business for himself. Over a period of two years he had saved about $10 per month until he had $250. With this he had bought some hand tools and made a payment on a very small store. It had been burglarized the very first night; all he possessed had been stolen.

When he had gone home that evening, his

wife and ten-year-old daughter had prepared a dinner to celebrate the beginning of his business. They had no telephone, so he could not have called to let them know of the disaster. He told his wife and daughter what had happened. His daughter had got up and run to her room, he told me. He had started after her to comfort her when she came running back with an old brown envelope in her hands. She had thrown her arms around his neck, hugged him, and said, "That's all right, Daddy, I've saved some money and I want you to have it to start again." It was 12 cents in pennies.

The man in my office looked at me and said that he was not going to let his little girl down. We agreed to finance him. (Since then he has been struggling along; his business has not yet prospered by normal standards, but for him it has been a chance to be on his own and he is full of hope and enthusiasm.

Once we had set a precedent of action for ourselves and broken the paralysis of discussion and inaction, we began to move in a serious way. That entrepreneur's firm was the first of many we have financed.

Breaking an old rule

In the case just described, we put up all the money for the business. The man could not have saved enough in any case. That was the first way we changed our thinking about the problems associated with getting a business started in Bedford-Stuyvesant.

The tragedy of our citizens that live in the ghetto is that they have no chance to save. The society in which they live does not permit saving, either implicitly or explicitly. They barely subsist on their low incomes and pay high prices for what they get. Because of the expense and lack of mobility, they are effectively denied the opportunity of going elsewhere. Since saving is the basis for accumulating capital, they simply cannot be expected to be in a position to provide any but the smallest part of the financial resources needed to get into business.

Would-be backers must make up their minds that they will have to relax or waive entirely the traditional requirement that an entrepreneur contribute part of the equity himself. If anyone wants to foster the start of capitalism in the economically disadvantaged areas, he must be ready and willing to put up all the money himself. There are no substitutes for this approach, in my experience. A lot of time is wasted and needless involvement undertaken looking around for "front money" to protect the investor's interest. That money is never there.

Bear in mind, too, that while the entrepreneur has no funds to get started, he has always faced very great odds. The level of his aspiration is high; yet he recognizes his prospects for achievement as low. If there is to be any chance for the success of such a venture, it must be constructed at the outset so he and any other principals will be the largest beneficiaries of any profits.

Fallacy of the give-away

Yet what we are discussing here is not a give-away program. This is one of the points where I disagree most vigorously with America's proposal. As I stated earlier, if the game is capitalism, it has to follow the rules. The only change is that here, because of the special circumstances, the investor must recognize the essential requirement of putting up all the money.

The investment should be made in capitalist terms. For instance, our typical financing at Chase Manhattan Capital Corporation is a ten-year loan with a five-year to seven-year moratorium on principal repayments. We form a corporation, issue *all* outstanding stock to the client, and take a detachable stock warrant for between 10% to 15% of the total capitalization.

At the same time we enter into a "put and call" arrangement with the founders according to which, after our original investment has been fully paid and discharged, they can "call" our warrant back for the pro-rated percentage of post-tax profits earned during the period of time the warrant has been outstanding. In other words, we will sell our right to, say 10% of the stock, for that amount of the company's net earnings. Under other circumstances we can "put" the warrant back to the founders at one half the rate of the "call"; or if there should be an underwriting, merger, or sale of the business, we can exercise the warrant and go along for the ride.

This is fair to all parties, it is businesslike, and it puts the founders in the driver's seat with respect to how the profits will be taken.

An investor's commitment

If we drop the requirement that the principals "come to the party" with some assets of their

own to contribute, we must face some hard questions. One such question is inextricably involved with the general nature of business, especially small business. I regard it is an inalienable right of a businessman to be wrong—not stupid or careless, but just plain wrong. The uncertainties of business are such that the best plans can be laid waste regardless of the competence of the men who made the decisions.

Normally, however, the investor can protect himself. If he sees a decision going sour, he will turn to second lines of defense and commence working on them. But in the case of the typical small business in the ghetto, there is not going to be any second line of defense. To aggravate the matter, there will be no capital base which might absorb some of the trouble. All losses are going to come out of the funds provided by the investors. In this respect, a ghetto firm is a glaring example of a rule which impresses me more and more: the largest disadvantage of small size in business is the inability to absorb error.

This means that the investor must be willing, before he makes his original investment, to support the venture through at least one and probably many periods of crisis when all losses are in effect taken against funds provided by himself. All the deficits will come "out of his hide." It is a very discomforting thought!

How can anyone make a commitment like this? What must be considered, what weaknesses overlooked, what questions asked during the investigation and analysis of a loan or investment request? Indeed, what type of organization should even think about becoming involved?

Need for a broad base

It seems to me that any organization formed for the exclusive purpose of assisting the establishment of capitalism in the major urban centers and in other economically disadvantaged areas of our country is doomed to failure from the start. It will certainly fail economically, and this in turn will cause it to fail in its objectives. The usual rule is that an investor should "go hunting where the ducks are," and, take it from me, there are no "ducks" in the ghetto. There are enough problems in running a business profitably if it is located in the best of places. When you add the additional problems found in the ghetto, the compound effect is often devastating.

This fact suggests the basic weakness of Senate Bill 3876—the proposed Community Development Corporation (CDC) Act. It would have an isolating effect. It will virtually eliminate participation by groups not centered in the areas (in other words, it will keep "whitey" out). This bill is a manifestation of the gap between aspiration and achievement that its backers are trying

to fill. In their frustration the blacks think they need only money to bridge the gap—but in truth money is only part of their need. Those who would assist with financial aid cannot let the matter rest at that. They must not merely put up the cash and, then, in the manner of Pilate, "wash their hands" of these people. Ongoing counsel and direct assistance are cardinal to success.

To whom, then, should they be able to turn for help? I suggest that those who can help the disadvantaged gain a measure of self-control over their affairs by assisting them in starting businesses of their own are precisely those who have already had some success in doing this—that is, the "swimmers" of the capitalist world. Such help is the best possible way for the "swimmers" to direct some of their surplus profits and energies. My greatest fear is that if adequate help comes too late, or if we do not follow through with all our resources other than cash, those of us who did not take time to work on these matters may become like Barabbas and wander from place to place always wondering what will be

the ultimate price of our oversight and how it will be exacted.

Companies that have a broader base of operations and are making profits in more fertile ground are the ones that can and should devote their energy, skill, and understanding to developing a new capitalism among the worthy people in disadvantaged areas. For example, at Chase Manhattan Capital Corporation we have gone ahead as we have, not because the fellow across the street was doing it—he was not—but simply because we have felt that the work has to be done.

Our objective is to have one third of the accounts in our portfolio vested in ghetto businesses. That may not be the right percentage, but it should give us a workable balance. We make good to very good profits in our general assignment of financing small businesses around the country. We are reasonably confident we can break even in our ghetto program. Although the latter requires a great amount of time in proportion to the dollar amount of investment, the results are exciting and seem to confirm the validity of our approach. We now have approximately 25% of our clients in this category.

One company's approach

We look at each investment opportunity with the hope that we can correctly identify and appraise the following:

1. The individual—his resourcefulness, his self-discipline, and his technical expertise.
2. The proposed business—its appropriateness to small size, the activities it will undertake to add value to its costs, its trading area, and its usefulness and social value to the neighborhood where it will be located.
3. The ability of our organization to give support in all areas, particularly during hard times, regardless of the size of investment.

There is no importance to the order of the list. Each category is part of the whole and adds either strength or weakness as the case may be. The list represents what we have found to be the important aspects of the failures and successes we have seen.

Our experience has been that when we find a person or group that meets the individual tests, has a proposition that meets the tests for the business, and leads us to feel reasonably confident that we will not lose faith, then we should go ahead with the support we can give in the way of capital and direct assistance; we believe we will not fail. We can provide the business with the resources needed to get over any periods of crisis or slowdown.

Lessons & guidelines

Now let me try to generalize from my company's experience and single out some of the things we have learned about backing a ghetto enterprise. These lessons may be useful to other investors who are new to this area.

Don't overlook the obvious

We have been surprised at how little can be taken for granted concerning an entrepreneur's business know-how. The following story will illustrate:

□ One man we financed seemed to meet all the tests. He was working very hard, and his receipts were right on target. Yet after several months there were nothing but losses for his business. We could not understand.

Since the young man on our staff who was working with this small businessman was as puzzled as we, it was decided that we would work up a complete audit of the business. As the work progressed, we continued to be perplexed because we could not pinpoint anything of sufficient magnitude to account for the poor results. After some more digging, we finally discovered the cause: our client was not adding anything to his costs to cover overhead!

You might think this such a simple error that it would be immediately apparent. But we had blinders on. On several occasions since then I have wondered how many other blinders we are wearing—how many other established concepts of business are so basic and routine that we are overlooking them. Why should we presume that our client will know these things as intimately and instinctively as we do?

Seek to be trusted

The next problem is extremely difficult in some cases. I have no easy answers for it—I know only that the investor or consultant must be alert to the danger of not being trusted.

It is easy for us to explain the theory of business practices to our clients. We can help them in planning a sales campaign, in record keeping,

in determining plant or office location, and in almost any technical aspect they may encounter. We have these services available either on our own staff or elsewhere.

Sometimes, however, our clients *do not believe us.* They doubt whether we are really interested in seeing them succeed even though we go to such great lengths to arrange the financing satisfactorily. We tell them that we want them to be successful because that is the only way we can make a profit. Yet cases like the following happen:

□ One black entrepreneur established a service business in a good community in central Long Island. He was experienced in the operations of the business from previous employment and was well recommended. We financed his operation and located the shop in a new shopping center. All the signals read "go."

After a couple of months, however, we began to have some serious questions about this client. The company's account was almost always overdrawn, although by small amounts. There was a series of meetings and phone calls when these matters were discussed in depth. Men from our staff balanced his checkbook and drew up an income-and-expense statement for him. On two occasions, when he clearly was not going to be able to cover his overdraft, we advanced temporary funds to cover it. At each meeting we emphasized that our interest was in helping him establish his business. We certainly gave evidence of this by continuing our support in the face of the irregularities.

Finally, at one of the meetings, we explained that the overdrafts had to stop. We suggested that a man from our staff visit the shop one night a week to issue checks. New checks would require two signatures including that of one of our men. This seemed acceptable to our client. But the next day, before the new procedures could be implemented, new checks were drawn. And within 10 days the overdraft was at a new high point.

Earlier, when we had made our own examination of his accounts, we found that some funds had been drawn for noncorporate purposes. The man had used some money to pay for an operation for his mother-in-law. Some other money had been used to pay personal bills that predated the establishment of his business. Normally, the development of such evidence would have been sufficient for us to have called our loan. But in discussing these matters with us, he said that since it was his business he felt he should be able to use the funds as he saw fit. When we pointed out that this was not so, he said he understood and would conform to accepted business practice. We reconfirmed our desire to work with him. We reiterated our original belief that he had the makings of a good, small businessman, and told him he still had our support.

Now, with the new overdraft, our confidence was severely shaken. We found that he had drawn the checks immediately after our meeting and before the new check-signing procedures could be established, probably to get some last amounts out and paid while he alone could write a check. We called to say that the overdraft would not be covered by us, and we stated that we were sending the checks back because of insufficient funds. He promised to have a deposit made to cover the overdraft in the bank that afternoon.

A deposit was made that was more than sufficient to cover the overdraft. The checks were paid. But in five days the deposited check was returned because it had been drawn on a nonexistent account at another bank. The deposited check was a complete fraud!

Now we went after the man in earnest. Again, a new deposit was made, large enough to cover all the old balance with some extra left over. And again, the same result; he had drawn the second check on a second bank against a second nonexistent account.

We finally arranged a meeting and told our client that we were calling our loan. He was contrite, apologetic, and full of remorse; he freely admitted all that he had done. But, and this is the point, he said he had done it because *he did not believe that we really were interested. He did not trust us!* He said no one had ever tried to help him before, so why would we be any different? He cited our suggestion of having two people sign checks; this proved to him that we wanted to take a good business away from him.

I have no idea how anyone can assure himself that he will be believed, that his partner will trust him. Yet this trust is cardinal to success; without it, no positive results can be predicted, and very probably the project will end in failure. It can be most difficult to gain the entrepreneur's trust if he comes from a background that will have conditioned him to expect the opposite. Such difficulties notwithstanding, a number of our clients have voluntarily told us that while they first approached us with dis-

trust, they became convinced later that we were interested in their progress because they got help when they stubbed their toes. They realized that what we had told them was true—we could not prosper unless they first prospered. They saw that the way we constructed our financings effectively put the initiative in their hands and prevented us from making any real profits until *after* they had made profits for themselves.

Deal in two worlds

Related to the problem just described is the matter of appearances. The world of tall office buildings may affect the black entrepreneur from the ghetto in an unexpected way. For example:

□ One young man was highly recommended to us by several of the businessmen who had taught the first sessions of the local Workshop in Business Opportunities. I called him, and we set a date. It was not kept. We set another date and still another. Finally I reported all this to one of the business executives who had recommended the young man. The executive made several phone calls which did not give him the answers he wanted. Finally, he paid a visit to the young man's mother. He found out that the young man had only an old pair of blue jeans and a torn jacket. Each time he rode down on the subway and walked up to our building, he could not make himself go in. My executive friend helped the family get some new clothes for the young man, who then kept his appointment. We are working with him now, and I hope we will be able to help him get started.

The lesson is that those who of us who have "made it" are far removed from the world these applicants know. We must expect that as simple and obvious a fact as our physical surroundings will get a response (even though it may not be as pronounced as the one I have recounted). I think, on balance, that it is better to know this and be prepared to deal with it than to rent a shabby store and wear work clothes. It is essential that we be believed, and one cannot expect much belief if we start off with theatrics designed to put the client at ease.

Give direct, personal help

Some problems lend themselves to all-encompassing solutions. For instance, mass programs have dealt effectively with such things as polio, chicken pox, anthrax, social security, and housing. But other problems must be solved on a one-to-one basis; that is, one problem solver working with one client. A cardiac patient needs this kind of attention; so does a small company president. When he runs into problems, his need is for direct help, usually of a consultative nature. He needs *individual* advice and guidance, not a management course.

A man who has gone into business for himself has in effect picked the president of his company. The chances of this selection being made according to any of the established precepts of personnel policy are remote. The selection has been made completely subjectively, by a man who is usually not qualified in executive selection and personnel practices. Yet it is the most fateful of all decisions that will affect the future of his small business.

Insist on realism

We decline some applications for help on the basis of inadequate preparation by the principals. Sometimes an applicant says he has heard we are helping men to get into business. We tell him that is correct. But when we ask what type of operation he is going to start, he replies that he does not care what it is, he just wants to be in business. Instead of rejecting such an applicant at the outset, we invite him in for a talk. Usually the meeting is not productive, but every now and then we can suggest something constructive. For example:

□ We once talked to a man who had been a mechanic and filling station attendant. He had gone to work at the age of 12 in the South to help support his mother. Later, he moved to New York and found similar employment. At our suggestion he attended a school run by a major oil company and also joined the Workshop in Business Opportunities. Now, after nearly a year, he is ready to try something on his own.

We also turn down proposed enterprises that do not seem to lend themselves to small size. For example, we have had a number of inquiries about starting businesses such as garment manufacturing companies. In this day and age, a competitor in such an industry has little chance if he lacks a well-trained labor force and top-notch facilities. Of particular importance, the investor should insist that the entrepreneur "*start small.*" The aspiring black businessman may want to go all the way in one jump (as

Richard F. America proposes). He may think he can build a large market all at once. I feel that the investor should resist such tendencies. Let me illustrate:

□ In one case we considered, the principals of the new business had a potentially fine program, but they would not agree to start small; they insisted on forming a company that would immediately employ 50 people. Moreover, the market potential, in our view, was limited. The type of high fashion clothing the blacks proposed to make was a risky venture. The projected sales were far above what we considered attainable goals. Therefore we turned down the application.

The men went elsewhere and got their financing. The results were predictable. Overhead "ate them up," and the results were so poor that the investors refused to go further. The enterprise collapsed.

The failure of this business, in my view, did more harm than if it had never started. It will unquestionably hinder those investors from going ahead again soon, and it put a lot of people back on welfare after building up their hopes for something better. All the parties in the transaction were either unaware of, or chose to overlook, one of the most basic rules of the game of capitalism: one can have the most capable management, the best possible plant and equipment, the finest products, and adequate financing, but unless there is a customer there is no business. This is true with our largest and most successful corporations, and it is true with the small business in the ghetto.

Trade outside the ghetto

We encourage small businesses to trade outside the area where they are located. A case in point is a furniture and carpentry business we financed. It is located in the poorest section of Brooklyn near Flatbush Avenue. The few men who work at this business live within a block or two of the small shop from which they operate. Yet most of their jobs are done for homeowners and industry located in the well-to-do areas of Long Island. It is a struggling small business, but it brings fresh money to the ghetto area.

As long as the businesses located in the ghetto have their customers, or a majority of them, also located in the ghetto, capitalism will never reach its fullest potential. Could Detroit be so prosperous if most of the cars and trucks made there were sold only in Detroit? In this connection, it is worth noting that the Community Development Corporation legislation would very effectively eliminate any chance of trading outside the ghetto. This is one of the most urgent

reasons why the whole program should be reevaluated. The history of industrial development has always shown a heavy incidence of "foreign" investment as the basic capital on which a country has built its economy. It is going to be just as true with our urban ghettos.

Of course, exceptions should occasionally be made to this rule, as the following case indicates:

□ A group of about 30 mothers who were on welfare in the Fort Greene area of Brooklyn determined that they wanted to be free of welfare payments (on which they had been depending). The mothers formed a family day-care center where they and other mothers could leave their children and try to find work.
